"EVERYTHING IS COMING UP."

BUSINESS IS BETTER AND THERE WILL BE A LARGER DEMAND THAN EVER FOR OUR

Sheep Skin Mitten.

Acknowledged to be the best article for polishing stoves, as it does away with the old time dirtiness of the work, making this work a pleasure. Also invaluable for polishing brass or glass, or silverware, which it does not scratch. For tan shoes and cleaning bicycles it has demonstrated itself a conspicuous success.

A GOOD THING.

IT'S IN THE TEETH.

The Patent "REFORM" Curry Comb is composed of three shallow, oval trays, with corrugated edges. The parts are struck up from a fine grade of cold rolled steel, heavily tinned and bronze lacquered, firmly riveted together and warranted not to rust. The outer dimensions are 6½x4¼ inches and by reason of the large cleaning surface and peculiar arrangement of teeth, the comb will do its work with a large saving of time and labor, cleaning with equal thoroughness both long and short coats. There are no places to accumulate hair and it will not tear or injure the brush, the comb being quickly freed from accumulation by giving its face a gentle tap.

"An Excellent Medium for Advertising."

Peerless Mfg. Co., Cleveland, Ohio. [*Bicycles*]: There is no question but that the Hardware trade is becoming a very large factor in the bicycle line. The two lines can be handled nicely together and, as a rule, a Hardware dealer has sufficient capital to add a cycle department, without danger of doing injury to his regular line. While again, few concerns have more visitors to their stores than the average Hardwareman, and this alone is a standing and effective advertisement for the bicycle that he may carry. We can see no reason why HARDWARE should not be an excellent medium for advertising.

THE NEW YORK PUBLIC LIBRARY
ASTOR, LENOX AND TILDEN FOUNDATIONS.

HARDWARE

VOL. XVI. DECEMBER 25, 1897. NO. 6.

HARDWARE is a Review of the American Hardware Market, specially devoted to the Retail Trade. Published the 10th and 25th of each month, by the HARDWARE PUBLISHING CO., No. 148 CHAMBERS ST., NEW YORK.

BRANCH OFFICES: CHICAGO, - No. 1142 MONADNOCK BLOCK. BOSTON, - - No. 33 EQUITABLE BUILDING. CINCINNATI, No. 103 LINCOLN INN COURT BLDG.

Subscription, $1.00 per year. Subscription, Foreign, $1.50 per year.

JAMES H. KENNEDY, - Editor and Manager.
HENRY HOPKINS, - - Associate Editor.
FRED. A. CATON, - - Asst. Manager
FRANK REIFSNIDER, - - Western Manager.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

Editorial Trade Review.

The air is filled with rumors of trusts and combinations of every description in connection with the Hardware business, from wire rods and nails to axes and edge tools, and including enameled and tinware, and steel tubing companies, bridge makers, sewer pipe manufacturers and many others. All this consolidation is no doubt being effected in order to get as much profit out of next year's business as the predicted prosderity will stand, and if all the anticipations can be realized, this will be the natural result.

Business continues in a fairly progressive condition. The indications are the holiday business that is now being done in all lines is approximately double that of a year ago. Of course, as far as the West is concerned, where wheat and prosperity have gone hand in hand, this was to be expected; but even here in the East, and throughout the country generally, the confident feeling of a prosperous future unloosens the purse-strings and money is willingly distributed by the consumers, making the heart of the retailer glad within him, and the wholesaler feel as though there certainly is a God in Israel.

Notwithstanding the increasing inquiry and willingness to order ahead, nails have only stiffened in quotation without material advance in price. And it will be noticed the shovel manufacturers, in convention assembled, deemed it wisdom of the proper kind to leave well enough alone until the filling of orders becomes more difficult, and the demands of labor for increased compensation gave a reasonable pretext for advanced quotations. Even in the new prices of padlocks, the manufacturers have apparently only attempted to "even up" a price-list which was formed on a scale of discontent which left net prices thirty or forty per cent. higher than obtain at present, which made some numbers reach below the zero of cost.

Household specialties are meeting with a much better demand than has been usual, and manufacturers of such goods are gladly preparing for an increasing business for '98, predicated on this gratifying revival.

A Merry Christmas!

To all the friends of *Hardware*, wherever they may be, we extend, with the sincerest regard, our holiday greetings, accompanied by the wish that affairs with them all may be as bright and pleasant as they are to-day with the journal which they have aided to successfully pursue its course of usefulness to the trade, during the year past.

While inventories and balance-sheets will occupy the attention of the greater majority of our friends during the coming week, we are sure that all will feel justified in laying business aside at this Christmas season, and in giving themselves up to the pleasures and the beneficent gift-giving of this, the most beautiful and open-hearted season of the year.

While the year past has, of course, brought with it certain trials and disappointments, and while affairs with none of us have been, perhaps, just what we could have wished, we still must bear in mind that a certain number of trials and troubles are incidental to human life, and that without them, the world would be a dead monotony, and the chief incentive to development and advance be lacking. Taken as a whole, however, we feel that the year has been filled with substantial pleasures for the present, and with a justification of uew hopes for improved conditions in the near future. We look over the horizon into 1898 with a more hopeful feeling, and a better assurance than has been possible in any recent Christmas, and all the signs pointing toward the future are set at a hopeful range.

This is sufficient to bid us all take heart, and keep up our courage. The surest guarantee of success is not merely to deserve it, but to so conduct ourselves as to command it. In this mood of spirit we should all be prepared to meet the duties and responsibilities of the coming year; and it is with the hope of far better times that *Hardware* to-day extends to all its friends a Merry Christmas and a Happy New Year.

Business Promises Well.

It looks as though a favorable demand for Hardware would keep up through the winter, doubtless arising from the fear that advanced prices will prove the feature of the spring trade, and that little loss would occur on goods ordered now for a possible demand. The fact that the prevailing quotations are of a character to create this feeling of safety is one of the incentives to this happy condition of affairs.

The bicycle makers enter the season early for 1898 business, impressed with the belief that fair prices on standard wheels are essential to stop an unusual competition caused by too large a margin of commission on unreasonable list prices forming a basis for a cost. With the former so-called $100 wheels selling at list-prices of $75 to $50, the trade looks forward to sales largely in excess of those made in '96 and '97, and with a prospect for an export distribution of growing im-

Digitized by Google

portance, which the jealousy of our German and English competitors will endeavor to limit, but fail to stop. The American bicycle of to-day has become a creation of mechanical skill, the beautiful lines of which are universally acknowledged and adopted. The lessening of the net profits on this important business will naturally cause the entire trade to seek the hands of such regular dealers as handle lines of other goods, and of this large and influential class the dealers in Hardware form the best distributors of skilled products which rely upon intelligence in the salesman for assurance of success.

The Hardware Dinner of 1898.

The great annual Hardware dinner for 1898 will be given on the evening of Monday, February 21st, at the Hotel Waldorf-Astoria. The dinner committee having the arrangements in charge, under the efficient and experienced management of A. D. Clinch, are making arrangements for a most admirable programme for that evening. The indications are that this will be one of the largest and most successful of the dinners yet given under the auspices of the New York Hardware Club.

Will They Do It?

The following is an official statement as to present purposes and intentions, put forth by the parties who are arranging the great wire combination:

"With the view of largely increasing the export trade in wire, wire nails and other products, and also materially reducing the cost of their manufacture and sale, certain gentlemen, who for many years have been identified with and successful in the business, have, after a careful study of the situation, decided to organize a new corporation, which will immediately engage in these lines, and will also acquire by purchase the properties of the leading manufacturers of wire throughout the United States.

"The new corporation has not yet been organized, but steps will soon be taken for that purpose. The amount of this capital stock will be sufficient to pay for the properties to be acquired, and also to furnish ample funds for doing the business.

"After negotiations covering the period of many months, agreements have been made with the owners of the largest and most prominent class for the purchase of their properties, including lands, buildings, machinery and patents, at prices which are considered reasonable, but which are subject to examination and verification by expert mechanical engineers and accountants.

"Three of the most competent engineers have been selected, and are now examining the different plants, and one of the largest and best known houses of expert accountants in Europe and America are now examining the books and auditing the accounts of the different companies for the purpose of accurately determining their earning capacity. The prices to be paid by the new company will largely depend upon the reports of these experts, but it is believed they will fully justify the prices which have already been named. So soon as the reports have been made and the prices fixed and the titles examined, the purchases will be closed and business commenced by the new company.

"A large portion of the capital stock of the new company will be subscribed by those who are now actively engaged in the business, and who will be personally connected with the management. Arrangements will be made with J. P. Morgan & Co. to underwrite the balance, so that under all contingencies the necessary cash capital shall be forthcoming. When the capital stock is all subscribed, the stockholders will meet, and elect a Boord of Directors, and the latter will designate a President and other officers. It is intended to select officers generally who have the greatest experience, and produce the best results in the manufacture of wire and who will retain large interests.

"There are a few smaller concerns who are desirous of selling their plants to the new company, and it is probable they will be purchased, if offered at fair prices.

"It is not proposed to antagonize the interests of any other manufacturers in any respect, nor to increase the manufacture of steel billets, nor is it the intention to increase prices to the consumer."

Delays in Shipment.

Editor Hardware: In the last preceding issue of *Hardware* there was an article in regard to the delay in shipment by railroad. We read it with a great deal of interest, as we think it is a subject that should be taken up by you in earnest, as there are frequently uncalled-for delays. We think your New York railroads are the ones most to blame. We enclose a bill of lading for your inspection, of a shipment from Manlius, N. Y., when eight days were occupied in bringing the goods to Philadelphia. The time from Providence to Philadelphia is from six to eight days; New Britain, Conn., four to six days: Waterbury, Conn., six to ten days; Millbury, Mass., six to ten days. From Providence you can ship by steamer three days after goods sent by rail, and they will arrive at the same time.

The fault lies, so far as we can ascertain, in the transfer in New York city. Yours truly,

Philadelphia, Dec 21, 1897. "RETAILERS."

There hangs upon the walls of our editorial room to-day a handsomely lllustrated calendar that was not there yesterday. It is to serve as a guideboard during the year 1898, and has been issued by the generous courtesy of the Union Metallic Cartridge Co., New York, and Bridgeport, Conn. As a work of art, it is one of the finest specimens of calendar making that we have seen for a long time. A handsome reproduction in ten colors is given of the original painting by the well-known New York artist, Gilbert Gaul, entitled "Molly Pitcher at the battle of Monmouth." Viewed simply as a work of art, the calendar makes a most attractive adornment.

The new boiler house which is being erected by the Waterbury Buckle Co., Waterbury, Conn., will have a roof of corrugated iron supported on steel trusses. The building is 36 feet wide and about 48 feet long, having brick side walls. Every effort is being made to make this building fireproof. The steel work is being furnished and erected by the Berlin Iron Bridge Co., East Berlin, Conn.

Cards That Catch Trade.

I recently encountered an up-to-the-hour walking advertisement. The sandwichman was a darky. The ad. read: "I'm a shining mark in black. But with all my polish, the stove polish E. N. Ameline & Co. sell puts me in the shade."

A unique feature of window advertising was witnessed at St. Louis. A dealer had transformed his window into a sort of pit, and gathered therein was a family of rodents. About a dozen mouse and rat traps of different patterns, all baited with fragrant cheese, had been placed about the improvised pit. An interesting rodent pantomime was soon in progress. The spectacle attracted crowds upon crowds of passers-by, and there was danger of a blockade. The police were asked to interfere, but so appealing to the humorous sense of the blue coats was this original show that instead of dispersing the crowd they ebowed their way to the "front row" to get the full benefit of the performance. The display opened at 10 o'clock in the forenoon and closed at 3 in the afternoon—at that time all the rodents having yielded to temptation. The merchant says it was the biggest business day he ever had.

A number of travelers were discussing epitaphs en-route by way of pastime. Though sombre, it was an interesting topic, and it ended with a tableau. "If my heirs will be grateful enough to erect a tombstone to my memory," said the manufacturer of tools who lets his advertisement do the talking, he making the sales, "my epitaph shall be 'He Died Advertising.'"

If you "work" a bulletin board, and you are short of bulletins, use this: "Polish up for the holidays. We have the polish, you do the work. It's easy with our mittens, which we give free."

Here's an ad. I ran across: "Keep your nose to the grindstone if you are looking for success. Also, keep your eyes on the grindstone, if you are looking for success. We are grindstone specialists. Are you whetted for this opportunity?"

It is easy to skate into popularity if you can suit in skates. Handle a makeshift skate and you run chances of making an endless number of detractors and trade killers. There's nothing more exasperating than a skate that doesn't fulfil its mission. A good skate is a good advertiser. You can't afford to sell bad skates as good ones no more than you can a trashy wheel for a good one. There's method in skate-selling. If you sell good skates at a close profit, you have the opportunity of making it up during the season by big sales; on the contrary, if you sell ramshackle skates at a large profit, you run the chance of killing your trade for seasons to come. The skater is gregarious. He will certainly denounce you if he is not pleased, to all about him. And slander travels with mile boots. I think I have said enough to enable Mr. Skate Dealer to make his own deductions.

That's the way a saw manufacturer puts it: "He came and saw. When he saw our saws, he saw that other saws were not the saws he wanted. And it's the old saw: 'Look well before you—buy saws.'"

"We got it on files," said the junior to the head bookkeeper. "Well, I should remark," interjected the sales manager, "the order we shipped to Rasptown has just been returned to us, marked 'Refused.'"

A Southern dealer advertises thusly: "I handle the best lumbermen's crayons and carpenter's pencils below Mason and Dixon line. Underline Dixon, bring this ad. to our store, and I'll just know what you want."

Screw up your courage, but never wrench your judgment.

This was catching. The ad. read: "We deal in toys. 'Nough said. Just show this the youngsters, and they'll explain the rest."

Iron-clad rule to our clerks: When you get a customer, nail him. If nails won't hold, spike him.

A Cleveland electrician has put the following plate on the doors of his residence: "Burglars invited to call. You will be well received." In further explanation I might say that his house contains a meshwork of alarms. There are bells galore. The mats are alive with electricity. The door knobs are charged at night. Automatic firearms guard every entrance. Tampering with any window would at once light and adorn the whole house. That's household electricity with a vengeance. It's also Cleveland ingenuity. Look to Cleveland for startling achievements.

Cleveland, Ohio, December 5, 1897. J. B. RINDFLEISCH.

Implement Men Protest.

The annual election of the officers of the Kansas City Implement, Vehicle & Hardware Club was held at the dinner given at the Midland some evenings since. The officers chosen were: President, George M. Moore, of the Kingman-Moore Implement Co.; first vice-president, A. B. Colton, of the Great Western Mfg. Co.; second vice-president, John S. Taft, of the Columbus Buggy Co.; secretary, O. V. Dodge, of the Kansas City Hay Press Co.; treasurer, A. G. Trumbull, of the Trumbull Seed Co.

The executive committee for the next year will be composed of C. G. Newman, chairman; John Conover, J. S. Welsh, F. L. Kaufman and R. B. Crawford.

The club criticized very sharply the recent ruling of the railroads that no passengers were to be carried on freight trains, and instructed the transportation committee to take the matter up at once and file with the officials a strong protest, showing that such a ruling would be unjust to the wholesale business. The members said their traveling men, in making small places, figured on getting in or out, or both, on freight trains, and in this way saved great time and delays. If the ruling was not reversed it would seriously interfere with business and largely increase the expenses of the traveling men.

The club also decided to discourage the use of local checks in making remittances. There is an exchange charged and the wholesaler or jobber must stand it. The club has recently waived the drayage charge for shipments, and in return for that will ask the patrons and members of the Western Retail Association to make remittances by Kansas City or Eastern exchange.

A Hardware Reception.

A reception was tendered in the room of the Hardware Merchants' & Manufacturers' Association, Philadelphia Bourse, by that organization, to E. J. De Hart, of Honeyman, De Hart & Co., Portland, Ore., who was the official representative of the Pacific Coast Hardware & Metal Association to the recent convention of the National Hardware Association. Mr. De Hart has been visiting for business purposes some of the leading manufacturers of Hardware in Philadelphia. He has been accompanied by his wife and daughter, Miss Ella De Hart, who have been the guests of T. James Fernley, secretary-treasurer of the National Hardware Association, at his home, No. 1938 North Twelfth Street.

The Eclipse Refrigerator Works, Burlington, Vt., have sent us an attractive little catalogue showing the Eclipse Cleanable Dry Air Refrigerator, with removable ice-tank, etc. A number of styles and sizes of this attractive article are shown, and the catalogue itself will be sent upon application.

The semi-annual meeting of the Missouri Valley Retail Hardware Dealers' Association was held in Omaha on December 9th. Col. Richards, of Kansas City, occupied the chair. Only routine matters were touched upon, and a dinner was given at the Millard House.

Stamping Companies Contemplate Consolidation.

For some months efforts have been made by a number of leading manufacturers of stamped, japanned, porcelain-lined and granite enameled ware, to form a gigantic combine of factories, with an aggregate capital of $10,000,000. There are so many details to be attended to in the formation of such a consolidation, which in this instance contemplates the actual purchase of the organizing plants, that it is doubtful if the new corporation can get in operation before February 1st next.

The Niedringhaus Bros., of St. Louis, Mo., who control the St. Louis Stamping Co. and the Granite City (Ill.) Steel Co., are said to be the central figures in the deal. The Niedringhaus plant may well occupy this position, as it is doubtless the largest of its kind in the world. It employs 2000 men and represents an investment of $3,000,000 capital. Niedringhaus & Bro. commenced business in a small way in 1858, and incorporated the St. Louis Stamping Co. in 1871, at which time they moved to the present well equipped plant.

The firms which are claimed will be in the contemplated consolidation are: The St. Louis Stamping Co.; Matthai, Ingram & Co., of Baltimore, Md.; Kieckhefer Bros., of Milwaukee, Wis.; the Bellaire Stamping Co., of Harvey, Ill.; the Central Stamping Co., American Stamping Co., Haberman Mfg. Co. and Iron Clad Mfg. Co., of this city.

It is said the desire to make this combination originated in a singular way. A party of Eastern capitalists, having in view the opportunities which will be given our manufacturers in 1898 in the extension of our export trade, visited the Niedringhaus works, the magnitude of which excited their admiration and astonishment. A proposition to purchase the plant was the original motive of the visit, but the greater advantages of a combine of the leading companies, which they believed was among the possibilities, caused them to abandon all idea of purchase. Every move, as is customary in making so important a corporate change, is shrouded in mystery, and affirmations and denials lack definitenesss. President James, of the Central Stamping Co., is credited with saying:

"Several of us have been trying to arrange plans to consolidate in order that our work may be made cheaper, and that our factories may be conducted at less expense. Our plan, however, was merely to form a stock company, which would buy up the stock of the present individual companies. A number of companies have been discussed, and there has been correspondence with several, but as yet absolutely nothing definite has been done. I can neither say that the project will go through in the immediate future, nor that it will ever be realized. There are so many stamping companies that any attempt to form a trust or combine for controlling the market would be absurd. The combined capital stock of all the proposed companies, counting even those which have merely been discussed, would not aggregate anything like $25,000,000. Mr. Niedringhaus was here, but a statement that any combination has been effected is untrue."

This statement is supplemented by that of State Senator George W. Ketcham, secretary and treasurer of the company, who declared that as yet nothing definite has been settled. He said that negotiations are still under way, and that so far as he understands, it is the intention to include in the combination sheet iron mills. tin-plate mills, and enameling and stamping companies.

A Maine Forest in New York.

The proposed exhibit of the region around Moosehead Lake and others reached by the Bangor & Aroostook Railroad, now being arranged for by Granville M. Gray, may well be looked for with keen interest upon the part of visitors to the Sportsmen's Exposition in January, at Madison Square Garden. It will be, in fact, nothing more or less than a breeze from the Maine woods, laden with the scent of the pine and fir, and giving one a glimpse of "life as it is lived" by the camper-out. The plans include the transportation to the Garden from Maine of not only a complete outfit for camping, the sportsmen's tent, the fly for a "dining hall," the guides' tent, all put up just exactly as they would be in the heart of the Maine woods, but added attractions will be given the exhibit by the erection in the Garden of a veritable Maine forest in miniature, the trees, the mosses which cover the ground, the occasional moss-covered rocks, the wild creatures half hidden by the shrubbery and "woods" of the back-ground, all will have come from Maine to add interest to this exhibit and make it realistic. Even the half-burned logs which form the dead embers of the camp fire, will have been rescued from the oblivion of some long-forgotten camping place, that the actual scene may be as like to the real spot represented as possible. On a knoll near the tent, resting easily upon the bed of ferns, carelessly dropped there for them to rest upon, will be a handsome string of the trout that have made Maine famous, lying just where, in his eagerness to step aside for a moment, the victorious angler had laid them and his tackle as he has brought them from the water.

The American Axe & Tool Co.

The American Axe & Tool Co., No. 253 Broadway, New York, and Beaver Falls, Pa., owning and operating a large number of axe and tool making plants throughout the country, have decided it would be greatly to the interest of their industry, if the various plants could be consolidated in some central location in the Pittsburg district. The principal object in consolidating their separate establishments would be a more economic system of manufacturing, a concentration of working forces, and under a central management a complete reorganization of office staffs. In addition to these considerations there would result a great saving of freight on material used in the works, nearly all of which is obtainable in Pittsburg and vicinity.

It was at first thought that Homestead would prove a most eligible location for the purpose, but naturally, offers of equally suitable locations possessing even greater advantages, make possible a different site for the extensive works contemplated by the fifteen companies under their control, the present plant of which will be abandoned when the new works have been erected and placed in operation. The various companies comprising this present organization are as follows: American Axe & Tool Co., Beaver Falls, Pa.; Robert Mann & Sons, Mill Hall, Pa.; J. Fearon Mann, Bellefonte, Pa.; Johnsonville Axe Mfg. Co., Johnsonville, N. Y.; Romer Bros. Mfg. Co., Gowanda, N. Y.; Douglas Axe Mfg. Co., East Douglas, Mass.; H. Knickerbacker & Co., Ballston Spa, N. Y.; Thos. R. Mann & Co., Mill Hall, Pa.; William Mann, Jr. & Co., Lewistown, Pa.: Powell Tool Co., Cleveland, Ohio; Hubbard & Blake Mfg. Co., Oakland, Me.; Jamestown Axe Co., Jamestown, N.Y.; Underhill Edge Tool Co., Nashua, N. H.; Francis Axe Co., Buffalo, N. Y.

The Bissell Carpet Sweeper Co., Grand Rapids, Mich., and New York, have sent as a handsome lithograph hanger, showing two Michigan beauties, the one in a pink shirt-waist, representing a fair daughter of that State, and the other, one of her choicest companions, Bissell's Cyco-Bearing Grand Rapids Carpet Sweeper. Attached to this hanger is a special placard stating that these goods "Make Good Christmas Gifts."

The George Tritch Hardware Co., Denver, Colo., will, on January 1st, add to their already extensive stock, a complete line of sporting goods.

Digitized by Google

Miller, Sloss & Scott's New Catalogue.

We have received from Miller, Sloss & Scott, San Francisco, Cal., New York offices, Nos. 185 and 187 Stewart building, a copy of their new general catalogue, recently issued to their customers. It is a magnificent volume and, including new pages sent, is about 1300 pages, 9x11½ inches in size, printed on excellent paper, with good illustrations and graphic descriptions, bound in half-morocco, with corners of the same, has colored edges, and a cover gold embossed with their address Like other large catalogues issued by the representative Hardware houses of the country, the volume is intended to cover almost every possible demand in a range of the widest scope.

Incorporated in its contents at the end of the catalogue are a number of pages giving estimated weights to foot on iron and steel of the various shapes, square, round and octagon, and weights to the hundred on nuts, bolts, spikes, rivets, etc., which will be found useful to their customers.

The catalogue is planned to consist of seven departments: No. 1, tools and farming implements; No. 2, locks, latches and builders' Hardware; No. 3, miscellaneous Hardware; No. 4, pocket and table cutlery, razors, shears, plated ware, etc.; No. 5, guns, pistols, ammunition, fishing tackle, etc.; No. 6, brass and iron valves and fittings, steam, gas and water supplies; No. 7, iron, steel, rails. metals, cast and wrought pipe, tubes, etc.

They adopt a sensible plan in the catalogue, of following manufacturers' lists and numbers wherever practicable, and where the manufacturers have failed to furnish the same, the goods are provided by the compiler with original numbers in order to facilitate ordering and avoiding errors, and the same time making lists for same that would indicate comparative values.

Owing to the many changes in prices, present and prospective, no "Discount Sheet" accompanies the catalogue; preference being given to direct inquiries, quotations given to which are more apt to be up to date. A very important feature in the catalogue is a carefully constructed index of nearly forty pages, in which the various articles are placed under every possible classification to make a quick reference.

Taken all in all, the volume reflects great credit upon the careful work of the compiler, and the mechanical execution in all its details deserves the praise due to conscientious work on the part of the printers, the Hicks-Judd Co., of San Francisco.

Failure of an Old Hardware Firm.

The trade was somewhat surprised some days since to learn that after an existence of twelve years as one of the largest wholesale Hardware houses in the West, the firm of Horton, Gilmore, McWilliams & Co., Chicago, had passed into the hands of the Illinois Trust & Savings Bank, as assignee. The statement filed in the court estimated the liabilities at $210,000, and the assets at $300,000. The latter consist of $150,000 in outstanding accounts and the sum received from the sale recently to Hibbard, Spencer, Bartlett & Co. of the company's stock. While the purchase price is not definitely known to others than the principals in the transaction, and their representatives, it is thought to be in the neighborhood of $150,000. This action, it is said, was taken because the members of the firm preferred to dispose of the stock under their personal supervision rather than to have it sold through an assignee.

The officers of the corporation are: William Gilmore, president; J. Newton Cole, vice president; James W. McWilliams, secretary and treasurer. There are a number of employees of the house who have been there for a number of years. The encroachment into the Hardware business by concerns engaged in other lines has affected the general Hardware trade to a large extent lately, and the insolvent concern suffered from this cause.

For twelve years the corporation has been in business on Lake Street, in its present location, and it probably had the largest city trade of any of the wholesale Hardware houses in business here. It was the successor of the old firm of William Blair & Co., one of the pioneer concerns in the Hardware business in Chicago. With the assignment the firm ceased business permanently, and it was announced that it would not resume.

The Excelsior Carpet Stretcher.

Richard W. Montross, Galien, Mich., will, when the sum total of human achievement is reckoned up, stand credited upon the books with having saved on behalf of suffering humanity an endless amount of labor, back-breaking and profanity. The thousands and thousands of Excelsior Carpet Stretchers with Tack Hammer Combined, which he has scattered all over the face of the civilived globe during the several years past, furnish the means by which the above admirable record has been made. An illustration of this excellent article will be found upon page 45 of this issue, and its method of operation can be understood at a glance. The improved stretcher and hammer has been sold by canvassing agents all over the United States, and the manufacturer is loaded with endorsements from thousands of users. The Hardware trade has handled it largely for a number of years, especially in the West, where it is safe to say that a Hardware catalogue without the Excelsior is an exception. The stretchers are packed in boxes of one, two, three and five dozen, and in each box are found display cards and special circulars describing the article. The price is $6 per dozen, 25 per cent. off. Mr. Montross will be pleased to furnish further information in regard to this article. In a statement of its merits, he says: "Saves labor, time, temper, sore fingers, backaches, etc., and is a great preventative of profanity. It is a little contrivance easily planted in any required position where it will stretch the carpet beautifully and evenly and hold it secure while the operator detaches the hammer and drives the tacks. A mere glance at the illustration will instantly recall to the minds of all who have ever put down a carpet in the 'old knee, hand and back-breaking way,' the many aches and perplexities of their own experience. It is inexpensive and so simple and easy of operation that a child can manipulate it. Its merits are proved. It's needed, hence it sells rapidly and gives satisfaction. It weighs only one and one-half pounds, and is so constructed that it can be in an instant as conveniently as a pocket knife folded up into a small compass."

Eastern Branch of John Lonn & Sons Co.

The Allerton Clarke Co., Nos. 97 Chambers and 79 Reade Streets, New York, have assumed the Eastern branch of John Lonn & Sons Co., La Porte, Ind., the manufacturers of the Crown and Cyrus brands of Bicycles. They will control territory covering the Eastern, Middle and Southern States.

The Crown Cycle, the list price of which is placed at $50, is provided with flush joints, arch crowns, Fauber cranks, Kelly handle bars and Perry-Humber chains. Saddles are given of any color corresponding with the color of frame. A choice of any standard tire will be permitted with this wheel. Other wheels will be included in the assortment made by the company, listing at $40 and $35, and varying somewhat in a few points of construction, the $40 wheel having cranks of the two-piece pattern, and the $35 wheel having outside flanged instead of flush connection.

It satisfies customers—Enameline.

A. Featherstone & Co.

A. Featherstone & Co., Chicago, Ill., who are among the leading bicycle manufacturers of Chicago, have recently opened an Eastern branch at No. 32 Warren Street, New York, which is under the management of J. C. Matlock, who gained his experience while manager of the bicycle department of Simmons Hardware Co., St. Louis, Mo., which establishment he left to assume charge of this important branch house. Coming from the West, credited with all the elements that go to form successful men, he will meet a welcome from the trade which will inspire him with confidence, fill him with ambition and provide him with an ample field for his industrious energy.

A. Featherstone & Co., although incorporated in 1893, have been manufacturers of bicycles since 1871, and consequently rank among the oldest makers of this important product. They have a paid-in capital of $500,000, and manufacture the bicycles long and favorably known under the names of the Road King and Road Queen, Duke and Duchess, Prince and Princess, Baron and Baroness.

An advance catalogue of their 1898 models has just been issued by the company, and will be mailed to the trade at once. Their more complete and elaborate catalogue, they state, it is impossible to have ready before January 15, 1898.

The "Excelsior" Cotton Stitched Belting.

The Rossendale-Reddaway Belting & Hose Co., New ark, N. J., the manufacturers of the well-known Came Hair Belting, after repeated and successful experiments, intend placing upon the market shortly a new variety of belting, to be known under the name of "Excelsior." The characteristics of this new belt, which is an improvement in an important sense on the stitched cotton belts now in use, consist in the introduction of a new substance in one ply or layer of the belt, the substance being absolutely unaffected by moisture; this enables the manufacturers to furnish a belt that will not be subject to the objectionable tightening and loosening at present inseparable from cotton stitched belts generally, and which creates such trouble with machinery when too tight, and produces a belt entirely too loose when dry. This belt, it is claimed, will be almost impervious to moisture.

Another feature, equally as important as the foregoing, is that the new material, under tests, reduces the stretch of the belt from 33⅓ per cent. to less than 10 per cent.; this, as may well be surmised, greatly enhances the value of the "Excelsior" belt by comparison with others on the market.

Discovery of Dynamite.

Alfred Nobel, who recently died at San Remo, and who has bequeathed the revenue from almost his entire vas fortune to be distributed annually in prizes for scientific research and invention, was born at Stockholm in 1833. He was the youngest of three brothers and the son of a talented mechanic who at the time of Alfred's birth was established in St. Petersburg. In 1860 his father founded a factory for the manufacture of nitro-glycerine, in which Alfred Nobel was employed. The accidents caused by the explosions of nitro-glycerine in its liquid form occurred so frequently, that the Russian Government actually thought of prohibiting the manufacture of this precious substance, without which modern industry could hardly get along. In 1867 Alfred Nobel discovered a process of solidifying nitro-glycerine with surprising ease. The idea of this discovery was suggested to him by a fortunate occurrence. A vessel filled with nitro-glycerine was cracked during transportation, and the liquid had spread in the quartz-sand which was packed around the vessel. The nitro-glycerine had amalgamated with the packing, the liquid retaining the solid parts by means of capillary action in such a way as to constitute a solid substance, which, while showing all the properties of nitro-glycerine, could be handled without danger. Dynamite was thus discovered, and the development of its manufacture was surprisingly rapid. In 1878 Alfred Nobel made another discovery, almost as important as the first. He then succeeded in transforming nitro-glycerine into a gelatinous substance as solid as gun cotton, but with the immense advantage that it was not as subject to decomposition nor to spontaneous combustion, and that its explosive power was considerably higher than that of previously invented explosive substances. Within the last twenty years Alfred Nobel has also taken great interest in the development of the oil industry in the Caucasus. His industrial enterprises earned for him a large fortune, which he used very liberally, particularly in the endowment of scientific institutions and research.—*Exchange.*

"Practically Unbreakable."

"Did it ever occur to you," it is asked, "that bronze and brass are soft metals, and when used in spring hinges for heavy doors the joints soon give way? The Bommer Spring Hinges, both bronze and brass, in all finishes, have a continuous steel core or skeleton from end to end, and the entire wear is thrown on this steel interior, the wear not in the least affecting the bronze or brass exterior. Spring hinges do the heaviest and hardest duty of any Hardware used in a building, and it pays to get the best and that only." "Practically unbreakable," says the World's Fair award on Bommer Spring Hinges. They can be obtained from all Hardware dealers who serve the best interests of their customers.

A great many traveling salesmen take occasion when in New York city to call at the tower of the Madison Square Garden. They are interested in the Commercial Travelers Fair, which is to be held at the Garden on February 28 to March 5, 1898. The commercial travelers recently held a harmonious and enthusiastic convention at Binghamton, and unanimously voted to make the Fair succeed. Mr. Chasseaud was appointed to manage the Fair and all the travelers agreed to back him up. The officers of the Association having the Home in its charge made a financial report that aroused extra enthusiasm, and inspired the Home builders with renewed courage. The officers of the Commercial Travelers Fair are: President, Chauncey M. Depew; vice-presidents, Governor Frank S. Black and Mayor William L. Strong; secretary, R G. Dun, and treasurer, Mayor George E. Green of Binghamton. Mrs. T. C. Platt is the chairman of the Women's Committee. Travelers in many parts of the country are sending in to Manager Chasseaud pledges of cash New Year gifts and in hotels everywhere are being placed glass collection boxes in the shape of miniature travelers' trunks. The Buffalo Hotel Men's Association has just pledged its hearty support to the Fair, and other hotel organizations will aid.

D. R. Harvey, who for several years past has held the position of manager of the bicycle department of the John P. Lovell Arms Co., Boston, Mass,, and who has recently severed his connection with this firm to accept the general management of the new store to be opened at No. 408 Washington, Street Boston, by the Iver Johnson Sporting Goods Co., was pleasantly surprised on the afternoon of his last day with the firm. At about 5:30 P.M., Mr. Harvey's associates began to gather in his office, and when all were present, A. M. Hall, in behalf of the friends, made a few appropriate remarks, and presented Mr. Harvey with a handsome diamond watch charm. Mr. Harvey was somewhat taken aback, but rose manfully to the occasion, and in well chosen word thanked them for the charm and the many good wishes which accompanied it. Mr. Harvey is well known to the bicycle trade of New England, and has the best wishes of a host of friends for his success.

Recent Trade Publications.

John H. Graham & Co., No. 113 Chambers Street, New York, have recently issued a very complete catalogue of bicycle sundries and parts, made up from the manufactures of the following firms and companies, for whom they are sole selling agents: The New Departure Bell Co., the Jos. Lucas & Son Co., the Slaymaker, Barry Co., Lane Bros., E. Jenckes Mfg. Co., G. W. Cole & Co., P. Lowentraut, Downey Bros., and Chantrell Tool Co. Among the important specialties which fill the forty pages of the catalogue, the Automatic Bicycle Brake and the large assortment of bicycle bells of the New Departure Bell Co. are prominently illustrated and described, and, in addition, the New Cyclometer and the Sykl Foot Pump add to its attractions. Included in its contents, which form a varied assortment of useful appliances, we notice lamps and lamp brackets, bicycle locks, wood handle bars and clips, cycle wrenches and cycle hangers, lubricants, toe clips, bicycle holders and stands, luggage and parcel carriers, saddles and tool bags. The catalogue is well printed on good paper, and should be in the hands of all dealers, to whom it will be sent upon request.

The Lancaster Machine & Knife Works, Lancaster, N. Y., have issued a very attractive catalogue for 1898, finely printed upon heavy paper and bound in black covers. This presents, both in illustration and description, their lines of plain and patent ratchet bit-braces, butchers' and packing-house cleavers, and machine knives of every description. They introduce themselves by the statement: "We propose to merit your patronage by manufacturing goods of the highest class only, using the best material and finishing second to none." They declare that all their goods are fully warranted, and that every article is carefully inspected before leaving the factory. Special attention is called to their Lancaster ratchets, full illustration and description of which appeared in the issue of *Hardware* last preceding. An illustration of one of their articles appears upon every page, with sizes and prices. They make a specialty of butchers' cleavers, and a very fine line is shown in this publication.

Simmons Hardware Co., St. Louis, Mo., are distrib uting to their trade a pamphlet of 110 pages, 9x4½ inches, with flexible cover, intended to be used as a want book. With the exception of a few pages in the front and back of the book, which gives general information, the pages are all ruled so the dealer can note his wants as they occur, in order to find it convenient to make frequent orders, which is the object of its distribution. Interspersed throughout the book are some wise and pithy business maxims, which will be read with interest by those who are fortunate enough to receive the same.

W. C. Heller & Co., Montclair, N. J., are sending their friends an unique reminder illustrating and showing the Heller Steel Hardware Shelf Boxes, so distinctly that a dealer can see just what the article is in detail at a glance. They announce that these boxes are made any size desired, and a sample of the same will be mailed on receipt of 25 cents.

The National Horse Nail Co., Vergennes, Vt. have published a calendar for 1898, in colors.

As France taxes bicycles and tricycles, the number of machines used in the country is known exactly. On January 1, 1897, there were 329,814 taxed, an increase of nearly 74,000 over 1895, which had shown an increase of 53,000 over the preceding year. The revenue obtained in 1896 was 3,272,339 francs. Paris department, the Seine, heads the list with 62,892 bicycles, paying a tax of 626,916 francs. —*Scientific American.*

Smokeless Powder Pistol.

The Mannlicher pistol, made in Berlin, described in the *New York Times* recently, is not the only small arm brought to this country from Europe in which the smokeless powder is used. The Borchardt automatic repeating pistol was tested in target firing at Creedmoor on September 11 by Col. McCoskry Butt, of the Twelfth Regiment, and Major N. B. Thurston, at 25, 100 and 200 yards. Eight shots were fired with it in fifteen seconds by Major Thurston at 100 yards, and his score was seven bulls-eyes and one "centre," an achievement as a whole which was said to be unprecedented.

The Borchardt pistol is of peculiar shape, having a long overhang behind what is usually called the butt, and a magazine within the latter which will contain eight cartridges. It differs in its mechanism from the Mannlicher pistol most noticeably in the fact that the automatic action is entirely resilient, and not at all dependent upon the expansion of gas.

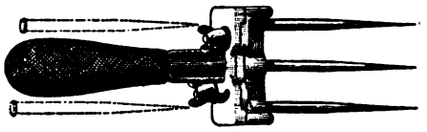
The rear end of the weapon is called the grip. The breech-block is driven back into this by the recoil caused by the discharge, while at the same instant the lifting spring within the magazine pushes out the emptied cartridge shell. A powerful double spring in the grip thrusts the breech-block forward again, and the latter carries into position in the breech of the barrel a fresh cartridge ready to be fired. By the same movement the firing bolt is cocked. The eight cartridges are all placed in the magazine at once, being held together in a box-like "charger," which drops from the magazine as soon as the last cartridge which it contained has been used. All the functions of the mechanism are automatic, excepting, of course, the pulling of the trigger.

The weight of the Borchardt pistol is two pounds and fifteen ounces, with the magazine charged. The calibre is not qnite .31. The weight of the weapon and its somewhat awkward shape are the chief objections urged against it. It is contended, however, that the weight is so well balanced when the pistol is held in position for firing that it assists the aim and steadies the hand. By the use of a large attachable stock it can be converted, like the Mannlicher pistol, into a small carbine at a moment's notice. There is a metallic sight at the extreme end of the grip and another is at the usual place near the muzzle. The long distance between them facilitates accuracy of aim. In use as a cavalry weapon the overhang, it is said, would be a valuable shield to the wrist of the pistol arm, protecting it from saber strokes and consequent disablement.

A Lesson in Economy.

Consul Germain writes from Zurich, in regard to a plan recently introduced in the public schools of several European cities. In Brussels, the children attending public schools were requested by their teachers to gather up, on their way to and from the school, all such apparently valueless objects as old metallic bottle capsules, tin foil, tin cans, paint tubes, refuse metals, etc., and deliver their collections daily to their respective teachers.

In the period from January 1 to October 1, 1895, or within eight months, the following amounts were collected: Tin foil, 875 kilogrammes (1925 pounds); old paint tubes, 100 kilogrammes (220 pounds); bottle capsules, 2007 kilogrammes (4415 pounds); scraps of metal, 555 kilogrammes (1221 pounds); total 3537 kilogrammes (7781 pounds). This apparent rubbish was disposed of and the proceeds applied so as to completely clothe 500 poor children and send 90 sick ones to recuperation colonies, and there still remained quite a balance, which was distributed among the poor sick of the city.



Louis XIV. drank the first cup of coffee made in France.

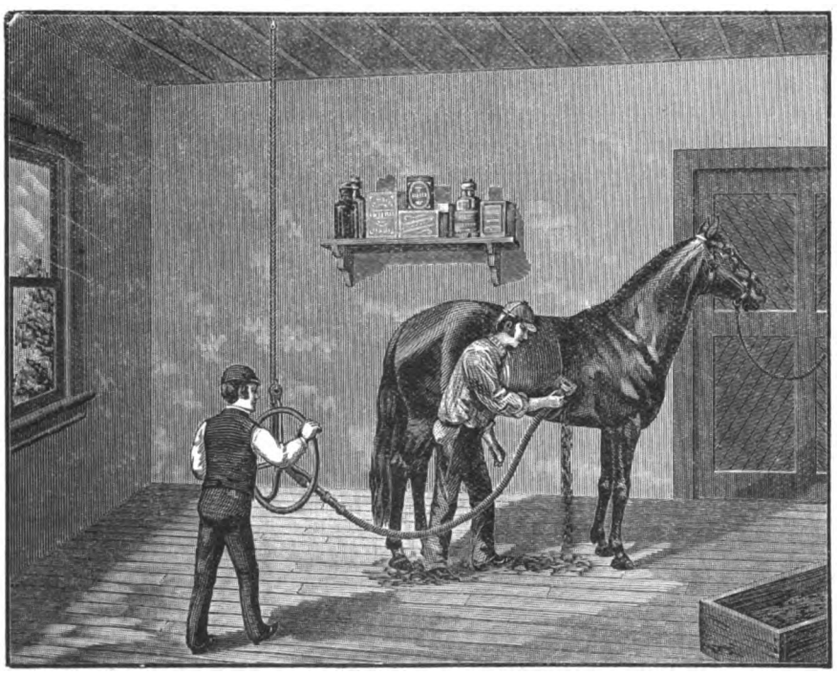
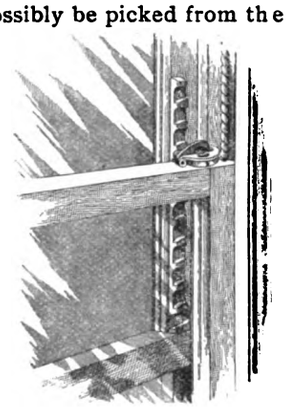
NEW GOODS AND SPECIALTIES.

Parker Ice Tools.



The Parker Ice Tool Co., Worcester, Mass., are manufacturing a line of Ice Tools, one form of which is herewith shown. In this combination tool is the shave, which

can be changed into an awl. The illustration here shown carries its own explanation, but a catalogue fully describing the same will be sent upon application. The company announce that their crushers for ice cream manufacturers are being successfully sold all over the country.



The New '98 Chicago Clipping Machine.

The Chicago Flexible Shaft Co., Nos. 158 and 160 Huron Street, Chicago, Ill., have brought out a new clipping machine herewith illustrated. The company state that it is sold at such a low price it competes with hand clippers, and is therefore an article which Hardware merchants can readily carry in stock. The machine is made as light as possible, and yet in a most thorough manner, to insure durability and easy operation. It is designed to be suspended from the ceiling by a braided rope which passes through a screw eye; the free end is passed under an eccentric pulley journaled in the frame, which from its peculiar construction locks it at any point desired by simply letting go of the rope. This feature will be much appreciated, as it accommodates the apparatus to the height of the operator instantaneously. The large balance wheel has teeth on the inner edge which engage with a small fibre pinion, which in turn transmits the motion through flexible shaft to the knives. The balance wheel turns on roller bearings; the flexible shaft is of the solid core type, is made of tempered steel, and runs in an oil-tempered sheath, the end of which near the knives is of larger diameter than the balance. This construction permits the introduction of anti-frictional bearings of fibre, which keep the core central in the case (or sheath) and reduce friction to practically nothing. The diameter of the balance wheel is 18 inches, while the fibre pinion is 1 inch, so that a speed of 1800 revolutions per minute can be obtained for the clipping machinery. The standard length in which the flexible shaft is furnished is 5 feet. The knives are dust-proof. The machine is handsomely enameled in red and bottle green, and when set up in a show window attracts much attention.

Elting Sash Lock.

Irving Elting & Co., Saugerties, N. Y., are very successfully placing upon the market the Elting Sash Lock, an illustration of which we herewith show. In description of the same, they declare that this sash lock is so constructed that it cannot possibly be picked from the outside; and, as

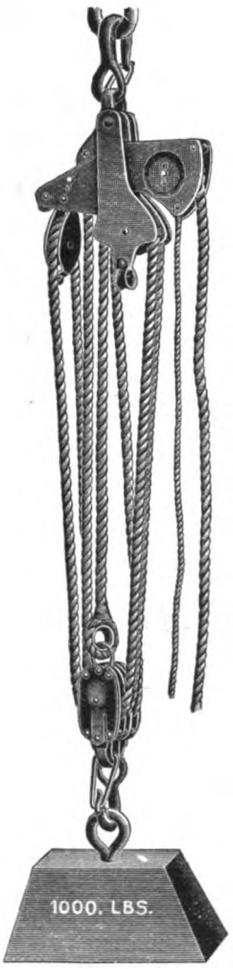
shown in illustration, it is secured to the window in such a manner that, if an attempt be made to pry it off, the strain is received against the side of the screws holding keeper to the upper stile, at the same time keeping lock in its correct position on the lower sash, thereby rendering entrance by such means impossible. It supports and locks the sashes while either raised or lowered, or both, in half-inch openings up to the full limit of safety, and holds them snugly in the frame, preventing rattling, while its free action is not in the least affected by looseness, shrinkage or sagging of the sashes. In locking the closed window it has a tendency to lift the upper and force down the lower sash, and draws them tighter together. Where windows have been in use for some time, it is not infrequently found that owing to swelling of the sashes, or an imperfect balance, the meeting-rails cannot be brought flush, a defect that is entirely overcome with this lock by simply raising keeper sufficiently, no underlaying being necessary. It is made in the simplest and most durable manner, has no springs and cannot get out of order. A sample lock will be prepaid to any address for 30 cents. Address Irving Elting & Co., Saugerties, N. Y.

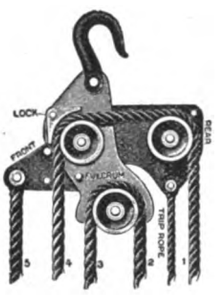
Burr Safety Lift Block.

The accompanying illustrations show a new rope block of interest to users of such appliances. In this block are combined many of the advantages of chain blocks without the disadvantages of some of these. The illustration on page 14 shows the form of block used in low power hoists; the large illustration, Fig. 1, shows the construction used on blocks of high power, or those having a ratio of 1 to 7. Fig. 2 represents the Safety Lift with side plate removed, showing the action of the block when "open"

Digitized by Google

and hoisting a load. When the rope is pulled to lift the load the rear end of the rock lever is pulled down, the sheave rocks carrying the hoisting rope away from the lock, and the hoisting is done the same as with a common block. Fig. 3 shows the Safety Lift with side plate removed, showing action of block when "closed" or locked. The hoisting rope being released, the load pulls down the front arm of the lever, the sheave swings forward and clamps the rope against the lock, securely sustaining the load at any point desired. The heavier the load the greater the pressure to hold the rope. To lower load when lower block is out of reach, grasp the hoisting rope securely before pulling on the trip rope. Hold rear end of lever down by pulling on the trip rope and allow the hoisting rope to slip back through the other hand. To lower load when lower block can be reached, pull down upon part of rope (marked No. 4 in Fig. 2) passing between block and central sheave in





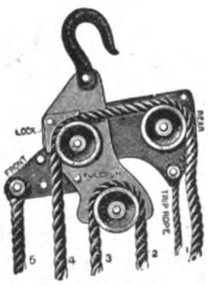


FIG. 1.

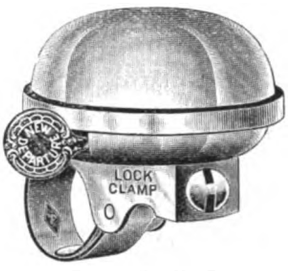
FIG. 2, OPEN.



upper block. As this portion of the rope does not pull upon the lever, it is easily slipped between the sheave and lock, so that a load can be adjusted with as much nicety as with an expensive chain hoist. This feature, that cannot be found in any other rope lock block, makes the Burr Safety Lift of the greatest value to painters and all persons working upon swinging scaffolds; also to the

FIG. 3, CLOSED.

workmen in the upper parts of buildings, as they can lower and place material where they wish and not depend upon signaling to the persons below doing the hoisting. There is nothing in these blocks to wear or cut the rope, all parts coming in contact with the rope being perfectly smooth. Use even makes it work more perfectly. These blocks are readily adjustable in power from a 1 to 2 ratio to 1 to 7 by the use of the cross sheave arrangement shown in Fig. 1. This is a particularly convenient matter where the loads to be handled vary greatly from light to heavy. These hoists are made by the Burr Mfg. Co., No. 823 Society for Savings Building, Cleveland, Ohio.

New Departure Bells.

The New Departure Bell Co., Bristol, Conn., John H. Graham & Co., selling agents, No. 113 Chambers Street, New York, are meeting with a very large degree of success with their New Departure Bicycle Bells, a full understanding of which can be had by reference to the accompanying illustrations. They announce that these bells are, in design, the same as have met with such popular favor during the season of '97. This design has proved to be most popular and satisfactory, in proof of which, it will be found that they are to-day in use all over the world. In the New Departure brand nothing but the very highest grade of material is used, while the mechanism is the result of long and close study, supplemented by experiment and thorough test; to absolutely demonstrate efficacy and durability before placing upon the market. The makers say: "The

Pattern E, No. 7.

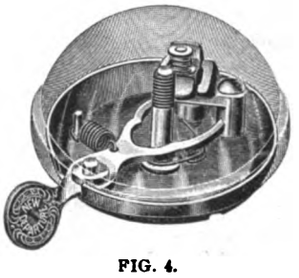


FIG. 1.

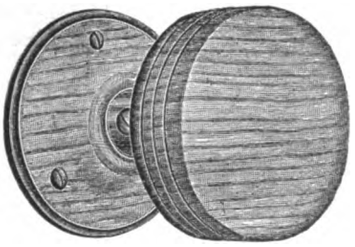
Pattern E. No. 10 1-2.

FIG. 2.

simplicity of the mechanism of the New Departure Bell has attained to the highest possible degree, the parts being assembled in a manner which makes it practicable for quick and easy removal for cleaning, should it be necessary. The beaded gong bell (which originated with this company) has reached its perfected form in the square bead, now exclusively used in the New Departure Bells, and possesses qualities of tone and resonance unobtainable by any other method. Scientific investigation, aided by experiment, has combined to produce, not only an attractive design, but a beading of such form, as to produce and retain the melodious tone for which the New Departure Bells are noted throughout the world. This form of bead gives a loud, clear, yet sweet and pleasing sound, which may be heard to a great distance. 'They have a tone that's all their own,' and the constant effort of the company is to retain the richness and purity of this tone by every means within the power of human attainment. The plain gong bells being somewhat of higher pitch, give a sharper sound, but again the shape of the gong has been made to conform to accoustic principles, so that the alarm is not grating or shrill. Fig. 1 shows the beaded gong bell with the lock clamp; Fig. 2 the plain gong with the plain clamp. These bells are made in sizes from 1¾ inches to 3 inches in diameter, with the beaded or plain gong, with the lock or plain clamp, and either electric or double stroke as desired. The lock clamp was the invention of the New Departure Bell Co., and was first introduced by it. Fig. 3 shows the interior mechanism of the New Departure Electric Alarm. It will be noted that the construction is much improved over

FIG. 3.

FIG. 4.

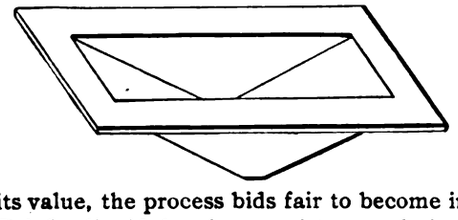


forms previously used and is much more simple and perfect. With this mechanism a clear and clean alarm is given, without rattling and without interference with the vibration of the gong. Fig. 4 shows the mechanism of the double stroke bell, which is exceedingly simple and durable. In Fig. 4 is shown the result of inventive skill and ingenuity, culminating in a simple and perfect double stroke, without muffling or rattling." The New Departure Bell Co. has, at Bristol, Conn., an immense bicycle sundry factory, where are produced the celebrated New Departure

Digitized by Google

Bells, the now famous line of Bristol Bells, the New Departure Cyclometer (non-corrosive), the "Sykl" Foot Pump, the New Departure Automatic Bicycle Controller (rear hub automatic brake), New Departure Trouser Guards, etc. John H. Graham & Co., of New York, are sole selling agents for the entire product of the New Departure Bell Co., and all inquiries for prices and terms should be addressed to them. For catalogues and other printed matter and information, address the Advertising Department of the New Departure Bell Co., Bristol, Conn.

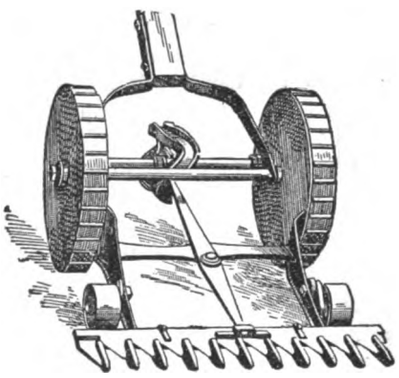
Wood Door Knobs.



James F. Martin, whose office and factory are at Nos. 1619-1625 Ruan Street, Frankford, Philadelphia, Pa., is

making a very attractive line of Wood Knobs, an illustration of which is herewith shown. Among these are the following numbers and sizes, full prices of which will be sent upon application: No. 2—2¼ inch star finish shank, wood roses, imitation apple; No. 2—2¼ inch bronze plated shank, wood roses, imitation apple; No. 2—2¼ inch bronze plated shank, wood roses, oak, ash and white maple; No. 2—2¼ inch bronze plated shank, wood roses, cherry, walnut and cherry stained; No. 2—2¼ inch bronze plated shank, wood roses, genuine apple; No. 2—2¼ inch bronze plated shank, wood roses, solid mahogany. Mr. Martin has had a great deal of experience in this line, and has successfully introduced these goods into all parts of the country. He is also a manufacturer of sugar and coffee scoops, escutcheons, shutter knobs and novelties in wood, metal, etc.

A Brazing Crucible.



A newer process of brazing is threatening the old-time flame method. That process is liquid brazing. Several years ago it was demonstrated by a company formed for that purpose, that a specially treated joint, plunged into molten spelter, would not only braze in a very few seconds of time, but would, in addition, come out almost entirely free from scale, a brisk cleansing by a metal brush being about all the after treatment required. The process was a secret one, the most important point being the anti-flux, which was a preparation painted over the parts to which it was desired the spelter should not adhere. Some difficulty and delay in the securing of the patents prevented the process being put upon the market in a commercial form, but a number of experiments having demon-

strated its value, the process bids fair to become in general favor. Briefly, liquid brazing consists merely in reducing the spelter to a molten form in a suitably shaped crucible at a high temperature, and then immersing the joint to be brazed in the liquid mass. The surfaces to be brazed are painted with a flux, and the adjacent parts with an anti-flux. A few months ago nothing definite was known regarding the best preparation for an anti-flux, each experimenter endeavoring to find out the best for himself, but the Joseph Dixon Crucible Co., Jersey City, N. J., placed on the market an anti-flux, known as Brazing Graphite, and repeated tests have so strongly demonstrated its value, that it is not too much to say that the next season will in all probability witness a complete revolution in brazing methods, the liquid process entirely superseding the others. On account of the high degree of heat required even the best of wrought iron vessels possessed but short life. The Dixon Co., on account of their well known reputation as crucible manufacturers, were therefore called upon to furnish some vessel that would successfully withstand the intense furnace heat. They have furnished several styles of graphite bowls, oblong crucibles, and other special styles, but have now manufactured a crucible specially adapted for bicycle manufacturers. An outline sketch is shown herewith. It is 24x6 inches inside, the bottom forming an angle, being 10 inches deep in the middle. It has a 3-inch flange to support it in the furnace, and can be used in either cake, coal, gas or oil furnace. The shape makes it particularly suitable for brazing the crank-hanger joints. Further particulars will be furnished by the Joseph Dixon Crucible Co., Jersey City, N. J.

Improved Clipper Lawn Mower.

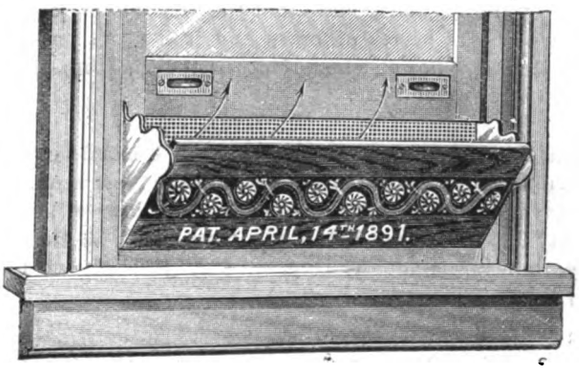
The Clipper Lawn Mower Co., Norristown, Pa., are very successfully pushing their Improved Clipper Lawn Mower, for which some special points are emphatically claimed by the mannfacturers. They state that on account of the simplicity of construction nothing can escape, and that all weeds, dandelions, etc., are cut as effectively as grass; that the height of the grass is immaterial, and that it cuts closely on irregular surfaces and spaces, between fence-posts and along the walks, and among the shrubbery. They call special attention to the fact that the Clipper does

not roll down the grass preparatory to cutting it; that the finger bars and the finger of the mower as it progresses, gather in the grass with a degree of uniformity in nearly an upright position, They say: "In introducing the Clipper to you, we wish to impress upon your minds that there is no use for a sickle or shears where the Clipper is used." The illustration which accompanies this shows a perspective view of the Clipper mower. "In the first place, you will observe that the cutter bar is directly in front of the wheels. The wheels travel over the ground where the grass is cut, never rolling down the standing grass with the wheels. The small gauge wheels at the side are to gauge the height you wish to cut the grass. The knives can be sharpened in the machine with small file or whetstone, or can be taken out and ground, but they must never be sharpened anywhere except on the beveled side of the knives. The Pony Mower has a cutter bar 24 inches long. The wheels are 15 inches in height. The face of the wheels is 2 inches. The handle is much heavier than that of the hand mowers. A V-shaped drag bar is attached to handle irons, to which pony is attached. The mower's weight is about 85 pounds."

The Trinity Chime Bicycle Bell.

A new bicycle bell, possessing a number of very desirable features not heretofore embodied in any bicycle bell, has been invented by A. W. Barton, traveling salesman for the N. N. Hill Brass Co., East Hampton, Conn. It will be called the Trinity Chime Bicycle Bell, and as its name im-

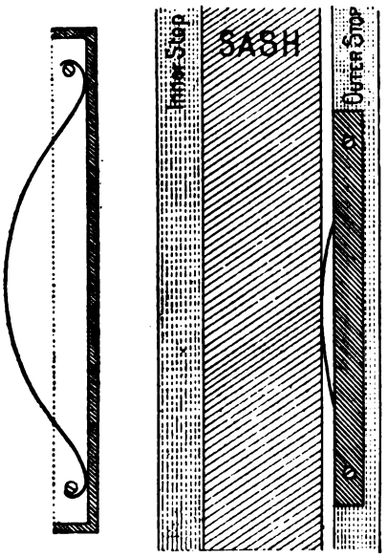
Digitized by Google



plies, is designed to produce tones of a decidedly musical quality. Its appearance is that of an ordinary bicycle bell, but unlike the ordinary bicycle bell, it is composed of two gongs, mouth to mouth, representing two notes of the musical scale in harmony. By means of a simple adjusting

device, the mechanism can be made to strike either single, double or electric strokes at one operation of the thumb lever. When adjusted to give a plurality of strokes, the hammer strikes the two harmonized bells alternately, producing a harmony of tones very pleasing to the ear. Trinity Chime Bells will be manufactured and sold by the N. N. Hill Brass Co., East Hampton, Conn., in connection with their famous line of Sterling Bells.

The Pancoast Ventilator.



We are pleased to show in this connection a very artistic and useful production of the Hardware line, which is being manufactured by the Pancoast Ventilator Co., with offices at No. 316 Bourse Building, Philadelphia, Pa. This article is designed for use in residences, mills, factories, schoolhouses and churches, or elsewhere where ventilation is desired, and some of the special points mentioned in its favor by the manufacturers are that it is handsome, strong, durable and efficient; that it has no back draught at any angle, and the statement is made that it will "exhaust more cubic feet of air per minute than any other storm-proof ventilator made." These ventilators are put together with a patent edgewise brace, which gives the least possible obstruction, and which insures accuracy of construction, preventing sagging from rough usage. The illustration which accompanies this shows the inside view, which gives ventilation without draught. The company further say: "Three-fourths of all sickness can be traced to impure air, because a large amount of time is spent in houses, place of business, club houses, school rooms, churches, theatres, halls, etc. Science estimates that forty per cent. of all deaths occur through neglect of the sanitary precaution of ventilation. The Common Sense Window Ventilator is the simplest, cheapest and most efficient means of ventilating a room

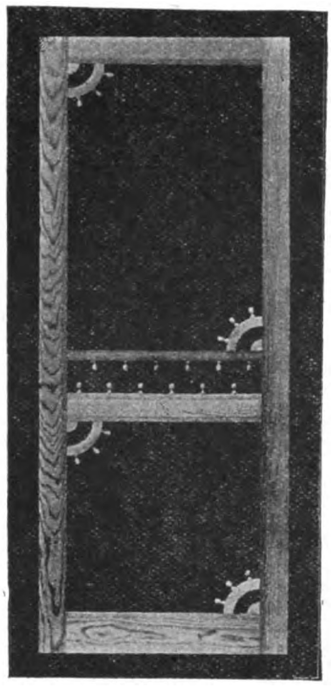
properly, and thoroughly supplies a want that exists in every occupied room, office, store or residence. No other means or appliance will supply the same amount of pure air in as satisfactory a manner. They are neatly constructed, do not interfere with the free use of the windows, nor do their application to windows mar them. The ventilators are made to fit windows of any width; the metal parts are nickel-plated or polished brass; the wood parts are made of the best seasoned wood, finished in the best cabinet style, all of which makes them neat in appearance and very durable." The Pancoast Ventilator Co. are also manufacturers of the Pancoast Special for use on skylights, power fans, ventilating pipes, etc., the Pancoast Building and Chimney Ventilators, and the Pancoast Chimney Ventilator and Cowl. Further particulars as to prices, etc., concerning all these goods, will be sent upon application.

The Triumph Sash Spring.

Gerolt Gibson, No. 115 North Eighth Street, St. Louis, Mo., is placing upon the market a new article which he calls the Triumph Sash Spring. As will be seen by the accompanying illustration, this is a little bow-shaped band of tempered steel, bearing against the inside stop, which holds the sash pressed against the inside stop. It is invisible. The manufacturer states that any carpenter can put it on, and that two pairs of springs equip a double-sash window. The price is fifteen cents a pair. The manufacturer fur-

ther adds that this spring will stop all rattling of windows, will keep out cold draughts, and all dust and soot. Full particulars will be sent to any one who makes application to Mr. Gibson at the above number.

Impending Changes in Patent Law.



On January 1, 1898, important changes in the patent laws of the United States will take effect. These changes will bear principally upon the relation of applications for United States patents and grants made upon such applications to foreign patents for the same invention. In a former number (issue of March 20, 1897) we have commented at length upon the latest amendments to the patent law. We would now draw the attention of our readers, especially those residing abroad and holding foreign patents for inventions not protected in this country, to the necessity for filing United States applications covering such inventions before January 1, 1898. After that date, applications for United States patents may be rejected if filed more than seven months after the date of filing the earliest foreign application. Under the present law, however, valid United States patents may be obtained for inventions patented abroad several years ago, provided the foreign patent is in force at the time the application for the United States patent is filed. This provision is of interest and advantage, not only to the holder of the foreign patent, but to the American manufacturer or capitalist who desires to secure in this country the monopoly for an invention patented abroad and not so protected here.—*Scientific American.*

In the reign of Henry II. carpets were not in use, and it was considered the height of luxury to have the floors strewn with straw or rushes every morning.

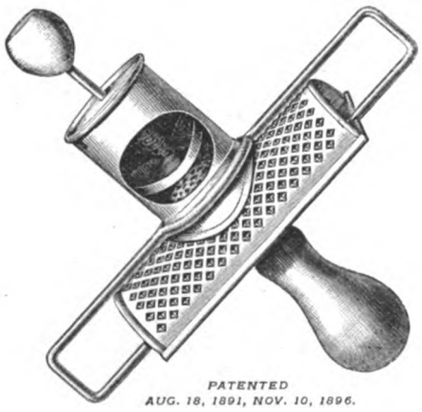
New Pattern Fancy Screen Door.



The A. J. Phillips Co., Fenton, Mich., known everywhere as successful makers of wire screens, snow shovels and specialties, are producing a new pattern Fancy Screen Door, style O, which is sure to attract the attention of the trade. The turned ornaments are of polished white maple. They are beaded and of good proportions. The door is

considerably more than a variation of their well-known Style E pattern, the handsome turned ornaments being an entirely new departure. The door will be made both ⅞ and 1⅛ inches thick, will be of pine finished in a natural color. A catalogue describing this new article, and their general line of goods, will be sent on application. The article above referred to can be fully understood by a glance at the illustration accompanying this.

Edgar Nutmeg Grater.

The Edgar Mfg. Co., Reading, Mass., are manufacturing with a great deal of success, the Improved Edgar Nutmeg Grater, a good idea of which may be secured by investigation of the accompanying illustration. They say that by the introduction of new labor-saving machinery, they have

The EDGAR Nutmeg Grater

greatly increased the efficiency and perfect action of the grater, at the same time so reducing the cost that they can now be retailed at the popular price of 10 and 12 cents. They point out the fact that this article will not clog, does not tire the fingers, nor is there a liability of dropping the nutmeg. It grates the nutmeg very fine, leaving no pieces, and they add: "It is simple, durable, economical and cheap."

Make Automatic Machines.

The Automatic Machine Co., Bridgeport, Conn., have just entered into the second year of their corporate existence, and the year they have just completed has been one exceedingly prosperous, with a full complement of help, working twelve and a half hours per day. They have now in course of construction upward of twenty Automatic Wire-Forming machines, besides over forty other automatic machines and presses of various kinds for various uses. They would be pleased to receive a call from anyone needing machinery of this kind, in order to convince the trade of their ability to design and complete automatic machines.

They know how to do things artistically out on the shores of the great Mississippi. One of the chief exponents of Western art, if the souvenir now on our desk can be taken as an evidence, is Col. James R. Nutting, of the Sickels, Preston & Nutting Co., of Davenport, Iowa. This great concern has issued a handsome series of "Art Studies" in copper etchings from recent paintings, and this attractive souvenir is finding its way, at this Christmas season, into the hands of friends in all parts of the country, It is a work of art fitted to adorn any center-table, while the etchings themselves will bear framing for display upon the walls.

The Magnolia Metal Co., Nos. 266 and 267 West Street, New York city, with branch offices in London and Chicago, are sending their friends a handsome ivory finished calendar, for use during 1898. This makes a beautiful ornament, either for the desk or for the wall, and in addition to informing the user as to the various dates during 1898, also conveys to him a wealth of information, touching the progress which Magnolia Metal has made in its successful endeavor to conquer the world, and to fill the ears of men with echoes of its usefulness.

John Milton Graff, a member of the firm of Graff & Co., dealers in stoves and ranges, in Water Street, New York, died on Saturday, December 11, at his home, No. 118 St. James Place, Brooklyn. He was born in Spencertown, N. Y., December 21, 1835. He spent his early manhood in Hudson, N. Y., and came to New York city twenty-eight years ago as a member of the firm of Burtis & Graff, which was succeeded by the present firm. Mr. Graff was a Republican in politics. He leaves a widow, a son and two daughters.

T. F. Welch & Co., No. 65 Sudbury Street, Boston, Mass., have published a four leaf circular containing illustrations and descriptions of dozens of the special articles manufactured by them. They state that they have over 3000 sizes of the different styles of brass and iron gears carried in their stock. They also manufacture steel shafting, springs, thumb screws, etc., etc.

The Hardware, stove and tinware dealers and dealers in agricultural implements of Auburn and Lewiston, Me., have reached an agreement to close their stores hereafter all day Thanksgiving, half a day Christmas, all day Fast Day, half of Memorial Day, all day July 4th and Labor Day.

R. Christensen, No. 88 Chambers Street, New York, has a couple of very eligible offices, and desk room only, to rent, in the most desiaable location on the Street. They are steam-heated, and include the services of porter without extra charge.

J. W. Hughes, late of McIlwaine, Linn & Hughes, who is sole agent for W. & S. Butcher for the United States, is now located at No. 79 Warren Street, this city.

Review of the Markets.

Business—that is, general business—has kept up so favorably among the retailers, it compares with the trade of a year ago by being largely increased. Seasonable goods have been distributed, however, only in a limited way; the season has been so pleasant, so free from positive wintry conditions in the way of heavy snows and zero weather generally, that snow shovels, sleigh bells, skates, sleds and trade to make up orders for future delivery, the desire being shown of limiting all purchases to a present delivery during this month. Should unnecessary delay take place in the completion of the organization, this condition may continue for a few weeks longer, as the trade not being in pressing need of a heavy stock at this time, will hold off as usual until a tendency to strengthen the market is more clearly perceptible. Prices continue as quoted previously,

SARGENT & CO.'S LIST.

REVISED LIST, DECEMBER 4, 1897.

The changes in list prices are indicated by the heavy face type.

similar goods have not yet been bought so liberally as the dealer hoped for. The jobbers are finding a lessening demand for staples, and with the annual inventory on their hands, have enough to occupy their time and attention to make any orders but special ones assume any importance.

Wire Nails: The absence of any definite date when the consolidation of the wire interests shall take effect, has had the influence on the market of keeping prices steady on this leading staple. There has been no pressure upon the $1.40, base, for carload lots at mill. New York quotations are: $1 55 for carload lots on dock, and $1.60@$1.65 for smaller lots from store.

Cut Nails: As usual with the end of the season, the sales of cut nails are very light by comparison with wire nails, although indications point to a greater use being made of them during the coming season, especially if the control of the wire output will have a tendency to still further widen the difference in prices between the two lines. Prices continue without important change, although a good

Digitized by Google

sized order could doubtless be placed slightly below the present current quotations, which are: $1.15 for carload lots at mill. New York prices: Carload lots on dock, $1.30; smaller lots from store, $1 40.

Padlocks: For 1898 business, the manufacturers of Wrought Iron Padlocks have issued revised price lists, changing lists on a number of styles which at the prevailing discount have been sold for some time without much profit. The discount remains as previously quoted at 75@80%.

The list announced by Sargent & Co., New Haven, Conn., and New York, is given herewith, the heavy face type indicating the changes.

We give a *fac simile* of it, in order to show methods adopted by their catalogue department to convey information of this kind, and which deserves to be followed by every manufacturer.

The following is the list of the Russell & Erwin Mfg. Co., New Britain, Conn, and New York:

Screws: The low prices so long prevailing on this leading line had prepared the trade to expect at any moment a change in quotations. The manufacturers have been trying for several weeks to agree to some uniform scale of discounts, on which the business of 1898 could be safely solicited. The tone of the market has become sufficiently firm to warrant the following announcements, which will doubtless be followed later by other leading manufacturers: Russell & Erwin Mfg. Co., New Britain, Conn., and Nos. 43-47 Chambers Street, New York, have issued, under date of December 22d, the following discounts:

Flat Head Iron	87½ and 10%
Round and Oval Head Iron	85%
Flat Head Brass	87½ and 10%
Round and Oval Head Brass	85%
Flat Head Bronze Metal	85 and 10%
Round and Oval Head Bronze Metal	85%
Flat Head Japanned	85%
" " Iron Screws, Blued	5% advance on net

P. & F. Corbin, New Britatn, Conn., have issued, under date of December 22d, a similar announcement, as follows:

Flat Head Iron	87½ and 10%
" " Japanned	85%
" " Brass	87½ and 10%
" " Bronze Metal	85 and 10%
Round and Oval Head Iron	85%
" " " " Brass	85%
" " " " Bronze Metal	85%
Flat Head Iron Screws, Blued	5% added

As the prices long prevailing on screws have been acknowledged unprofitable to all concerned, there is no doubt the increasing cost of raw material will make advanced quotations possible throughout the entire line.

Shovels and Spades: The manufacturers who were in convention assembled on the date of our previous issue, spent more time than was at first anticipated, but the few differences arising were quite harmoniously settled, and the combination is undoubtedly stronger than ever. Although in the opinion of some, a stiffening of the market by advanced prices would be deemed good policy, the majority were opposed to unsettling the present satisfactory conditions, which were consequently permitted to continue.

Linseed Oil: The Dean Linseed Oil Co., No. 181 Front Street, New York, under date of December 21st, quote advanced prices as follows: In lots of less than 5 barrels, 43 cents per gallon; in lots of 5 barrels or more, 42 cents per gallon. The 5-barrel price only applies to deliveries of that quantity at one time. Boiled linseed oil, 2 cents per gallon higher than raw. Calcutta oil, 54 cents per gallon.

THE COLUMBUS TRADE.

The year of 1897 will soon be a thing of the past, and business men can reflect while smoking their pipes of peace, and decide whether they have displayed good business sense at all times or not. If we are not badly mistaken, some transactions will loom up that will compel most Hardware jobbers to admit that they have made mistakes that might have been avoided. The question is, Will they repeat them in 1898? The failure of a large Chicago jobber is proof that there is danger in doing business on the ridiculous margins that have prevailed on many goods during the past few years. It is an undisputed fact, that it costs money to sell goods. Whenever a manufacturer, jobber or retailer gets a notion that he can do business on a five per cent. margin of profit, somebody suffers. If Hardware dealers will go over their purchases and see what a large per cent. of their purchases are staple goods, they will be surprised, and many of the staple goods do not pay the cost of marketing them.

Another disease dealers are troubled with, is the habit of selling goods at the old price as long as their stock lasts, after manufacturers have made an advance. They seem to think their competitor was not so lucky, and they will make it warm for him. They forget that the other fellow is more than likely as well provided for as they, and also forget the many times they have had good stocks, when manufacturers dropped the price 10 to 20 per cent. With the small margins, and the many decline in prices, it is absolutely necessary to get the occasional advance. We know a jobber that was selling a certain article at five per cent. less than he could replace it for, and as it was a staple article, he soon unloaded, and then he tried to contract for more of the same article at 10 per cent. more than he just unloaded at. No doubt this jobber thought he was doing something smart. Possibly he was, but we cannot figure it out that way. It is a common thing for retailers to act just as foolishly. We have often heard them say, "Well, I have a pretty good stock, and my competitor has to buy at the new price and I will get some of his trade." Of course his competitor will sell just as low, if he makes nothing; and the lucky one loses an opportunity to get back part of what he lost by a decline on some other articles. Business is a peaceful warfare. While we believe a fair

Digitized by Google

fraternal feeling is springing up between dealers, there is, no doubt, still room for improvement in that direction.

The year of 1897 has been a great improvement over 1896 in the volume of business, but we cannot see any improvement in the margin of profit. We believe that with the general increase in business and the bettered condition of the farming community, the cutting that has prevailed for the past three years will not be as great in 1898. We hear of a number of improvements in the way of new buildings in our city for the next year, and think it is true of other cities. We fear the new nail and wire deal (if consummated) will interfere with building and farm improvements. If the deal goes through, there is a danger of prices being advanced too high. The syndicate claim there will be a great saving in expense by concentrating the business. This is, no doubt, true, but who is going to get the benefit of this saving? Are they doing this in the interest of the consumer or are they getting ready to make them throw up their hands while they rob them? We hope they will be satisfied with a reasonable profit, which no one will object to. Time will tell.

Wishing our many friends a merry Christmas and a happy and prosperous New Year, we say good-bye for 1897.

SMITH BROS. HARDWARE CO.

THE BOSTON TRADE.

Although the close of the year is at hand, there seems to be a good demand for general merchandise, but certain seasonable goods which depend upon weather conditions are not moving as readily as we might wish.

One reason why trade keeps up is because of the conservative purchases made during the past few months. Nowhere can we find stocks larger than is consistent with present demands of business.

There is an absence of that speculative spirit which was so rife a few years ago, and even the possibility of a new wire and nail trust has little or no attraction for the would-be speculator.

The outlook for higher values is not as encouraging as we would like to see it, and this is especially noticeable in certain lines of spring goods which are being offered by the manufacturers regardless of cost of production.

Every one is getting ready for his annual inventory, and but few orders are being placed for wants beyond immediate demand. FRYE, PHIPPS & CO.

THE BIRMINGHAM TRADE.

In looking back over the year to see what progress has been made, while we see many things that we would have had otherwise if we had the choosing, yet we are able to note progress. In this vicinity we have two large cotton mills nearing completion, one oil mill at work, one fertilizer plant ready for work, one powder mill which will soon be after orders, one steel mill in full blast, some new business houses, many nice new residences and other plans in the hands of the architects. In addition to this, a railroad has been built across the State, and we see from the newspapers that other lines of road will be built next year, and so we look to the future with hope. Many of our people feel discouraged at the low price of cotton, while their brethren of the West are obtaining such nice profits on wheat, but sometimes what seems to be a hardship proves to be a blessing in disguise. We will hope that it is so in this case, since that is the only bright side to the question. If it shall result in cutting down the surplus and causing a wider diversification of the crops, the ultimatum will have been reached. In order to make the large crops of cotton, our farmers depend too much upon the West for corn, mules, meat, hay, etc., and in order to pay for same they must sell their cotton too cheap and pay higher for these products. It does look as if they had had object lessons enough already, but they seem to learn only in the dear school of experience. We note they are now holding conventions and resolving to cut down the acreage the coming year. This is a good resolution, but like many other good resolutions, by all classes, we fear it will die with the resolving, and never be adopted until the powerful hand of necessity is laid upon them.

We are glad to note the tendency of our Southern people to take up the manufacturing of our great staple, for this surely is the most advantageous territory, when all things are considered. We note they are able to make the market prices on such goods as they are making, and will be able to do so with other lines as they add them on. We have a great country, and our section has much promise of a brighter future. When it is considered that Alabama can compete with the world in the cheapness of the production of pig iron, steel, coal and cotton, why should we not have an influx of population, which will bring trade in all lines? The financial question will ere long be settled on a better basis, so will the tariff, and when these great questions are properly adjusted we may look for better things.

To reach a general conclusion, we would say we have much reason to be hopeful—even though Congress is again in session. MOORE & HANDLEY HARDWARE CO.

THE DAVENPORT TRADE.

After the calamity that has just occurred to the Hardware trade in Chicago by the failure of one of its oldest and staunchest houses, it would seem proper that what few houses are left there, should return to the time-honored custom of charging for case and cartage. They claim the honor of being the first to advertise they had discontinued this charge, and hence they should be the first to admit that it was a mistake. Why should we not charge for packing cases and carting Hardware? We pay men good cold cash every Saturday night for doing this work.

Digitized by Google

Cases cost money as well as the merchandise they contain, and so far we have been unable to get draymen to cart our goods without a consideration.

Even Uncle Sam charges as much for carrying a package one block as he does for hauling it across the continent. A customer readily pays the freight carried on railroads five miles, but if the same goods are sent to him on a dray ten miles, he is not even presented with a bill for the service. Prices quoted on the different lines we sell in *Hardware* and other trade papers do not add the cost of packing, cartage and cases to their printed schedules. These quotations reach the heavy as well as the shelf or general Hardware trade. If a dealer buys in Chicago of a heavy Hardware house, he pays for boxing and draying; but if he buys the same goods from a shelf Hardware house at the same prices, there are no such charges made. We do not expect to get something for nothing; why should we be so eager to give something for nothing?

Since we very foolishly decided to follow Chicago in this no case and cartage departure, we have given away thousands of dollars in this manner, and no customer has shown his appreciation by even a "thank you." Why do we persist in making ourselves appear ridiculous by such gifts as twenty-five per cent. dray tickets and second-hand packing boxes? We pay for all kinds of packing, and will be compelled to do this as long as we live, and the first bill that will be presented to our heirs and assigns after we have climbed the golden stairs and begin pushing silver-lined clouds, will be for case and carting.

SICKELS, PRESTON & NUTTING CO.

THE PITTSBURG TRADE.

Consolidation seems to be considered the cure for all ills in business at present. Both manufacturers and merchants seem to think that they can save in expense account, and stop competition, by this means, so the big aggregations form, and time alone can demonstrate the wisdom of this plan of operation.

In theory, it works out all right; in practice, we have noted some successes and some failures.

With the rapidly accumulating capital in our country seeking profitable investment, the managers of these big consolidations dare not advance prices beyond a fair manufacturer's profit, without inviting new competition. In some lines it may take several years to develop such new competition, and no doubt in some cases the old owners count on present profit, and let the future look out for itself, but with the immense productive capacity of our manufacturers, it would seem to be the part of wisdom to be satisfied with a smaller profit, and thus disarm new competition.

The year now closing has not been so good as was generally expected, yet it has shown an improvement in this: that although prices of all manufactured goods remain very low, there are more men employed and more works busy.

The good crops and increased prices secured by the farming population must increase their purchasing ability, and their demands will, without doubt, keep the wheels moving.

The increasing export of our products in iron and steel is a most encouraging feature of the situation, and offsets to a considerable degree the disappointment of low prices.

The local jobbing trade is in fair volume for this season, rather ahead of December, 1896.

Stock-taking will occupy our attention soon, and then the books will tell the result of our year's work.

LOGAN-GREGG HARDWARE CO.

THE PHILADELPHIA TRADE.

The end of 1897 finds jobbers, as usual, in the midst of stock-taking, which, added to the duties of the holiday season, gives them very little time for reflection, or even for the joys of Christmas, and it now remains to be seen whether the results will gladden the hearts of those interested, and this applies to small as well as large dealers.

We feel that we cannot impress too strongly upon all dealers the necessity of annual inventory. In these years of declining prices, the natural tendency is to over-estimate the amount of stock on hand, and many a man, who puts off stock-taking from year to year, is confronted by a most unpleasant surprise when he finally takes account.

Stock-taking, therefore, should be rigorously taken every year. Old and depreciated goods should be marked down, or taken as worthless, and weeded out, while all goods should be estimated at the lowest cost. There is no use in making a profit on paper, and when a man over-values his stock, this is simply what he is doing. If favorable results are there, it will show, and nothing is gained by concealing.

Business, of course, as is usual at this time of the year, is quiet. Salesmen are off the road, overhauling their books; and until the first of the year there is a general lull, which, however, may be broken at any moment by a spell of cold weather, and consequent demand for skates.

In reviewing 1897, we may say it has been an exceptional one in the history of trade. Prices which were supposed to be low at the end of 1896 have gone still lower, while trade in the East has been somewhat slow to feel the general improvement which is so markedly manifest in the West. It certainly seems as if better times were in prospect for 1898, and it seems reasonable to suppose that higher prices will rule in many cases.

BIDDLE HARDWARE CO.

THE DENVER TRADE.

Denver jobbers in all lines appear to have been very busy during past three months, and are "still in it." The results of enormous crops and good prices for all products,

COMMON SENSE IN RUBBER.

Belting,
Garden Hose,
Water Hose,
Fire Hose,
Suction Hose,
Steam Hose,
Air Hose,
Tubing.
Packing.
Gaskets,
Valves,
Rubber Tiling,
Rubber Matting,
Emery Wheels,
Specialties,
League Tires.

When one business man asks another for his trade, it is not sufficient to make claims—there must be reasons. That is one of the advantages of high grade goods—they fairly bristle with reasons. Take water hose for instance—you don't have to be a rubber expert to see that the vital point is the tube; for if it leaks, the layers of duck at once begin to rot. Leaks come from pin holes or cracks in the tube. Fine rubber does away with both—with pin-holes because it contains no foreign matter to interfere with the mixing—with cracks because the rubber is elastic and not injured by the continual bending and twisting of the hose. **All sizes and grades of our Garden and Water Hose have tubes of exceptionally fine rubber, elastic, seamless and lasting. Full line for '98 now ready.** Call or write.

Confectioners' Heaters, Bicycle Pumps, Wall Torches, &c.

Union Heater Supply Co.,* 91 Congress St. E., *Detroit, Mich.

as well as the increased gold product of the State, are making themselves felt in all lines of business. A most disastrous freight war among the all-rail and rail and water lines from the East to our territory has been raging for weeks past, with no apparent sign at this time of coming to an end. Its result cannot be estimated until peace is restored, but its immediate effect has been no satisfaction to any one that we can learn.

The quiet winter season is approaching, but we anticipate that it will be short, and spent chiefly in stock-taking and preparations for renewed activity in the spring.

In the local situation we can see only brightness ahead, which will be fulfilled in a good business for Colorado in 1898, unless general conditions in the country at large are made worse instead of better. This, we hope, no one expects. GEORGE TRITCH HARDWARE CO.

THE ST. PAUL TRADE.

The business of these closing weeks of the year has proved very satisfactory, in that there is some increase in the volume of sales, and a marked improvement in collections over previous years. In fact, collections were never better than they have been during the past two months. In the past, the farmers, and others, have shown a disposition to hold back some of their dollars, evidently fearing that more would not be forthcoming to replace them. Now the strongest confidence prevails that better times are at hand. Farm mortgages are being paid off, and the money received is steadily flowing back to the East, from whence it came, as the old demand for it has ceased to exist.

The holiday trade has been good. The average person felt more like making presents than he did last year, or the year before. This is another indication of the improved condition of things.

The rumors of the formation of "trusts," or "pools," or whatever they may be called, in certain lines, causes the market in these lines to be rather feverish and unsettled, but we can always expect to be stirred up more or less in this way, and we cannot all of us be on the right side all of the time.

We believe that a firmer tone in the market on all lines would be a welcome condition, and with the general increase in business that seems so well assured, can we not reasonably expect it? C. W. HACKETT HARDWARE CO.

THE OMAHA TRADE.

December, up to the present time, has shown an exceptional record of trade. The latter part of November was a little inclined to be quiet, as all the farmers appeared to be busy gathering their crops, but the first of December started in with a snap and a bang, and has not shown any signs of lessening.

From present indications, December, in all lines, will be the heaviest December for a great many years.

The unsettled conditions prevailing in the matter of freights for some time past, promise to pass away with a series of good resolutions to be adopted on the first of the year, so that prices on staple goods will undoubtedly rule materially higher after that date.

Collections are all that could be asked for, and the general prospects for the coming year are very materially improved over those of a year ago.

RECTOR & WILHELMY CO.

Trades and Their Patron Saint.

No fewer than forty-two trades have their patron saints, mostly chosen because the selected saints worked, or were supposed to have in their lifetime worked, at that particular occupation, and therefore fitted themselves to watch over, guard and protect those engaged in it. The following list gives the names of the occupations and their respective patron saints:

Armorers, St. George; artists, St. Agatha; bakers, St. Winifred; barbers, St. Louis; bookbinders, St. Louis; booksellers, St. John; brewers, St. Florian; brushmakers, St. Anthony; burglars, St. Dismas; candle makers, St. Lucian; carpenters, St. Joseph; carpet weavers, St. Paul; clothworkers, St. John; divines, St. Thomas Aquinas; doctors, St. Cosme; dyers, St. Maurice; ferrymen, St. Christopher; fishermen, St. Peter; goldsmiths, St. Eloy; hatters, St. William; huntsmen, St. Hubert; lawyers, St. Yves Helori; locksmiths, St. Peter; mariners, St. Christopher; millers, St. Arnold; miners, St. Barbara; musicians, St. Cecilia; mailers, St. Cloud; netmakers, St. James; nurses, St. Agatha; painters, St. Luke; pinmakers, St. Sebastian; potters, St. Gore; shepherds, St. Windeline; shoemakers, St. Crispin; spectacle makers, St. Fridolin; tailors, St. Goodman; tanners, St. Clement; tax collectors, St. Matthew; tent makers, St. Aquila; travelers, St. Raphael; wheelwrights, St. Boniface.—*Tit Bits.*

The Nova Scotian Iron Industry.

Nova Scotia has for years been trying to build up an iron industry, but so far no great success has attended these efforts, although the Canadian Government have loyally assisted those who were disposed to invest their money in the iron industry by granting very substantial bounties. As much as £17,000 has been paid to the Nova Scotia Steel Co. for nine months' work in producing billets made in Canada from pig-iron manufactured in Canada from Canadian ores. The bounties on billets, which for a long time stood at 8s. 4d. a ton, have lately been increased to 12s. 6d.; but, nevertheless, the Nova Scotia Steel Co. have lost something like £1000 in the year 1896–97, and this in the face of large reductions in the wages of the workmen and the salaries of the officials. The Londonderry Iron Co., also of Nova Scotia, who for several years past have paid no dividends, have apparently given up the business as a bad job, and are offering their works for sale.—*Iron and Coal Trades Review.*

The Troy Nickel Works, Albany, N. Y., are sending their friends a cute little leaflet entitled "Service," which shows some wonderful illustrations of the American citizen under various phases, and also conveys the impressive fact that the Alaska goods, manufactured by this well-known company, are "Always Cold."

To Educate the Salesman.

One of the latest forms which practical education has assumed is to teach the young man how to become a successful salesman. It is an important factor in commercial and manufacturing life, this art of disposing of a product once ready for a market, or of finding purchasers for commodities bought for a profitable resale, and the education of the efficient salesman is therefore a matter of supreme interest to the captains of industry. At these new schools of learning, we gather from fragmentary information, the aspiring salesman is thoroughly initiated into the mysteries of securing a reluctant order.

A novice with greater ambition than penetration of mind once upon a time went on the road on a salary, but day after day sped by and no orders went in to the house. The manager finally felt it his duty to tell him that he would probably never sell a machine. "Just wait till I find some one who wants to buy and see if I can't sell," was the reply. Alas, for the young man. He failed to grasp the elementary principle that his mission was to convince, not to search.

But at this school for salesmen the inexperienced youth is to be given an exhibition of how to make a sale. The second step is to place him in the fictitious marts of trade and require him to make the sale which he has just seen brought to a successful issue. And so by degrees the curriculum expands until the student receives his diploma and goes forth to encounter the genuine buyer. It might be premature to compute the increased percentage of efficiency among salesmen which will result from the new school. It will not be known until the new education is thoroughly tested.

It is proper to remark, however, what a great boon the development of 25 per cent. greater efficiency in the salesman would mean to trade. Business is essentially aggressive. The trader who sells glass beads to the painted savage entices the barbarian to buy after he has found him, and from that primitive transaction up to the sale of a railway, spanning a continent, there is almost invariably present in the negotiation the element of personal insistence.

Civilization owes a huge debt of gratitude to this aggressiveness of trade. It constitutes the pressure that uplifts the social fabric and brings in its train the material comforts that distinguish present life from the more primitive type of existence. If buyers were let alone, if the manufacturer and the merchant made no effort to sell, rapid deterioration would immediately begin in all branches of trade. Modern progress would be at an end.

It will probably be discovered that the salesman, like the poet, is born, not made; but if the general average should be raised a little, the world would be the great gainer.—*Industrial World.*

The Modern Trade Journal.

I do not hesitate to put forward the assertion that the "rank and file" of trade papers show more intellectual cleverness in their advertising columns than can be found anywhere else in the journalism of America.

There is not a single representative trade journal that in some way or other does not possess a redeeming trait in this respect, and a great many are as artistic, clear-cut and scintillant as the business pages of any of the high-class literary magazines.

The trail of the amateur ad. writer has not yet ensnailed itself through their columns, but the outcrop of the sturdy brain of the practical up-to-date business man is there in all its forceful comprehensiveness, sight-compelling typography, great good humor of "the shop," and unmistakable acquaintance with the technique of the goods written about.

The best humor in American advertising to-day is in the trade journals.

The most forcible advertising language is in the trade journals.

The business announcements, that are couched in the most gentlemanly, well-bred college-put English are to be found in the trade journals.

The greatest percentage of terseness and compressed intelligence is in the advertisements of the trade journals.

The best models of artistic typography and engraving are to be found in the advertising columns of the trade journals.

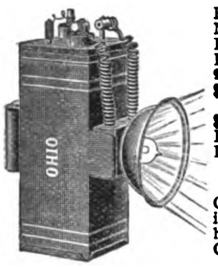
The trade journal is a development, not an experiment. It is the evolution of the circular, the booklet and catalogue into a full grown, end-of-the-century periodical, taking on increased vigor and enlarged facilities at every stage. Considered as a class, it is the embodiment of progressive ideas and the exponent of what is modern and new.—*Advertising Experience.*

Paternal Failure.

When the young man called to ask for the old man's daughter the latter naturally thought it was necessary to put up a good bluff, that being the usual method of procedure. Consequently he looked solemn, coughed once or twice as a sort of preliminary, communed with himself a minute or two, coughed again and asked:

"Can you support her in the style to which she has been accustomed?"

"If I couldn't," returned the young man, promptly, "I ought to be ashamed of myself."



The old man's bluff was called.—*The Chicago Post.*

Nothing associated with rapid transit or means of transportation has secured as much public attention in Europe as the motor carriage. In both Paris and London numerous stock companies have engaged extensive capital to operate horseless vehicles. In the gay capital of France, the motor driven voitures, as the cabs are called, are a common sight in the boulevards and avenues. At the coming Sportsmen's Show in Madison Square Garden, New York, the exhibition of motor cabs and carriages will form no unimportant feature of what promises to the most interesting exposition the famous amphitheatre ever sheltered.

A German Cyclist's Brake.

"We Americans traveling abroad are apt to be very proud of our reputation for cleverness," said a tourist who went bicycling in Europe last summer. "And no doubt we have reason to be. But I am going to tell you how I had some of the conceit taken out of me.

"We were going through Switzerland, and had reached the close of the first day's descent toward Geneva. The road had been too steep to coast without the aid of a brake, and as we were afraid to use our brakes for fear our tires would not last us through our trip, we back-pedalled all the way.

"As we were sitting after supper on the veranda of the lodge discussing the fatigue of our unusual exercise, and dreading the morrow, which meant more of the same sort, our attention was suddenly called to a cloud of dust descending the mountain side. Then we saw a cyclist, coasting as nice as you please, towing a good-sized sapling by a rope tied to the rear of his wheel, which acted as an effective brake without injury to the tires. One of the boys ejaculated: 'Well, why didn't we think of that?' The rest were simply dumb. That man was a German, I now take off my hat to our German brethren of the wheel."—*New York Sun.*

Cowbells.

One of the comparatively few things that the hand of improvement has not touched is the cowbell, which is made now just as it was fifty, a hundred, and more years ago, and has now just the same peculiar clanking sound as ever. Cowbells are made, some of copper and some of a composition metal; but most of them are made of iron and finished with a coating of bronze. The cowbell is not cast; it is cut from a sheet of metal which is folded into shape and riveted. The metal loop at the top, through which the strap is passed, is riveted into the bell. Cowbells are made in ten sizes, whose sounds range through an octave. Sometimes musical entertainers who play upon bells of one sort and another come to the manufacturer, and by selection among bells of the various sizes find eight bells that are accurate in scale.

There are only four factories in the United States in which cowbells are made, and in each case the cowbell is only an item of production among many other things. Cowbells are sold all over the country, just the same as ever, but much the greater number are sold in the South, the Southwest and the West, where farms are larger, less likely to be under fence, and cattle are more likely to stray. There are sold in those parts of the country a hundred dozen cowbells to every ten dozen sold in the East. American cowbells are exported to the various countries of South America and to Australia.—*Exchange.*

A horse will live without solid food for twenty-five days, provided he is given drinking water; but will exist only five days upon solid food without any liquids.

Situations Wanted.

EXPERIENCED traveling salesman, familiar with the jobbing trade, wants to better his future by connecting with a house where he can grow. Highest references from present employers. RETAIL TRADE RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Hardware Stores.

Boyne City, Mich.—Herron & Son have recently established a Hardware store. They will handle Hardware, tinware, cutlery, guns and ammunition.

Eau Claire, Mich.—Chas. F. Howe, Hardware, has opened a new store.

Jersey City, N. J.—R. C. Beard & Son.

Lafayette, Ind.—John Lanner is making arrangements to open a Hardware store and tin shop.

Lawrenceville, Va.—Sledge & Barkley, Hardware, etc., have opened new store.

Louisville, Ky.—The Bridgeford Hardware Co. have filed articles of incorporation with the Secretary of State. Capital, $75,000. C. W. Adams and others are the incorporators.

Milford, Del.—The store formerly occupied by Thos. F. Hammersley, in Jump's Block, has been rented by Walter H. Davis, of Camden, Del., who will occupy it for the sale of Hardware.

Richmond, Va. — A charter has been granted to the Richmond Hardware Co. to do a general Hardware business. The capital stock is not to be less than $10,000 nor more than $20,000. The officers are as follows: President, William H. Parrish; vice-president, M. H. Isbell; secretary, W. D. Green; treasurer, W. H. Parrish; manager, Samuel H. Wilkinson. The directors are the above and A. J. Parrish and Susan E. Parrish.

Somerville, N. J.—W. I. Honeyman.

Trenton, Mich.—F. Bailey & Co., Hardware, tinware and stove store, have opened a new store.

Upper Montclair, N. J.—A. A. Sigler & Son.

Worcester, Mass.—William T. Sykes has opened a Hardware store and tin shop at the corner of Cross and Church Streets.

Changes and Improvements.

Bixby, Minn.—H. K. Dimmick, Hardware and blacksmith, succeeded by Joseph Huderlick.

Centerville, S. D.—C. C. Grimsley, Hardware, succeeded by L. B. Thompson & Co.

Columbus City, Iowa.—W. W. Dunham has traded his stock of Hardware to W. W. Orr and R. M. Moore for their farms. They will take possession January 1st.

Elkhart, Ind.—The sale of the Jones Hardware Co.'s stock by assignee D. M. Best took place recently, and Edgar T. Parker, of Hillsdale, was the successful bidder.

Fort Valley, Ga.—The firm of Tonner & Co., doing a grocery and Hardware business here, have sold to the Exchange Bank. The amount of their indebtedness is not known. Dull business and poor collections are said to be the cause of their selling out. This firm has been doing business here for quite a while.

Fremont, Neb. — Theo. Huette & Son, wholesale and retail Hardware, succeeded by Jones & Hobbs.

Hampton, Mass.—J. W. Mason has recently sold his grocery, grain and Hardware business for $5000 to Ernest Cole, a hustler in trade.

Henderson, N. C.—C. E. Wilson, grocery and Hardware departments, has remodeled his store.

Jeffersonville, Ky.— T. J. Lindley has bought the entire stock of Hardware belonging to the firm of Lindley & Fry, assigned.

La Porte, Ind.—The Webber Hardware Co.; H. C. Wilhelm has sold his interest in the business, and will sever his connection with the establishment.

Macon, Ga.—Etheridge & Baker, who have been conducting a general Hardware business at No. 317 Third Street since October, 1889, have made some very extensive additions to their line of business, and to make room, have rented the adjoining store, No. 319, formerly occupied by S. Jones & Co. They now have one of the most commodious, as well as convenient and well arranged Hardware and house-furnishing stores, not only in Macon, but in the South, enabling them to display their large and well assorted stock to the very best possible advantage.

Marlboro, Mass.—Bradley & Brigham, dealers in stoves and tinware, have moved their stock into the west factory owned by J. B. Billings on Main Street.

New Cumberland, Pa.—Mr. Conley, of Parkersburg, has purchased Jacob Eichinger's Hardware store on Market Square.

New London, Conn.—Henry M. Whittemore, of New York, has purchased the Hardware business which has been conducted for a number of years by Daniel Latham, at No. 143 State Street. Mr. Whittemore will continue the business at the old stand and also the repair shop.

Newport, Vt.—F. W. Caw, of Lancaster, N. H., has purchased of A. F. Benjamin his stock of tinware and stoves.

Northwood, Iowa.—John Opsthus is now proprietor of the W. I. Brebner Hardware store. The deal was made about a week ago and the new proprietor has taken possession.

Pleasant Hill, Mo.—Russell & Gustin, Hardware, reported to have dissolved partnership.

Prattville, Mich.—Clark & Gallup start out as a good team in the Hardware store purchased from H. E. Iseman.

Staunton, Va.— Worthington Hardware Co., wholesale and retail Hardware, have moved into their new building fronting on both Main Street and Central Avenue.

Torrington, Conn.—Dwan & Harrington, stoves and plumbing, succeeded by J. J. Dwan.

Weimar, Tex.—L. Fahrenthold, dealer in tinware, pumps, windmills, etc., has sold out business to G. Buske.

Welcome, Minn.—H. A. Miller, Hardware, etc., succeeded by Welcome Hardware Co.

Business Embarrassments.

Cambridge, Mass.—George W. Barnes, Hardware, reported to have made an assignment.

Eaton, Ohio.— Bonner Bros., Hardware and implement dealers of this place, have assigned to George H. Kelly. Assets about $10,000. Liabilities unknown, but not quite as large as assets. They are successors of W. A. Bonner, the leading Hardware dealer in this place for many years.

Fitzgerald, Ga.—The Boyd Hardware Co. has closed its doors for the benefit of creditors.

Hochheim, Tex — A. Timm, doing a Hardware and blacksmith business, has filed deed of trust, naming A. A. Ross as trustee. Assets and liabilities are not known.

Johnstown, Pa.—F. W. Hay & Son, Hardware, tinware and stove dealers, have assigned.

Lyons, N. Y.—County Treasurer Richard T. Ellison has been appointed by Justice Davy as receiver of the firm of Noble & Tromer, Hardware merchants doing business at the corner of Water and Broad Streets.

Melrose, Mass.—Wm. A. Burrell made an assignment on December 6th.

Remington, Ind.— Hardy Bros., Hardware, have failed.

Taylor, Tex. — Robertson & Prewitt, Hardware, house-furnishings, etc., stock sold for the benefit of creditors.

Toledo, Ohio.—Henry Katsche, a Hawley Street Hardware dealer, has made an assignment for the benefit of his creditors to John Burton. Slow collections and poor business are given as the causes. Assets and liabilities are not stated.

Burglaries in Hardware Stores.

Lincoln, Neb.—Humphrey Bros., $250.

Mount Vernon, N. Y.—A. Templeton, knives and shotguns.

Putnam, Tex.—J. J. Sigler, Hardware, store burglarized, and about $500 in cash taken.

Sanborn, Minn.—Poss & Gleason, Hardware, store burglarized.

Recent Fires.

Collins, Iowa.—John B. Jones, implement store, destroyed by fire.

Ellston, Iowa.—W. Q. White, Hardware, etc., destroyed by fire at a loss of $900; insured for $600.

Evart, Mich.—The Evart Hardware Co., damaged by fire at a loss of $3000.

Hemple, Mo.—R. A. Sodowsky, Hardware, destroyed by fire.

Providence, R. I.—G. P. Patterson, $10,000.

Scottsburg, Ind.—J. M. Price, Hardware, etc., destroyed by fire at a loss of $1500; insured for $1000.

Toledo, Ohio.—Charles Ullrick & Co, $1500.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over are requested to contribute to this page. News of new factories or companies, changes, improvements, etc, will be gladly received, and promptly published.

New Companies, Etc.

Albany, N. Y. — The Self-Sharpening Plow Co. has been incorporated by Charles L. Dow, John J. Gallogly, George R Meneely, M. S. Northrup and Henry Norris, to manufacture, buy and sell plows and other inventions of Charles L. Dow, especially self-sharpening plows. Capital stock, $125,000.

Baltimore, Md.— The Columbian Mfg. Co. has been incorporated by Edmond J. Murphy, William S. Ryon, Forrest Bramble, Frank D. Gosnell, William G. Towers, James A. Gawthrop and Gustave W. Ridgeley, for the manufacture of novelties. Capital stock, $20,000.

Hartford, Conn.—American Specialty Co. has been incorporated by J. H. Knight, C. E. Billings and G. J. Capewell, to manufacture specialties. Capital stock, $100,000.

Madison, Wis.— The Broadway Implement Co., of Superior, with a capital of $75,000, has filed articles of incorporation.

Moselle, Mo.—The Moselle Iron Co. has been incorporated by J. Craig Smith, J. A. Powers, S. N. Taylor and others. Capital stock, $25,700.

Providence, R. I.—Articles of incorporation of the W. E. Burrett Co. have been filed. The company is formed for the purpose of carrying on the business of buying, selling, vending, trading, manufacturing and exchanging farming tools and agricultural implements, and also for buying and selling all kinds and varieties of seeds and fertilizers, and transacting all kinds of business incidental thereto. The corporation is to be located in this city, and the incorporators are George W. Williams, Wilbur A. Fisk and George F. Williams. The amount of capital stock is $125,000.

Raleigh, N. C.—The Kester Mfg. Co. has been incorporated with a capital stock of $11,000. The business of the company is manufacturing and repairing machinery and working in wood, iron, tin, steel, bronze, etc.

San Antonio, Tex.—The A. A. Browne Novelty Mfg. Co. has been incorporated by Andrew A. Browne, Marian C. Browne and James L. Mogford to manufacture novelties. Capital stock, $5000.

Changes and Improvements.

Batavia, N. Y.—The officials of the Wiard Plow Co. are now firmly established in their handsome new office, which has been in course of construction for several months. The architectural design of the building is plain, but at the same time handsome. Inside modern improvements are in evidence everywhere, and the office force has at hand everything to facilitate its work. Entrance is gained through a solid oak door on the Swan Street side, over which the words "Wiard Plow Co. Office" appear in raised letters. Below, in gold letters, is the inscription "Established 1804. Incorporated 1876." Inside the main entrance is a short hall, on the south side of which are located a general office room and the big vault. These occupy the entire south end of the ground floor. The general office is about 20 by 21 feet in size and handsomely finished in polished oak. North of the hall are the private offices of President Wiard, Treasurer Hough and Secretary Washburn, each being about 16 by 18 feet in size.

Burlington, Vt. — C. E. Hobbs & Co., manufacturers of granite cutting tools, have moved their business to East Montpelier.

Frankfort, N. Y.—The Business Men's Association of Frankfort are busy raising $1500 to be used in paying the freight on the machinery of the Ostrander Arms Co. from Boston to Frankfort, as an inducement for that concern to locate its plant in this village. The company will bring to Frankfort machinery worth $70,000, and place it in one of the vacant West Shore shops, which it can occupy free of rent for 99 years, with excellent prospects that a large number of workmen will soon find employment.

Middletown, Conn.—The Doebler & Leonard Mfg. Co. has recently been reorganized by C. F. Doebler, and incorporated under the laws of the State of New Jersey, with a capital stock of $50,000, as the Doebler Mfg. Co. The company will manufacture window pulleys, padlocks, steel shelf brackets, etc., and will commence operations immediately.

Sheffield, Ala.—The Sheffield Stove Works; Messrs. Lowman have sold their interest to Sadler & Cohen, who will start another stove manufactory.

Improved Conditions.

Beaver Falls, Pa.—The H. M. Myers & Co. Shovel Works at this place, one of the largest concerns of the kind in the State, which has been running short handed for some months, have started up full handed in every department, and it is said have orders enough ahead to keep running until next May.

Cincinnati, Ohio.—A large order has been received by the Davis & Egan Machine Tool Co. for export. The order was given in person after a careful inspection of the plant and of the quality of goods turned out. Mr. Yarrow, member of the large shipbuilding firm of Yarrow & Co., of London, England, with Mr. Green, a representative of Yarrow & Co., spent a day at the factory, and the result was, as stated, the placing of a very large order for all sorts of machine tools that can be used in a shipbuilding plant. The yards of Yarrow & Co. are at Poplar, London, and are among the largest in Europe.

Erie, Pa.—Erie will soon have another flourishing industry. John Depinet and John G. Liebel have leased the extensive plant of the Chicago & Erie Stove Works at Twelfth and Sassafras Streets, and have taken possession. It is the intention to start the works up on the 1st of January, with a full force of men. The sale includes the possession of all the patterns, moulds, etc., owned by the Chicago & Erie Stove Works, which went out of existence several years ago. Improvements will be made at once. Messrs. Depinet and Liebel will manufacture high grade heaters and cook stoves. Mr. Liebel has been with the South Erie Iron Works for many years. He has had considerable experience. Mr. Depinet is known as one of Erie's most progressive business men.

Fitchburg, Mass.—The Putnam Tool Co. have resumed work. For some time past workmen have been engaged in putting the machinery in proper condition. The plant will be by degrees worked more and more until, it is hoped, it will be on its old footing again.

Reading, Pa.—The representatives of the Reading Hardware Co. (which employs 1000 hands in its works here) are holding their annual meeting here, to last for a week, during which reports will be received as to the trade in their respective sections and the outlook for the ensuing year. These representatives come from all parts of the country, and they unite in saying that 1898 will be a good business year. Trade is reported to be improving in the West.

Recent Fires.

Allentown, Pa. — The M. C. Ebbecke Hardware Co. has been singularly unfortunate the past few years in visitations by the fiery element. On April 15, 1896, the foundry at the foot of Linden Street fronting on the Lehigh River, was partly consumed at a loss of about $300. April 27 last the handsome and well stocked store of the firm at No. 606 Hamilton Street was completely gutted and a loss sustained of $12,000. Recently the foundry was again visited by fire, and everything destroyed save the engine, boiler and cupola.

Berlin, Ont.—A fire has occurred in the M. B. Perrine & Co.'s shoddy and twine mills, the largest in Canada, situated at Doon, a village six miles from here. There is no fire protection, and the flames raged uncontrolled until the arrival of the Preston fire brigade, which confined the fire to the large brick twine department. The loss is at least $50,000.

Gallipolis, Ohio.—The Kling Stove Foundry building, damaged by fire at a loss of $2000.

Miscellaneous.

Springfield, Ohio.—Wages have been cut at the big harvester works of Warder, Bushnell & Glessner, of which Gov. Bushnell is the head. The cut is made by means of the annual readjustment of prices for piece work. As a sample of how the readjustment works, the men working on binder frames received 35 cents a piece last year, whereas this year the price has been cut to 25 cents. There are now about 800 men at work in the shop.

NOT LIQUID BUT AIR.

The Eclipse is an air Check. That is a decided advantage. Air doesn't leak all over; air doesn't freeze. The Eclipse Door Check and Spring has other great advantages. It is easy to apply—any mechanic can apply it; it is easy to keep in order, little attention required. It is a article for the money-making Hardwareman, who should supply the demand at this season of the year. For simplicity, durability, utility and cheapness there is nothing like the Eclipse. It is not an experiment; it stands the test of time. Send for printed matter with reduced prices.

BICYCLE TRADE RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Companies, Agencies, Etc.

Baltimore, Md.—The Lerch Cycle Saddle Co. has been incorporated by Harry A. Lerch, William M. Lerch and John T. Bird Hyde; to manufacture bicycle saddles. Capital stock, $5000.

Boston, Mass.—The Iver Johnson Sporting Goods Co. will open new store at No. 408 Washington Street, about January 1, 1898. D. R. Harvey will be general manager of the company.

Carthage, Mo.—H. P. During, of this city, has formed a partnership with a Ft. Scott, Kan., bicycle firm, and they will open a wholesale sundry business under the name of the During & Peniman Cycle Supply Co., of Fort Scott, Kan.

Chicago, Ill.—American Chainless Wheel Co. has been incorporated by Walter T. Stanton, Robert J. Frank, James E. Daughters; to manufacture bicycles and Hardware specialties. Capital stock, $100,000.

Chicago, Ill.—Diamond Rubber Co. has been incorporated by H. E. C. Miller, W. S. Oppenheim and W. S. Holden; to manufacture rubber goods. Capital stock, $300,000.

Chicago, Ill.—Hare Bicycle Mfg. Co. has been incorporated by Henry A. Ritter, William Brace and John G. Campbell; to manufacture bicycles. Capital stock, $20,000.

Chicago, Ill.—Wilson-Davy Mfg. Co. Capital, $10,000; manufacture bicycles, machinery and metal specialties. Incorporators: Charles M. Wilson, Edward W. Davy and Charles D. Bennett.

Cleveland, Ohio.—The J. Sachs Boot & Shoe Co. has entered into the manufacture of bicycle shoes, upon an extensive scale.

Fort Wayne, Ind.—L. A. Centlivre Mfg. Co., incorporated, $20,000 stock. Will make bicycles.

Ihlen, Minn.—J. C. Dnea, Hardware, sporting goods, etc., has opened new store.

Sheboygan, Wis.—John G. Riedel, furniture dealer, has taken the agency for the Imperial bicycle; also for the Arabian, Progress and Imperial, Jr.

Springfield, Ill.—The Rokker St. Clair Airless Tire Co. has been incorporated by H. W. Rokker, O. C. St. Clair, A. H. Atherton and others; to deal in bicycle improvements. Capital stock, $30,000.

Stewartville, Minn.—Howard N. Stillman, bicycles, sporting goods, etc., has opened up for business.

Syracuse, N. Y.—The Snow Cycle Chain Co. has been incorporated, with a capital stock of $10,000.

Worcester, Mass.—The Lovell Arms & Cycle Co. have opened new store, which is conducted under the management of Geo. S. Davis.

Changes and Improvements.

Boston, Mass.—Peerless Bicycle Clothing Co., manufacturers bicycles, reported to have dissolved partnership.

Brockton, Mass.—Senter & Christie, bicycles, reported to have dissolved partnership.

Bryant Pond, Me.—O. A. Haniford has purchased the old chair factory, and will manufacture wood rims for bicycles.

Charlotte, N. C.—Marsh J. Heizer, bicycles, reported to have sold out.

Denver, Col.—Perkins & Shields, bicycles, H Shields sells interest to Mr. Ferkins.

Greeley, Col.—Olsen & Baker, bicycles, reported to have dissolved partnership.

Holyoke, Mass.—A. S. Schofield & Co., bicycles, reported to have dissolved partnership.

Lapeer, Mich.—Alvin Peter, of Toledo, Ohio, will remove all the manufacturing interests of his father, who has placed him at the head of his business affairs, to Columbiaville. They include bicycle and wagon works.

LaPorte, Ind.—The Crown Cycle factory has been sold to J. Sons, who will manufacture wheels on a limited scale, and utilize a portion of the factory for the manufacture of harness.

Milwaukee, Wis.—The Chief Cycle Co. is erecting a new $2500 addition to its plant.

Nashville, Tenn.—Charles Hord, bicycle repairer, will go to Augusta, Ga., where he has accepted a position with the repair firm of Field & Kelley.

New London, Conn.—The Owen Mfg. Co., makers of high grade bicycles, with shops in the main building of the New London Gas & Electric Co.'s works, will remove its plant to the Hill Street schoolhouse within a few weeks. The interior will be remodelled somewhat for its new use, and, it is expected, make an admirable place for the bicycle factory.

New York, N. Y.—Burkart & Widmayer, bicycles, etc., reported to have dissolved.

Springfield, Mass.—The Industrial Cycle Co. is preparing to enlarge its plant.

St. Paul, Minn.—F. M. Smith & Bro., bicycles, succeeded by F. M. Smith.

Washington, D. C.—Jones & Burr, bicycles, reported to have dissolved partnership. Succeeded by Jones & Fellows.

Westfield, N. J.—William P. Schriven has purchased the stock and fixtures of W. B. Elliott & Co., bicycle dealers and repairers, whose store is at Broad Street and North Avenue.

Wilmington, Del.—The McDaniel Cycle Co. has re-purchased from E. G. Sawdon the bicycle store and repair shop at No. 1011 Market Street, and will take charge of the establishment at once.

Recent Embarrassments.

Bloomington, Ill.—S. S. Haggard & Co., dealers in bicycles, etc., have assigned.

Grand Rapids, Mich.—The Souvenir Wheel Co., a well-known local bicycle firm, filed a trust mortgage for $10,000, to which sum labor claims must still be added. The company has suffered from overproduction the past two seasons.

New Haven, Conn.—Ralph J. Kirby, the bicycle dealer, has made an assignment, naming Carl F. Stahl as trustee. The liabilities and assets are small.

Providence, R. I.—Walter J. Taylor, bicycles, etc., reported to have made an assignment.

Recent Fires.

Buffalo, N. Y.—Fire was discovered in the five-story brick building occupied by the Electric Wheel Co., at Nos. 57 and 59 Franklin street, about eight o'clock some evenings since. The flames were confined to the top floor, where they started, and a total damage of about $13,000 was done before they were extinguished. The detailed loss is $10,000 to the wheel company on bicycles and machinery, and $3000 to the buildings.

Marietta, Ohio.—The E. J. Lobdell bicycle factory, destroyed by fire at a loss of $50,000; insured for $20,000.

Miscellaneous.

London, Eng.—The Hon. Sir Ford North, Judge of the Chancery of the High Court of Justice, has refused an application to enjoin the National Cycle Show, which opened at the Crystal Palace December 3d, from holding its exhibition unless it includes American machines. The petitioner was allotted space, which was subsequently withdrawn when it became known that he intended to exhibit American wheels. Justice North, in rendering his decision, said that if the plaintiff succeeded at a trial of the case he would be entitled to substantial damages; but it would be an injustice to the defendants to order a specific performance.

Richmond, Ind.—Isham Sedgwick, inventor of the first machine to weave wire fence, which made him a fortune, has just invented a driving apparatus for motor vehicles of all kinds, built on entirely different principles from those now in use. The machinery of Sedgwick's motor can be driven by compressed air, gasoline or electricity, and it transmits twenty-five per cent. more power than any yet constructed, he claims.

Washington, D. C.—Information has been received at the War Department of the adoption of a new folding military bicycle for the Belgian army. A detachment of twenty rifle cyclists of the Belgian service were detailed to test the merits of the machine, and the order of adoption followed the report of their operations. The detachment used the wheels for a month, covering a large number of miles. For twenty days the riding was over soft roads. At the stopping places reconnoissances were made, and the soldiers found it easy to carry their wheels over streams and through woods and fields. The machines stood the test extremely well. They can be folded and carried on the back, and the detachment found that they could fire, kneeling and standing, without inconvenience, while the machines were in that position. The detachment averaged 100 kilometres a day for thirty days.

The Chicago Rolling Ladder

Especially Adapted for Hardware Stores.

THE CHICAGO ROLLING LADDER.

The first requisite for a store ladder is **ease of operation.** The Chicago is the only ladder of the style shown above that does work easily. If you would save one-half your labor, fit your store up with either the **Chicago** or **Bicycle Step Ladder** system. Write for Catalogue illustrating our 4 distinct ladder systems to

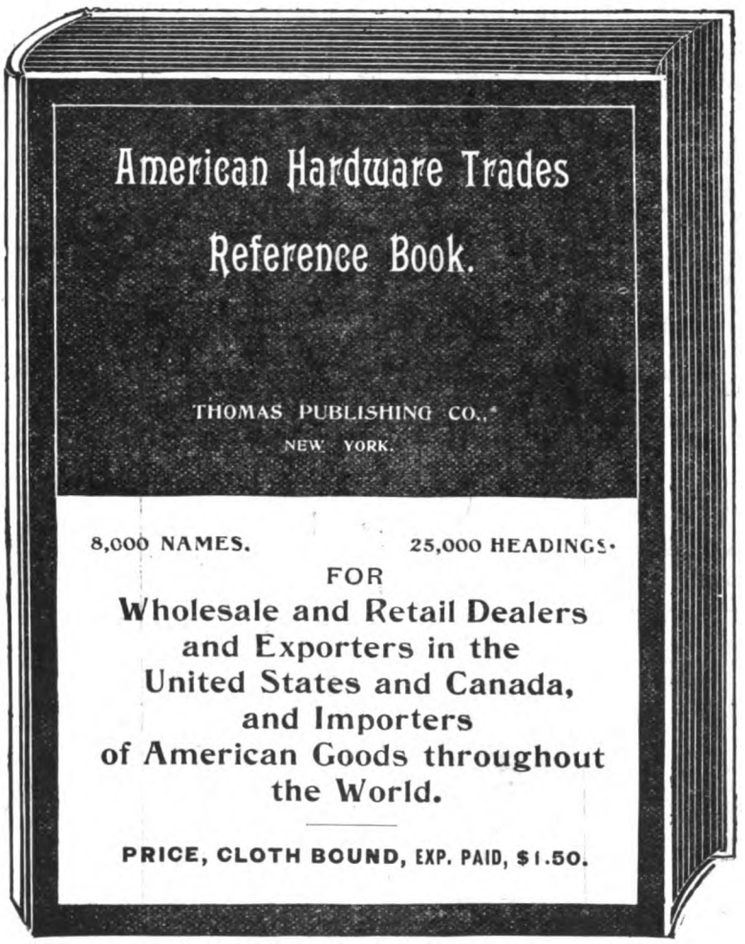
EVERY PROSPEROUS HARDWAREMAN

MUST BE WELL POSTED.

Secure the benefit of all possible Competition in Buying. A Dealer's Reference Book is essential. Here it is. A complete one, independent of any other publication, giving the names of ALL manufacturers, those who do not advertise, as well as those who do. The only work of the kind maintaining this feature. 1898 edition ready in few days. . . . . .

IT COVERS THE FOLLOWING TRADES:



Hardware of All Kinds,

Hardware Specialties,

Agricultural Implements and Machinery of Every Description,

Carriages, Wagons, Harness,

Stoves, Ranges,

Tinware,

House-furnishing Goods,

Bicycles,

Plumbing,

Steam and Gas Fitting Goods of all Kinds and all Other Articles,

Machines, etc., Handled by these Trades.

The object of the work is to enable the above trades to instantly find all the manufacturers of any article desired; the main and branch offices of every manufacturer in the trade, and the financial rating of every manufacturer.

Completeness.—The names of all manufacturers, regardless of whether they advertise or not. We give the names over 8,000.

Classification.—By our method of classification, we index every manufacturer under every article manufactured. We name some manufacturers under as many as 300 headings. We make no charge whatever for any number of headings required to completely represent every manufacturer. The book gives nearly 25,000, fifty times as many as any other publication gives to these trades. We do not use general headings, such as are used in ordinary directories, as for instance: "Hardware," "Agricultural Implements," "Vehicles," "Plumbing Goods," etc., but state the specific article and the special kind of article, and for what purpose used, as for instance: "Door Locks," "Bicycle Locks," "Refrigerator Locks," "Gang Plows," "Sulky Plows," "Swivel Plows," "Ditching Plows," "Brass Faucets," "Wooden Faucets," "Beer Faucets," "Steam Heating Boilers," "Combination Steam and Hot Air Boilers," "Air Valves for Radiators," etc., etc., throughout the 25 000 headings, naming every article, every special kind of article needed by these trades. It enables the user to instantly find exactly what is wanted. Nothing like this minute classification has ever been attempted before.

Ratings.—The financial rating of every manufacturer is given.

SAVES SUBSCRIBERS 100 TIMES ITS COST.

THOMAS PUBLISHING CO., SOLE PROPRIETORS, 40 Broadway, New York.

Special to our Subscribers.

WE have contracted with the Thomas Publishing Co. for 10,000 copies of the 1898 American Hardware Trades Reference Book, which we are offering to the trade of the United States, with a year's subscription to "Hardware" for $1.50; the price of the book alone. . . . . .

« « « ◆ » » »

Those who are already paid subscribers to "Hardware" may take advantage of this offer by sending 50 cents. . .

« « « ◆ » » »

We do not agree to hold this offer open for any specified length of time, as it will be impossible to furnish the Book alone at less than $1.50 after these 10,000 are taken.

To Bicycle Riders.

WE MAKE OUR TUBE
OF FIFTY CARBON STEEL

Because a Tube like this of our Is just as strong as a Tube like this of

.50% CARBON STEEL

.25% CARBON STEEL

While weight for weight in a Bicycle our FIFTY CARBON Steel will last so long

and TWENTY-FIVE CARBON Steel will last only so long

NOTE THE FULL IMPORT OF THE PARALLEL LINES.

The comparison which they graphically make indicates the result of the prolonged investigations of the most practical experts of the world.

That the tests in our own laboratory coroborate these results is merely so much to its credit; that the same is true of actual trial on the road equally proves the trial to have been made in bicycles of correct design and construction. THE FACT REMAINS.

The margin of safety is greatly increased by the use of this tube. Every bicycle manufacturer should use it; every dealer should insist on having it; every rider should demand it. Send for catalogue.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

CRONK'S

Combination Fencing Plier.

This newly invented fencing tool is needed by all people that build or have occasion to remove or repair wire fence, as it is made with two staple pullers, two hammers and two button cutters. They are the same heft as the 1½ Maydole Hammer, and they are made of forged tool steel. No good farmer will be without one. They are warranted to cut No. 8 hard or No. 6 soft wire. Like the celebrated Cronk Plier they are fully warranted in all respects. No. 12, 11 in. long, $12.00. Dis. . . .

TROY NICKEL WORKS
ALBANY, N. Y.

"READ IT FROM THE FIRST ISSUE."

C. E. Neale, Worcester, Mass.: Please find enclosed the cash for the coming year's subscription to HARDWARE. I have read it from the first issue, and intend to keep right along reading it, and wish you success.

"WELL PLEASED WITH 'HARDWARE.'"

W. W. Johnston, Bartlett, Ohio: Enclosed find $1 to pay my subscription to your journal. I am well pleased with the paper, and think it would pay all dealers in Hardware to take it.

"'HARDWARE' IS READ BY THE DEALERS."

Forehand Arms Co., Worcester, Mass. [*Arms*]: In the numerous inquiries received daily, reference is made to HARDWARE as often as to any other publication, which shows that HARDWARE is read by the dealers.

"CANNOT FAIL TO HELP OUR BUSINESS."

J. C. Tanger & Co., Hanover, Pa.: Please find $1 enlosed for one year's subscription. After examining a specimen copy, we think it one of the best, and that it cannot fail to help us in our business.

Digitized by Google

A WARNING.

THIS OFFER HOLDS UNTIL FEBRUARY 1st, 1898,

For all **NEW 1898 SUBSCRIBERS** to "HARDWARE," but it will not take until then for you to discover some remarkable offers in the subjoined premium list.

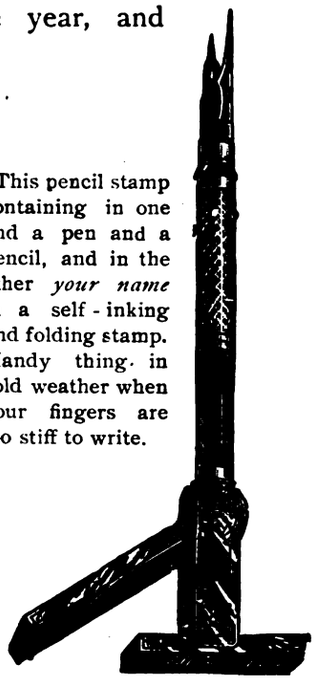
ALL THE NEWS. **HARDWARE** HARDWARE EXCLUSIVELY.

Needs no introduction to the Hardwareman. He already knows what a valuable adjunct to his business this bi-monthly visitor is, with its reliable "Prices Current," its "Market Reviews" and its general news of interest to the Hardware trade.

FOR $1.00 we will send "HARDWARE" for one year, and the **"WORLD'S ALMANAC"**—an encyclopedia of useful information, boiled down to about 600 pages. It gives statistics of almost every subject likely to be of interest to the busy man. All the news and statistics of the world put into shape for handy reference. Will answer any question you may ask it.

FOR $1.00 We will send **"HARDWARE"** for one year, and **ANY ONE** of the following articles:

A numbering stamp, which will number from 1 to 999,999. You can number every article in your store with this stamp. It is indispensable to the careful retailer.



A dating stamp that will last till 1902, with 12 special entries for marking letters and bills.

This elegant self-inking stamp, with *one line* of print *to order*. Your name, your business, your address, or whatever you wish.

This pencil stamp containing in one end a pen and a pencil, and in the other *your name* in a self-inking and folding stamp. Handy thing in cold weather when your fingers are too stiff to write.

Address all communications to——

HARDWARE PUBLISHING CO.,

IF YOU'RE NOT MARRIED

to old-fashioned methods, you need **"HARDWARE"** in your business. If you are, you need it all the more. **"HARDWARE"** for a year, and any one of the attractive premiums shown on this page, sent prepaid for $1.25, to our . . . .

NEW 1898 SUBSCRIBERS ONLY.

1. A Perfect Fountain Pen . . . . with 14 kt. gold pen and a filler, warranted to give the most satisfactory results. . . . . .

2. A Silver Mounted Stationery Set. Seal, letter opener, and paper knife with pearl blade—that gives an air of elegance to your desk. . . .

3. The Latest Fad in Jewelry. . . Everybody wears one now for luck. A real four-leaf clover mounted between glass in sterling silver or heavy plate—silver is fashionable—for bangle, watch charm or scarf pin.

4. A Cut of Your Premises, ... 2x1½ inches, for illustrating your advertisements, or printing your envelopes. Send us a photo—we'll do the rest. . . . . .

5. If You Have a Good Name . . . you may like to see it in your window. We send you ten of the best white enamel 4-inch letters, with a half pound of best cement and full instructions for putting up. If 4-inch letters are too large, send for twenty 2-inch letters. If you require more than the quantities specified, we will send you extra letters; 4-inch at 6 cents each, and 2-inch at 3 cents each. . . . . .

6. They Speak for Themselves. . . That is something good signs always do. We send you 100 red, white or black embossed cardboard letters, 2-inch, ready gummed, with which you can make most attractive indoor signs. These letters will adhere to anything. When ordering, specify the quantity of each letter, figure, $-signs and cts. signs you require. Extra hundreds sent for $1.00 per 100. . . . . .

7. Bushnell's Price Book . . . bound in seal morocco, 4¾x6⅞ inches, 200 pages, adapted to the use of the traveling man, the home salesman and the office. Neatly indexed, red edged, ruled faint. This practical Price Book is in almost universal use. . .

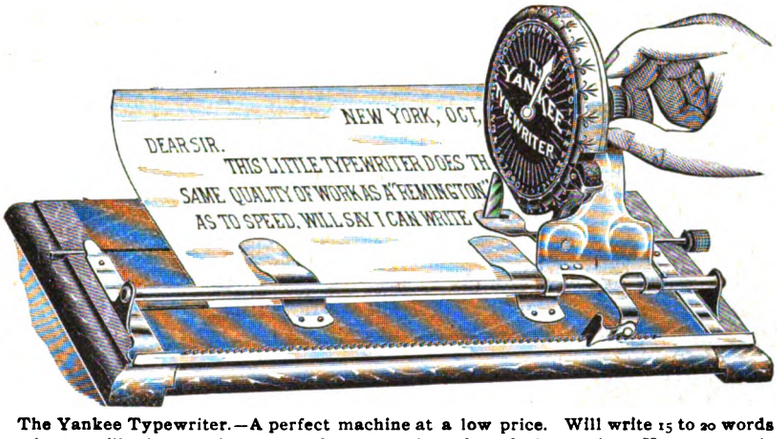
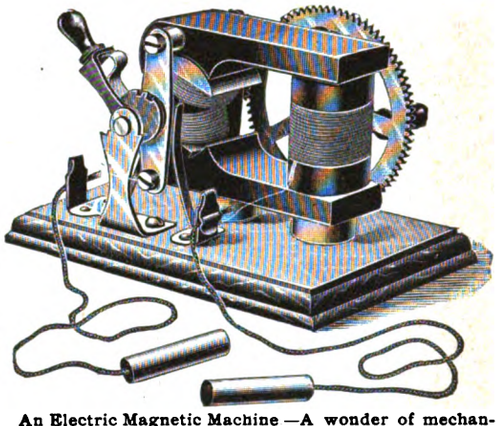
HERE'S OUR HOLIDAY OFFER:

Hardware for a year and any one of the following attractive premiums for $1.50. This offer applies to

NEW 1898 SUBSCRIBERS ONLY.



A perfect Sewing Machine. "The Baby" It uses regular Wilcox & Gibbs needles and ordinary machine thread. It is strong and simple; won't get out of order; can be clamped on any table, and is so constructed as to make it almost impossible for the smallest child to injure itself with the needle.



Just think- a complete Camera and an outfit to print, develop and mount. Makes a picture 2½x2½ inches, and its work compares favorably with any higher-priced ones of which it possesses all the best features, including an instantaneous shutter adjustable to time exposures if desired, and operated by a lever and button just as your $50 outfit is.

An Open-Faced Nickel-Plated Watch; fully guaranteed for a year. Winds and sets in back of case, and will stand rough usage, and keeps as good time as an expensive watch.

The Yankee Typewriter.—A perfect machine at a low price. Will write 15 to 20 words a minute; will take any size paper, from postal card to foolscap size. Has automatic carriage and paper feed. Mounted on highly finished hardwood base, and packed in a strong wooden case.

An Electric Magnetic Machine—A wonder of mechanical perfection and cheapness. Supersedes the old-style medical batteries, and gives a stronger current without the expense of renewals It has a current regulator which can be adjusted to a nervous child or to overpower the strongest man.

OF COURSE, YOU TAKE A MAGAZINE,

Probably one in the subjoined list, if it is not, let us know, and we'll put it there. The first column shows the price you would have to pay for the magazine alone. The second column indicates the price at which we will send you "HARDWARE" and the magazine for a year. In many cases you will find the combined price is no more than the single one, and you know you can't afford to do without "HARDWARE." This offer applies to **New 1898 Subscribers only.**

OLD SUBSCRIBERS AND NEW

May take advantage of the following liberal offers:

1. "American Hardware Trades Reference Book," published by Thomas Publishing Co., with "HARDWARE" for one year, will be sent on receipt of **$1.50.** Those who are already paid subscribers to "HARDWARE" will receive the book, on sending **50c.** This book is a complete directory of the manufacturers of Hardware in the United States. Each manufacturer is classified under the name of every article he makes. The financial rating is given in each case; 8000 Names; 25,000 Headings.

---

2. "Ladd's Discount Book," with "HARDWARE" for one year, for **$3.00** Single Index, and **$4.00** Double Index. Present subscribers will be credited for one year in advance. If you have to calculate discount this comprehensive work will save many times its price in time, trouble and mental strain. Its comprehensive character may be realized from the fact that it contains nearly 200 pages of positively accurate tables or more than 120,000 computations giving at a glance the net of any sum at all discounts from 1 per cent. to 95 per cent. together with a great range of combinations.

---

3. "American Hardware Store," with "HARDWARE" for one year, for **$3.00.** The "AMERICAN HARDWARE STORE," containing 450 pages and 500 illustrations, is an exhaustive treatise on the most approved methods used by the successful merchants of this country to arrange, display and sell Hardware. It is edited by R. R. Williams, editor of the *Iron Age*, and published by the David Williams Co., of this city, at $3.00. By a special arrangement, we are enabled to combine "HARDWARE" with the book at the same price. Present subscribers will be credited for a year, in advance of their present subscription.

CONDENSED BUSINESS WISDOM.

"WHAT EVERY MAN WANTS."

C. A. Fisk, Helena, Mont.: HARDWARE is what every man wants, who hopes to gain success in the Hardware business.

"ALL WANT TO READ IT."

H. E. Iseman, Prattsville, Mich.: The boys all want to read HARDWARE as soon as it reaches us, and are delighted with it.

"GOOD FOR ADVERTISING PURPOSES."

Zenith Cycle Co., Binghamton, N. Y. [*Bicycles*]: We consider HARDWARE a good journal for bicycle manufacturers, to use for advertising purposes.

"A VALUABLE ADVERTISING MEDIUM."

Harvey Hubbell, Bridgeport, Conn. [*Machinery and Tools*]: We are very much pleased with your paper, and consider it a valuable advertising medium.

"TRACE MANY SALES TO 'HARDWARE.'"

Philadelphia Lawn Mower Co., Philadelphia, Pa. [*Lawn Mowers*]: We have been with you for some years, and can trace many sales to HARDWARE's influence.

"JUST WHAT HAS BEEN WANTED."

W. P. Walter's Son, Philadelphia, Pa.: Enclosed please find $1 for renewal to HARDWARE. We think your paper is just what has been wanted for a long time for the retail Hardware trade.

"IN YOUR COLUMNS FROM THE FIRST."

Van Wagoner & Williams Hardware Co., New York and Cleveland. [*Hinges, Anvils, etc.*]: Having been represented in your columns almost from the first issue, we have a feeling of pride and pleasure in your achievements.

"THE MOST HELPFUL AID."

Pike Mfg. Co., Pike Station, N. H. [*Whetstones, Oil Stones, etc.*]: We like to keep our name and our wares before the public in a modest way. We have found HARDWARE the most helpful aid toward accomplishing that purpose.

"OUR ADVERTISEMENT HAS PAID US."

Ralph Temple Cycle Co., Chicago, Ill. [*Bicycles*]: We take great pleasure in stating that our advertisement as placed with you during the past two years, has certainly paid us, as we believe the Hardware trade is one of the best classes of trade to work for the sale of bicycles, as in most all cases Hardware concerns are financially all right. We shall, without question, advertise with you for the coming season, and we wish you, and the handsome journal published by you, the very best of success.

"THE BEST WE HAVE SEEN."

Massey & Thompson, Monroe City, Mo.: Place our name on your subscription list. Your paper is the best thing we have seen in that line.

"FILLED A PLACE NOT HITHERTO OCCUPIED."

Peck, Stow & Wilcox Co., New York. [*General Hardware, Tinners' Tools, etc.*]: Your paper has filled a place not hitherto occupied by trade journals.

"'HARDWARE' THE PROPER MEDIUM."

Central Cycle Mfg. Co., Indianapolis, Ind. [*Bicycles*]: We consider Hardware dealers desirable agents for Ben Hur Bicycles, and HARDWARE the proper medium through which to reach them.

"WOULD NOT BE WITHOUT IT."

H. M. Seitzinger, Wilkesbarre, Pa.: Enclosed please find my check for $1 for renewal of subscription to HARDWARE. I would not be without your paper nor should any one handling electrical supplies.

"A DOLLAR WELL INVESTED."

John T. Merimee, St. Mary's, Ky.: Enclosed please find $1 in payment for another year's subscription to your valuable paper—a dollar well invested, I believe, for it keeps me posted.

"IS JUST RIGHT."

Alling & Lodge, Madison, Ind.: We enclose $1 to pay for our subscription to HARDWARE for one year from date. Your paper is just right; don't make it too big so one can't find anything in it.

"FOR MEN NOW ON EARTH."

R. H. Bussler, Williamsport, Pa.: As per your last issue, I find your paper is published for "men now on earth." I am here, and as long as I stay I want HARDWARE, and I am going to stay as long as I can. I enclose $1 for this year, and hereafter you can collect until the inevitable comes.

"COULD NOT KEEP HOUSE WITHOUT IT."

Sickels, Preston & Nutting Co., Davenport, Iowa. [*Wholesale Hardware*]: We would not know how to keep house without HARDWARE. The review of the Hardware markets, trade reports and editorials are frequently read before letters are opened that are received in the same mail with HARDWARE.

"ENGROSSES MY ATTENTION."

P. H. Robbins, Chester Depot, Vt.: Find currency, $1, to renew my subscription to HARDWARE for another year. I find much in it that engrosses my attention—so much so that if it is delayed by the mail I miss it as much, and more, than other publications that I take devoted to the same interests, that cost more.

"Replies From All Sections."

McIntosh-Huntington Co, Cleveland, Ohio. [*General Hardware and Bicycles*]: As an advertising medium, we have recently had occasion to test HARDWARE in a manner that would give us some idea as to how successful it can be used. Our advertisement did not occupy a very prominent position, but was of a character to excite the cupidity of the reader. We found that within two days after your paper came out, we commenced to receive replies from all sections of the country to the advertisement. This would seem to be sufficient proof that yours is a good medium.

"EVERYTHING IS COMING UP."

BUSINESS IS BETTER AND THERE WILL BE A LARGER DEMAND THAN EVER FOR OUR

Sheep Skin Mitten.

Acknowledged to be the best article for polishing stoves, as it does away with the old time dirtiness of the work, making this work a pleasure. Also invaluable for polishing brass or glass, or silverware, which it does not scratch. For tan shoes and cleaning bicycles it has demonstrated itself a conspicuous success.

Diamond Hardware Co.,

QUADRUPLE Your Spring Sales

STANDARD FIBER-WARE COMPANY. STANDARD TRADE MARK. MANKATO, MINN.

WASH BASINS, SLOP JAR MATS.

In these lines by stocking up with **plain** and **decorated** **"STANDARD" WATER PAILS, DAIRY PAILS, CHAMBER PAILS, CUSPIDORES, &c.,** for Office, Lobby, Hotel, Hall and Home.

Made of **strong fiber, wound,** and **steel bound,** they do not split open, nor chip off at edges, neither do their truss bottoms warp, loosen or leak.

All "Standard" goods are **waterproofed throughout,** and then **indurated by oxidation** until **absolutely unsoakable.**

"Standard" is the only Fiber-Ware having **hand-painted decorations,** which, with its other merits, makes it outsell all similar ware.

Catalogue and price list, with full particulars, sent to dealers on application to the above company.

THE PIONEER. . . . . .

By all odds the BEST cheap Digger on the market. It is a great improvement over the ordinary Split-handle Diggers, as our Handles are stronger and easier to open; and the strain comes against the thick way of the Handles, which any mechanic can see is the proper way to resist the strain. Split handle Diggers made with the handles not folding, but opening out straight from each other, are a dismal failure, as the strain comes against the broad thin part of the handles, causing them to spring, warp or break. BEAR THIS IN MIND when purchasing Post Hole diggers, and thus save annoyance to both yourself and customers. . . . . .

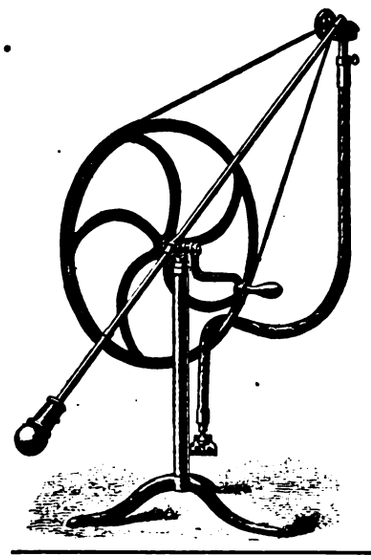
A GOOD THING.

IT'S IN THE TEETH.



The Patent "REFORM" Curry Comb is composed of three shallow, oval trays, with corrugated edges. The parts are struck up from a fine grade of cold rolled steel, heavily tinned and bronze lacquered, firmly riveted together and warranted not to rust. The outer dimensions are 6¼x4¼ inches and by reason of the large cleaning surface and peculiar arrangement of teeth, the comb will do its work with a large saving of time and labor, cleaning with equal thoroughness both long and short coats. There are no places to accumulate hair and it will not tear or injure the brush, the comb being quickly freed from accumulation by giving its face a gentle tap.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

Editorial Trade Review.

At last we close the books of the year 1897 and begin another year which, it is the hope of all concerned in the business expansion of our industrial interests, will bring fewer unrealized expectations and a steadier growth of increasing wealth than characterized the year just ended.

A new era of consolidation and combination is upon us, born of a condition of competition among aggressive manufacturers who, under the belief that the cost of production may be materially lessened by a consolidation of manufacturing plants, are confident that without the demoralizing conflict of unprofitable quotations, gradual and periodical advances may be successfully maintained and a proportionate degree of profit made a certainty.

With the increasing importance of the leading makers in all the various lines which lend dignity to the Hardware industry, some such movement may be periodically expected. The tendency toward cheapening production under influences which permit no sustaining of prices that are not exorbitant, force the makers to protect themselves by some advanced methods of centralizing management, and so reap advantages only possible when production and distribution can be done on a scale of importance unobtainable under ordinary facilities hampered by an open market.

Such immense corporations as that now on the eve of consummation to govern the output of wire rods and the various products in which wire forms a component part will, eventually, if their plans are successfully carried out, so revolutionize prevailing methods, as to make unprofitable the running of smaller plants unable to compete. While, as a compensation, our ability to compete under more favorable conditions with the manufacturers of the old world, will bring us a national prestige in many countries that may lengthen our seasons of employment, even if it fails to increase the daily wages of the laborer.

The fact that the year 1897, taken as a whole, will show a large excess of export over the import trade, exerts a very gratifying influence in our speculation on the possible advantages of the future. With the figures for eleven months ending with November showing an excess of exports over imports of $283,521,805, we view with complacency the balance of trade preponderating so largely in our favor; especially when we see to what an extent our exports of manufactured product have aided in creating the grand total. This fact is all the more to be appreciated when we realize that our export of cotton during the eleven months was $57,000,000 less than in 1896, and a corresponding decline extended as well to our mineral oils, when compared with the year previous.

Eighteen-Hundred-Ninety-Eight.

"Let the dead past bury its dead." The year just closed has had many days in which hope told a flattering tale, many days that seemed filled with a glad surprise, and many and more that were disappointing in promises unfulfilled and pledges unredeemed; but the year, it can be truly said, leaves us with a solid background to our present feelings of confidence, infinitely more so than when the year was ushered in with so many harbingers of a happy and prosperous future, in the glowing fires beneath factory furnaces which had been dead to the productive world for many uneventful months.

A year ago we were more susceptible to outside influences and willing to take almost anything in the way of promise without a great deal of investigation. The wish was invariably father to the thought, and when the brisk beginning so earnestly gave assurance of an early fruition, and then took occasion to slump in numerous cases in a depressing manner, we felt as though our hopes had surely gone astray.

But now things look different. The manufacturers of many of our best products have been developing a trade in this country and abroad regarding which, previous to 1897, they had but little knowledge and but slight encouragement. To-day the backbone is stiffened by success, and the producer is constantly on the lookout for other worlds to conquer. He knows the country is rapidly recovering from the supine condition of a year or two ago, and will be heard from safely during 1898, when, should the domestic demand fail to reach the proportions so sanguinely anticipated, he knows there are other markets for which he can reach out and recoup himself without a single workman being made to suffer in idleness as of yore, or the factory doors compelled to close in a manner discouraging even to an under-sheriff.

No better evidence need be shown to demonstrate the happy frame of mind the leading manufacturers of the United States find themselves in the opening of the new year, than to notice the large number of new advertisements covering page after page of *Hardware* and its cotemporaries, showing the disposition on the part of these intelligent producers to echo the words of Addison, "'Tis not in mortals to *command* success, but we'll do more, Sempronius, we'll *deserve* it."

We might add as a corollary to the above thought,

Digitized by Google

that never in the history of *Hardware* have the Hardware dealers of the country so flooded us with subscriptions as have come to hand during the past month, in response to earnest efforts on our own part to increase a circulation in trade circles that is acknowledged even now as unsurpassed.

Montreal Hardwaremen.

At the recent annual meeting of the Montreal Metal & Hardware Association, after the annual report had been read and adopted, the question of terms of credit was discussed, and the following resolutions adopted:

The Montreal Metal & Hardware Association, understanding that an agreement is being signed limiting the terms of credit on Hardware to four months or 3 per cent. off for cash, hereby endorses such action of the Hardware trade, and trusts that the limit of credit stated above will become general.

Allusion was made to what was considered excessive passenger rates charged by railways and other transportation companies to commercial travelers; also to the charges for travelers' samples, and it was resolved:

That this association's representative on the Council of the Board of Trade be requested to bring this matter to the attention of that body with a view of taking action in the matter.

The election of officers for the ensuing year resulted as follows: President, Geo. E. Drummond; vice-president, J. B. Learmont; treasurer, J. W. Pyke; directors, Charles Cassills, Frank Caverhill, Robert Gardner and C. L. Letang.

The firm of Berger Bros., No. 237 Arch Street, Philadelphia, was incorporated on December 20, 1897, and began from January 1, 1898, to be styled the Berger Bros. Co. The officers of the company are: W. H. Berger, president; William Barth, secretary: C. B. Geiser, treasurer. In announcing this change of firm, the company say: "We take this opportunity to thank our friends and patrons for past favors, and trust we will merit a continuance of the same in the future." Better and increased office facilities will be a feature of the change.

The Jackson & Woodin Mfg. Co., of Berwick, Pa., are extending their foundry building by an addition which covers practically one-half the ground of the original foundry. The construction of the new portion will be similar to that of the present building, having steel trusses supporting the roof and carrying the trollies for transporting material over the foundry floor. They have given the contract for furnishing and erecting the steel work to the Berlin Iron Bridge Company, East Berlin, Conn.

The paragraph in our issue of December 25, 1897, having reference to the new belting intended to be placed upon the market by the Rossendale-Reddaway Belting & Hose Co., of Newark, N. J., was somewhat premature, especially as to the name adopted to distinguish it. The name referred to in our notice, being one of those now the property of the Boston Belting Co., has been abandoned, and one of original significance will be adopted instead, when the belting is ready for marketing.

The Hartford Hardware Clerks' Association, of Hartford, Conn., held an annual banquet at Farmington some evenings since, and passed a most enjoyable evening. Following the supper, the presentation of appropriate gifts to several of the boys by President F. C. Bidwell caused much merriment. E. R. Clark received a sailboat, W. B. Odber, a blonde doll; L. E. Pellett, a whip-snapper, and A. S. Russell, a medal for fine appearance.

The Danger of Many Creditors.

The following pertinent advice to retail merchants is from the able address by W. H. Preston, ex-president of the National Association of Credit Men, delivered at the annual convention of the Iowa and Nebraska Retail Implement Dealers' Association, held at Council Bluffs, Iowa:

"I have found it the custom of many retail dealers to buy of several houses in the same line of trade. When a dealer is compelled to consult with the wholesale merchant because of his inability to meet his obligations and the absolute necessity of extension of time, I have often found him indebted to so many houses that it was almost impossible to obtain an extension for him. Many of the smaller creditors, knowing that they have little at stake, would insist upon being paid, and would refuse to grant an extension. The aggregate of the indebtedness represented by these smaller creditors would be sufficient to preclude the possibility of securing the desired extension. I am sure, therefore, that the retail dealer will buy to better advantage and have his account in much better shape if he confines his purchases to as few houses as possible, consistent with the need of sufficient variety in his stock to meet the requirements of his trade.

"One of the most unwise and unjust acts which a dealer can perform is to attempt to transfer his trade to another house while behind in his payments. The fact becomes known very speedily and causes collections to be vigorously crowded. * * * Be loyal to those who have granted you credit. Do not transfer trade when behind in payments. Wait until you have nothing past due, then place your orders with the firm offering the best opportunities."

The North Dakota Retail Hardware Association will meet in Fargo, on Wednesday, February 17th. It is expected that there will be a large attendance of the trade.

The Basis of Credit.

To arrive at a decision in the matter of filling an order taken by a traveler, is sometimes a difficult task. But it is an important one, as losses are common, and the net profits of the business are considerably reduced thereby. In fact, almost every order that comes in should have careful scrutiny, in order that the leakage from this source should be reduced to the smallest fraction possible. The fact that the name may be already upon the ledger, should not of itself be sufficient for filling this order. His account should be examined, and something of his past record learned. This is one of the best means and surest ways of determining whether a man is entitled to further credit or not; and when you get an order from a man whom you have never had upon yonr books, if you had the opportunity of looking over his account as it appears upon your rival's ledger, you could with remarkable ease arrive at a conclusion whether to fill the order or not.

In too many instances houses in the same line of business, actuated perhaps by a petty feeling of local jealousy, object to giving much information about a customer of theirs to their fellow merchant. Now we hold this is wrong; and the interests of both would be better served, and the principles of sound trading would be furthered, if correct information were cheerfully given. Local associations of merchants in a given line of business have done much to remove this feeling of jealousy, and now most of them arrange to exchange credit information among themselves. The credit clearing house system which has been inaugurated seems to be an idea which is needed by the times, and appears a reasonable and feasible plan for the dissemination of information which is really valuable in forming a basis for credit.

A man's past record, with but few exceptions. should determine the question of his eligibility for credit in the future. If he has been slow pay in the past, he will probably be slow pay in his next purchases; if he has been prompt and satisfactory, he will likely be the same again. As an instance, I might mention a case which recently came under my notice. A trader who had gradually got to be slow and unsatisfactory was compelled to assign. His failure was not due to any misfortune, such as fire or flood, but seemed the natural consequence of his incompetence and lack of management. A wholesale house which had been supplying him lost heavily, but compromised, and as he continued, they still sold him, but on thirty days' time. For a while he promptly attended to his payments, but after a time he got slower and slower, and as he was a liberal buyer, and his purchases were allowed to accumulate, he soon owed a bill far larger than his means would warrant. As this dragged along for some years a compromise was granted upon this indebtedness also. Still he clung to his old creditor, and again ordered goods, promising to send the money within thirty days. But his past record was too much even for so lenient a creditor. He was told plainly that he would get no more goods on credit, and that if he ordered anything cash must accompany the order in every case. Now a man of this stamp is a positive detriment to a man who pays his bills. After thus being refused credit by the old house, he will try and get it elsewhere, and no doubt will succeed. But if his record is known, it should be a final answer to the question of granting him credit.

Again, a man may have been trading with a house for a number of years and it may be advisable to reduce his line of credit. His record may not be satisfactory. A storekeeper who has been in business for, say, ten or fifteen years, and if he is slower in his payments than at first, it plainly shows that there must be some reason for it; and unless it is a satisfactory one, it is almost a sure sign that the man is not as prosperous as he should be. A man in business, if he is making money, should become more forehanded in money matters, while if he is not, it is a very fair inference that the opposite is the case. A trader's credit should improve with time; his gain in capital should manifest itself in his better payments.

A man may have a high financial rating in the mercantile records, yet his record may be such that it does not correspond with his reputation. He may be considered such a desirable mark that he is allowed his own way and his own time to settle, yet a little experience will show something wrong, and that his manner of settling would warrant a curtailment of his credit in disregard of his high rating or reputation as a good mark. In fact, the credit rating of some firms is too high, as it is not to be supposed that the mercantile agencies can always be correct; but the manner in which a man settles his account is of far more value than high rating. Experience has proved that when any man shows a slowness or unsatisfactory method of settling, that his account should be carefully watched, no matter how well spoken of he may be by the traveling men; and that in nine cases out of ten prudence will dictate to cut down his line of credit, as there may be trouble ahead for the firm who supplies him. LYLE MERTON.

From Joseph Dixon Crucible Co.

Editor Hardware: In 1893 it was a case of business paralysis, in 1894 we had a year of debility, in 1895 the patient partially revived, in 1896 came a relapse, but in 1897 came recovery, and the patient took up his bed and walked. The great medicine man was dollar wheat and thirty-cent corn, plus poor harvests at this exigency abroad.

I saw it myself, for in November I visited Indianapolis, Cincinnati, Chicago, Omaha, Denver, Kansas City, Pueblo and St. Louis, and saw everyone up to his eyes in new business. The consumer at last had money once more, and was spending it.

The industrial triumphs of 1897 are important. In this year the business cloud passed away and another era of prosperity, hopefully of long duration, opened. Export trade was larger in the fruits of the harvest, and particu larly in manufactured goods, than in the history of the country. Americans are competing in every market. American motors won the order in London. On a bridge in Holland an American firm was the lowest bidder. American steel rails go regularly to China, Japan and India. A movement is on foot to have the English Parliament pass a law changing the stamp on goods not made in England, stamped "Abroad" instead of the country where they are made. This is an effort on the part of the English lawmakers to obscure the origin of these goods.

For the Dixon Co. personally, we have shared in the general prosperity. The year has been an agreeable one, the future looks rosy to those who have eyes to see. Perhaps the outlook was never more inviting. Never were there so many roads open to wealth to those who know how to find them. Yours truly,

JOHN A. WALKER, Vice-President.

Another Medal for "The Bissell."

The Bissell Carpet Sweeper Co. have been awarded the medal of superiority for their very elegant display in the American Institute Exposition, which closed at the Madison Square Garden on December 1st. They have been awarded the same high prize at every exposition that has been held by this Association for the past fifteen years.

Austria, with Hungary, had 5737 miles of railroad at the end of 1896. The gross revenue was $52,000,000, the working expenses $35,000,000, and the net revenue $17,000,000 on an invested capital of $570,000,000.

Omnibuses were first started in Paris in 1862.

Palmer's Utopia Hammocks.

As the almanacs used to say, "about this time of the year," the thoughtful and progressive Hardwareman begins to turn his attention to the hammock season of 1898, and naturally his eyes turn toward headquarters, at Middletown, Conn.

It is needless to say to those who know I. E. Palmer, that he is always up to the present date. He has made hammocks for so long, and has made them so well, that his

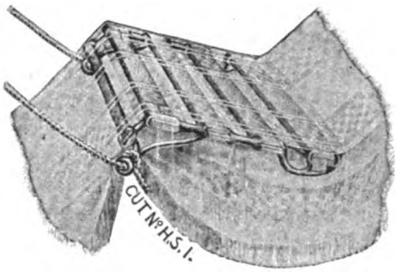

FIG. 1—UTOPIA HAMMOCK SEAT.

products have held youth and beauty, old age and childhood, in every corner of the globe; and to-day, while snow and frost are about us, the products of his factories are swaying in the summer breezes of the tropics, and furnishing a place of refuge to the residents of far-off Indian climes. It will be our turn, very soon.

We have received from Mr. Palmer a handsomely illustrated catalogue of his latest designs, upon every page of which may be found something of interest and value to the trade. It illustrates and fully describes his patent canopy fixtures and canopies; mosquito nettings, window screens, piano cloths and crinoline linings; patent hammocks and hammock suspension devices; self-adjusting pulleys, school bags, etc. These various articles are shown, with full descriptions, and in a note of introduction, Mr. Palmer says: "In presenting this catalogue, I trust, upon investigation, that all goods represented herein will be found to be of the highest type of excellence, and are warranted in their respective classifications."

A special feature or so from this work, warrant a more extended notice here, showing a line which should interest every Hardwareman. These goods are Palmer's Utopia Hammocks, several illustrations of which are here shown. "In 1883," says the manufacturer, "I of-

FIG. 2.—UTOPIA HAMMOCK, RECLINING POSITION.

fered to the public the Palmer Woven Hammock, with pillow, spreader, divided suspension, and other distinctive features in construction. Later, I applied to the hammock the valance, both useful and ornamental. I now offer the Palmer Utopia Hammock, believing it to be as superior to other hammocks, as those of 1883 were to other hammocks of that period. The Utopia, with the radical improvements, embraces all the desirable features of my other hammocks, making it par excellence *the hammock*." He further adds: "Should any persons infringe any feature of the Palmer Utopia Hammock, or deal in such infringing hammocks, I shall promptly and vigorously prosecute them. The theory upon which the Palmer hammocks are made gives greater strength and durability than is obtained with the same amount of material by any other method."

In Fig. 1 is shown the Utopia Hammock Seat, which is

FIG. 3 UTOPIA HAMMOCK, READING POSITION.

composed of two sides (malleable iron) three fixed slats or rungs, and two removable slats. For the purpose of varying the length between the seat and the pillow and for detaching the seat from the hammock, the front slat is made removable from the hammock body by pressing a spring, similar to an umbrella spring, at one of its ends. The body of the hammock is provided with a plurality of pockets in close proximity for the purpose of receiving the removable slat for adjustment. The back slat is made removable only for the purpose of detaching the seat from the hammock, the pocket for this slat being made of sufficient length or width to admit of any desired adjustment of the seat by means of the front slat. The body of the hammock for receiving the seat is quite similar in its general characteristics, to the ordinary Palmer hammock body, the features for adapting the body to the seat being simply the attachment of an under web to the hammock body

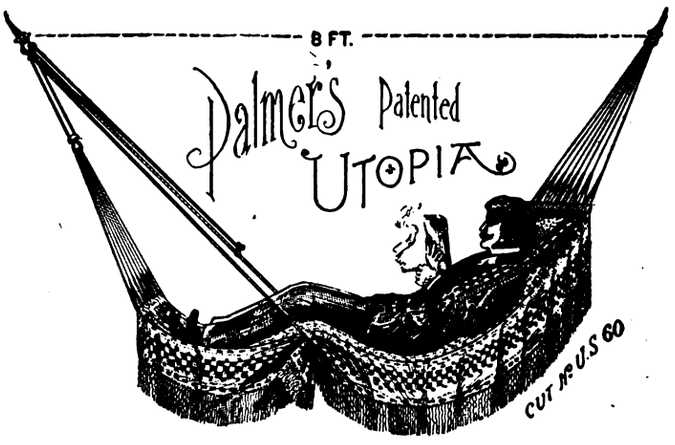

FIG. 4—FULL RECLINING POSITION.

proper, at such intervals as to form the required pockets. Ropes from an extra ring connect with the arms at the front of seat support and permit adjustment of seat and foot portion of the hammock. These ropes should always be of such equal length from ring to the eye of arm."

In Fig. 2, the Utopia is shown with the occupant in a reclining position, which may be changed to more upright by raising the head end and lowering the opposite end at points of suspension, and vice versa if more recline is de-

Digitized by Google

sired. The feet may be raised or lowered by the extra side cord and sliding grip.

Fig 3 represents the occupant of a Utopia Hammock in a comfortable reading position(with arm supporters), which may be varied to a number of postures, adding thus, by change, to the comfort of the occupant. Fig. 4 shows the occupant in full reclining position, which may be varied to sleeping position by lowering the head end.

This catalogue, which should be examined by every dealer, will be sent on application.

Parish & Unger.

Parish & Unger, Nos. 53 and 55 Warren Street, New York, have succeeded to the business of the Haida Lamp & China Co., and contemplate extending their business very materially for 1898 trade, by adding a number of new departments that will add largely to the present space of their attractive sample rooms. This well-known house was established in 1882, and have ever since done an annually increasing business blest with all the elements of popularity and prosperity.

Independent of the increasing importance of their large stock of china, lamps, English crockery and other goods identified with their established business, they have several specialties of their own production, the manufacture of which has increased their prestige in the trade, and augmented their annual sales to an extent noticeably important. Among these the "Empress" Lamp Chimneys,

made in about twenty-five different styles, have achieved a pronounced success. These high grade goods are made in their factory in New Jersey, which is complete with the most perfect accessories to modern improvement in production, being made of the best lead glass, and are claimed to have no superior on the market. Their handsome trade mark, shown in their announcement on page 37, is etched on each chimney, every one of which is separately papered and carried in stock in full supply in packages, or open stock, as may be required by the wants of their customers.

This firm and their representatives are extremely popular with the trade handling lamps and glassware, and the *personnel* of the firm consists of Thomas Parish, Benjamin Unger and Edward A. Unger; while among their staff of travelers will be noted Harry G. Mills, for the last four years associated with George F. Bassett & Co.; A. J. Rhodes, whose territory extends to the Pacific Coast; Wallace G. Hawley, covering territory visited periodically by him for five years past; Samuel H. Wharton, whose knowledge of Philadelphia, Baltimore and Washington trade is surpassed by none, and Howard W. Danser, who will make good use of the fact that the firm is headquarters for "Johnson Bros.' English Dinnerware." William J. Cassin, who has been with the house for fifteen years, will join the throng of travelers for 1898; while Edward A. Unger of the firm, will still make his customary trips to Rhode Island, Connecticut and Massachusetts. Hardware dealers handling lamp chimneys and similar specialties could not do better than open up correspondence with this reliable house, whose catalogue and quotation will be gladly furnished upon request by the trade.

Spirits are said to be "proof" when they contain 57 per cent. of alcohol.

National Association of Manufacturers.

The district members of the National Association of Manufacturers of the United States, consisting of Warner Miller, chairman; Augustus G. Paine, treasurer; Charles E. Locke, secretary; Pliny Jewell, Benjamin Atha, Charles A. Shieren and Charles A. Moore, vice-presidents, have been in almost constant session during the past two weeks, organizing for the third annual convention of the National Association of Manufacturers, which will be held in New York, January 25th, 26th and 27th. The business sessions will be held in the Masonic Temple, corner of 23rd Street and 6th Avenue, upon the days of Tuesday, Wednesday and Thursday, January 25th, 26th and 27th, and upon Thursday evening, January 27th. Additional committee rooms for the accommodation of the various sections of the Association have been secured at the Fifth Avenue Hotel, which is nearby the Masonic Temple. The social headquarters will be at the Waldorf-Astoria. The night of Tuesday, January 25th, will be devoted to a grand Bohemian smoker, the details of which are in the hands of a committee. The grand banquet will probably be the largest ever given in a hotel, and will also take place at the Waldorf-Astoria on the night of January 27th, and President McKinley has promised to be present.

Closed for Enlargements and Repairs.

The four factories of the Nicholson File Co., Providence, R. I., closed their producing departments on Friday, the 24th, for a period of nine days, till January 3rd, in order to effect certain absolutely necessary enlargements and repairs. The executive and shipping departments remain open, to provide for the continued prompt dispatch of all orders received. Extensive additions are being made to the inside equipment of the factories, while the buildings also are being considerably enlarged. The capacity of the Nicholson plant at Providence, where is manufactured the famous Nicholson Brand, will be brought up to where it can more readily meet the demand, while the works at Pawtucket, R. I., and Beaver Falls, Pa., where are made the well-known American and Great Western brands respectively, will be enlarged to admit of a greater production. The company plan to be in a position where they may produce an average of over 70,000 files daily after January 1st. The increased domestic and foreign demand rendered these changes necessary.

The Hardware trade everywhere will sympathize with T. James Fernley, secretary-treasurer of the National Hardware Association, in the death of his father, Rev. Thomas A. Fernley, D.D., who passed away, in Philadelphia, December 23d, 1897. He had been afflicted with a slight cold for some days previous to his death, but had not been confined to his bed. While conversing with a visitor, he was taken with a congestive chill, and soon after passed away. Dr. Fernley was 72 years of age, his pastoral services having practically closed in 1884, when he became secretary of the Philadelphia Sabbath Association. He was an eloquent, able, earnest and faithful minister, and was respected and esteemed by all who knew him.

A dispatch from Topeka, Kan., announces the death of J. H. Martindale, of the Hardware firm of Miller & Martindale, who was found frozen to death in a pasture near that town some days since. He was riding with a friend, and left the buggy for the purpose of finding a buffalo robe which had been lost. As he did not return, his friend made search for him, but was unable to discover his whereabouts.

Four large tablespoonfuls make half gill of liquid; one teacup holds one gill; a large wineglass two ounces.

RECENT TRADE PUBLICATIONS.

The Canton Steel Roofing Co., Canton, Ohio, are distributing to those interested, their large and handsome "Catalogue C," covering a line of Stamped Steel Ceilings, etc., and intended for the business of 1898. The steel ceilings and wall patterns made by this company are invariably of late and original designs, and being constructed in a careful and accurate manner, can be laid with unusual rapidity and a perfect job secured accordingly. They are made with joints so dust proof and tight fitting that the point of contact is scarcely noticeable when adjusted. As good and careful construction is a point most sought after by architects and expert builders, the care with which these materials are made, makes perfect work possible and enables any design to look attractive, while without it, an appearance of unskillful construction is unavoidable. The company have many styles which present continuous patterns in strong relief, making also some of their panel styles in three different degrees of depth. This makes possible a variety of combinations giving bold and pleasing effects, which are always appreciated, as monotony of design is thereby avoided. Among the claims for superiority presented by this company an important one is that their plates are prepared by being resheared on all sides after they are stamped, which makes them line perfectly straight and regular, and makes it immaterial which way the plates are lapped, as the lap is not noticeable after the plates are applied. They can, consequently, be laid and painted more rapidly than others less perfect, as they require no puttying up or calking of joints, which, in too many cases, add largely to the cost of construction. Among these advantages may also be mentioned the fact that each of their plates is interchangeable with any other (with a single exception—where the use of a border is essential to complete the design) all the plates, mouldings, friezes, stylings, etc., being primed both sides with white paint unless otherwise ordered. The catalogue is embellished with handsome illustrations, showing their various designs of ornamentation, by half tones, taken from completed ceilings and side walls, admirably giving the extent and variety of their various material. It is provided with a telegraphic cipher code, covering every number of their patterns and parts. Dealers, architects and others interested in the goods referred to will be greatly benefitted by the possession of this catalogue, which will be mailed to possible patrons upon request.

The Logan-Gregg Hardware Co., Pittsburg, Pa., who are valued correspondents among our market letters, have recently issued a little paper of their own, of which No. 2 is before us, called *Hardware Hints*, and devoted, as they state on the heading, "to the cultivation of a better acquaintance with our customers." The advantages of the distribution of a monthly sheet of four pages such as *Hardware Hints*, enables the jobber to exploit in a pleasantly attractive manner, the new and seasonable specialties as they are needed by the retail dealer; gives their patrons entertaining reading matter having reference to their business; keeps their customers constantly in touch with their stock, and furnishing in its reading columns the advertising matter for local advertising which the country dealer is usually rejoiced to have placed in his possession. In the interesting contents of the present number they publish in *fac simile* a "statement," dated Sept. 1, 1866, covering sales made during a year previous; their comments on this document we give herewith, indicating as they do, the period of time this old house has been a Hardware landmark in the Iron City.

"YE OLDEN TIMES."

"We present above a *fac simile* of an invoice sent out by us some thirty-three years ago. This was during the era of war prices, and an inspection of the items and comparison of the prices charged, with those ruling to-day, is calculated to bring a smile to the lips of the well posted merchant, as well as to inspire the wish that we might again have a taste of such 'bonanza' times. Wool twine at 30 cents, cotton rope at $1.25 and coal scuttles at $1.75 each, are articles which exhibit, perhaps, the most marked evidence of the tremendous decline which has taken place since then. Our contemporary records of this and later years show, however, just as surprising a drop all along the line, when comparison with present prices is made. Only so long ago as 1883 double bitt axes were selling at $18.00 per dozen; coke forks at $40.00 per dozen; Potts iron handles at $5.00 per dozen; 10 in. Button's plyers at $17.00 per dozen; manilla rope at 16 cents a pound, and many other items that would now seem exorbitant prices, were no rarity, while to-day as good, and in some cases far better, quality of the same goods can be purchased at surprisingly low figures The steady improvement in the manufacturing arts has so reduced the cost of production, probably more in the metal industries than anywhere else, that prices a few years ago deemed impossible are now realities. The consumer has certainly been most benefited by this reduction, but there are still opportunities for the merchant. Now-a-days an up-to-date stock, prompt service and fair treatment are important considerations as well as price. We claim to sell you goods at low prices, and as for the rest we point with pride to a record extending back to 1831, in which year the house was founded. We occupied our location on Wood Street for so many years as to become almost a landmark, but four years ago our increasing business induced us to remove to our present warehouse on Seventh Street below Penn Avenue, and two years later we were incorporated under the name of Logan-Gregg Hardware Co., at which location and under which name we are ready and anxious to serve you."

F. E. Myers & Bro., Ashland, Ohio, issue, suitable for the season, the most graphically illustrated and useful calendar which has come under our observation. In order to prove that "their line is without an equal on the globe," they show in the ample space given on the sheet which holds the calendar proper, every illustration of their goods which is to be found in their very extensive catalogue. It is their desire that in hanging this up in the store of the dealer reached by the calendar, to stimulate the wants of that dealer's customers by their constant perusal of the many illustrations, and as each picture has the catalogue number in green ink ornamenting it, it is an easy matter to order the part or the appliance pictured thereon with great ease, convenience and profit. In addition to all this utility, the ornamental and artistic are by no means neglected. At the head of this large hanger, which measures over four feet long, is a very handsome farm house scene in which the milkmaid and the hired man are wasting so much time in the vicinity of the farm pump—which of course is a "Myers' Pump, with a glass valve seat"—that the old farmer in the background threatens to follow them up with a fence rail. This is a calendar worthy of being

Digitized by Google

added to the stock of embellishments, without which, at this season of the year, no Hardware dealer's walls are considered properly adorned.

The Remington Arms Co., Ilion, N. Y., Hartley & Graham, general agents, No. 315 Broadway, New York, have recently issued a very handsome and artistic booklet having reference to the new Remington small bore arm, which is produced to supersede the regular Remington single shot military rifle, illustrating as it does in its skillful construction, the most perfect of quick-firing high-power military rifles which the science of gun making has yet evolved. This booklet is being distributed to the various foreign governments contemplating rearmament, especially the South American governments. It is claimed by the manufacturers that they have in this new single shot rifle a weapon for military purposes fully the equal of any small calibre magazine arm which has been adopted in Europe or elsewhere within the past few years, and possessing none of the inherent disadvantages arising from breech mechanism usually more or less complicated. Among the many claims for advanced improvement put forth by the makers, it is stated that in order to withstand the increased pressure of smokeless powders, they have greatly strengthened the breech mechanism, and made use of the finest grade of steel throughout, so that there is no risk of its being upset, nor can it be shot loose by long continued use. The booklet is printed on a superior coated paper, with contents in English and Spanish, and will no doubt amply fulfil the purposes of its creation.

The Buhl Stamping Co., Detroit, Mich., present the compliments of the season with an 1898 calendar, on which the taking feature, in addition to its use as a calendar, is a map of the entire United States. The surface of this map is not made useless by an all-pervading advertisement, for only on the top and bottom of the entire sheet, which is arranged for hanging upon the office walls of the firm receiving it, will be found a few references to the several varieties of the "Buhl Milk Cans" which, under the names of "The New Sunlight," "Genuine Iowa," "Eastern Pattern" and "Western Pattern," have already achieved a national reputation. The calendar will be forwarded upon request being made to the company.

The A. J. Phillips Co., of Fenton, Mich., have published a very attractive catalogue of their line of wire screens, snow shovels and patented novelties. They have taken as their watchwords the words "Phillips" and "Excelience," which suggest not only the name of the manufacturer, but the quality of their goods. This book contains illustrated descriptions of their various lines of screens for windows and doors, their different makes of snow shovels, and Phillips' clothes bars, snow and stable scrapers, boys' stilts, repair boxes, nail boxes, folding tub stands, bicycle stands, door holders, card holders, etc. This is a seasonable contribution to the Hardware literature of the day.

From E. I. DuPont de Nemours & Co., Wilmington, Del., we have received an extremely handsome and very artistic calendar, in which a characteristic scene, emblematic of a day's good sport in the gunning season, is indicated by the large colored engraving of a pair of hunting dogs, shown in a condition of action enjoyable to the hunter; a brace of partridges, a pair of breech loaders and a couple of wild geese, make up appropriate accessories to a first-class calendar; one worthy of being hung among the finest office adornments that at this advanced date make business life enjoyable.

The Bridgeport Chain Co., Bridgeport, Conn., have issued a catalogue of their various lines of chains, which are illustrated and described on every page. A great many details of information are given, with prices, etc. An examination of the catalogue seems to suggest that nothing which can be wanted in the chain line has been omitted therefrom. This catalogue will be sent upon application.

The Cleveland Twist Drill Co., Cleveland, Ohio, with New York store at No. 99 Reade Street, have published a combined memoranda and calendar, which not only serves as a guide-post during 1898, but makes an attractive ornament, and furnishes some valuable information concerning the "Old Reliable" Cleveland Twist Drills.

We have received from Messrs. Robinson & Fox, exporters, No. 35 Warren Street, New York; No. 44 Broad Street, Boston, and Newfoundland, a very handsome and attractive calendar for 1898, printed in colors, with very distinct lettering and handsome enough for an ornament upon the wall of any office.

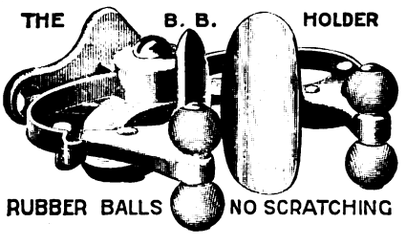
The Dean Linseed Oil Co., No. 181 Front Street, New York city, are sending to their friends once more, a handsome wall calendar, consisting of a patent leather frame, enclosing cards for each month in the years 1898 and 1899. It is a very neat and useful ornament.

The Importance of Oiling.

To obtain the best results from any bicycle, it should be properly oiled. No wheel will be at its best unless careful attention is given to this matter. Few people have any idea of the injury done thousands of machines by neglect in this respect. Fault is frequently found when probably the sole trouble is the result of carelessness in oiling. Oil frequently and only a little at a time. Avoid extremes. Do not let your bicycle suffer from want of oil; and, on the other hand, do not saturate it with oil, as the overflow causes dust and dirt to collect, which not only soils the hands and clothes, but interferes with the working of the machine. It is an easy matter to oil any article properly if it is done with the "Perfect" Pocket Oiler. This oiler does not leak and is neat and convenient. It is so handy that there is little chance of the machine suffering from neglect, and as it regulates the supply of oil, there is no danger of an overflow causing the accumulation of dirt. If you do not own one of these oilers already, get it at once from your dealer or from the makers, Cushman & Denison, No. 174 Ninth Avenue, New York. It costs only 25 cents, and will save that amount in a short time in the economy of oil. The avoidance of grease and dirt makes it worth a hundred times the price. This firm also make a line of cheaper oilers for those who wish something lower in price.

Stanley Rule & Level Co.

In their handsome new quarters in the Cary Building, No. 107 Chambers Street, New York, the Stanley Rule & Level Co. are as conveniently and comfortably located as any manufacturing company on the street. Having an entire floor, which runs through the block to No. 91 Reade Street, devoted to their business, their increased facilities enable them to carry a much larger stock than ever of their labor-saving specialties. The floor having been entirely refitted with a new equipment of shelving, etc., the steam-heated and electrically lighted premises extend a more grateful welcome to their old friends than ever before. No firm to-day is better fitted to handle the increased patronage predicted for 1898 and no manufacturing company more thoroughly deserves its success.



The Riverside worsted mill, of Providence, R. I., are making some extensive improvements in their plant. Among them is the rebuilding of the boiler house, which is being constructed so as to have it absolutely fireproof. The walls are of brick, and the roof will have metal supports with a tile roofing. The contract for furnishing and erecting the iron work has been given to the Berlin Iron Bridge Co., East Berlin, Conn.

NEW GOODS AND SPECIALTIES.

Ball-Bearing Bicycle Holder.

The Bristol Bell Co., Bristol, Conn., is placing upon the market something new in the way of a Bicycle Holder which will doubtless become extremely popular. It is called the "B. B." (ball-bearing) Holder, and we give herewith an illustration of it which will convey an idea

of its great utility. It is automatic in its action, and can be adjusted to any desired angle. The rubber balls which are attached to the spring-actuated clutches afford a frictionless rolling motion, which effectually prevents all scratching and marring of the beauty of the wheel, for no matter how swiftly it may be thrown between the clutches, or even if the mark is missed entirely, no damage results. It holds a lady's wheel rigidly, so that she is enabled to mount carefully and with some degree of comfort and satisfaction. The improved method of operation, arising from its ball-bearing features, will undoubtedly prove very popular. The manufacturers, identified as they have been for so long a time in the production only of articles possessing superior merit, intend bringing the advantages of this new holder before the riders of the country in an intelligent manner. The holders will be made in three styles and finishes, and they are intended to be marketed through the jobbers who are legitimately engaged in distributing similar goods. Further particulars will be furnished by the manufacturers upon request, and dealers desiring to handle a salable specialty will do well to write for information as to prices, etc.

The Gale Automatic Safety Sash Lock.

Rufus E. Eggleston, Philadelphia, Chicago and New York, with factory at Newark, N. J., is placing upon the market, with no small degree of success, the Gale Automatic Safety Sash Lock, which is shown in full size herewith in Fig. 1. It is also shown in parts in Fig. 2, and the illustrations together convey a very good idea of this ar-

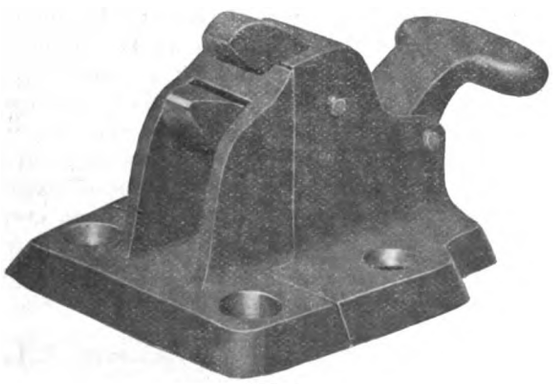

FIG. 1.

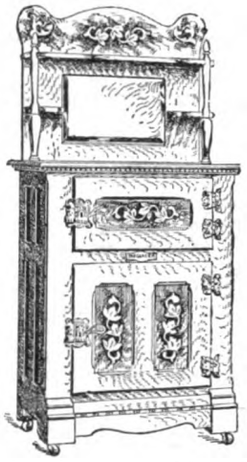
ticle. Among the many points made in its favor are the following: By keeping the sashes continually locked, it prevents their warping, and if the upper or outside sash has dropped or sagged, this lock forces it up to the head of the frame, and makes it absolutely fast. Even if the sashes should not be entirely closed, the window would still be fastened, as the Gale Lock fastens in three different places, or when the meeting of the rails are as much as ⅜ of an inch out of plumb. The manufacturers further say that there is no scratching or chipping of the woodwork, no catching of either sash, and that they are strong, durable, compact, effective and well made. The sizes and styles are varied to suit different windows, and are furnished in all the popular finishes. The makers further say: "Other window locks have promised equally sure results, but the nature of their construction makes them unreliable and easy to put out of order. The Gale Automatic Sash Lock cannot get out of order, even when misused. It has no springs, no complex parts, simply free moving pieces of metal, which slip into place when the window is shut. You take no midnight excursions in search of something to wedge the sashes when they are fastened by the Gale Automatic Sash Lock. It holds them rigid, no rattling

FIG. 2.



possible. All this accomplished simply by closing the window." Mr. Eggleston is publishing a very handsome catalogue, fully illustrating and describing this article, upon which is the taking title, "Familiarity Breeds Content. It never fails." This will be sent on application to the makers at the following addresses: Philadelphia, Mutual Life Building; New York, Postal Telegraph Building; Chicago, No. 764 Monadnock Building.

The "Leonard Cleanable."

The Grand Rapids Refrigerator Co., Grand Rapids, Mich., have issued a handsome catalogue for 1898, upon which, in bold letters of gold, stands the well-known trademark, "The Leonard Cleanable." This book is very handsomely prepared, and printed in green and black upon a very fine paper, which shows each article out with wonderful distinctness. It is not necessary at this late date to introduce "The Leonard Cleanable" to the Hardware trade. In the construction of these goods, the makers state that they use every improvement known to the trade to produce a first-class article. The outside cases are made of ash and finished in the new shade of reddish antique. All the carvings are raised instead of sunken, as heretofore, and the designs are most delicate and artistic.

Digitized by Google

They add: "The interior workmanship, we believe, is unapproached by any other factory in the country. We use mineral wool for insulation, combined with charcoal sheathing in such a manner as to give eight walls for the preservation of the ice. All of these refrigerators are fitted with our celebrated movable flues, which obviate the necessity of removing the whole ice box for cleaning.

Even the waste pipe is removable. The Leonard Airtight locks are another special feature of these goods. The ice racks and shelves are made entirely of galvanized iron. The bottoms and backs of these refrigerators are paneled as nicely as the fronts and ends. The refrigerators are all mounted on ball-bearing casters, and packed in a first-class manner for safe shipment to any part of the world. The constantly growing popularity of these goods is induced not only by their merit but by the liberal advertising given them in the magazines, of which all agents reap the benefits. Catalogues free on application."

Repairing Kits, Etc

Special attention is called to the card of Brandenburg & Co., manufacturers of family shoe, harness and tinware repairing kits, found upon page 66 of this issue. These sets have served to fill "a long-felt want," and are described as "just the thing for a thrifty family and mechanic, and in consequence, many thousand sets are being sold every week by this popular firm." Storekeepers who are looking for a money-making, rapid seller should investigate the merits of these goods, as they are something which every family should have, and sell rapidly on sight. This company are also sole proprietors of the Bonanza

Half soles, which are specially adapted for family shoe repairing, and which are sold at a price within the reach of those who wish a good thing for little money. These sets, and the half soles, are being largely sold by the Hardware and general store trade, and the company inform us that business is growing rapidly. Full information as to prices and details will be furnished upon application to Brandenburg & Co., No. 41 Peck Court, Chicago, Ill.

The Stanley Works, of New Britain, Conn., and New York, state that the demand for their ball-bearing butts is rapidly increasing, and that these articles are being specified for many of the larger buildings to be erected during the coming season.

The Nicholson "New Year's Greeting."

The Nicholson File Co., of Providence, R. I., have favored their trade friends with a most original and tasteful New Year's greeting. It is in the form of an old English parchment sheet, engraved in old-time lettering with ap-

To All and Singular to Whom these presents shall come Greeting

Whereas in times past it has been the custom in sundrie places and in divers manners on the recurrence of the New Yeare for all good people to send felicitations and goode wishes to their best and dearest friends . . Now Theretore know ye that the goode things said and done in the Olden Tyme be not forgotten and fall into desuetude to the detriment of the goode feeling holding between friends And Whereas it is goode and profitable for the soul's health to interchange sentiments of good-will particularly at this time and especially towards those for whom a sincere regard is entertained And Whereas it is destrable that this commendable custom should be maintained I hereby in all goode faith and honesty send these presents Wishing you health happiness and all the compliments of this joyful season with the loyal and fervent hope for a bright and happy New Yeare

Witness my Hand and Seal this first day of January in the yeare of Our Lord One Thousand Eight Hundred and Ninety-Eight

Signed Nicholson File Company
Jno. M. Nicholson Pres.

FAC-SIMILE OF NICHOLSON FILE CO.'S NEW YEAR'S GREETING

propriate well wishes, both the engraving and wording being after the manner of ancient court documents. At the bottom appears President Nicholson's signature, with a crude old-fashioned red seal stamped beside it. The whole is in keeping with the high standard set by this concern in everything they undertake. So attractive is it that we reproduce it herewith.

Failure in Syracuse.

The trade some days since learned with surprise of the closing of the wholesale Hardware store of Bradford Kennedy & Sons, Syracuse, N. Y., on executions aggregating $40,626 36. The liabilities of the concern are about $100,000 and the assets $120,000. The assets consist of the stock, which is worth $70,000, and the book accounts, some of which are bad.

Mayor McGuire, who for many years was connected with the firm, but who retired recently, on being asked the reasons of the failure, said:

"The great shrinkages of values in metals during the past six or seven years, together with excessive amounts paid retiring partners amounting in principal and interest to nearly $225,000, bad collections and failures in trade, are the chief causes of the failure. My partnership has been a special one and in the contract I was guaranteed exemptions from debt liability. The firm dissolved recently and gave the notes for the amount that was due me. I have not taken judgment, as I do not care to evade the settlement of anything I am bound for. If the stock, realty and accounts could sell at par there will be enough for everybody. The great trouble will come from the depreciation The salaries of the employees have been paid in full."

The annual supper, given by the Tabb & Jenkins Hardware Co., of Baltimore, Md., to their traveling salesmen, occurred some evenings since at a prominent restaurant. Besides the officers of the company there were present about twenty-five of the house employees and fifteen salesmen, some of the latter coming from a great distance to be present. The occasion was marked by good fellowship, and the menu was an excellent one. Plans for the coming year's campaign were discussed, and views exchanged as to the best method of securing trade. C. T. Jenkins, the secretary and treasurer of the company, was the presiding spirit of the feast.

Nicholson File Co.'s "Extra [XF] Fine" Files.

We present herewith in *fac simile* the price list, dated January 1, 1898, of the Swiss pattern files, tools and specialties, manufactured by the Nicholson File Co., Providence, R. I., and known under the distinctive trade mark of "Extra [XF] Fine." This superior product has already achieved a reputation for excellence in quality which has greatly lessened the importation of Swiss and Grobet files, formerly considered so necessary in a stock which catered to the wants of the jeweler and watchmaker. The prejudices of these skilled artisans in favor of imported files were very pronounced and hard to overcome, but, as in every other branch of industry requiring files and rasps, which were conquered by the undeviating excellence of American-made files, this extensive and useful variety finally capitulated and the American product holds the field.

Some careful experiments which have been made in England prove that the life of a locomotive is about 500,000 "train miles." In other words, that a locomotive of the latest approved pattern will run 500,000 miles before wearing out so as to be useless. In making this run of a half-million miles the fire-box will have to be renewed, the wheel tires five or six times and the crank axles from three to five times. — *Boston Budget.*

Review of the Markets.

There is no great amount of activity noticeable in the trade, with the exception of that needed to bring to a conclusion the inventory so essential to establish results.

The "boys" are, all of them, at home preparing new outfits of sample cases and sample trunks filled with standard goods and many novelties that have yet to be shown the trade. They will sally forth to meet their customers with every confidence of reaping good results. Prices, if anything, are as low at present, as they are likely to be at any time this season. The only trouble will be to get the goods wanted on time for the season's trade, for but few of the manufacturers of leading lines of goods for Spring trade will have a stock ready for early delivery at all commensurate to the possible demand.

The travelers will find this year, more than ever before, trade is getting closer together.

The various State associations, wholesale as well as retail, are composed of a class of dealers the brightest and most intelligent in the industry, and a word or two at a monthly meeting could induce the giving of an order or the "turning down" of a traveler, should there be any occasion to question the honesty of purpose or directness of statement, that should be the travelers' best credentials. Let us hope the dealers will be found as having had a fairly good year, not entirely unprofitable, with fresh hopes for the future, and faith in the fruitfulness of persistent effort based on intelligent methods.

Wire Nails: The feeling among the wire nail mills is that the trade at present is fairly well supplied, having freely purchased during December, the output being in a few mills the most phenomenal of the year. The demand at present is consequently extremely light, and with the mills closed as they are for the usual two weeks' overhauling and repairs, stocks amount to very little and prices are very steady. For early delivery only, manufacturers will accept orders at $1.45 base, f.o.b. mill. New York quotations are: $1.60 for carload lots on dock and the usual advance for smaller lots from store.

Cut Nails: Trade in cut nails is at present very limited in character. Although stocks are not unusually heavy, the demand at this season of the year is especially limited. New York prices are: For carload lots on dock, $1.25; smaller lots from store, $1.35.

The revised prices in the screw market have been very favorably received by the trade as indicating a condition of affairs that would be welcomed all around. All the leading manufacturers have been heard from, and concert of action is assured. There have been no speculative purchases so far, as the season is young and the taking of inventories but recently concluded, but a number of satisfactory orders have been booked at recent quotations for the ordinary wants of a jobbing stock up to April 1st.

Machine Screws: Revised lists and discounts on machine screws have been agreed upon by the leading makers of these goods, as received from the American Screw Co., Providence, R. I., and are subject to the following discounts for either iron or brass: Round head machine screws, 60 per cent., flat head machine screws, 60 per cent; fillister head machine screws, 60 per cent.

Swiss Pattern X F Files: The Nicholson File Co., Providence, R. I., have recently issued a revised price list of their Swiss pattern files, tools and specialties. We give it in *fac simile* on another page. This new list is subject to a discount of from 30 to 30 and 10 per cent.

Window Glass: The American Glass Co., representing the Associated Manufacturers of Window Glass, have adopted, under date of January 1, 1898, the following official list. Several changes in the bracketed signs have been made, and on a number of the smaller sizes it will be found that the net prices are higher than the French glass list in use since last September.

The discounts for the largest quantities have been established, as follows: Interior points of distribution, 5000 boxes or over, 85 and 20 per cent; carload lots, 85 and 15 per cent. The prices for smaller quantities, to be sold by the jobbers, are not yet established, but will be given at an early date:

United inches.	Sizes.		Single. 1st,	2d.	3d.	4th.	Double. 1st.	2d.	3d.

100	36x60	" 40x60	.....	.....	.....	.....	66.50	60.50	55 00

Sizes above 100 inches, $10 per box extra for every five inches.

An additional 10 per cent. will be charged for all glass more than 40 inches wide. All sizes above 52 inches in length, and not making more than 81 united inches, will be charged in the 84 united inches bracket.

Cordage: Changes have been made since our previous issue in the prices of sisal and manila rope, which constitute an advance of ½ cent a pound, the prices given being for less than carload lots, as follows:

Sisal, 7-16 inch and larger	Per pound,	5½ cents.
" ⅜ inch	"	6 "
" ¼ and 5-16 inch	"	6½ "
Manila, 7-16 inch and larger	"	6½ "
" ⅜ inch	"	7 "
" ¼ and 5-16 inch	"	7½ "

Lead Pipe, Sheet Lead, etc.: Among the metals, lead at the present time is in such favorable condition that the manufacturers, under date of January 3, announce the following revised quotations:

Lead Pipe	per pound,	5½ cents.
Sheet Lead	"	6½ "
Tin Lined Lead Pipe	"	12½ "
Block Tin Pipe	"	30 "

Screws: The Boston Screw Co., Fitchburg, Mass., make the following announcement:

In accordance with the unanimous sentiment of the screw manufacturers at a recent meeting, in regard to prices and to the welfare of all mankind interested in the sale of wood screws, we quote:

Flat Head, Iron	87½&10%
Round Head, Iron	85%
Oval Head, Iron	85%

Net cash, 30 days. Usual freight allowance. Prices subject to change without notice. BOSTON SCREW CO.

Under date of January 1, 1898, the American Screw Co., in the following discount sheet, confirm discounts previously agreed upon on wood screws, and call attention to changes in discounts on machine screws and rivets, new lists of machine screws, dated January 1, 1898, being given to the trade at the same time. All discounts named are subject to change without notice:

THE DAVENPORT TRADE.

A remarkable business year has just closed. Depression and almost despondency marked its beginning; later, returning confidence brought hopes which were fulfilled in a prosperous ending. Money was lost the first four months; expenses barely paid the next, but a net gain was realized during the last four months of the year.

The Hardware trade of 1897 was compelled to stand or fall on a legitimate business basis. No sudden advances in staple goods occurred to swell the profits which have so often happened in many of the preceding years. Prices remained steady during the year, giving the Hardware dealer an opportunity of knowing for once whether the regular profits received were sufficient to pay large and constantly increasing expense accounts for the use of capital employed, and a fair salary for his own work.

When the year's annual inventories are completed, a fair allowance for shopworn and slow-selling goods is made, a liberal deduction allowed for the doubtful accounts, the balance will be on the right side of the ledgers of only conservative jobbers who have not depended upon successful speculation for their net earnings.

Digitized by Google

It is no longer safe to await the result of an annual inventory to know the result of a year's business. The prudent dealer should keep a daily sales sheet, showing each night the amount of goods sold, how and by whom the sales were made, and what the gross profits for the day have been. With this sheet in hand, knowing the average daily expenses, the net result is shown.

December sales were much larger than usual. Collections satisfactory. SICKELS, PRESTON & NUTTING CO.

THE BOSTON TRADE.

The year closes with everybody finishing or preparing to take their annual inventory. What the results will be are to a certain extent problematical, and yet there exists a feeling that the profit side of the ledger will not be in the nature of an agreeable surprise.

The year just closed has been somewhat of a disappointment as regards the industrial conditions of New England, as it was expected with a new administration the depression of previous years would vanish and we should enter an era of prosperity. We now acknowledge that an immediate return to prosperity would have been nothing short of a miracle, and we realize after so long a period of depression that it would be impossible to expect a prompt revival of business.

We are glad to note that the conditions are different from what they were one year ago, and can say with all sincerity that we have never seen more unmistakable signs of better times for the future than now exist. There are few, if any, clouds, to threaten the growth of New England prosperity, and we firmly believe that this is the beginning of a turn toward a term of years of more confidence and better business.

We only hope with this improvement in general industries may come an improvement in business methods whereby the manufacturer, jobber and retailer may receive a better return for their investments.

FRYE, PHIPPS & CO.

THE PITTSBURG TRADE.

Inventory methods are so greatly improved of late years, that we are able to write out the stock and get it ready for pricing and calculation, within four or five days, which under the old plan took as many weeks. Results are, of course, as yet uncertain, but some things we know. Values in general are the lowest yet made, and it takes a very large quantity of goods to amount to much money. The widea wake merchant will not try to deceive himself by anything else but actual cash value of his stock, for he must sell in competition with those who so value their goods. Stocks of imported cutlery and guns may safely be taken, however, at the present advanced cost, as it is not likely they can be bought lower in 1898. We are glad to see the stiffening tendency in some items, such as screws and manilla rope, which seem to be a natural advance. We cannot look for a large general advance, but if we can be sure that bottom has been reached, and that where goods are abnormally low, a living margin for the makers will be allowed, merchants generally will rejoice at the new order of things. Our mills report very heavy December business done, with many inquiries and offers to place orders for the new year. LOGAN-GREGG HARDWARE CO.

THE COLUMBUS TRADE.

We are in the midst of our annual inventory, and hope the showing will be a good one for our labors of 1897. This vicinity is having winter too late to benefit trade much. Had the snow come three weeks ago it would have made a big difference in the sales of skates, sleds, blankets, etc., but as we do not make the weather, we take it as it comes, just the same as they do out West.

There is a "Hot Time in the Old Town" just now. Some sore heads are trying to defeat the Republican party's choice for United States Senator. We do not think it can be done. "Mark" that.

We have not received notices of many changes in prices so far, but it is a little early, Registers are higher, and several manufacturers of screws have advanced prices. The wire and nail situation is the same as it has been for some weeks. Rope has advanced one-half cent per pound in the last sixty days. We hope there will not be any radical change in prices. SMITH BROS. HARDWARE CO.

John C. Hagan & Co., Manchester, Va., have dispatched to their friends in various parts of the country a *fac simile* of a very patient and long-suffering friend of humanity, upon the back of which is a little basket containing some very interesting information in regard to Hagan's Bull Dog Lace Leather. The company say: "You know what the characteristics of the bull dog are—well, we are producing a Lace Leather that stands to other leathers as the bull dog to other dogs. You may think the braying animal on this card is tough, and, as a rule, he is, but you may be certain of one thing—if you tackle him, you'll have kicks coming—well, that's what you won't have by using our Bull Dog Leather, it simply grips and grips, and never lets go."

Patterson, Harral & Gray, No. 85 Chambers Street, this city, intend fitting up the front portion of their store in a very handsome and elaborate manner, with the view of renting it to someone who may be desirous of having office and salesroom in the most convenient and eligible part of Chambers Street. Judging from an inspection of the plans governing the changes to take place, the premises will not long be without a first-class occupant.

OUR NEW GARDEN HOSE BOOKLET

Belting,
Garden Hose,
Water Hose,
Fire Hose,
Suction Hose,
Steam Hose,
Air Hose,
Tubing.
Packing,
Gaskets,
Valves,
Rubber Tiling,
Rubber Matting,
Emery Wheels,
Specialties,
League Tires.

Is ready. It gives a full description of our '98 line—eight grades of Rubber Hose and two of Cotton, ranging from the finest hose we know how to make, down to a good, serviceable article at a low price. **The booklet is the handsomest we have ever issued, and is a capital advertising medium for customers handling our line.** We will be pleased to furnish our friends with as many booklets as they can use. Call or write for them, and also for hose samples and prices at any of our stores.

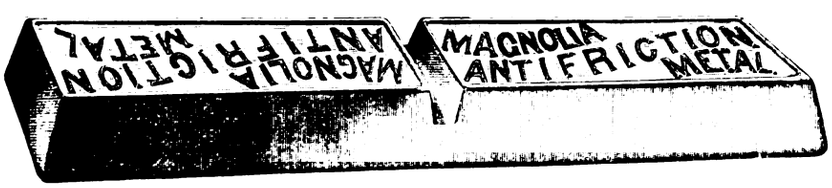
Important Injunction Suit.



The Magnolia Metal Co., whose trade extends to every part of the United States and Canada and to every civilized country in the world, has during the last two or three years had numerous suits with parties infringing their trade marks and patents.

An injunction was granted on December 15, 1897, by Lord Chief Justice Russell in the Queen's Bench Division of the High Court of Justice, London, England, enjoining the Tandem Smelting Syndicate, Ltd., and restraining them from passing off their metal for Magnolia Metal, it being made up so as to counterfeit Magnolia Metal.

A few months ago, the Globe Engineering Co., Ltd., of Manchester (now in liquidation), shipped a quantity of metal to a firm in South Africa that had ordered Magnolia Metal. The metal sent to fill this order was made up into ingots as near as possible to represent the well-known ingots of Magnolia Anti-Friction Metal. They bore the words "Magnolia Anti-Friction Metal," but the trade mark, the Magnolia Flower, and the words "Patented June 3rd, 1890," were not imprinted upon them. The purchaser brought an action in the High Court of Justice, at the Manchester Assizes, against the sellers, and judgment was given in his favor by the arbitrator to whom the matter was referred.

The Magnolia Metal Co. has called our attention to the above and desires to warn the public, through our columns, against fraudulent imitations. The public are as much interested in getting straight goods as the manufacturers are in suppressing frauds.

The genuine Magnolia Anti-Friction Metal is made up into bars of which this is *fac simile:*

and the trade mark, which is also shown with this, and name are always stamped on bars and boxes; and, besides this, the words "patented June 3rd, 1890," and "manufactured in U. S." are stamped on the under side of each bar.

The Magnolia Flower Trade Mark is registered in every civilized country in the world.

The Magnolia Metal Co., of No. 266 West Street, New York, advise us that similar frauds are being committed in this country at this time, and they offer one thousand dollars reward to any party causing the arrest and conviction of any individual or firm infringing their trade marks or patents.

A. L. Deane & Co., Nos. 501–503 Sixteenth Street, Denver, Col., are placing upon the market the Lightning Repair Tool, an illustration of which in its various parts may be found upon page 37 of this issue. This tool is used in the repair of any single-tube tire, and the manufacturers guarantee that any ordinary puncture can be permanently repaired, in less than one minute. The illustration shown is the exact size of the tool, and the price for tool and one tube of cement put up in a neat box, is but 40 cents. The Lightning Solution is itself a special mixture, and will be furnished by Deane & Co either in bulk or in tubes. Prices for the same will be furnished upon application. The makers inform us that this article has met with great success, and that they have introduced it in all parts of the country.

The longest commercial distance at which the long-distance telephone is now operated is from Boston to St. Louis, a distance of 1400 miles. This line is more than twice as long as any European telephone line.—*Electrical Age.*

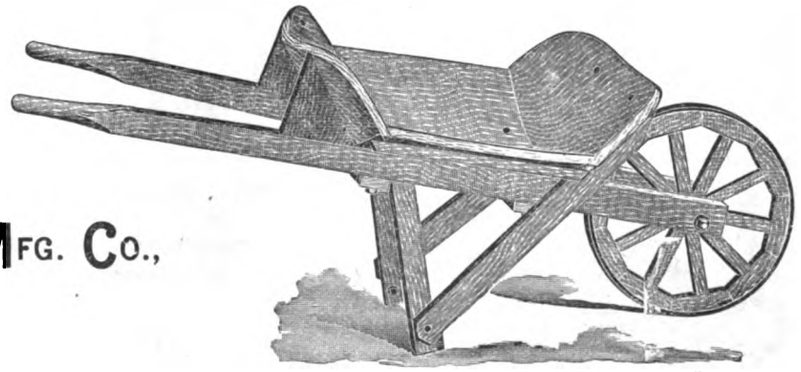
"Your Silent Salesmen."

Nothing ever comes in the way of printed matter from the New York Belting & Packing Co., New York, that is not artistic, and filled with information, ably condensed and yet saying all that is to be said. This holds especially true of a small publication which this company have just issued, headed "Garden Hose," in which their well-known lines are presented in colors with full descriptions, and in which also are found the several articles connected with hose and the use of the same, which they manufacture, among which are hose fittings, hose pipes, Gem sprinklers, Boss sprinklers, Rose sprinklers, and hose reels. The lines of hose shown are the 1846 Para, Tuxedo, Double Diamond, Puritan, Oxford, Carbon, Comet, Spider, Double Diamond cotton hose and Spider cotton hose. In a note of introduction under the heading "Your Silent Salesmen," the company say: "Suppose you were able to follow your customers into their homes, and, without intruding, say a good word for yourself—would that help your business? Suppose these home salesmen talked against you all the time—would that injure your business? Perhaps you don't realize it, but one or the other of these salesmen is talking about you now. Every length of Garden Hose you sell is working for or against you, according to its quality. If the hose is the right kind—strong and lasting—every time it's used you are pleasantly remembered Unconsciously the impression soaks into the household that you are a safe man to buy from—not only in hose, but everything in your line. Poor, cheap hose makes exactly the opposite impression. You can't select a surer way to drive customers from your door than sell them a length of cheap hose. Can you afford to advertise your store as a good place to buy leaks and bursts, and other kinds of trouble? Every length of our hose is a trade maker, working silently and steadily in somebody's interest—yours, if you sell it. There are ten grades. and every one a good honest worker—rubber the finest, duck the strongest. On the following pages each grade is described in detail. It will give us pleasure to furnish further information, samples and prices."

Bowling at the Sportsmen' Shows.



Probably the happiest mortals in Greater New York and vicinity are the bowlers and those who love the game, because they are to receive recognition at the Sportsmen's Exposition to be held at Madison Square Garden, from January 13th to 22nd inclusive. This feeling, however, is not confined solely to local knights of the wooden sphere. Those who twirl the ball on alleys in other cities are much interested in the many competitions to be decided at the Sportsmen's Association Bowling Tournament. Samuel Karpf, secretary of the American Bowling Congress and other important bowling organizations, who is in charge of the affair, has received numerous letters from bowling clubs in Boston, New Haven, Buffalo, Columbus, Dayton, Cincinnati, Toledo, Chicago, Detroit and other cities, stating that they will send their best bowlers to take part in the competition, which is hoped to produce the individual headpin champion of the United States. This contest will be open to all, and the lucky individual will receive the handsome Brunswick-Balke Collender Co.'s trophy emblematic of the championship.

The bowlers who have been selected to battle for the championship of Greater New York are hard at work on the various alleys in this vicinity, and the winner will have to do some tall bowling. The cream of the bowling talent have been selected for this competition. Games will be rolled every afternoon from 3 to 4:30, and evenings from 8:30 to 10 o'clock.

The stove salesmen of Philadelphia have effected an organization to be known as the North Second Street Stove Salesmen Association. The officers are: President, Harry E. Borzell; vice-president, William F. Habicht; secretary, W. G. Withers; treasurer, Horace Tyson.

At the recent annual meeting of the stockholders of the Simmons Hardware Co., St. Louis, Mo., the following gentlemen were elected officers: President, Wallace D. Simmons; first vice-president, J. E. Pilcher; second vice-president, H. M. Meier; third vice-president, J. E. Smith; fourth vice-president, S. Norvell; traffic manager, F. N. Johnson; treasurer, A. E. Dann; assistant treasurer, G. R. Barclay; secretary, A. W. Douglas; assistant secretary, E. H. Simmons; advisory board, E. C. Simmons and I. W. Morton.

The retirement of E. C. Simmons from the presidency of this company will attract considerable attention. While giving up the active duties of president, Mr. Simmons will still remain associated as a member of the advisory board. The gentlemen into whose hands the management now falls are men long connected with the company, and the general policy and detailed work pursued in the past will in all probability be continued in the future. The new president, Wallace D. Simmons, is the eldest son of E. C. Simmons. He is a graduate of Yale, and has been actively connected with the company for the past six years. Mr. Pilcher has been with the house for a quarter of a century, and is conversant with every detail of the business.

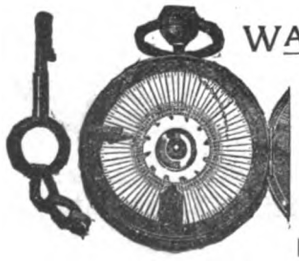
BALDWIN REFRIGERATOR CO.,
BURLINGTON, VERMONT.



We learn from a Reading, Pa., exchange, that the recent meeting of the representatives of the Reading Hardware Co., for the purpose of discussing the outlook for business for 1898, was a very successful annual gathering. The company were represented by the following: Orton Hill, Lowell, Mass.; W. H. Bennett, Chicago; Ira. L. Gifford, Kansas City; Fred. L. Stellwagen, New York; F. B. Hendrickson, Philadelphia; R. P. Boyd, Knoxville, Tenn., and I. M. Rhoads, Meadville, Pa. Mr. Hill, representative in the New England States, has been employed as a salesman for the company 22 years, and has traveled in every State in the Union. In 1894 he made an extended trip through Europe. Mr. Gifford, who represents the company in the extreme Southwest and West, reports business improving wonderfully. Most of the salesmen said the outlook was exceedingly bright, and that business has gradually advanced during the past year.

The Hardware and iron dealers of Baltimore, Md., have followed in the steps of their brethren elsewhere, having met and organized an association to be known as the Hardware & Iron Dealers Association of Baltimore City. The following officers were elected for one year: Jacob Wolf, president; Louis Schaefer, vice president; W. Wyeth, secretary; E. Scott Payne, treasurer. The object is the protection of the dealers. A committee consisting of the officers was appointed to draft a constitution and by-laws, to be submitted at a meeting to be held at the same place on January 7th.

"PRODUCTIVE OF RESULTS."

Pope Mfg. Co., Hartford, Conn. [*Bicycles*]: While little advertising seems to be necessary this year to sell Columbia Bicycles, we still feel that our advertising with you is productive of results.

Digitized by Google

GREAT WESTERN FILES.

REASON,

A plant that is larger and more completely equipped with machinery and appliances, that employs more skilled labor, and that is managed by the best reputed file concern in existence, necessarily turns out a product that is better than the product of a smaller factory not so favored.

——We call this good logic.——

Best Steel; **Thorough Temper;**

Sharp Teeth; **Durable.**

SUPPORTED BY FACTS,

The Great Western File Works are next to the Nicholson Works, the largest and most completely equipped file and rasp works in the world, and they are managed by the greatest and best reputed file concern in existence, the Nicholson File Co., Providence, R. I., U. S. A.

——These facts are indisputable.——

MAKES A CONVINCING CONCLUSION.

GREAT WESTERN FILES ARE SUPERIOR TO THE OTHER SO-CALLED IMPROVED FILES SOLD AT EQUAL PRICES.

——Try them and prove it, as others have done.——

GREAT WESTERN FILES.

RETAIL TRADE RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Hardware Stores.

Charleston, S. C.—H. McGee Sanders has opened new Hardware store at No. 757 King Street.

Gilroy, Cal. — The Robinson Hardware Co. has been organized by Amos Robinson, Herbert E. Robinson, Matilda Robinson, Mrs. C. A. Hoxett and Valentine Grodhaus, for the purpose of owning and conducting a general Hardware, tinware, plumbing and manufacturing business. Capital stock, $30,000.

Grand Marais, Mich.—R. M. Hewitt, Hardware, will open new store.

Kansas City, Mo.—The Adams Stove & Hardware Co. has been incorporated by Lon Adams, E. N. Adams and Louis Adams. Capital stock, $15,000.

Montreal, Can.—E. Depocas.

Parkersburg, W. Va.—The West Virginia Hardware Co. has been incorporated by C. H. Shattuck, J. M. Jackson, Jr., C. F. Rathbone, P. L. Jones and Charles A. Moss. Capital stock, $100,000.

Stoneham, Mass.—The firm of Mann & Brown, who will occupy the new store in the Baker block as a Hardware emporium, is composed of C. C. Mann, of Stoneham, and F. W. Brown, of Boston, connected with the firm of Bolles & Wildes, wholesale Hardware dealers of Boston. Mr. Mann also has a large experience in important branches of the business.

Changes and Improvements.

Akron, Ind.—Ball & Co., agricultural implements and Hardware, succeeded by William Wilhoit.

Ashland, Ky.—John H. Eba & Co., Hardware, reported to have sold to Ogden Bros.

Ballinger, Tex.—Hall & Clampitt, Hardware and agricultural implements, succeeded by R. A. Hall.

Belle Plaine, Minn.—H. W. Diers, Hardware, moved to Roberts, Wis.

Belvedere, Ill.—W. W. Ray is removing the Hardware stock purchased by him from the building occupied by Disotell & Wilcox.

Bloomfield, Ind.—Grover & Hasler, Hardware and agricultural implements, succeeded by Hasler Bros.

Callaway, Neb.—Roy W. Welch, Hardware, succeeded by F. B. Harrington.

Chicopee, Mass.—O. C. Knox, stoves and tinware, reported to have sold out.

Delavan, Ill.—Smith & Moorehead have traded their Hardware stock to J. B. Coyner, of Farmington, for a residence property in Columbia, Tenn. Mr. Coyner moved the stock of Hardware to Hanna City, near Peoria.

Elizabethtown, N. Y. — T. C. Lamson, Hardware, reported to have sold out.

Elliott, Iowa.—Gem Hardware & Harness Co., reported to have dissolved partnership.

Gardiner, Me.—Dingley & Decker have put an entirely new front in their Hardware store, and the first and second floor fronts will be of plate glass. When completed, this will be one of the prettiest at this end of the street.

Harper, Iowa.—N. Kautenberger & Son, Hardware and agricultural implements, succeeded by J. A. Longhue.

Hartsville, Ind.—Mobley Bros. & Co., Hardware and agricultural implements, succeeded by J. T. Wright & Co.

Hebron, Ill.—H. D. Walling, Hardware, sold to Ira E. Hyde & Co.

Louisburg, N. C.—The Gannaway Hardware Co., dissolved. John E. Gannaway, of Lynchburg, Va., has sold his entire interest in business to the Louisburg Hardware & Supply Co.

Louisville, Ky.—Amended articles of incorporation of Robinson Bros. & Co., Hardware dealers, have been filed in the county clerk's office. The name of the firm is changed from Robinson Bros. & Co., to R. A. Robinson Sons' Co., and the authorized capital stock is increased from $150,000 to $700,000. The articles were signed by R. A. Robinson, president; William A. Robinson, Worthington Robinson, Charles P. Robinson, George A. Robinson, Archibald M. Robinson and A. Lee Robinson.

Luray, Va —F. W. Berry, Hardware, has removed to larger quarters.

Muscotah, Kan. —Allison & Bovington, Hardware, succeeded by W. C. Allison.

New London, Conn.—Daniel Latham, Hardware, succeeded by H. M. Whittemore.

Newmarket, N. H.—Young & Young will move their Hardware business into the store recently vacated by George W. Pillsbury & Son. They will retain the store now occupied by them for a storehouse.

North Washington, Pa.—Arner & Williamson, Hardware, succeeded by J. A. Williamson.

Oshkosh, Wis.—W. H. Crawford, who has been in the plumbing, Hardware and mill supply business in Oshkosh for the past thirty-one years, is removing his stock to Chicago, preparatory to establishing himself there in the same line of business. Mr. Crawford gives as the reason for his removal from Oshkosh to Chicago, the fact that he has had an excellent site and opportunity in view in Chicago for the past two years, and he has finally decided that it would be to his interest to make the change. He is moving his stock of goods from this city into a six story building at Nos. 418-420 Dearborn Street, and he occupies the basement and first floor of the structure.

Oskaloosa, Kan.—George Patterson, Hardware, reported to have sold out.

Pinconning, Mich.—The Shook Hardware Co. will put up a new brick store, 40x20 feet in size.

Rockford, Ill. —Mandeville & Lobdell, Hardware; V. D. Lobdell sold interest to W. H. Mandeville.

Somerville, N. J.—T. I. Honeyman has purchased the Hardware store of Thomas & Co., and taken possession. Mr. Honeyman is not a new man at the business, having been in it over a year.

Swedesboro, N. J.—Jacob Norton has purchased of David R. Black his interest in the Hardware store of Black & Norton. Mr. Norton is now sole proprietor.

Sycamore, Ohio.—Heard & Beebe, Hardware merchants, have sold out to E. C. Crosby, of Delta, Ohio, and the latter has taken possession.

Trimble, Tenn.—The Dyersburg Hardware Co. have added a repair shop.

Williamsville, Ill.—John B. Taylor & Sons have purchased the Hardware stock of W. C. Gilbreath & Son.

Business Embarrassments.

Boston, Mass.—Ernest S. Lent, Hardware, reported to have made an assignment.

Melrose, Mass.—William A. Burrill Hardware, etc., reported to be in bankruptcy.

Chicago, Ill.—Ignace N. Howell, Hardware, etc., reported to have made an assignment.

Burglaries in Hardware Stores.

Atlantic, Iowa.—Shoudy Bros., $200.

Seattle, Wash.— Seattle Hardware Co., razors, etc.

Recent Fires.

Atlantic City, N. J.—Three carloads of nails, one carload of iron pipe and a carload of heaters were totally ruined in a fire which burned a storage warehouse of the Currie Hardware Co. The fire is believed to have been of incendiary origin.

Bainbridge, N. Y.—Barlow & Clark, complete loss.

Baltimore, Md.—Crook, Horner & Co., dealers in plumbers', machinists' and millers' supplies, partially destroyed by fire, at a loss of about $150,000; covered by insurance.

Baltimore, Md.—J. R. M. Adams Hardware Co.; $1000; insured.

Dolgeville, N. Y.—Charles Dedicke, Hardware etc., destroyed by fire.

Detroit, Mich.—Baumgartner & Gleason, $150.

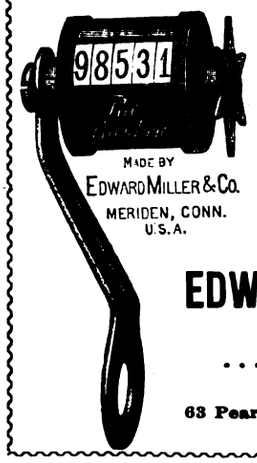
Evart, Mich.—Fire, caused by an explosion of an oil stove, damaged the three-story warehouse belonging to the Evart Hardware Co. Covered by insurance.

Huntington, W. Va.—The clothing, shoe and Hardware store of A. E. Cox has been burned. The loss is estimated at $50,000, with insurance of $20,000.

Rochester, Pa.—J. W. Hartzell, $1500.

Sharon, Pa.—An explosion occurred in the cellar of R. A. Hanna & Co.'s Hardware store and damaged the contents to the extent of $200. James Huffman, a clerk, was badly burned.

Stephensville, Tex.—Crouse & Leonard, Hardware, damaged by fire at a loss of $7000; insured for $3000.



St. Paul, Minn.—Karst & Breher, Hardware, destroyed by fire.

Tulsa, I. T.—Brodick & Lewis, Hardware, damaged by fire.

Toronto, Can.—Bertram & Co., $100.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over are requested to contribute to this page. News of new factories or companies, changes, improvements, etc, will be gladly received, and promptly published.

New Companies, Etc.

Albany, N. Y. — C. Kramer has received a patent for a pipe wrench. A company with a capital of $25,000 has been organized, to manufacture this useful article.

Baltimore, Md.— The W. L. Armiger Mfg. Co. has been incorporated by William L. Armiger, Waldo Newcomer, Charles G. Kriel, Daniel A. Klein and William A. Kammerer; for the manufacture of refrigerators, stoves, etc. Capital stock, $50,000.

Bedford, Ind.—The branch of the Columbus handle factory is to be located in Bedford and work will begin on it within thirty days.

Charleston, W. Va.— The Secretary of State has issued a certificate of incorporation to the Legg Handle Co., of Belleville, Wood County, W. Va., with an authorized capital of $50,000. The company is organized for the purpose of manufacturing hickory handles and dealing in lumber of all kinds. The incorporators are: J. M. Keever, Emma J. Keever, A. S. Keever and Maria Keever, of Belleville, and J. A. Wetheral, of Parkersburg.

Detroit, Mich.—Detroit is promised another industry in the shape of a factory for the manufacture of mica into lubricants, and for use in stoves and electrical apparatus, as well as other purposes. It is to be established by the Detroit Mica Mining Co., which is composed of H. M. McCormick, president; F. B. Clark, vice-president; Harry H. Wait, secretary, and Thomas R. Sherk, mining superintendent, all of Detroit, and is capitalized at $100,000. The mine which the company will operate is at Lyle Knob, in Macon County, N. C. The intention is to bring the raw material here to be manufactured. Superintendent Sherk is now at the mine, where the machinery is being put in, and it is expected to be in operation by March 1st. It is also expected that work will be begun in the factory here by May 1st, and the officers say that they will employ fifty people from the first, and turn out at least $100,000 worth of goods per year.

Hammond, Ind.—Long time leases have been drawn up by Marcus M. Towle, for the renting of his large factory building, formerly occupied by the Chicago Axe & Tool Co., to the Jackson Box Co. and the Kreuger Rawhide Belting Co., both of which concerns will move their establishments from Chicago to Hammond.

New York, N. Y.—The Mouthemont Machine & Tool Co. has been incorporated by F. Mouthemont, E. B. Mouthemont and Emil Gully. Capital stock, $10,000.

Richmond, Va. — The Richmond Hot Water Radiator Co. has been incorporated by Cornelius C. Hazlett, George H. Rogers, William C. Codd and Frederick S. Gassway. Capital stock, $15,000.

Changes and Improvements.

Albany, N. Y.—The Fuller & Warren Stove Co., of Troy, has filed with the Secretary of State a certificate of the extension of its business to include that of a general warehouse and storage business. The names of the trustees who are at present managing the concerns of the company are: Walter P. Warren, William Henry Warren, Walter Thompson and Robert H. Thompson. The company's capital stock is $450,000.

Galesburg, Ill.—W. H. Cooper, of Moline, has accepted a proposition to move from that city to Galesburg his factory, which employs fifty men. The Galesburg Business Men's Club offered him ten acres of ground and three buildings for factory purposes and to pay his expenses. This he accepted on condition that he should be allowed to pay for the plant as time permitted. Mr. Cooper is a manufacturer of saddlery Hardware.

Millbury, Mass.—With the opening of the new year Buck Bros. will commence the manufacture of razors. The firm has been considering the advisability of such a step for some time, and has come to the conclusion that it can be made profitable.

Norwich, Conn.—The Richmond Stove Co. have purchased from the Norwich Savings Society the building adjoining their works on the south, covering 119 by 95 feet, and in addition 224 feet of ground, with buildings thereon, on lower Thames Street, known as the W. W. Collins property: also the Burt Building, which connects the two properties. This will give the company a frontage on the river of 1000 feet. These new additions became necessary to provide room to take care of the increasing business of the company. The works are now melting daily more iron into new constructions than at any time during the past two years.

Utica, N. Y.—The Savage Arms Co. has been incorporated with a capital of $200,000, to manufacture the Savage rifles and kindred articles. The directors are: Henry W. Miller, Thomas R. Proctor, George E. Dunham, Charles W. Hackett, Walter Jerome Green, John A. Roberts, Edward H. Risley, of Utica; J. Scott McComb, of Dobbs Ferry, and Richard S. Reynolds, of Denver, Col.

Reading, Pa.—The Reading Hardware Co., of this city, which is to-day the most extensive establishment in the United States engaged in the exclusive manufacture of builders' Hardware, and whose plant is without exception the most substantial and best equipped industrial establishment in the city, are having built one of the most complete telephone systems to be found anywhere. The central station will be located in the factory office, in which will be placed a switchboard capable of accommodating fifty telephones, and will be in charge of a man whose only duty it will be to make the proper connections. The system, when completed, will consist of seventeen Swedish telephones, one of which will be placed in each of the most important departments. The new system will form a perfect means of communication between any of the departments containing a telephone, and will be the means of saving considerable time and labor. The system is being erected by Paul C. Anthony.

Rochester, N. Y.—The Robeson Cutlery Co., whose head offices are in Rochester, are about to move their factory from Camillus, a village near Syracuse, where it is now located, to the village of Perry, in Wyoming county. This city will continue to be the center of its business operations, and its salesrooms will be here, and all the shipping will be done from this city. The offices are located at No. 12 Saratoga Avenue. The change is expected to take place about April 1.

Improved Conditions.

Bridgeport, Conn.—The Gun Implement Mfg. Co. on Elm Street are running nights until nine o'clock. This busy concern has a rush of orders which will keep them busy for some time.

New Castle, Pa.—The laborers at the wire nail works, this city, were treated to a surprise when notices were posted telling them that from now on they would receive an advance of 10 per cent. per day and that at their next pay they would receive the advance for the past two weeks. The men had not been asking for the raise, and it was entirely unexpected. In the neighborhood of 100 men are affected.

Pittsburg, Pa.—Notices have been posted in the majority of the forty lamp chimney factories of the country that instead of the usual two weeks' shut-down, there will be only one day of idleness during the holidays this year—Christmas. The extra work means thousands of dollars in the aggregate to the workmen in wages.

Miscellaneous.

Fulton, N. Y.—The employees of the Hunter Arms Co. have been given notice of a general cut in wages to take effect with the beginning of the new year.

Hamilton, Ohio.—The Nile Tool Works are turning out, on the order of the Government, carriages for fourteen of the new disappearing guns intended for coast defense. The guns are twenty feet long, with a sixteen-inch bore, and will carry a projcetile twelve miles. The work of constructing the carriages is being done under the supervision of three inspectors appointed by the war department.

San Francisco, Cal.—The Japanese military authorities have decided to adopt a new rifle, to take the place of the Murata rifle, which will be manufactured in Japanese arsenals. The new rifle will have the smallest calibre of any army rifle, measuring only 6.5 millimetres, against 6.65 millimetres of the Italian and Dutch rifles.

BICYCLE TRADE RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Companies, Agencies, Etc.

DeLand, Fla.—J. A. Erickson, harness, etc., is preparing to take up a line of bicycles.

New Haven, Conn.—Andrew Pappardakes, of this city, has received a patent for a new driving machine for bicycles. His patent consists in a novel system of gearing by which, at every revolution of the pedals, the wheels of the machine revolve forty times.

Pittsburg, Pa.—The Sitwell Pedal Co. have applied for a charter, with the following incorporators: W. L. Abbott, N. L. Tener, H. L. Trees, W. L. Merwin and A. D. Boyd; to manufacture a new design of pedal for bicycles.

Rochester, N. Y.—It is announced that F. W. France will reopen his retail bicycle store in the spring, some time in March. The Barnes wheel will, as in the past, be his leader in high grade wheels. Mr. France recently visited Syracuse and saw next year's model of the Barnes. He was highly pleased with it and has decided to reopen his store and keep the Rochester agency. Other makes will also be handled, but he has not yet decided what they will be. Mr. France closed his store when he purchased the Toledo plant of Arlington U. Betts, proprietor of the Red Cross sundries. The plant was removed to this city and the Red Cross Rubber & Cement Co. is now one of Rochester's important industries.

San Diego, Cal.—Bay View Park Association has been formed by James R. Works, Ross A. Wood, J. M. Dodge, George T. Earle and H. S. Taylor, to equip and manage a bicycle track and athletic grounds. Capital stock, $2000, all subscribed.

San Jose, Cal.—The Pacific Coast Cycle Co. has been organized by George Rayburn, C. A. Mette, J. S. McGinnis, Gilbert Rayburn and George W. Peckman, to manufacture and deal in every way in all kinds of bicycles, tricycles and vehicles of every description and the various parts thereof and attachments thereto. Capital $500,000.

Seattle, Wash.—Bailey & Battelle have taken the agency of the Rambler wheels.

Syracuse, N. Y.—The Syracuse Handle Bar Co. has been incorporated for the purpose of making and selling handle bars for bicycles and similar vehicles. The capital stock is $4000. The directors are: Milo Harris, Jamestown; H. W. Wilkinson and Alfred Wilkinson, of Syracuse. The company is to work under the patents of Samuel Palmiter, of Jamestown, and C. E. Tomlinson, of Syracuse. In connection with this company, and operating under it, another one has been incorporated to work under the patents of Henry L. Trebert, of Syracuse. The principal business office will be located in this city.

Tampa, Fla.—The New York Cycle Supply Co., are now established in this city.

Changes and Improvements.

Athens, Ga.—The Collins Cycle Co. have moved into building on Lumpkin Street.

Chicago, Ill.—The American Cycle Mfg. Co.; plant has been purchased by J. H. Bradley, the former president. It is reported that the purchase price was $36,200. The inventory showed that the plant was worth in the neighborhood of $80,000. It is said that Mr. Bradley does not desire to operate the plant.

La Crosse, Wis.—John C. Holtz, bicycles, etc., succeeded by La Crosse Bicycle Mfg. & Plating Co.

Newport News, Va.—Maguyre & Small, bicycle repairing and remodelling, commenced business at No. 2511 Washington Avenue.

Reading, Pa.—Miller & Cleaver, bicyclists and machinists, reported to have sold out.

Sheboygan, Wis.—Fairweather, Weigand & Co., bicycles, etc., new store on North Eighth Street is about completed.

Taunton, Mass.—Goodwin & McDonald, bicycles, reported to have dissolved partnership, and each continues.

Toronto, Ont.—E. C. Hill & Co., bicycles, reported to have dissolved.

Washington, N. J.—Eastern Wheel Works, bicycles, reported to have gone out of business.

Recent Embarrassments.

Indianapolis, Ind.—The Central Cycle Co., which made a specialty of the Ben Hur wheel, assets have passed to the control of the Van Camp Hardware Co., this city, at receiver's sale, for $14,100. During the receiver's control he realized over $60,000 for creditors, and the claims have been met or will be.

St. Paul, Minn.—A. D. Smith & Co., bicycles, reported to have made an assignment.

Springfield, Mass.—The Overman Wheel Co., of Chicopee Falls, makers of the Victor bicycles, have made an assignment. It is one of the oldest and largest bicycle houses in the country. The company issued this statement: "The Overman Wheel Co. has made an assignment of all its property to H. H. Bowman, president of the Springfield National Bank, as trustee for the benefit of its creditors. The necessity for this action arose out of the company's inability to meet obligations maturing. As shown from the annual statement from the inventory taken November 1 last, the company has $539,000 liabilities, with $1,318,000 assets. A meeting of the creditors has been called at the office of the company for Friday, December 31, for the purpose of determining the future policy of the company. The management believes that with a reasonable extension of time the present prospects of business are such as to warrant a payment in full of all claims. The company now has advance orders for something over $250,000 worth of goods. The mill has been closed to await action of the creditors. The directors hope that the shut down will only be temporary." The greater part of the company's liabilities are held by New York and Boston banks. The help was paid off in full. The plant is said to be worth $500,000. There is $200,000 of assets in bills receivable and nearly $500,000 in stock in process of manufacture. The company is capitalized under the laws of Connecticut at $250,000. A. H. Overman holds a controlling interest, and the rest is held principally by Luther White, of Chicopee, the vice-president of the company, R. R. Reeder, of Chicopee, the secretary, and Rodney Dennis, of Hartford, and George D. Seymour, of New Haven, directors.

Recent Fires.

New York, N. Y.—L. C. Landorff & Co., No. 321 Broadway, damaged by fire, at a loss of $2000.

Owensboro, Ky.—Fire partially destroyed the Delker Cycle & Carriage Co.'s factory, corner of Main and Allen Streets. The loss will be about $2000, fully insured.

Miscellaneous.

Bridgeport, Conn.—Last year the owners and proprietors of bicycle stores in this city met and formed an association for the sake of sociability and to improve the wheeling business in general. The first annual banquet was held recently at the Windsor Hotel. Nearly every dealer in town was present. The affair was an enjoyable one from start to finish. An eight-course dinner was the main thing. From blue points to the regulation black coffee was a long distance, but the noble sellers of the silent steed did not need any sort of a wheel to take them over it. Everything was relished as only those with good appetites can relish good things to eat.

Jackson, Mich.—The Christy Saddle Co. recently shipped 7884 saddles to Chicago. The factory is turning out 2500 saddles a day.

New York, N. Y.—A union label for bicycles has been adopted, and the organizations in the Greater New York Label League will be asked to indorse it. The bicycle label has been issued jointly by the International Association of Machinists, the International Union of Bicycle Workers and the Metal Polishers, Buffers, Platers and Brass Workers' Union.

Peoria, Ill.—The Patee bicycle factory will be started up as soon as the necessary material reaches this city. President Patee says that his workmen are now building the first wheel, which will be used as a model.

Syracuse, N. Y.—Richard Schwartzkopf, of Berlin, Germany, has completed negotiations with E. C. Stearns, of this city, by which he secures the use of his patents, patterns and machinery with which to equip a factory in Berlin, and dispose of the Stearns bicycle to the German and Austrian trade. The business will be conducted on American lines, and several Syracuse people will go to Berlin and become heads of departments in the factory.

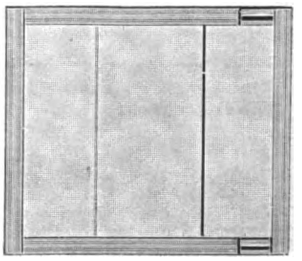
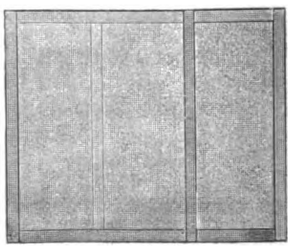
PHILLIPS' SCREEN GOODS





Have won for themselves the confidence and respect of the best posted buyers.

Where quality is considered as well as price, these goods are apt to have the preference. They are not rough. They are not "hustled," nor are they "degenerated" from other people's patterns.

What is a cent on a Window Screen or two cents on a Screen Door, when you consider that you wish to sell them again at a profit? Poor goods always have to be sold cheap! Of course, all manufacturers claim their goods are A1. But—what is your experience?

If your jobber will not sell you genuine Phillips goods, you can get them of the manufacturer.

THE A. J. PHILLIPS CO., Fenton, Mich.

To Bicycle Riders.

WE MAKE OUR TUBE
OF FIFTY CARBON STEEL

Because a Tube like this of our — .50% CARBON STEEL — Is just as strong as a Tube like this of — .25% CARBON STEEL

While weight for weight in a Bicycle our FIFTY CARBON Steel will last so long [redacted]
and TWENTY-FIVE CARBON Steel will last only so long [redacted]

NOTE THE FULL IMPORT OF THE PARALLEL LINES.

The comparison which they graphically make indicates the result of the prolonged investigations of the most practical experts of the world.

That the tests in our own laboratory corroborate these results is merely so much to its credit; that the same is true of actual trial on the road equally proves the trial to have been made in bicycles of correct design and construction. THE FACT REMAINS.

The margin of safety is greatly increased by the use of this tube. Every bicycle manufacturer should use it; every dealer should insist on having it; every rider should demand it. Send for catalogue.

THE POPE TUBE CO., Hartford, Conn.

The Hartzell Self-Draining Hose Reel

IT SELLS RAPIDLY.

Patented January 5, 1897.
Other improvements applied for.

It is scientifically and mechanically constructed.

It is a nice ornament and a great convenience in spraying and watering a lawn.

The hose is not kinked, twisted, crushed or drawn to a tension, thus avoiding the breaking of either the inner or outer walls of the hose which protects the fabric and prevents it from becoming water soaked, which usually causes the rapid destruction of the hose.

It drains all the water out of the hose, after it has been reeled, and keeps it always in good order, ready for service.

Each section of hose is independent of the others and may be easily detached at the top or bottom.

It sells at sight, because any person who owns a garden hose can readily see its advantages and superiority.

Jobbers are especially solicited to handle our goods to whom lists and prices will be furnished upon application.

DEALERS ask your Jobbers for the HARTZELL SELF-DRAINING HOSE REEL and insist on getting it.

If they will not supply you address us for prices, circulars and lists.

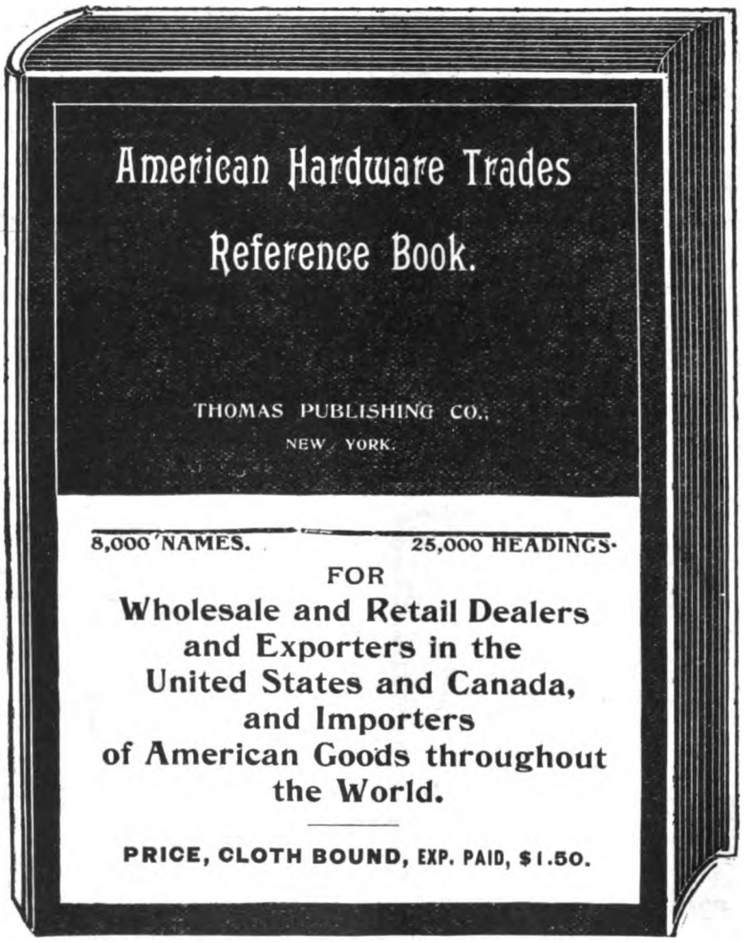
EVERY PROSPEROUS HARDWAREMAN

MUST BE WELL POSTED.

Secure the benefit of all possible Competition in Buying. A Dealer's Reference Book is essential. Here it is. A complete one, independent of any other publication, giving the names of ALL manufacturers, those who do not advertise, as well as those who do. The only work of the kind maintaining this feature. 1898 edition ready in few days. . . . .

IT COVERS THE FOLLOWING TRADES:



Hardware of All Kinds,

Hardware Specialties,

Agricultural Implements and Machinery of Every Description,

Carriages, Wagons, Harness,

Stoves, Ranges,

Tinware, House-furnishing Goods, Bicycles, Plumbing, Steam and Gas Fitting Goods of all Kinds and all Other Articles, Machines, etc., Handled by these Trades.

The object of the work is to enable the above trades to instantly find all the manufacturers of any article desired; the main and branch offices of every manufacturer in the trade, and the financial rating of every manufacturer.

Completeness.—The names of all manufacturers, regardless of whether they advertise or not. We give the names over 8,000.

Classification.—By our method of classification, we index every manufacturer under every article manufactured. We name some manufacturers under as many as 300 headings. We make no charge whatever for any number of headings required to completely represent every manufacturer. The book gives nearly 25,000, fifty times as many as any other publication gives to these trades. We do not use general headings, such as are used in ordinary directories, as for instance: "Hardware," "Agricultural Implements," "Vehicles," "Plumbing Goods," etc., but state the specific article and the special kind of article, and for what purpose used, as for instance: "Door Locks," "Bicycle Locks," "Refrigerator Locks," "Gang Plows," "Sulky Plows," "Swivel Plows," "Ditching Plows," "Brass Faucets," "Wooden Faucets," "Beer Faucets," "Steam Heating Boilers," "Combination Steam and Hot Air Boilers," "Air Valves for Radiators," etc., etc., throughout the 25,000 headings, naming every article, every special kind of article needed by these trades. It enables the user to instantly find exactly what is wanted. Nothing like this minute classification has ever been attempted before.

Ratings.—The financial rating of every manufacturer is given.

SAVES SUBSCRIBERS 100 TIMES ITS COST.

Special to our Subscribers.

WE have contracted with the Thomas Publishing Co. for 10,000 copies of the 1898 American Hardware Trades Reference Book, which we are offering to the trade of the United States, with a year's subscription to "Hardware" for $1.50; the price of the book alone. . . . . .

« « « ◆ » » »

Those who are already paid subscribers to "Hardware" may take advantage of this offer by sending 50 cents. . .

« « « ◆ » » »

We do not agree to hold this offer open for any specified length of time, as it will be impossible to furnish the Book alone at less than $1.50 after these 10,000 are taken.

We feel that the benefits which we are securing from your paper are **greater than ever before.**

Digitized by Google

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

CRONK'S

Combination Fencing Plier.

This newly invented fencing tool is needed by all people that build or have occasion to remove or repair wire fence, as it is made with two staple pullers, two hammers and two button cutters. They are the same heft as the 1½ Maydole Hammer, and they are made of forged tool steel. No good farmer will be without one. They are warranted to cut No. 8 hard or No. 6 soft wire. Like the celebrated Cronk Plier they are fully warranted in all respects. No. 12, 11 in. long, $12.00. Dis. . . .

"BEYOND CRITICISM."

Wm. Jessop & Sons, New York. [*Steel manufacturers*]: Another five years as proportionately successful as HARDWARE's last will place it almost beyond the criticism of friends or competitors.

"OF INTEREST TO LIVE DEALERS."

Van Voorhis & McNair, Crawford, Neb.: We like the journal very much. It always comes to our desk full of bright, sound matter, that cannot but be of interest to all good live dealers.

"LIKED 'HARDWARE' FROM THE START."

Gibbs Mfg. Co., Canton, Ohio. [*Hardware Specialties*]: We liked HARDWARE from the start, and have no reason to think otherwise now.

"HAVE FOUND IT SATISFACTORY."

The Ideal Mfg. Co., New Haven, Conn. [*Reloading Tools*]: We recognize your medium from time to time, and have found it satisfactory.

Digitized by Google

A WARNING.

THIS OFFER HOLDS UNTIL FEBRUARY 1st, 1898,

For all **NEW 1898 SUBSCRIBERS** to "HARDWARE," but it will not take until then for you to discover some remarkable offers in the subjoined premium list.

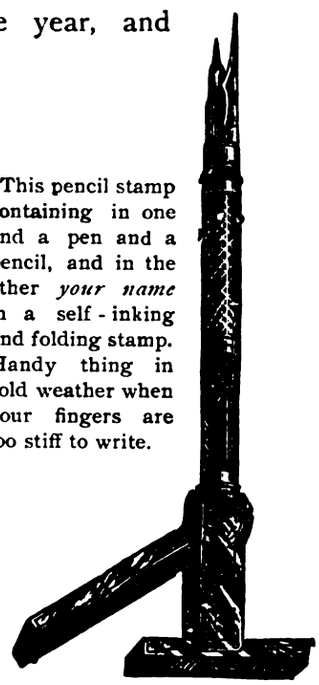
ALL THE NEWS. **HARDWARE** HARDWARE EXCLUSIVELY.

Needs no introduction to the Hardwareman. He already knows what a valuable adjunct to his business this bi-monthly visitor is, with its reliable "Prices Current," its "Market Reviews" and its general news of interest to the Hardware trade.

FOR $1.00 we will send "HARDWARE" for one year, and the **"WORLD'S ALMANAC"**—an encyclopedia of useful information, boiled down to about 600 pages. It gives statistics of almost every subject likely to be of interest to the busy man. All the news and statistics of the world put into shape for handy reference. Will answer any question you may ask it.

FOR $1.00 We will send **"HARDWARE"** for one year, and **ANY ONE** of the following articles:

A numbering stamp, which will number from 1 to 999,999. You can number every article in your store with this stamp. It is indispensable to the careful retailer.



A dating stamp that will last till 1902, with 12 special entries for marking letters and bills.

This elegant self-inking stamp, with *one line* of print *to order*. Your name, your business, your address, or whatever you wish.

This pencil stamp containing in one end a pen and a pencil, and in the other *your name* in a self-inking and folding stamp. Handy thing in cold weather when your fingers are too stiff to write.

Address all communications to——

HARDWARE PUBLISHING CO.,

IF YOU'RE NOT MARRIED

to old-fashioned methods, you need "HARDWARE" in your business. If you are, you need it all the more. "HARDWARE" for a year, and any one of the attractive premiums shown on this page, sent prepaid for $1.25, to our . . . .

NEW 1898 SUBSCRIBERS ONLY.

1. A Perfect Fountain Pen . . . . with 14 kt. gold pen and a filler, warranted to give the most satisfactory results. . . . . .

2. A Silver Mounted Stationery Set. Seal, letter opener, and paper knife with pearl blade—that gives an air of elegance to your desk. . . .

3. The Latest Fad in Jewelry. . . Everybody wears one now for luck. A real four-leaf clover mounted between glass in sterling silver or heavy plate—silver is fashionable—for bangle, watch charm or scarf pin.

4. A Cut of Your Premises, ... 2x1½ inches, for illustrating your advertisements, or printing your envelopes. Send us a photo—we'll do the rest. . . . . .

5. If You Have a Good Name . . . you may like to see it in your window. We send you ten of the best white enamel 4-inch letters, with a half pound of best cement and full instructions for putting up. If 4-inch letters are too large, send for twenty 2-inch letters If you require more than the quantities specified, we will send you extra letters; 4-inch at 6 cents each, and 2-inch at 3 cents each. . . . . .

6. They Speak for Themselves. . . That is something good signs always do. We send you 100 red, white or black embossed cardboard letters, 2-inch, ready gummed, with which you can make most attractive indoor signs. These letters will adhere to anything. When ordering, specify the quantity of each letter, figure, $-signs and cts. signs you require. Extra hundreds sent for $1.00 per 100. . . . . .

7. Bushnell's Price Book . . . bound in seal morocco, 4¾x6⅞ inches, 200 pages, adapted to the use of the traveling man, the home salesman and the office. Neatly indexed, red edged, ruled faint. This practical Price Book is in almost universal use. . .

HARDWARE PUBLISHING COMPANY,

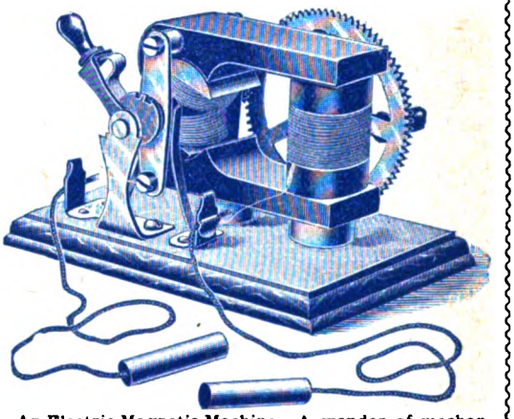
HERE'S OUR HOLIDAY OFFER:

Hardware for a year and any one of the following attractive premiums for $1.50. This offer applies to

NEW 1898 SUBSCRIBERS ONLY.

A perfect Sewing Machine. "The Baby" It uses regular Wilcox & Gibbs needles and ordinary machine thread. It is strong and simple; won't get out of order; can be clamped on any table, and is so constructed as to make it almost impossible for the smallest child to injure itself with the needle.



Just think—a complete Camera and an outfit to print, develop and mount. Makes a picture 2½x2½ inches, and its work compares favorably with any higher-priced ones of which it possesses all the best features, including an instantaneous shutter adjustable to time exposures if desired, and operated by a lever and button just as your $50 outfit is.

An Open-Faced Nickel-Plated Watch; fully guaranteed for a year. Winds and sets in back of case, and will stand rough usage, and keeps as good time as an expensive watch.

The Yankee Typewriter—A perfect machine at a low price. Will write 15 to 20 words a minute; will take any size paper, from postal card to foolscap size. Has automatic carriage and paper feed. Mounted on highly finished hardwood base, and packed in a strong wooden case.

An Electric Magnetic Machine—A wonder of mechanical perfection and cheapness. Supersedes the old-style medical batteries, and gives a stronger current without the expense of renewals It has a current regulator which can be adjusted to a nervous child or to overpower the strongest man.

OF COURSE, YOU TAKE A MAGAZINE,

Probably one in the subjoined list, if it is not, let us know, and we'll put it there. The first column shows the price you would have to pay for the magazine alone. The second column indicates the price at which we will send you "HARDWARE" and the magazine for a year. In many cases you will find the combined price is no more than the single one, and you know you can't afford to do without "HARDWARE." This offer applies to **New 1898 Subscribers only.**

OLD SUBSCRIBERS AND NEW

May take advantage of the following liberal offers:

1. **"American Hardware Trades Reference Book,"** published by Thomas Publishing Co., with "HARDWARE" for one year, will be sent on receipt of **$1.50.** Those who are already paid subscribers to "HARDWARE" will receive the book, on sending **50c.** This book is a complete directory of the manufacturers of Hardware in the United States. Each manufacturer is classified under the name of every article he makes. The financial rating is given in each case; 8000 Names; 25,000 Headings.

2. **"Ladd's Discount Book,"** with "HARDWARE" for one year, for **$3.00** Single Index, and **$4.00** Double Index. Present subscribers will be credited for one year in advance. If you have to calculate discount this comprehensive work will save many times its price in time, trouble and mental strain. Its comprehensive character may be realized from the fact that it contains nearly 200 pages of positively accurate tables or more than 120,000 computations giving at a glance the net of any sum at all discounts from 1 per cent. to 95 per cent. together with a great range of combinations.

3. **"American Hardware Store,"** with "HARDWARE" for one year, for **$3.00.** The "AMERICAN HARDWARE STORE," containing 450 pages and 500 illustrations, is an exhaustive treatise on the most approved methods used by the successful merchants of this country to arrange, display and sell Hardware. It is edited by R. R. Williams, editor of the *Iron Age*, and published by the David Williams Co., of this city, at $3.00. By a special arrangement, we are enabled to combine "HARDWARE" with the book at the same price. Present subscribers will be credited for a year, in advance of their present subscription.

THE BURR PATENT STEEL

Safety Lift Block

A Perfect Self-Locking Rope Tackle Block.

Runs as freely as an ordinary rope tackle block
Holds more securely than a chain block.
Locks instantly and does not cut the rope.
Allows the load to be lowered safely and slowly, the operator using only one hand.
Cannot stick nor jam when the load is to be lowered.

"I have tested the Burr Self-locking Steel Tackle Block and find it the most practical, quick and reliable Safety lift I know of." J. C. DEBES,
Supt. of the C & G. Cooper Co.,
Mt. Vernon, O.

THE FULTON SIGN AND PRICE MARKERS

Are the best, most complete and cheapest outfits for Business men to make their own Show and Price Cards, to print Shelf Labels, mark Boxes, Barrels, etc., etc. There is in fact no business where they cannot be used to advantage. Newspapers are using them for their Bulletin Boards, Ministers for Church Notices, Theatres for Announcements, Restaurants for Bills of Fare, etc. Their price in comparison to their usefulness amounts to almost nothing; it saves the cost of Sign Painters and Ticket Writers. A Boy can do all the lettering required in the largest Department Store. They last a lifetime and can be used for every language. We have

50 DIFFERENT STYLES

to select from in sizes from ½ to 4-inch letters. For marking Boxes and Barrels for shipping, or labels, they are far superior to adjustable stencils; the work is done quicker and neater and without blurring, making it look as if printed on a printing press. Nearly 100,000 sets of the **Fulton Sign Marker** have been sold, and they are in use daily by all large wholesale and retail business houses in the United States. Goods can be bought direct from us, or through your nearest wholesale house. Complete catalogues in English and Spanish sent free. Address

THE FULTON STAMP WORKS, 22 Beekman Street, NEW YORK.

Ha

ALUMINUM SIGN LETTERS AND FIGURES, 7 STYLES, 36 SIZES.

Complete stock always on hand. Exclusive manufacturers and originators of the only Interchangeable Script Sign Letter. A fine line of House Numbers, Name and Door Plates, and Street Signs. Aluminum Trade Checks, Aluminum Bicycle Chain Guards, Aluminum Castings. We challenge comparison for promptness, quality, and prices. Illustrated Catalogue on application.

ALUMINUM SIGN & NOVELTY CO., 174 W. Locust St., COLUMBUS, OHIO.

"TOO VALUABLE TO BE WITHOUT."

Charles T. Mitchell, Baltimore, Md.: HARDWARE is too valuable to be without.

"BEST CLASS TRADE FROM HARDWARE LINE."

Sager Mfg. Co., Rochester, N. Y. [*Bicycle Saddles and Specialties*]: We have received a large proportion of the best class of trade from the Hardware line. We always regard it advisable to dispose of our goods wherever we can do so to advantage. We see no reason why the Hardware trade should be excepted.

"BROUGHT US MANY PAYING CUSTOMERS."

Defiance Bicycle Co., Defiance, Ohio. [*Bicycles*]: We are much pleased with the results obtained from our advertisement in HARDWARE during the past season. It has brought us many paying customers, and we feel that the money paid you was well invested.

"USEFUL AS AN ADVERTISING MEDIUM."

Smith & Egge Mfg. Co., Bridgeport, Conn. [*Traps, Locks, Chains, Pulleys, etc.*]: We have found your paper very useful as an advertising medium.

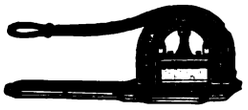
IRVING ELTING & CO. Saugerties, N. Y.



"Bright and Newsy."

Biddle Hardware Co., Philadelphia, Pa. [*General Hardware and Bicycles*]: In season and out, we have claimed that the Hardware trade was the proper medium for the disposal of bicycles and bicycle sundries throughout the country, and our opinion on this point is so well known, that it does not seem as if we could strengthen it materially by saying it again. Of course large cities may be able to support a few exclusive bicycle men, but in the majority of towns and cities throughout the country the man must have other business in order to make it pay. We appreciate the fact that from the first HARDWARE has held the same views, and we think they have been fully justified by the trend of events. HARDWARE is always welcome in our office, and its bright and newsy columns are often a relief amid the cares of business.

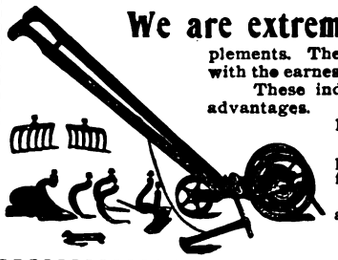
"EVERYTHING IS COMING UP."

BUSINESS IS BETTER AND THERE WILL BE A LARGER DEMAND THAN EVER FOR OUR



Sheep Skin Mitten.

Acknowledged to be the best article for polishing stoves, as it does away with the old time dirtiness of the work, making this work a pleasure. Also invaluable for polishing brass or glass, or silverware, which it does not scratch. For tan shoes and cleaning bicycles it has demonstrated itself a conspicuous success.

Diamond Hardware Co.,

624 Atlantic Ave., Boston, Mass.

We are extremely desirous of interesting you in handling the Planet Jr. Farm Machinery and Implements. The benefits and advantages we offer you will fully correspond with the earnestness of our desire for business dealings.

These inducements are potent for profit—note three of the salient advantages. Quality and workmanship are unquestionably and absolutely the best obtainable.

Generous profits are assured by our method of price protection which prevents the ruinous price cutting so unfortunately prevalent. We find the customer.

Write us for catalogue and full particulars of our goods and business methods.

A GOOD THING.

IT'S IN THE TEETH.

The Patent "REFORM" Curry Comb is composed of three shallow, oval trays, with corrugated edges. The parts are struck up from a fine grade of cold rolled steel, heavily tinned and bronze lacquered, firmly riveted together and warranted not to rust. The outer dimensions are 6½x4¼ inches and by reason of the large cleaning surface and peculiar arrangement of teeth, the comb will do its work with a large saving of time and labor, cleaning with equal thoroughness both long and short coats. There are no places to accumulate hair and it will not tear or injure the brush, the comb being quickly freed from accumulation by giving its face a gentle tap.

To Bicycle Riders.

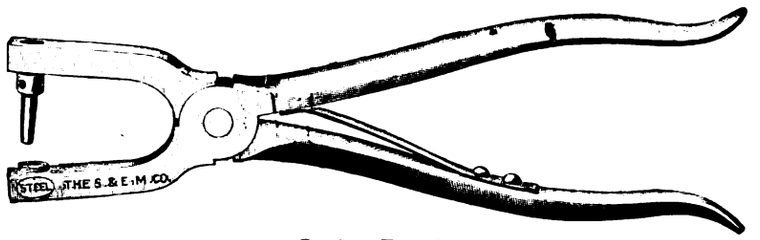
WE MAKE OUR TUBE OF FIFTY CARBON STEEL

Because a Tube like this of our .50% CARBON STEEL Is just as strong as a Tube like this of .25% CARBON STEEL

While weight for weight in a Bicycle our FIFTY CARBON Steel will last so long

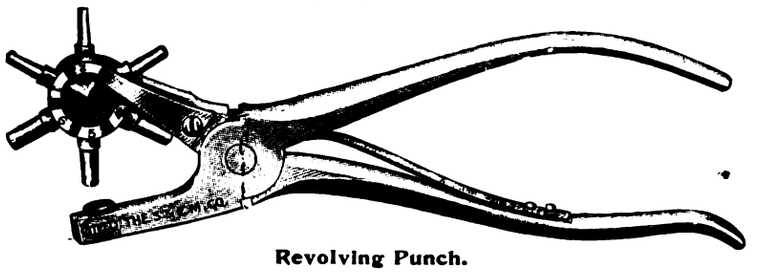
and TWENTY-FIVE CARBON Steel will last only so long

NOTE THE FULL IMPORT OF THE PARALLEL LINES.



The comparison which they graphically make indicates the result of the prolonged investigations of the most practical experts of the world.

That the tests in our own laboratory coroborate these results is merely so much to its credit; that the same is true of actual trial on the road equally proves the trial to have been made in bicycles of correct design and construction. THE FACT REMAINS.



The margin of safety is greatly increased by the use of this tube. Every bicycle manufacturer should use it; every dealer should insist on having it; every rider should demand it. Send for catalogue.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

Editorial Trade Review.

The month of January has nearly passed, many plans for the year's business have been formulated, fervent hopes for increased profits and lessened expenses are being developed in the brainy minds of commercial leaders, and upon every hand are found noticeable those harbingers of a prosperous spring trade, exhibited only too visibly, in a decreasing indebtedness upon every hand from the vigorous farmer with an eye on increased productions, to the ambitious merchant planning a spring campaign of greater extension.

Combined with this will be found increasing activity in the fertile fields of usefulness covered by the manufacturer and his representatives, so that the hearts of these advance agents of 1898 prosperity will be gladdened by innumerable orders which last year failed to materialize early enough although sanguinely expected.

The trade of the winter has maintained a steadiness which inspires the feeling that we have at last reached the end of industrial uncertainty. Manufacturers see in these hopeful conditions the improving signs of the times. Industries, the prices for whose commodities have been for a long time abnormally low, are lending a glad ear to the promoter who firmly believes that in a combination and concentration of industrial energy can be established a more certain basis of sustained profits, than if each manufacturer was turned loose on the fields of competition to pick up what he could get only by underbidding a manufacturer whose resources are equal to his own, while his wish for a dividend is even greater.

Prices quoted by Hardware manufacturers have recovered from that depressing condition that creates strikes and closes factory doors, and although low are in a favorable state for the encouragement of stock orders, a state of things the leading makers of Hardware would welcome only too gladly.

It will need only a glance at our columns giving a review of current changes and corrections, to notice how sedulously the manufacturers are preparing for the active demand which, unless all signs fail, will prove the most prominent characteristic of business during the year upon which we have now entered.

Is It the Best Way?

Judging by the action taken by the National Board of Trade of Cycle Manufacturers for this year in denying to the dealers the usual Annual Cycle Show, it is evident that the local dealers especially are not satisfied with the trend of affairs that is noticeable in cycle matters at the present time, with reduced commissions and less help from general advertising.

It strikes an observer as very peculiar that a concentration of advertising publicity to a few channels is being attempted by the makers, recognizing as they do that publicity is expensive, and more economical methods must prevail when lower list prices are promulgated and made indispensible, and that, in addition to this they should also omit the one great advertising feature of the trade so popular when the possible margin of profit was much greater—that of the grand cycle show, which, lasting a week, always succeeded in entertaining and stimulating buyers to a number running into hundreds of thousands.

The dealers realize that without the adventitious aid of modern advertising methods, it will be difficult to dispose of a sufficient number of cycles to reap a remunerative business; and they argue that the leading makers doubtless wish to avoid the big show which is so apt to make equally prominent the product of some smaller dealer, whose advertising expenditure may be larger in proportion than his output would encourage.

There are two horns to this dilemma, and one should be sufficient to cause more than the customary anxiety.

In the absence of the advertising show it would seem indispensible that other forms of exploiting should become essential in order to keep the riders in touch with the dealers distributiug the product. The fact as stated that excessive advertising in the columns of so many cycle journals has been found irksome, expensive and unproductive of results, should not form a reason why the agents should be deprived of the assistance of more reasonable publicity being given, or why the manufacturers should deprive themselves of the natural opportunity to create the agents who are so necessary for the proper distribution of an annually increasing production.

When one reflects how essential it is this season to call proper attention to the many new devices now before the riders of the country, the important changes in construction adopted by many makers, in order to make a more economically constructed wheel; with driving gears of an unfamiliar kind, intended to supersede styles of propulsion upon the excellence of which every rider considers himself an expert; with a degree of perplexity and uncertainty surrounding the industry for this year in excess of any previous time, a cycle show would have been a great and important step to take, in the way of informing the would-be buyer, one in which only the great possibilities of a combination of exhibitors, can in a single week, impart six months of instruction and desirable information.

The indications are, that in the absence of an annual

Digitized by Google

cycle show, the importance of which was essentially the one prominent motive underlying this cycle organization, it is just possible that the National Board of Trade will eventually disintegrate. The apathy manifested in its movements by some of the manufacturers formerly so prominent, would indicate this, and that a number of separate organizatians whose interests would be identical, covering the individual component lines of saddles, sundries, lanterns, bells, etc., would eventually spring into existence to take its place. It is altogether likely that before another season comes around, it being too late to attempt it this year, an organization will be perfected that will comprise in its membership every local dealer handling bicycles. This organization, if perfected, will develop a power that will make future seasons prove more profitable than either of the past few seasons the trade has experienced.

Ready to Represent American Houses.

Edward I. N. Waagen, a native of Christiania, Norway, but who has made himself thoroughly acquainted with the English language and American business methods, is desirous of locating once more in his early home, as the representative of American business interests. He is highly recommended as a very able, industrious business man, and is related by family connection with the well-known house of C E. Sontum & Co. Mr. Waagen received a thorough education in the schools of his native town, and had several years' business experience at the same place. Being desirous of acquiring broader business views, and a more perfect knowledge of the English language, he decided to spend some years in America. Coming to this country, he entered the Mount Hermon School in Massachusetts, after which he obtained a position with the American Tobacco Co. of Canada, and has been promoted through various grades during the past four years, until he occupies a responsible position to-day.

Mr. Waagen has just returned from a trip to Europe, and declares that in his belief a great market can be obtained for American goods if their excellent qualities could be intelligently pointed out to European buyers. He regards it as essential that these buyers should be put in direct connection with reliable houses on this side, by a man who at the same time would properly look after the interests of the American manufacturers. He is inclined further to the belief that he could make proper use of his time and experience as a European representative for some large American exporting firm. Any concern which is looking out for a man of this character, would do well to correspond with Mr. Waagen, and would, no doubt, find him amply fitted for such representation. He is ambitious, energetic and intelligent, and has received from leading concerns in the Old World recommendations of the highest character. A letter addressed to him, care of this office, will be put directly into his hands.

The Hardware Club.

At a meeting of the board of governors of the New York Hardware Club, held on January 13, 1898, the following gentlemen were unanimously elected to membership:

Eben Miller, No. 65 Duane Street.
William H. Kenyon, No. 150 Nassau Street.
James S. Coleman, Croton-on-the-Hudson.
Henry Ivison, No. 31 Washington Place.
Harold Roberts, No. 150 Nassau Street.
Tyler L. Redfield, No. 409 Pearl Street.
Henry A. Moody, No. 280 Broadway.
John B. Townsend, Philadelphia, Pa.
Chas. A. Southworth, South Hadley Falls, Mass.

The Sportsmen's Exposition.

The fourth annual exposition of the National Sportsmen's Association opened in the Madison Square Garden, New York, on January 13th, and was continued with great success until Saturday the 22nd. This may well be regarded as one of the most successful meetings of this great Association, and in addition to the exhibit of sporting goods, there were a number of tournaments in which the skill of the angler, the hunter, the bowler and others was shown to great advantage. Space will permit only a brief mention in the present issue, but a more extended mention will be made of the various special features in our issue next succeeding.

The *Chicago Journal of Commerce* in an article in regard to the necessity of proper training for the business of afterlife, speaks well and truthfully of three prominent Western Hardwaremen, as follows: "The lack of the average business man is thoroughness and depth. Knowledge makes labor easy and not a drudgery. The leading men who are doing most toward building up the industries of the West have been hard workers since boyhood. In this connection we need more men like W. H. Preston of Sioux City, Iowa, Col. James R. Nutting of Davenport, Iowa, and William Glass of Omaha, Neb., who stand prominent in the Western Hardware trade. Young business men engaged in fighting their way upward would do well to study the practices of these leaders of the Trans-Mississippi country. The West needs more men like them. To become a successful business man it is far more important to study to be thorough than it is to be brilliant."

The Syracuse Hardware & Iron Co., of Syracuse, N. Y., has been incorporated with a capital stock of $100,000. The directors are: Abraham Howe, Joseph Born, R. H. Bonta, Bradford Kennedy, James K. McGuire and C. G. Baldwin, of Syracuse. It will be readily understood from the above list of names, that this concern is practically a successor of Bradford Kennedy Sons & McGuire. The new concern has purchased the stock of the older one, and is in the market to buy and sell all kinds of Hardware and metals.

Farwell, Ozmun, Kirk & Co., St. Paul, Minn., gave a dinner to their traveling salesmen at the Merchant's Hotel, in that city, on January 6th. The occasion was one of festive enjoyment, and like all gatherings of this character, could not fail to result in increased usefulness and loyalty to the house, and good to all the employes thereof.

The *Commercial Advertiser* has evidently taken a new lease of its hundred years of life. Its pungent comments on current events cannot be passed lightly by, while its new dress commends it to professional journalists, and its legal department makes lawyers think.

Water that boils very violently is not any hotter than that which boils quietly.

FINDING A HOME IN NEW YORK.

Editor Hardware: There was a Hardwareman of a modest Western city whose employers desired that he should remove with his family to New York. It was, naturally, with regret that this sundering of ties, and forsaking of friends, was contemplated. But all the family saw a compensation in the fact that it was toward New York, the most attractive spot upon the soil of the new world, that their footsteps were to be directed.

Many had taken the same step before them, and many have taken it since; but few, if any, have placed upon record their haps and mishaps, their expectations, their experiences, their pleasures and disappointments, their losses and gains, during and just after their first plunge from a semi-rural station into the vortex of metropolitan life. That which follows may, therefore, be regarded as the confession or narration of a class, rather than that of an isolated individual.

When the decision to make the venture had been arrived at, the next thing in order was to collect such of the household goods and gods as could be safely carried, and would be needed in the new home, and here was the first mistake made—unavoidable, but none the less a mistake. Of course they knew that a lawn-mower and a wheelbarrow would be out of place in a New York flat, and they had enough of foreknowledge to sell the kitchen and laundry stoves, but how were they to know that the architects here planned for folding beds, that but one bookcase was all that the laws of space allow, that ice-chests are built into the walls, and that kitchen furniture must be kept to the lowest possible point? So freight was paid upon a score of heavy articles that mercilessly crowded the first flat occupied, and went to the auction room before removal to a second.

It was a crisp morning in winter when the stranger and his little family alighted from an Erie train in Jersey City, and their first impression was one of mingled exhiliration and delight. The sun shone upon one of the busiest and most beautiful harbors in the world, while the city across the Hudson stood out with a clearness and cleanness almost paralyzing to one accustomed to the soft-coal smoke of the cities just west of the Allegheny mountains. Subsequent experience deepened that first impression. Even in the country, one cannot go so far with so slight an accumulation of cinder and soot, and dust generally, as in New York city. As one of the youthful sons of the family argued with his mother: "What's the use of washing so much? I don't get half as dirty as I used to at home."

A temporary boarding place had been engaged by correspondence, and here the family alighted, and took their first view of metropolitan life. The careful study of a week led to the conclusion that howsoever New York might differ from other cities in many respects, a boarding house is a boarding house the world over, whether in the side streets of New York, or amid the foliage of a country town—except as to the bill.

With the juvenile portion of the family stored in a second story front where they could see the ash-men cover the street with the paper and dirt they made a pretense of carting away, and under admonition that if they stirred out of the room they would be lost, the responsible members of the firm sallied out in a fearing and uncertain mood to hunt a domicile that should be located and engaged before their carload of household goods should arrive.

And here the firet male of this family, Adam, was reminded by his Eve, of a promise made in the days when they had a home and a city of their own: "Remember, now, that I came to New York on the agreement that there should be no false pretenses about this. If we are to live in New York, I want to live in New York. I don't want to go to Brooklyn—I don't know why, but I don't want to go. Nor to Jersey City; nor Staten Island; nor Yonkers; nor Hoboken; nor Coney Island, Sing Sing, nor the rest of them. Let us be New Yorkers for a year at least, and then it will be time enough to consider the suburbs." An expression like this was the law unto Adam, and so they boarded a sixth Avenue Elevated at Forty-second Street, and headed for Harlem, which, in their minds, suggested only Irving's Knickerbocker, and goats.

Their one disturbing fear was that the movement of the ontside world toward New York might have been such as to take up all the flats, leaving them no chance to preempt a place for their transferred hearthstone. But as their train swung out of Fifty-third Street and into Ninth Avenue, with glimpses of Central Park on the one hand, and the shining Hudson on the other, that fear was dispelled. Block after block passed in review, with buildings in all stages from the half-finished foundation to that already well occupied. Strung all along were signs, "Elegant Flats to let; seven and eight rooms and bath; elegantly decorated; rents moderate. Apply on premises, or to Reel & Estate, agents"; or legends varying only as to the number of rooms or manner of statement. There was an air of cheerful business about them all that was reassuring and even inviting, when the region was passed where the bottles of milk were displayed on the window-sills, and tubs adorned the fire-escapes.

These flat-hunters, it must be borne in mind, were not old New Yorkers, who can size up the interior accommodations and character of a building by a glance at the hall door-mat, or an inspection of the marks upon the jamb; and so they looked upon much, and suffered much, and hoped much, that came back to them in nothing but the coin of experience. They knew more about flats on the evening of that first day, than they had ever expected to know in all their lives.

They had left a roomy home behind them, with parlors and bedrooms overflowing with space, a wide hall, a dining-room measuring eighteen by fifteen feet, and other rooms to match, and their feelings while surveying the limited accommodations of the first flat entered, can be imagined, but hardly described.

"There is one advantage," said Adam, consolingly, "we can eat breakfast without getting out of bed—just reach across the hall and help ourselves." But his wife was past speech—she had prepared herself for much, but this was too much, or rather too little. "I hardly think it is large enough," was all she could venture, and the line of march was taken up, in the direction of another alluring sign.

Had their minds been free to study natural history, as not connected with the need of a roof before their furniture should come, the day would have been profitably spent in noting the various moods and diverse characteristics of the New York janitor, as seen from the foreign view. There was the lofty colored man, who studied a scenic bit in frost upon the window pane, while the investigators rummaged about and asked questions of each other; there was the honest German woman, who confessed the faults of the place with a frankness that condoned them; the red-eyed

Digitized by Google

man who oozed the aroma of rye, and seemed to take the call as an unwarranted disturbance of an afternoon nap; the man who was very anxious as to the number of children in the invading family, and was followed upstairs and down by a mangy cur of his own; the glib youth who could declare the flat had never been occupied, while strips of oil-cloth in the bath-room, nails on the wall, and a broken range gave him the lie; the suspicious man, who conveyed in every look and motion the belief that his callers were looking about from mere curiosity, that they did not want a flat, and would not pay the rent if they got one; and that polite young man who told the truth about the building and the neighborhood, and seemed anxious to secure good tenants, and therefore made the best impression of any in the lot.

"Some one should have built a flat to match our furniniture," said Adam, bitterly, as they marched along Ninety-fifth Street, with eyes open for more alluring signs. They had almost made the many corners of the situation fit the many circumstances of the case at the last call, when the wife discovered that no place had been provided for the piano, if the divan was retained; and so the castle of hope the husband had commenced to rear came tumbling about his ears.

"What did you look for? We expected to look about for a week, and here the first day has not ended yet."

The logic of the situation was clearly on the feminine side, and he wisely held his peace.

The void was unfilled when the evening put an end to the quest. When the neighborhood was satisfactory, the rents were too high; where the parlors were large and well-lighted, there was a dearth of bedrooms; when enough bedrooms were provided, there was a lack of something else. In some cases showy fronts and hallways led only to small coops that were out of the question; while an elaborate display of hand-painted ceilings in front could not remove traces of cockroaches and croton-bugs in the kitchen. Finally the wife said: "I'll go into no building that is not new"—and their field of search was narrowed from henceforth.

The second day was a counterpart of the first, except that experience was rapidly taking hold upon them, and they began to imagine that the greenness was wearing off, and a polish of metropolitan ways taking its place. The third day was moist overhead and sodden underfoot, and as the fog rose up their expectations went down. They were willing to overlook some things that seemed to shut them out at first, and to forego conditions that seemed imperative in the beginning; and by this time they had worked their way out to Harlem, and found a city by itself, where they had expected to find only vacant fields and straggling patches of settlement. A city with banks and hotels, newspapers and theatres, parks and crosstown roads, churches, schools, and societies all its own—a city that, while a part of New York, was in one sense a community by itself, and carried to them many reminders of the pleasant and busy community they had left.

Here they found a flat to suit, where they could sit all day and see the flood of gay travel pour out of Central Park, flow on to Harlem River by way of Seventh Avenue, aud back again to the Park; here they raised their family altar within a narrow range of space, and drew in the pure air beyond the Hudson, and boasted unto themselves that they were at last a settled half-dozen in the hundreds of thousands that make up the great city of New York.

But they had much to learn, even then.

New York, January, 1898. BROAD AXE.

Mount St. Gothard, 48,840 feet, is the longest tunnel in the world.

The average length of a cat's life is ten years; a dog's, welve.

The Annual Hardware Dinner.

The annual dinner of the Hardware and metal trades will be given under the auspices of the Hardware Club at the Waldorf-Astoria, Fifth Avenue, Thirty-third to Thirty-fourth Streets, New York, on Monday evening, February 21, 1898. As the membership of the club is not confined solely to those in the Hardware and metal trades, but includes many other trades and professions, in making up the Reception Committee, prominent members of the various trades and professions have been drawn upon to complete it.

The Dinner Committee consists of Alfred D. Clinch, chairman; Eugene Bissell, James H. Kennedy, George H. Sargent, Edward C. Van Glahn, J. Leonard Varick and Richard R. Williams. Tickets will be $6 each, (wines *a la carte*) and can be obtained by application to the committee named above.

Chairman Clinch, of the Dinner Committee, suggests that members who intend purchasing tickets should not delay unnecessarily, as a prompt response will lessen the amount of labor in regard to the proper placing of guests who express a preference for a certain location.

It is intended to serve the dinner at tables accommodating 6, 8 10 or 12 guests.

The lower tier of boxes surrounding the superb ball room of the Waldorf-Astoria, where the dinner will take place, have already been disposed of by the committee to holders of dinner tickets; and the committee have decided to make available the upper tier of boxes, which will be on sale at a lower price of $3 each. Arrangements have been completed by which those occupying the boxes can, if they so desire, be served with refreshments at a cost of $1 for each person.

Definite arrangements as to all of the speakers who are to appear upon this occasion have not yet been made, but it is safe to say that a very attractive programme will be presented.

The Dinner Committee, at a recent meeting, appointed a special committee, consisting of George H. Sargent, of Sargent & Co.: George W. English, of the Berkshire Life Insurance Company, and James H. Kennedy, editor of *Hardware*, to go to Washington with special invitations to several distinguished gentlemen to be present as the speakers at the dinner. The committee called upon President McKinley, by special appointment, on the forenoon of Wednesday the 19th, and were received in a cordial manner. The President expressed his thanks for the honor conferred in the invitation, and said that he would be pleased to take the matter into consideration. No definite response has yet been received from him.

The committee were fortunate in securing the promise of Senator Thurston, of Nebraska, and the Hon. Mr. Tayler, member of Congress from President McKinley's home district, to speak in response to toasts, and also had an interview with the Hon. John M. Dalzell, of Pittsburg, who assured the committee that he would come if his engagements permitted.

The full list of speakers will be announced as soon as the same is completed.

Phillips & Clark Stove Co., Geneva, N. Y., are distributing to the trade a very useful memorandum diary gotten up in the easel form and intended to occupy a place npon the desk of the busy merchant, and remind him of the few important things with which each day comes freighted. It will be found by its recipient a very handy addition to the furniture of his desk and serve a double purpose by reminding him also of the "Andes" stoves made by this company, which are very modestly advertised on top of the easel.

HARDWARE'S "Prices Current" are reliable.

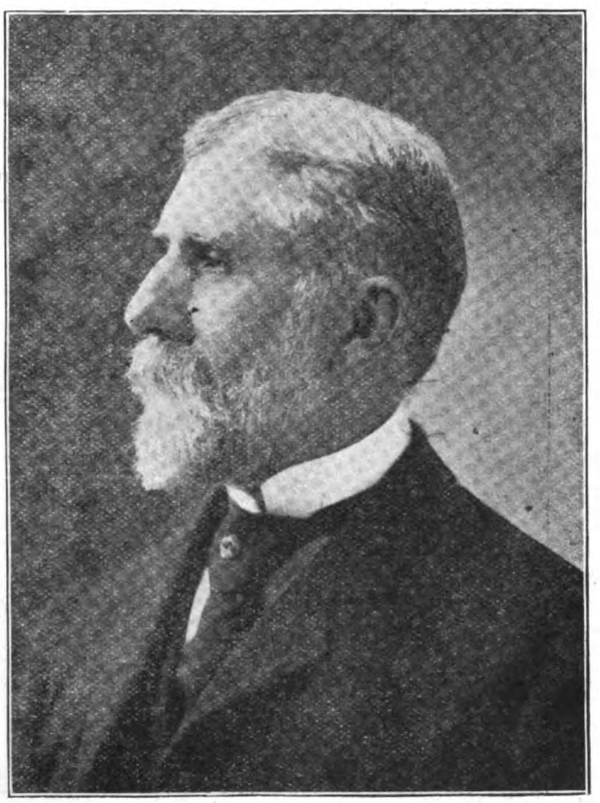
FILE MAKING BY MACHINERY.

A generation ago, when hand looms had been abandoned, except in Thrums, and even clock works and jewel screws were being made by machinery, the heaviest file used by the machinist, as well as the finest required by the jeweler and sculptor, was still cut by hand. Millions of dollars were spent in this country and abroad in vain attempts to make and introduce the machine cut file. The reasons for the repeated failures are not at once apparent, and cannot be understood without detailed explanation of the peculiarities of this indispensable tool and the services demanded of it, for the file seems to present no more mechanical difficulties in the making of it than many another tool that has long been successfully made by machinery. Success was ultimately attained, as is attested by the existence of large establishments like The Arcade File Works, of Anderson, Ind., and the machine-cut file has become such an important article of commerce that it is difficult to realize that its introduction and general acceptance were comparatively recent.



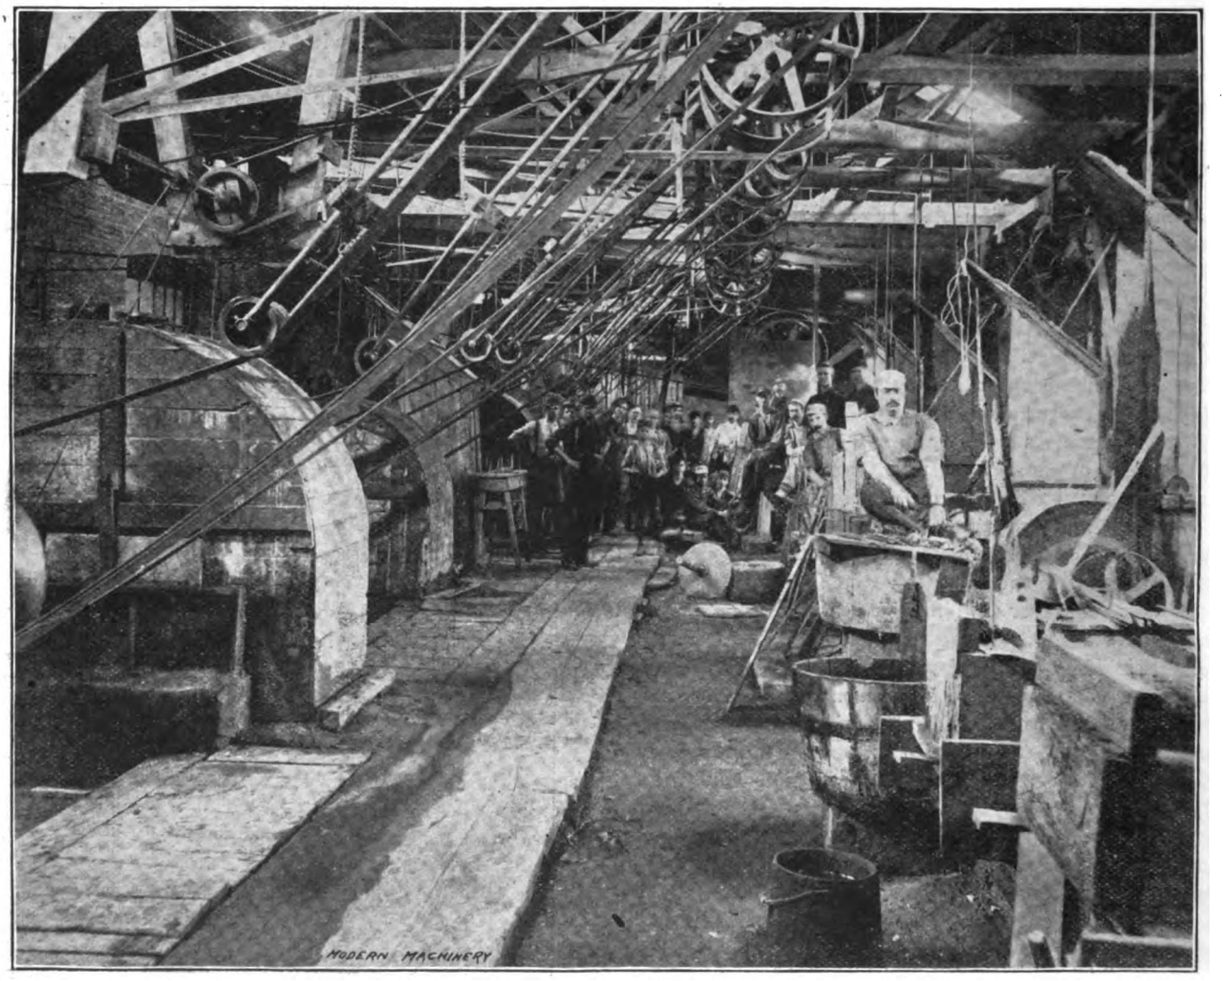
The file is one of the oldest tools known, and one of the most widely used. It is recorded in the "First Book of Samuel" that the Hebrews were possessed of files, more than a thousand years before the birth of Christ, and had then reached such a point of excellence in the manufacture of them that there were different styles and sizes for many different uses. They must have been made in much the same manner as they continued to be up to thirty years ago, by hand, with a chisel and hammer, and as a few of them are made to this day. There is only one break in this record of 3000 years of exclusive hand labor, and that is in the tradition that Leonardo da Vinci, painter, poet, engineer and mechanical genius, contrived a machine for the cutting of teeth on files, and set it up in the classic Val d' Arno about the time Columbus sailed for America. Whether this machine suffered the fate of Hero's steam engine, in the Temple of Alexandria, and became a toy to amuse the populace; whether it was cried down and destroyed by the superstitious and fearful of the middle ages, or whether its operation proved as unsatisfactory as did later devices, and was abandoned, is not known. Certain it is, however, that further developments were discouraged, and 400 years went by before the hand file cutter was even partially displaced by machinery.

FILE CUTTING THIRTY YEARS AGO.

In the list of the year's distinguished dead is chronicled the death of a man who, fifty years ago, learned the trade of file cutting in a little shop in Philadelphia, and whose first task set by his master was to carry a day's output of a half dozen men, in a basket on his head, to each customer, who selected a file to his liking. There were no big file works in the country, small shops supplying the local demand, and occasionally having a surplus for the Western pioneer. In England, up to thirty years ago, although there were large finishing works and shipping depots, and the responsibility was assumed by firms, file cutting was a cottage industry. Within five miles of Sheffield and Warrington hundreds of file cutters lived and applied their skilled craft, and the wayfarer might see blonde or grizzled heads lowered at the quaint casement windows, and hear the rapid strokes of the hammers on the chisels, or note the infrequent pause when the cutter looked out upon his flowerbeds or off to the wooded hills.

In the green lanes that ran between mossy stone walls or clipped hedges of holly and box to the towns, the file-cutter's boy might be seen ambling along on a donkey, with a basket of blanks from the file works, or the file-cutter upon a market day taking the finished work back to get his pay. The cutter usually had a hound, with which he followed the hunt in season, for he was a well-paid craftsman, and could afford to take his day now and then for pleasure. Many of these cutters owned a patch of ground, cultivating the soil one day, and working at the anvil, the next.

Much of the bar steel for files was at first brought from Sweden from the famous Dannemora district. The bars were cut into lengths with chisel and hammer, and then shaped by forging, after which they were annealed or softened for cutting. The blanks after annealing were sent to the grinders, who plied their craft at little proprietary



ALFRED WLED,
Vice-President and General Manager Arcade File Works.

grinding mills on the tributaries of the Sheaf and Don, near Sheffield. These mills of stone with overshot water wheels appeared to have occupied their sites from time immemorial, and were rented with water privileges from the proprietors of landed estates. Here the grinder worked night and day when there was water, but accepted with complacency months of idleness. Gradually dams were built and pools formed, so that the supply of water fluctuated less. The blanks, after grinding, went to the stripper, who made the surfaces true and level ready for the cutter.

As the file came to the hand of the cutter it was soft, bright steel, with surfaces flat, round, square, triangular or half-round, with tapered or square ends, and of half a hundred different sizes. The blank was held to the anvil with straps that passed under the cutter's feet, exactly as it is by hand cutters to-day. The workman held a short chisel,

Digitized by Google

broader than the file to be cut, in the left hand, and resting on the blank at a specified angle across the file and at a slight inclination toward the point. The cutter then struck a sharp, short blow with a peculiar hammer that curved over from the handle like a heavy-headed inverted pipe. An indentation was made and the soft steel thrown up in a ridge in front of the chisel. This ridge determined the position of the next cut by preventing the chisel from sliding back into the groove. Sixty to eighty times a minute the hammer descended until the surface was covered with a parallel row of ridges inclined towards the point. A second course, at an angle from the first, was cut a trifle closer together and with a shallower indentation. The file was then turned on a sheet of lead to prevent dulling the teeth already cut, or was supported in a lead groove if the blank was round or triangular. The expert file cutter could finish two dozen bastard cut flat files in a day. When cut

THE GRINDING SHOP.

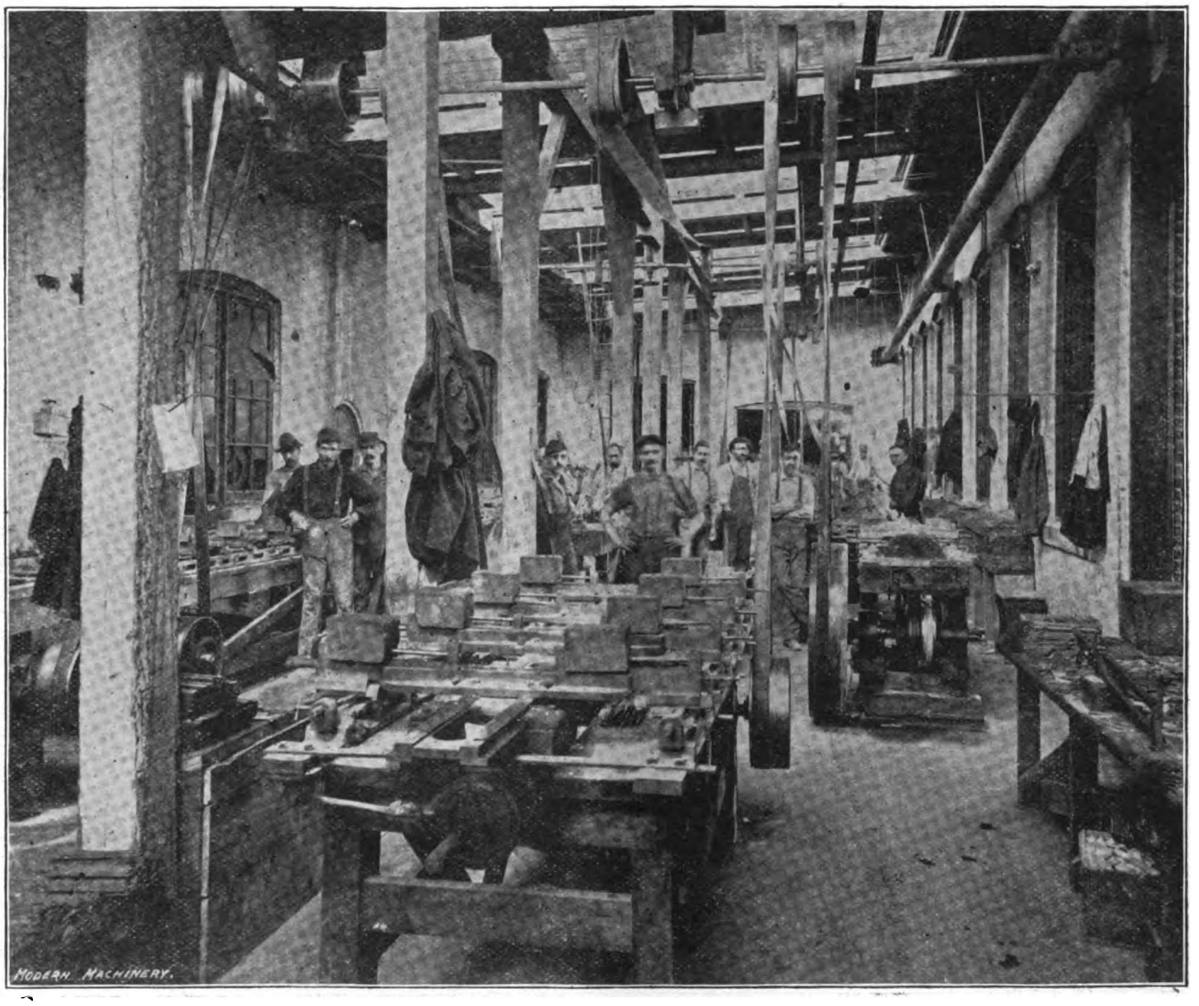
the files were sent back to the factory to be tempered, tested and finished for the market.

THE FILE-CUTTING MACHINE A TRIUMPH OF INGENUITY.

To the sense of sight and touch these hand-cut files seemed to have every tooth of the same size, and the spacing mathematically accurate. It was only when machine cutting was attempted that attention was called sharply to the fact that it was in the irregularity of the spacing and the depth of the indentations given by the flexibility of the human vise holding the chisel, that the virtues of the hand-cut file consisted. The perfectly regular teeth produced by the fixed mechanically-operated chisel of the early machine were found to groove or channel the work—that is, the teeth followed in each other's tracks, cutting in the hollows instead of the rear teeth cutting away the projections left by the forward ones. All the efforts of inventors of file cutting machinery have been but toward securing a reproduction of the hand-cut work, and the peculiar requirements explain why the invention of a satisfactory device was so long in coming. Although apparently so simple the file-cutting machine, as it stands to-day, represents one of the most triumphant achievements of modern machinery endowed as it is with something like human nerves and intelligence.

The amount of cut that any file will make at a stroke depends on the area of cutting edges in contact with the work, and also upon the pressure exerted. Paradoxical as it might seem, the smaller the area of cutting edge under a given pressure, the greater will be the amount of metal removed. In the machine-cut files of a dozen years ago, the regularity of the teeth had the defect of presenting too much cutting area to the surface of the work, and besides "channeling," the indentations between the teeth were more rapidly filled up with filings than was the case with the hand-cut file, so that the workman dared not apply all the pressure necessary to accomplish the work desired, and was often forced to stop to clean the "pinnings" from the teeth. As a result, in a very short time after being introduced the machine file had a deservedly bad name, and was thrown out by workmen who refused to use it. If you give a dog a bad name you are advised by an old adage to hang him. So, many men despaired of rehabilitating the machine-cut file that had failed to do good work or to inspire confidence, and they abandoned the attempt. All honor is therefore due to the few who persisted in their belief that the machine cut file could yet be made a success, and continued to make inventions and improvements in the machinery. Among these men was Alfred Weed, now vice-president and general manager of the Arcade File Works, at Anderson, Ind., which now turns out 2000 dozen files a day, and has been largely instrumental in establishing the reputation of the machine-cut file in this and foreign countries.

Digitized by Google



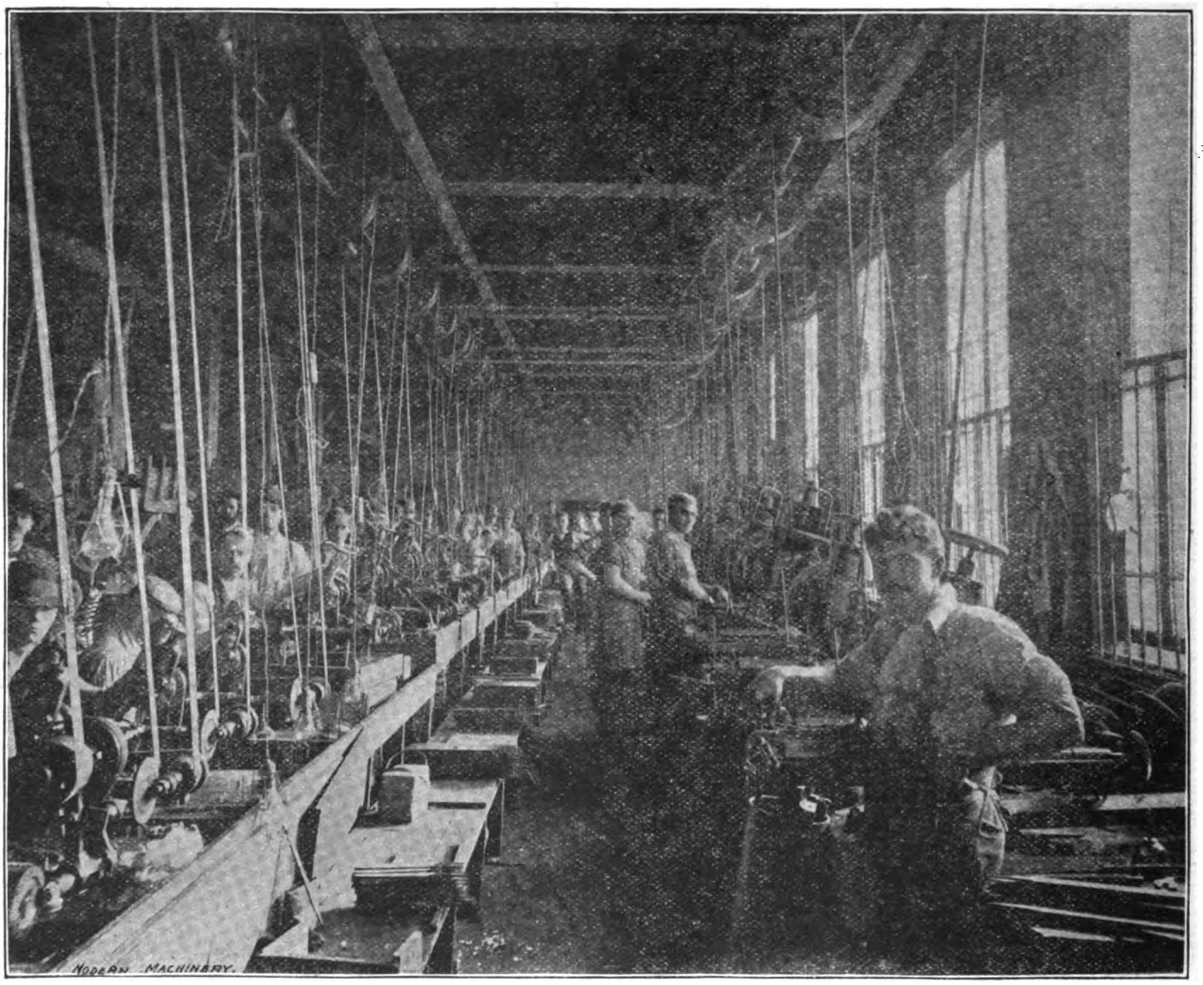
More than thirty years ago Mr. Weed was chief draughtsman of the Whipple Co., of Ballardsvale, Mass., which spent two million dollars unsuccessfully in attempts to make files by machinery. In those days the usual form of file cutting machine had a table or anvil to which the blank was secured, and on which it was fed automatically beneath the chisel that was struck by a trip hammer. In a slight modification of this machine the chisel was fixed in a lever with a spring; in the next device the file was attached to a screw slide which rested on a stationary anvil and was worked by a feed screw. The chisel was struck by a vibrating drop hammer. Ericsson, the great engineer, invented a machine which developed the idea of graduating the depth of the cut, but not the width of the spacing. All of these machines lacked the nervous tension of the human arm and the infinitesimal variations in the height and force of the drop of the hand-cutter's hammer. The machine-cut file remained, like the too perfect maid, of whom the poet complained that she was "faultily faultless."

THE FIRST WEED FILE-CUTTING MACHINE.

While the millions of the Whipple Co. were being lost, their chief draughtsman was differing from them, and quietly working out some ideas of his own. At the first opportunity he went to Europe and studied the hand file cutting works of all lands, and the samples of files, ancient and modern, in the museums. His aim was to construct a machine that would reproduce, as perfectly as possible, the action of the human arm and hand. He perfected his apparatus and began to build machines in Philadelphia. So great was the advance made over all previous inventions of the kind that file-makers everywhere bought the machine and began to introduce the machine-cut file. Mr. Weed then sold the right to manufacture his invention to a large Eastern manufacturer, and retired from business.

He might have been retired yet, and had more time to shoot big game on his ranch in Wyoming, where he spends his vacations, had not natural gas been struck in Indiana. The virtue of the file depends as much on the regularity of the temperature at which it is hardened as on their regularity of the teeth. The ideal fuel is one with which the heat of the furnace can be controlled to the thousandth part of a degree. Besides the temptations offered by this fuel, Mr. Weed had a few other ideas to patent, which are now incorporated in the product of the great factory of The Arcade File Works.

To see The Arcade File Works from the outside one might imagine that the Arcadian days of hand file cutting had never passed away. An electric car runs up to the doorway of the long brick buildings, which stand on the outskirts of the thriving town of Anderson. A belt of woods stretches away to the east, and the workmen's neat frame cottages, each with a lawn and garden, border the street-car line for half a mile. No file cutters sit at the windows, and only curly-headed children look out on the flower beds, and women gather vegetables for dinner from the little gardens. The fathers and brothers and elder sisters, 400 in number, are at work in the great brick buildings, which spread over more than three acres or so of ground. No smoke ascends from the chimneys to defile the blue sky, green earth or unsullied snow, by virtue of the natural gas used for fuel. When you enter the building a cyclopean hammering is going on that makes one resort to the sign language to convey ideas. A man sits just outside the forging shop beside piles of long, steel rods, some of which are flat, some square, some triangular, some round or half round in cross section, and of diameters from



STRIPPING SHOP.

Digitized by Google

a slate pencil to a crowbar. These he feeds to a pair of power shears, which clips them at the rate of 2000 dozen a day into lengths that are then conveyed to the forging shop.

This is a room 200 feet long, where thirty power hammers, part of them built by the Bradley Co., of Syracuse, N. Y., and part by Dienelt & Eisenhardt, of Philadelphia, exert a power that would have conferred immortality on as many Vulcans. Each one has a little brick gas furnace for heating the strips of metal. The furnaces are tended by boys, and the strips are lifted out by workmen with tongues and manipulated under the hammers, that come down with a thousand pound stroke more than a hundred times a minute. In less than a moment the bar is rounded, tapered or pointed, and the tang forged at the other end. The rapidity of the whole operation may be judged from the fact that 25,000 files a day are shaped on these thirty anvils; 100 an hour for each machine. The red hot bars have scarcely time to lose their fierce glow from the furnace to the iron truck in which they are wheeled off to the annealing room to be softened for the grinding, stripping and cutting. The "blanks" or blank files, which have now a mottled, rough appearance from the forging and the softening in the furnaces, are sent in batches on long rolling carriers to the grinders, who operate ten power machines, and as many more stones by hand. The great grindstones, such as the Sheaf or the Schuylkill never blinked at or rippled over, are shut up in a framework, forming boxes ten feet high, from which comes the peculiar ear-splitting sound made by stone on steel. All that is required of the machine grinder is to put a number of blanks in a plate holder, which closes up against the stationary stone like a furnace door. With the revolution of the wheel the plate goes up and returns, and one surface of the blanks has been made true and smooth. When all the surfaces of the blanks have been ground they are fitted into the stripping machines, which consist of vises and sliding file strips on long, horizontal tables.

Testers now take these blanks one by one, and, with a hand-cutter's short chisel, test them to see if they are level. Those that are imperfect are sent back to the grinder, while the others pass on to the cutting machine, each one of which occupies scarcely more room than a sewing machine, and is operated by girls and boys as well as by men, each machine being adapted to its particular task of cutting edges or sides in single or double cut on the various shaped files. The blank fits into a groove, and is automatically fed to the chisel, that comes down at the rate of 4000 times a minute on the small files, cutting from 50 to 200 teeth to the inch, and finishing one row of cuts on the side of the file in six or seven seconds and making no two teeth exactly alike from point to tang, but increasing them imperceptibly.

CUTTING SHOP NO. 1.

THE "INCREMENT" CUT.

The manufacturers have been experimenting on this irregular spacing. The Arcade File Works has produced the "Weed Increment" cut by patent, flexible chisels, which they claim reproduce the nervous action of the human hand. Two rooms, 40x200 feet in size, are filled with these machines, each of which can turn out forty to one hundred and twenty-five dozen files a day.

At the other end of the room is the latest achievement of Mr. Weed in the line of invention in file cutting machinery, a machine that cuts a rat tail file with spiral increment, and by one continuous operation. Up to three years ago the round file was cut from point to tang in parallel rows.

The product of each machine is numbered so as to keep

Digitized by Google

tally on the machines, and the testers reject imperfect files. The perfect ones are covered with a paste of various substances to protect the teeth from direct contact with the fire, and are then heated in a crucible filled with molten lead. The hardener must be an expert, and able to tell from the cherry redness of the color when the files have reached a certain temperature. With natural gas the tempering, it is claimed, is much more perfect than with any other kind of fuel, for the supply can be regulated by the turning of a screw and the heating made as accurate as clockwork. The files are taken from the furnace one at a time, lifted by the tang with a pair of tongs, and plunged into brine vats with apparent carelessness as to which way they go down. But in fact, some are dipped in perpendicularly, others horizontally or at various angles, as experience has proved to be best to prevent warping. Should they become warped in the process, however, they are straightened with lead hammers on tables of lead before becoming entirely cool. The files are scoured clean with steam scrubbing machines, and dropped into tubs of lime water.

When they are taken from this bath they have not the beautiful black color that they have on Hardware dealers' shelves, but are gray and ashy looking; after which the tangs are annealed by dipping in molten lead. The tester now draws a piece of stiff steel across every surface to find soft spots or imperfect teeth, and those that do not come up to the standard are put aside and sold as "seconds." The files are now oiled, sorted, wrapped in oiled paper to prevent their rusting, placed in labelled boxes, and are ready for the filling of orders.—*Modern Machinery.*

General Booth established the Salvation Army at Mile End Green, London, in 1865. This venerable man was born in 1829, at Nottingham.

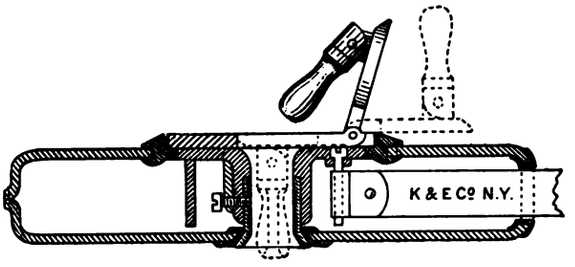
TEMPERING SHOP.

Ausable Election.

At the annual meeting of the stockholders of the Ausable Horse Nail Co., held at their office in Keeseville, N. Y., on Thursday, January 13th, the following gentlemen were elected directors for the ensuing year: Abraham Bussing, New York; Daniel Dodge, Edmund K. Baber, James R. Romyn and George N. Kingsland, Keeseville. At a subsequent meeting of the directors the following officers were elected: Abraham Bussing, president; Daniel Dodge, vice-president; Edmund K. Baber, treasurer and manager; George N. Kingsland, secretary.

To Avoid Misleading Trade-Marks.

The tariff act of July 24, 1897, explicitly state that "no article of imported merchandise which shall copy or simulate the name or trade-mark of any domestic manufacture or manufacturer, or which shall bear a mark which is calculated to induce the public to believe that the article is manufactured in the United States, shall be admitted to entry at any custom house of the United States." As it has been the custom among some American manufacturers to import cutlery and similar goods from Europe, branded in a manner to make people believe it was made by them in this country under their corporate firm name, the secretary of the treasury has been called upon by the appraising officers of the Port of New York to construe the portion of the tariff law which covers such branding or marking of articles manufactured abroad.



The Berlin Iron Bridge Co., East Berlin, Conn., have a contract for a new drawbridge over the South Shrewsbury River, in Monmouth County, N. J. This bridge is to be 180 feet in length and 40 feet wide. The Berlin Co. have the contract for both the substructure and superstructure.

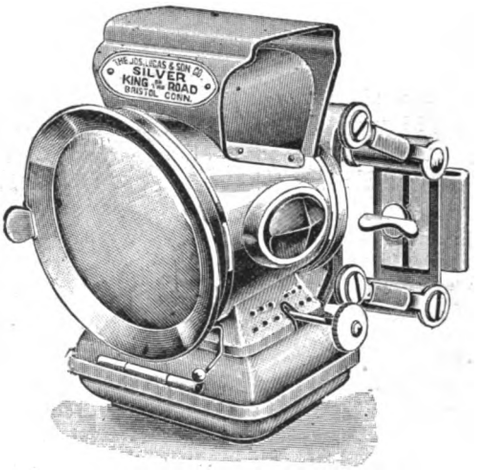
NEW GOODS AND SPECIALTIES.

Excelsior Measuring Tapes.

We are permitted to reproduce here in a complete shape, and also in sectional view, the new Excelsior Measuring Tapes, with a patented improved centre, which are being placed upon the market by the Keuffel & Esser Co., No. 127 Fulton Street, New York, with branch offices at No.



110 Madison Street, Chicago, and No. 708 Locust Street, St. Louis. In a very attractive new catalogue which they have just issued, they illustrate these goods in full, and illustrations may be found upon page 74 on a colored insert, in to-day's issue. These tapes, it must be borne in mind, are American-made, and the company say that "they are recommended as superior to all others in accuracy, construction, material and workmanship." They are divided according to the United States standard as fixed by the United States Coast & Geodetic Survey. The steel tapes are standard at 62 degrees Fahrenheit. Special attention is called to the patented improved centre, which will be understood at a glance of the illustration herewith. This patent centre with flush folding handle, has a large drum which winds the tape quickly, and avoids the close coiling which injures the steel lines. A long swiveling handle, when closed, protrudes beyond the surface of the tape case, so that the crank can be thrown open by pressing on the projecting end of the handle. The larger centre permits of using a longer crank, giving more leverage. These goods are all made of the very best material, and the reputation of the house is such that they can be regarded by everybody as first-class in every respect. A cata-

logue of measuring tapes and pocket rules will be sent by the manufacturers on application.

The Silver King.

The severe service required of a bicycle lamp demands in design, material and workmanship only the best that can be devised. The manufacturers of Lucas lamps have always adhered to that principle, and in the well-known Silver King, shown in the accompanying illustration, they state that they have "embodied every feature of value that inventive ingenuity or human skill has been able to produce." As the simplest methods produce the best results always, improvement has been sought in the direction of producing a perfect oil lamp, as being easily cared for, fuel easily and cheaply procured, and subject to no complications to give trouble just at the time when most needed. The Silver King is therefore placed on the market for '98 with such improvements in construction as to insure its reliability and durability under all circumstances. "The draught is strong, sure and steady, insuring an even and powerful flame. Ample ventilation and safety against flooding or leakage assure perfect combustion without excessive heat. The wick is automatically locked against jarring down, and the light cannot be blown or jarred out. A distinguishable feature, and one which is unique in the Silver King, is the double set of donble-convex lenses. These lenses are not ordinary pressed glass, but are carefully and accurately ground and polished. The large lens in front is 2½ inches in diameter, the small lens in rear of flame 1½ inch. This smaller lens covers the polished reflector, thus protecting the latter, while it also acts to project the light rays through the larger lens in front, the lenses and spacing being so calculated that the stereopticon effect is produced, giving a brilliant, strong and

steady light. The method of opening the Silver King for lighting or cleaning constitutes a point of great advantage, and one of the strongest features found. By releasing a swing catch at the back, the whole upper part tilts forward, giving perfect accessibility to every part without detaching a single piece. The lens in front also opens upon a hinge, as also does the polished cone reflector behind it. Side lights are two colors, finely cut and jeweled, giving a rich and handsome effect. The entire design is neat, chaste and elegant." The Silver King is made of solid brass throughout, with riveted and spun joints, no solder, and is fully guaranteed. It is manufactured by the Jos. Lucas & Son Co., John H. Graham & Co., No. 113 Chambers Street, New York City, general selling agents. Dealers will be supplied with electrotypes and literature, also with catalogues having their name on, free of charge.

League Tires for 1898.

The New York Belting & Packing Co., No. 25 Park Place and No. 22 Murray Street, New York, make the following special announcements in regard to an article which will be of interest to that large body of Hardwaremen who handle bicycle accessories: For the coming season League Tires are made in five different varieties, all single tube—League Special, League, League Tandem Special, League Tandem, League Racing.

League Special Single Tube Tire: A high-speed road tire, constructed of precisely the same rubber and fabric

Digitized by Google

used in the League Racing Tire, the quantity of each being practically doubled, to give the strength and wear required for road service. The rubber is Fine Para, elastic, resilient, full of spring and go. The fabric is the choicest Sea Island, strong and light, woven so that each individual

6 5 4 3 2 1

FIG. 1—LEAGUE SPECIAL SINGLE TUBE TIRE.

1. First layer of air tube. 2. Second layer of air tube. 3. Third layer of air tube. 4 First ply of fabric. 5. Second ply of fabric. 6. Outer cover and thread.

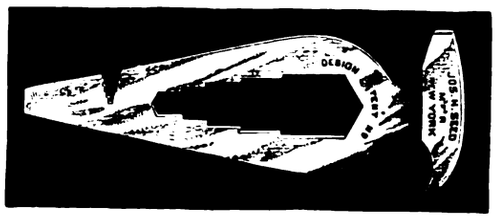
thread has free play in every direction. This elasticity of texture permits the tire to yield instantly to obstructions, carries it over small obstacles without jolt or jar, and reduces vibration to a marked degree.

League Single Tube Tire: A road tire of unusual strength and lasting qualities. The closely-woven fabric gives high endurance, and greatly decreases the chance of puncture. In other points of construction the League closely resembles the League Special. It is recommended for road riding of every description—touring, vacation trips and all-around work generally.

League Tandem Special—League Tandem: These two tires are precisely alike, except that in the former thread fabric is used, and in the latter close fabric. As a result,

6 5 4 3 2 1

FIG. 2—LEAGUE SINGLE TUBE TIRE.



1. First layer of air tube. 2. Second layer of air tube. 3. Third layer of air tube. 4. First ply of fabric. 5. Second ply of fabric. 6. Outer cover and tread.

the Tandem Special is unusually fast; the Tandem unusually durable. Both are high-quality tires, in the strictest sense of the word.

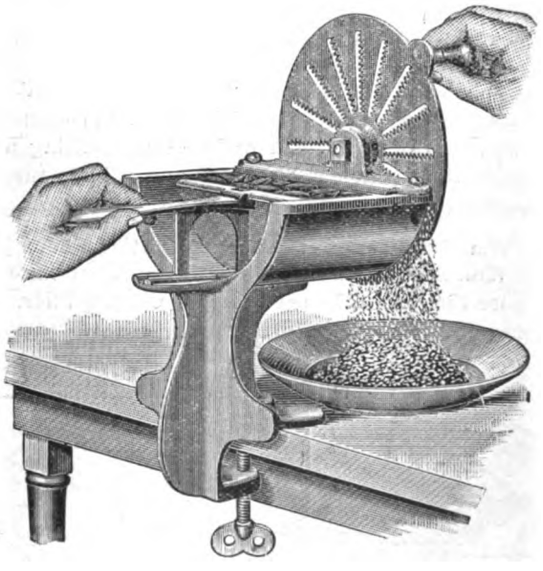
The League Racing Tire: Is lightly but powerfully constructed, and designed especially for track purposes. It is not intended for road work.

Seed's Combination Tool.

We show in this connection Seed's Four-in-hand Combination Tool, being manufactured and successfully placed upon the market by Joseph H. Seed, Nos. 21–23 Centre Street, New York, whose specialties are well known to the trade. The manufacturer calls this "The Bicyclist's Pocket Companion and a Household Handy-Handy." An examination of the same will show that these descriptions are not misplaced, as this little article combines a hammer, a tack-

puller, a square or hexagon nut, spoke or nipple wrench, and screwdriver. It can also be used as a cigar-box opener or closer, and a half-dozen other purposes, which readily suggest themselves. It is made of the finest drop-forged steel, and nickel-plated, and packed in one-fourth gross boxes. The prices announced are $1.50 per dozen, or $15 per gross, and a sample will be sent by mail on receipt of 25 cents.

The Nansen Steel Ball-Bearing Hanger.



"Nansen is ahead of all others, and so is our Nansen Steel Ball-Bearing Hanger, which we have named after him for the same reason." This is the striking and fetching announcement with which the Stowell Mfg. & Foundry Co., South Milwaukee, Wis., manufacturers of Hardware,

door hangers, registers, ventilators, etc., use in introducing to the trade the article there named. A very good idea of the same may be gleaned from an examination of the illustration shown herewith. The manufacturers add to the above the statement that this article is strong, simple and secure, and are firmly impressed with the belief that there is no better ball-bearing hanger on the market. The prices announced for these goods upon the market are as follows: No. 4, four-inch wheels, per dozen pairs, $15; No. 5, five-inch wheels, per dozen pairs, $18. Full particulars as to discounts, etc., will be sent on application.

The Champion Grater.

The Specialty Novelty Co., Lancaster, Pa., Allerton Clarke Co., sole agents, No. 79 Reade Street, New York, are placing upon the market the Champion Grater, one of the most useful specialties in the line of mechanical graters so far brought to our notice, an illustration of which is given herewith. It is made in the best manner, handsomely tinned, and designed to be retailed at a dollar each, being

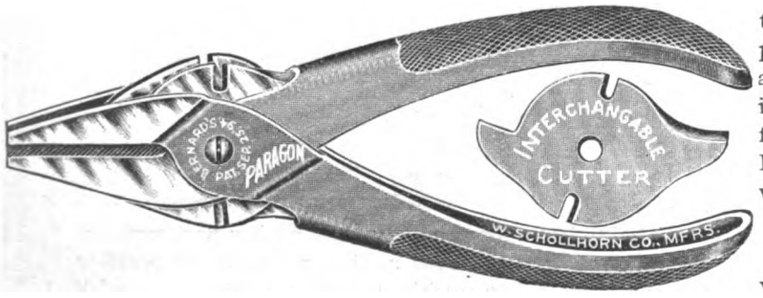
calculated to last a long time and having few parts subject to any wear. It can be used in the grating of all possible substances in larger quantities than is usually the case with other graters now before the public. It grates equally well everything in the line of nuts; cocoanut, walnuts, almonds, etc., while such diverse articles as chocolate, horse radish potatoes, crackers and cheese, can be readily reduced

Digitized by Google

cooking and other purposes, making the Champion Grater a really valuable kitchen companion.

The Planet Dust Beater.

The accompanying illustrations will convey some idea of the Planet Dust Beater, which is made by the Planet Mfg. Co., Holyoke, Mass. This beater is described as "different from all other kinds, and has the distinction of being the only patented leather dust beater on the market." The advantages of the "Planet" beaters are that, being made of round strands of solid belting leather,



which is pliant, they will not injure the finest furniture, upholstery or clothing, and they can be used for many things where many beaters are of no practical use, as, for instance, in beating all kinds of upholstery, carpets, rugs, ladies' and gentlemen's clothing, bedding, car seats, carriage seats etc., and are especially useful in hotels, hospitals, churches, schools and all public buildings. The "Planet" Beaters have only been on the market one year, but in that time they have been shipped into every State in the Union and the most of the foreign countries. The manufacturers give away very handsome advertising stands for displaying the goods, and as they are put up in individual boxes, nicely printed, they should find a ready sale among the Hardware trade of this and other countries. They are made in four lengths, and retail at from 25 to 50 cents, according to length. A catalogue and price list will be sent upon request. The success of the "Planet" Beaters is largely due to the liberal inducements offered the trade, and to the generous supply of advertising matter and illustrations which the mannfacturers have furnished their customers.

Wm. Schollhorn Co.'s Paragon Cutting Pliers.

The Wm. Schollhorn Co., New Haven, Conn,, are placing before the tool trade the Paragon Cutting Plier, something new in the way of a cutting plier, having interchange-

able cutter, and which is of a very unique design, an illustration of which is given herewith. It is not intended to replace their high grade "Barnard" cutting plier, but simply to supply the constant demand for a good tool for general use, which, although quite moderate as to selling price, still possesses a quality that will command it to the Hardware trade handling tools. These goods are kept in stock by Underhill, Clinch & Co., No. 94 Chambers Street, New York.

Akins' Felt Show Case Mats.

C. E. Akins, Nos. 21 to 25 Centre Street, New York, manufacturer of artistic specialties for advertising purposes, has had an unqualified success with his Felt Show Case Mats, which for a number of years have been a leading specialty, the customers for which are now numbered among such leading companies as: The Union Metallic Cartringe Co., Simmons Hardware Co., the Winchester Repeating Arms Co., Michigan Stove Co., Rathbone, Sard & Co. and Mallory-Wheeler Co. These mats on every show case where they may be placed, form a handsome and attractive advertisement, always before the buyer, and are invariably welcomed by the dealer who receives them, saving the glass of his show case from scratching, making a good change receiver and adding to the attractiveness of the counter furniture.

Death of Burr K. Field.

It is with feelings of sorrow that we announce the death of Burr Kellogg Field, vice-president of the Berlin Iron Bridge Co., who died at his home in Berlin, Conn., on Thursday morning, January 13th, after an illness of less than a week. His death was so sudden and his sickness so short, that few of his friends were aware that he was ill. Burr K. Field was born in May, 1856. He entered the Sheffield Scientific School of Yale University in 1874, and graduated in 1877, as a civil engineer. Immediately after graduation he commenced practical work among the railroads of the West. His principal experience was in connection with the laying out and building of the Northern Pacific. Mr. Field had charge of the locating and building of the branch connecting the Yellowstone National Park with the Northern Pacific. In 1882 he was appointed superintendent of bridges in the city of Philadelphia, which position he held for something over a year, when he resigned to accept a position as assistant engineer of the Berlin Iron Bridge Co., of East Berlin, Conn. His advancement in the Berlin Iron Bridge Co. was very rapid, and at the time of his death he occupied the position of vice-president, with general charge of all the sales. Since his connection with the Berlin Iron Bridge Co. its business has been much extended and its sales have increased very rapidly year after year. Mr. Field had no small part in the making of the enviable reputation which the Berlin Iron Bridge Co. now enjoys, and his death will be a severe loss to his associates. In the very flush of manhood, when everything in the world seemed brightest and best to live for, he was cut off in an instant. He was an indefatigable worker, not only for the company which he had so faithfully served, but in everything he undertook; a true friend of his fellow-men, a devoted and earnest worker in the church, a staunch friend to the cause of temperance; active and energetic in every public position that engaged his attention. Mr. Field had a most pleasing manner, and was so honest in all his dealings that he had an enviable reputation among the manufacturing corporations of the country. People who knew Burr K. Field best, trusted him most. He is survived by a wife and two small children.

One of the finest rooms in Ohio, finished specially in hard woods for Hardware trade and used for such twenty-six years, may be enlarged to include tinware, plumbing and roofing. Rare opportunity. Address W. B. Carey, Salem, Ohio.

Best advertised stove polish on earth, Enameline.

THE PHILADELPHIA HARDWAREMEN.

The above caption stands for a great deal. It stands for those manufacturers who have made the name of Philadelphia famous, wherever tools are used; it means the great jobbing houses through whose instrumentality these manufactured articles have been carried into every corner of the earth; it means the retailers who supply local wants, and it also means a great many things in addition.

Used in this connection, it means the Hardware Manufacturers' & Merchants' Association of Philadelphia, which on the evening of Friday, January 20th, gave its twelfth annual dinner in the spacious and attractive main dining hall of the Philadelphia Bourse. It means, further, that the occasion was one of rare enjoyment, that the attendance was large and that for once the old men were relegated to the rear, and the young men brought forward with great success. This fact will be demonstrated by a perusal of the speeches which follow, as they are without exception able and full of interest, and the orators were listened to with close attention and rewarded with generous applause.

At the recent annual meeting of the Association, James H. Ritter, of the Biddle Hardware Co., who has served most faithfully as Vice-President of the Association, became its President. He was on hand at an early hour to greet the members of the Association and their guests, and was ably supported by the other officers, with the exception of the genial Secretary-Treasurer, T. James Fernley, who was unable to be present because of the recent great bereavement which had befallen him in the death of his honored father. There were some doubts whether a gathering of this character could be made successful without Mr. Fernley's presence, but Mr. Ritter and his associates threw themselves into the breach with such ability that the loss was in a large measure made up.

At a few moments before 7 o'clock the guests took their seats at the four tables which had been arranged, and were delighted with a scene of very attractive beauty. The tables and the room were tastefully decorated with flowers, and in addition there were discovered about each plate a collection of souvenirs generously provided by the Philadelphia manufacturers for the occasion. Among these were Disston saws and files, Plumb hammers, Barnett files, North Brothers' screwdrivers, McCaffrey files, and little boxes containing bunches of matches about which was wrapped a strip of sandpaper of the Baeder-Adamson brand. In addition to these souvenirs, here and there upon the table were seen meat cutters from the Enterprise works, and lawn mowers of the Supplee manufacture. The latter were adorned in streamers of blue and yellow, which colors, it is needless to say perhaps, are those officially recognized as belonging to Philadelphia—despite the popular impression that drab is the city's prevailing hue.

A very handsome programme had been prepared, the cover of which we reproduce herewith and also a diagram showing the arrangement of the tables and the location of the members and the guests.

The menu and the programme were as follows:

MENU.

Blue Points. Cream of Celery.
Planked Shad. Pate of Sweetbread.
Saddle of Southdown Mutton. Peas. Potatoes Duchess.
Roman Punch.
Quail en Casserole. Lettuce and Tomato Salad.
Montrose Pudding.
Assorted Cakes. Cafe.

"And some loquacious vessels were, and some
Listened perhaps, but never talked at all."—Omar Khayyam.

TOASTS.

PRESIDENT'S ADDRESS, - - - James H. Ritter.
"No more wine? Then we'll push back chairs and talk."—Browning.

CIVIC PRIDE—OUR FAIR CITY OF PHILADELPHIA. Wm. D. Supplee.
"Be to her virtues very kind,
Be to her faults a little blind."—Shakespeare.

SONG—"THE FLIGHT OF AGES," Chas. A. Huff, - —*Bevan.*
"Come now a roundel and a fairy song."—Shakespeare.

OUR PART IN THE NATION'S PROGRESS, - Hugh McCaffrey.
"Let our object be our country, our whole country,
and nothing but our country."
"Thank God! I—I also am an American."—Daniel Webster.

OUR NATIONAL UNREST, - - - - Chas. Z. Tryon.
"No pent up Utica contracts your powers,
But the whole boundless continent is yours."—Jonathan M. Sewell.

SONG, - - - - - - Edmund L. Wunder.
"He coude songs make and well endite."—Chaucer.

AS SEEN THROUGH LEGAL SPECTACLES, - John Roberts.
"Do as thy adversaries do in law, strive mightily, but eat and
drink as friends."—Shakespeare.

IS THE AXE MIGHTIER THAN THE SWORD? - Paul A. Griffith.
"Many strokes, though with little axe,
Hew down and fell the hardest timbered oak."—Shakespeare.

SONG—"AMO," Charles A. Huff, - - - - —*Mattei.*
"It's by his singing the abbot gets his dinner."—Cervantes.

PROSPECT AND RETROSPECT, - - - Alfred C. Rex.
"Defer not to to-morrow to be wise;
To-morrow's sun to thee may never rise."—Congreve.

VALEDICTORY, - - - - - -
"'Farewell!' the portly landlord cried;
'Farewell!' the parting guests replied."—Longfellow.

After the dinner was concluded, which was at 8:30, the retiring president, Samuel Disston, arose, and in a few well-chosen words, introduced the president-elect, who was received with many expressions of good will. Mr. Ritter, after the applause had subsided, arose and delivered the following address of welcome:

ADDRESS OF PRESIDENT RITTER.

"What, no more wine? Then we'll push back chairs and talk.'

Guests and Fellow Members:—The quotation attached to my name calls me to my pleasant duty of extending to all a hearty and brotherly welcome on this our twelfth annual dinner. Only a few years ago there passed away from this earth one of the greatest of American statesmen, a man whose name is still a name to conjure by; and whose memory is ever hailed with acclaim as the "plumed knight." Alike in the midst of debate and in set speeches his eloquence won for him the name of the "silver tongued," and I would that I might have but a shred from his mantle so I might fittingly welcome you all to-night.

For it is not for naught that we yearly leave the hurry and rush of business, the stress of competition, and pausing in the battle of life, come here as fellow workers, having for a flag of truce the fair white cloth of the banquet board, and for regimental colors the glowing hues of flowers. The poet says, "Through the long day we suffer Lord, O give us now repose," and as the green oasis gladdens the eyes of the weary Arab and gives him new strength and fervor, so our annual feast brings encouragement and hope.

And now having satisfied the wants of the body, we gladly push back chairs and talk, glad to hear from those who in the past have given us of their wisdom and eloquence, and glad also to welcome those who now maybe make their maiden speeches and so give promise for the years to come.

And if our Association had done nothing else it is proud of having removed the personal antagonism which once

Digitized by Google

existed between us as rivals, and which is perhaps illustrated by the story of two little darkies quarrelling in the street. One of them called the other all sorts of names—except pleasant ones—while darkey number two listened impassively and then said:

"Is you all troo?" "Yes, darn you," was the answer.

"Hab you nuffin more to say?" "No."

"Den all dose tings you were callin' me *you* is."

For twelve long years we have been meeting in this friendly fashion, and as an evening or so ago I sat down in front of my fire to think what words of cheer I should say to-night (for many impromptu speeches are thus thought out), I closed my eyes to think. Perhaps it was the roast turkey and plum pudding which I had for my late dinner, but my closed eyes saw visions, and looking back over the decade and more, I saw old familiar faces representing well-known firms and houses, who now meet with us no more, and of whom we might say as did old Isaac Walton of a one-time comrade, "An excellent angler and now with God." I saw, too, some who are with us to-night, but who were then knickerbockered schoolboys knowing nothing of the price of strap hinges or of nails. And looking down the vista of the coming years I could see the time when future generations would say, "Where are the gray-headed members of 1898?" So time passes, crises come and go, men pass away and their places are filled by others, but our Association goes on in renewed life and vigor with promises of many fruitful and happy days to come.

And now I take pleasure in thanking you for the honor you have conferred upon me in my election to the dignified office of your president. For to be president of an organization of this kind, by no means the least of our Philadelphia merchants' guilds, is no small honor. The record of the merchants of our city, containing such names as Robert Morris, the financier of the Revolution; Stephen Girard, whose fair memory yearly increases with the fame of his white college, and many others who crowded the old coffee house at Front and Market streets during the early years of the century, and made Philadelphia the metropolis of the country and the greatest port of entry in America, is one of which we as loyal Philadelphians may well be proud.

It is something, therefore, for us to stand to-day in the Apostolic succession of Philadelphia merchants, for merchants are the real rulers of the world to-day. Whether they are merchants in money whom we call bankers, or merchants in goods whom we call traders, by trade is the world ruled. If I were to-night to name the rulers of the world, I would name Love, Religion and Commerce. Love and religion rule the hearts and inner lives of men, but the outward ruler is commerce. Once the world was ruled by the firm and ringed hand of the priest, and the Holy Roman Empire was a reality that commanded alike the respect of the refined Italian prince and the reverence and fear of the Northern barbarian; later the mailed hand of the warrior held all power in its kingly grasp while diplomacy was its buttress, but to-day, greater than priestly power, more potent than the armed hand and more subtle than the arts of diplomats, is commerce, the ruler of the world. She it is who scales the mountains with iron roads and streaks valleys and plains with the smoke of the locomotive, who plows the seas with merchant fleets before which the navies of Rome and Cleopatra would be as puny rafts. It is commerce who appropriates all things to her service. Is the lightning called from heaven?—it is enchained in slender wires and made to carry her messages to the ends of the earth and even to perform work once done by the veriest drudges. Has Nature surpassed herself in making a Niagara before which thousands of untutored redmen have bowed in reverence as before the voice of the Great Spirit? Commerce chains that marvel to slavery and compels it to turn the wheels of manufacture. Is earth revealing her secrets of light and heat and life? Commerce appropriates them all to her purposes and work. And if it is so with the once wild forces of nature, how is it with man himself? Truly he has long been tamed to do her bidding. No hamlet is so remote that her influence is not felt. The jungle dweller in India, the ivory hunter in the wilds of the Dark Continent, the lonely inhabitant of the Australian bush and the savage in the South American fields, all do her commands and serve her all the days of their lives.

And if this sounds like poetry or fancy let us look at facts in our own country. Fifty years ago the agricultural products of our country exceeded manufactures by about one-half. To-day, in spite of the marvellous increase of agricultural production, our manufactures are three times the value of the products of agriculture.

This, then, is pre-eminently the Age of Commerce. The old problems of kingcraft and government have passed away, and we merchants of to-day are helping to solve the new problems arising from new conditions and a new ruler.

Sometimes these problems seem hard and unsolvable. *Tempora mutantur*, say some of our Hardware brethren, and it does not take an old man to see that conditions of trade change rapidly from one decade to another, but "if our courage fails in the hour of adversity, our strength," as the Book of Books says, "is small," for there is a Power which may be trusted to overrule all for the good of mankind.

They change so rapidly they remind us of the Irishman before a judge who asked him if the plaintiff had been riding fast. "Very fast, your Honor," was the reply. "How fast?" said the judge; "as fast as a man could run?" "Yis," said the Irishman; "as fast as two men could run."

On that dark day when the news of Lincoln's assassination reached New York City, Wall street was filled with a

surging crowd of anxious men who doubted the safety of the nation, and knew not where to turn for hope. Suddenly a man pushed through the crowd and, mounting the Treasury steps, his clear voice rang out over the excited tumult: "Clouds and darkness are round about Him; righteousness and judgment are the habitation of His throne. The Lord reigns and the government at Washington still survives." Prophetic indeed was the scene in the light of after years when the speaker, who was James A. Garfield, became our second martyred President.

So, if at times the future seems dark, let us not lose heart, but remember that we, as merchants, are making history to-day. There can be but little doubt that this old world of ours is on the eve of great social and economic changes, brought about by the all-compelling power of modern commerce. But we are not to lose heart; on the contrary, let us take courage by standing as we do to-night—shoulder to shoulder in a common cause.

When, in 1776, our glorious nation was new-born among the powers of the world, it was her proud privilege to work out many problems which the Old World could not, or would not, and as a leader among the nations stands the United States to-day—the refuge of the oppressed and the hope of the desolate the world over. It may still be our proud privilege as a nation of merchants to solve the social problems of to-day, chaining competition to such a degree that it may become a beneficent force, giving to every man a fair chance for an honest and comfortable living.

So, if with this confidence we look into the coming years, we see a still greater United States, filled with countless millions of happy and industrious people, with the comforts and even luxuries of life so evenly distributed that men and women are no longer doomed to privation and unremitting toil, but having time for the enjoyment of home, for self culture in art, music and all the inspiring heritages of the race, and free indeed in every sense of the word, as befits the people in this country. When our fathers, filled with prophetic instinct, designed a fitting flag for this great nation, they took the pure whiteness of moonlight as emblematic of her purity among the nations, the glowing red of the sunshine as typifying her youthful and growing strength, the deep blue of the midday sky as showing her serenity and depth of character, and then, as a fit emblem of her aspirations and hopes, they took fair stars from heaven and wove all into the flag we love to-day.

And so, believing in this happy future of our beloved country, our hearts will ever be more fully stirred by the sight of the glorious stars and stripes flying overhead in the golden sunshine—a beacon to the weary in every land and the hope of the desolate the world over, and then, more than ever, will our spirits thrill with patriotic pride and fervor as we sing:

"My country, 'tis of thee,
Sweet land of liberty!
Of thee I sing!"

A vocal solo was admirably rendered by William P. M. Braun, after which William D. Supplee was introduced and spoke on the subject, "Our Fair City, Philadelphia." Mr. Supplee said:

SPEECH OF WILLIAM D. SUPPLEE.

Mr. President and Gentlemen: Before accepting of the opportunity that you offer me of reference to but a few of the many blessings that Philadelphia enjoys, I would address myself more particularly to our honored and esteemed president. In public I must refer to him as our worthy president—Mr, James Hansell Ritter; in private I might possibly whisper, "Jimmy," while he may refer to me as a competitor, as that "Bill Supplee."

Mr. President, you should feel noble, great and honored. While your Quaker bashfulness has always prevented your telling your age, we are inclined to believe you younger than any of your predecessors in office. If in this I am wrong please correct me.

The first, our much beloved president, Mr. Wm. J. Lloyd, then Mr. Biddle, Mr. Plumb, Mr. Supplee, Mr. Disston, and now comes yourself. Perhaps, when your little boy joins our ranks, we, as old, grey-haired men, will tell him that you were the greatest of them all; but don't let all the words of praise likely to be spoken mislead you. If you would serve us well, your row will not be an easy one to hoe; 'twill be full of pebbles; as a Southerner would say, it will be full of rocks. You have got to please us all, and with all I must include that greatest of Romans, the honorable secretary, whose recent bereavement preventing him from joining the festivities of the evening no one regrets more than I do. You have got to please him, and this in itself is a task worthy of a diplomat.

Speaking of our titled Secretary-Treasurer Hyphen, lots of other things remind me of an anecdote I read some time since, and with a promise on the part of all present that they will not peach on me for telling tales behind one's back, I would attempt to relate it.

'Tis one of the anecdotes of the Hon. Chauncey M. Depew, related by him and labeled, I believe, "My Joke" No. 1,727,319. Why it reminds me of Thomas James I will leave you to imagine.

Some time since the rumor was spread that a certain gentleman, then president of a prominent railroad, was about to resign his position, the names of both gentleman and corporation having been forgotten—we will say Mr. Smashup, of the Squedunk & Walk-home Railroad Company. Well, the rumor was that Mr. Depew was to accept of the position in order that he might add further honors to his name and at the same time assist his bank account towards that point where he could say, "Thank fortune, all debts are paid and a dollar or so left over." Well, the street rumors were repeated to Mr. Depew, who replied: "A man went into a restaurant, and after eating a very hearty meal asked what was on the bill of fare for dessert. The waiter, who had been wondering at the guest's capacity, answered, 'Peach, pumkin, apple and custard pie.' 'Well,' said the old man, 'bring me a piece of peach, pumkin and apple.' The waiter looked at him a minute and said sarcastically, 'What t'ell's matter with custard?'"

But, to return to our text, which I have no desire to desert.

If there is any grievance against Philadelphia, it is as against that percentage of her citizens who do not, and will not recognize that taking Philadelphia as a whole—that there is no more favored city, no more body of citizens more open for congratulations than those who can say, I am a Philadelphian.

I make this statement of Philadelphia compared with any city in this great United States of America, and that carries with it a comparison with any city in this known world. A thousand and one blessings are ours as compared with New York, Chicago, Baltimore, Pittsburgh, Cleveland and so on, naming all the prominent cities of the country.

We can refer to our parks—unequalled—go where you will. Our city full of homes, the majority of which are owned by the occupants, and so on through a list that will in part, be referred to later.

But some few of her citizens, and often those who do the most or loudest shouting, will pick out the gloomy side of a question and add an apology. Take our public buildings, than which there are no finer in this country, and you will find hundreds—nay thousands—of people who will but mention them to make a complaint; hundreds who complain at its awful cost who have never spent directly one cent in the way of taxation—save it be for a poll-tax—they will walk through the corridor from North to South Broad streets on a dismal day, when all the city is rain and

Digitized by Google

gloom, and pronounce the building itself a dirty, dismal hole. Whereas, they should examine some of the chambers provided for the various city departments. Let them, examine but the stairway in either the southwest or southeast corners, and dare then to find the equal in any municipal building in the world. Shame it is for such citizens—for while at heart they may be true and honest they should be more proud.

Nevertheless, the existence of such a class is only too well known to us.

It is not many months since I saw an old woman standing with open-eyed wonderment of despair, because she could not find some awful cracks in the tower, in order to show a friend some of the beauties of the building. And giving it up in despair she said, "Well, the cracks are there some place, and I guess there must be lots of them."

How different from a friend of mine in New York, with whom, on a recent visit to that city, I was crossing the City Hall Park. I noticed scaffolding around the City Hall, and asked if they were going to tear it down and build a decent building for those who have charge of New York's municipal affairs.

"Why"—the man turned on me in disgust. He acted as if I had insulted his city, his family and himself. "Tear it down—why, that's recognized as one of the finest buildings in the country." He started in about archtecture, about proportions and other beauties so hidden as to make them treasures. And all this burst of enthusiasm about a building that you could place in the court of our public buildings and find room enough left to play base ball. Beg pardon, must play golf in these days.

Take our parks of 2,800 acres, as compared with the parks of Paris and London combined, of less acreage; and New York, of less than a third its size.

Take our prize of all prizes—a building which almost casts its shadow on the ground beneath us—our State House. A building which awakens such interest, stirs such enthusiasm as can no other one building in the country. And I doubt if there is any one spot in this known world which should bear such reverence of the country's people as this our grand, glorious and beloved Independence Hall.

Take our homes, numbering nearly a quarter of a million, where Philadelphians are housed at the rate of five to a building as compared with over eighteen to a building in New York and over twenty-five in Paris.

Take a city of peaceful citizenship, where a force of about 2,200 police give better protection than those of our near neighbor with double the number of bluecoats, and only about one-third the street mileage to cover, and our force of 2,200 police as compared with 1,4000 in London, with practically the same street mileage.

Why, gentlemen, in what other city could you give a dinner like this? I mean a *dry* dinner. Which recalls an anecdote I heard the other evening:

An old soak walked into the Hotel Walton bar and asked for a drink. He wanted a Tin Roof. The barkeeper looked at his customer puzzled, and confessed himself at a loss how to prepare it. Well, Mr. Soak explained what was to be put in—whiskey, brandy, gin, cream, de la menthe, a dip of lemon, and so on until a very respectable sized drink if not appetizing mixture was prepared and immediately gulped down. The barkeeper asked forty cents for his pay. "What for?" "Why that drink—that tin roof." "Why, that's on the house." "Gentlemen, your drinks to-night seem to be on the house."

Take our manufacturing industries, as, while we stand second in output, there is no city in this universe where the laborer, mechanic and artisan is in a better position, has as a rule better work or more work and better pay. Take these manufacturers and they turn out on an average a much better, fairer line of merchandise than can be secured elsewhere; a much smaller proportion of shoddy, trashy articles.

Take those goods which our business would put us in a position to positively speak about and know whereof we speak. Of the lines manufactured, we stand unquestionably at the head. Who will question this as to the superiority of the wares of our manufacturers of saws and tools, files, with our several large factories; hatchets and hammers, ice cream freezers, meat cutters, malleable castings, steel goods, sand paper, shovels, and, if I may say it myself, lawn mowers. And, again, take such industrial works as Cramp's, Baldwin's, our oilcloth manufacturing plants, our textile mills, and our carpet mills, where, you well know, more carpets are made than in all the balance of the United States, or more made than in all of England.

A total estimate is made of the value of our manufactured wares gradually and surely creeping up to the one thousand million dollar mark.

The good-naturedness of Philadelphians is as proverbial as their modesty. They can smile at jokes cracked at their own expense; and being able to enjoy one myself I will repeat a sketch and anecdote of *Life's:*

A misty, disagreeable night; an old-fashioned awning post held up by Mr. Stay-out-late from another city, talking to himself until he has attracted the attention of the old, weather-beaten watchman carrying a lantern of the Diogenese pattern; an old coat, 1796 design, together with a street car, composed the sketch. The watchman addressing the inebriate says: "You'd better catch that car and go home; it's the last night car."

"Last night's car, last night's car. I always knew Philadelphia was slow, but I never knew they run last night's car to-night."

A word in regard to our commercial museums. A model of enterprise not even attempted in any other city in our country; and while we have but once more proven the truth of the assertion that there is nothing new under the sun by in part copying the museums of the old world, nevertheless we have, in but a couple of years, so surpassed our foreign rivals as to cause them to send representatives to our shores to get points from us.

Our museums have already proven worthy of their mission by opening up channels of trade that might take a score of years for the individual manufacturer to successfully follow up.

Take our universities, our medical colleges, Girard College, our Bourse building, the finest in this country. Take our Bank of North America, the oldest banking house in the United States, who recently made the laudable offer to subscribe $16,300, or one-tenth of the balance of the Philadelphia Bourse's indebtedness, providing the banking interest and trust companies at large, or the citizens at large, would take the other nine-tenths.

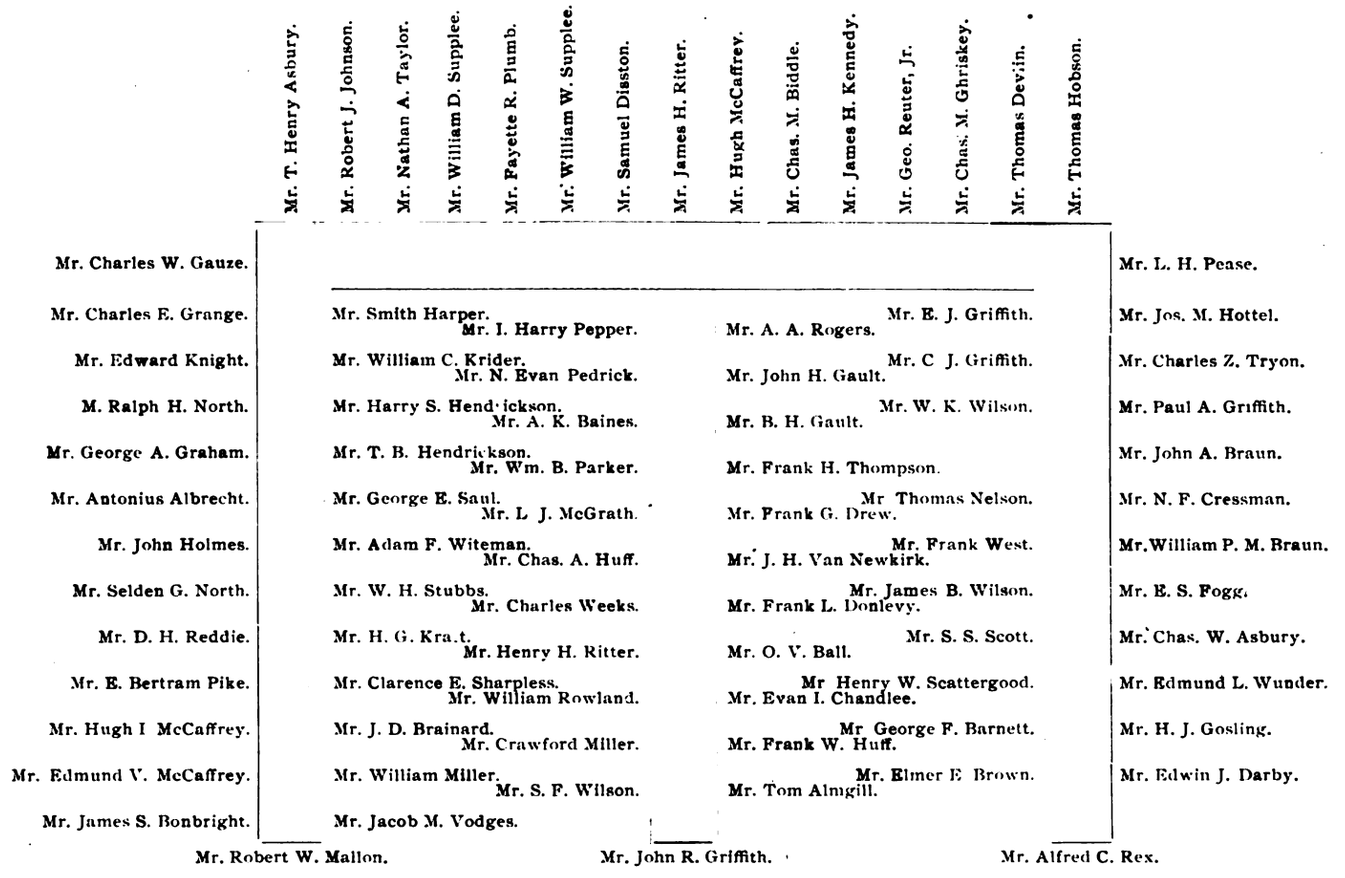
And so on, all buildings and institutions worthy of note; and take that little brick building around on Arch street, where was made the first American flag. Could we not as true American patriots, and as true and loyal citizens, add a postscript to that stanza:

The Star Spangled Banner,
Long may she wave,
O'er the land of the free
And the home of the brave.

And add:

And long may she wave over the homes of the people of the most favored city in this beloved United States.

Charles A. Huff rendered a vocal solo, and was followed by Hugh McCaffrey on "Our Part in the Nation's Progress." His address in full was as follows:



SPEECH OF HUGH M'CAFFREY.

While attempting to say a few words on the work of our organization, or on that of the individuals composing it, in the progress and upbuilding of the nation, yet I am conscious of my inability to say anything new or possibly any

Digitized by Google

thing that would even merit your approval, and much less serve you in your business or intercourse with your fellow-manufacturer or merchant. I wish to address my words chiefly to the young men here present, as well as to congratulate them on the selection of one of their number to serve as President of our organization. For his administration I bespeak success. I know he has your confidence and good wishes; and anything you can do to assist him in the discharge of his duties will be a pleasure to you. Our Secretary-Treasurer is a young man; and we regret the bereavement in his family which prevents his being with us this evening.

To my mind, gentlemen, the occupation of a Hardware merchant or Hardware manufacturer is an honorable one; the latter produces or shapes articles that are useful or

beneficial to his fellow-man, sells to the merchant, who distributes them, and thereby creates or promotes commerce.

I do not desire to go into the statistics of the manufacturing interests of our country, not even those of the period that has elapsed since the close of our Civil War, as you know already that they have advanced by leaps and bounds, mainly on account of the principle and workings of the Protective Tariff. All honor to the statesmen who at different periods in our country's history enacted laws that have resulted in the building up of such splendid factories, not only in Pennsylvania, but in almost every State of the Union.

The construction of locomotives was early established here, and has grown steadily, until to-day it has assumed gigantic proportions. The American tourist can now ride behind the Baldwin engine in every country where railroads exist. In 1845 the first rails were made in our State at Danville, and from that time on the great civilizer of our age, the railroad, has made steady progress, reaching out to the South, the North, and especially the Great West, enabling our pioneer farmers who brought the prairies under cultivation to market their products in the Eastern centers of population, and even in Europe.

The building of steamships has been notably a Philadelphia industry; and we are all proud of the immense plant of the Cramp company. The name and fame of Disston's saw works are universal. I shall not attempt to enumerate other busy hives of industry which abound in our city.

Our Hardware merchants are thoughtful, energetic and honorable, well maintaining Philadelphia's credit for fair dealing and hospitality, distributing their goods from Maine to California, reaching the Great Lakes, and south to the Gulf of Mexico, exporting special lines and importing others that are found to be advantageous to our people.

Gentlemen, there is no doubt of our country being the greatest and grandest on earth; and all men, especially those having youth on their side and who are honest, sober and energetic, have a better chance of success and material advancement under the Stars and Stripes than is to be found elsewhere.

I do not wish to praise our Association unnecessarily; but since its formation it has acted well its part in the progress of our nation, being always foremost in every good work; and it has cemented in bonds of trade and friendship the merchants and manufacturers of our city in such a brotherhood as does not exist in any other place that I know of. And one of our members deserves the credit of organizing the jobbing Hardware merchants of the United States into a national organization which has proved of assistance, protection and profit to them.

Fellow-members, I would have you continue in the future as you have done in the past. Keep your record clear as the noonday sun and your principles as honest as the patriots who founded our Government in this good city one hundred and twenty-two years ago. Your equality and high purposes of organization, if continued and lived up to, will not only permeate the people of the West, North and South, but ultimately extend from pole to pole.

Before closing, I desire in all seriousness to say a few words in regard to trusts and combines. I mean those organizations which are formed for the purpose of raising prices and extorting money from their customers for the time being. I am firmly convinced that there is danger to

Digitized by Google

our country and its institutions from them, no danger as great, in fact, as from those gigantic frauds. They hold themselves above all laws, national, State and moral. I beseech you to use your strongest influence against them, to urge the people to petition Congress and the State Legislatures for redress. Insist that the lawmakers pass enactments that will abolish trusts and make it impossible for these iniquitous monsters to exist. Throttle them before they have time to stifle and destroy the liberties of the Republic. If you will do this, you can then conscientiously ask God to guide and protect this nation for ever and ever.

"Our National Unrest" was the subject which was most ably handled by Charles Z. Tryon, who spoke as follows:

REMARKS OF MR. TRYON.

If we look broadly over the history of any nation during some stated period of time, we can generally determine some one peculiar force evidencing itself beyond all others and becoming the expression of the mental condition of the people. Art, for instance, controlled the thoughts and feelings of the early Greek civilization; physical prowess and allegiance to country moulded the great Roman empire. During the dark middle ages a cloud of passiveness and ignorance seemed to overshadow the whole of humanity, only to be dispelled by the glorious revival of learning which emanated from the brilliant minds clustered around the Byzantine Empire.

What is the expression of our present civilization, particularly in our own good country? I think we may well say a spirit of restlessness, for from pulpit and platform, in meetings social, political and commercial, on every hand do we hear comments of alarm upon the condition of unrest which seems to have taken such firm grasp upon all grades of society. Now, what are the causes of this unrest, and is it really so alarming? There is one sort of nervous restlessness which pervades all our Western civilization, and I think is in a measure accounted for by Dr. Max Nordau. The mind of man has grown gradually with the progress of the world up to a time say fifty years ago, when, presto—in a moment, without preparation, the tremendous discoveries and inventions of the Nineteenth century have been launched upon us. Every man to-day, with only the same amount of food and sleep as his grandfather, does ten times the work, receives ten times, yes, twenty-five times the number of sense impressions. Our ancestors attended to business with no distraction save perhaps the chirp of a a canary whose gilded cage hung in the office, while to-day into your one ear is poured the medley of sounds and vibrations from the street—the whizzing of the trolleys, the incessant clang of fire, police and ambulance bells, the shouts of draymen, and the piping voices of newsboys. The other side of your head is no better off. This poor ear receives the unending discord of store sounds—the telephone bell, the wrangling of your cashier with the customer who wants two off of a sixty-day account, the tramp, tramp of many feet, and the incessant click, click of the type-writer as it transfers to print your thoughts of but a moment before. The strain has been too sudden for our nervous systems, and humanity has broken down—is tired out. Have you never felt this? Have you never longed for just one week, one day when everything would stop and rest? Not you alone, for then some other fellow would get ahead of you; but when everything—railroads, mail service, banks, interest on that note you owe, steamships, electric lights, sun, moon, stars and gas works—everything, would stop for just one moment, so that you could catch just one breath? But no, you are in the grasp of the hurrying, plunging universe, and you must keep awake and alive or go down and out. Progression or retrogression is the only alternative. Dr. Nordau, however, comforts us with the remark that this nervous restlessness will correct itself in the future, when humanity has had time to assimilate the many phenomena which have thus been ruthlessly thrust upon us.

We may safely cease to worry, then, over this form of restlessness, and engage our attention with another form, apparently more serious in its effects and apparently far more dangerous to the welfare of our land. I refer to that feeling of social unrest always more or less prevalent, but which has appeared more clearly of late, due no doubt to the continued period of hard times through which we have passed.

Primarily, restlessness in itself is not bad; it is natural, and hence good when properly directed. It is a scientific fact that by the restless, untiring use of certain organs, functions or ideas, that these organs, functions or ideas become prominent. Why, the simplest form of life, a mere tiny cell has two restless tendencies, a desire to grow and a desire to divide into two, which it promptly does the moment it is large enough.

Capital, when fixedly invested, produces interest, and what a restless fellow interest is, working day and night; a sacreligious rascal too, for while you are at prayers he is working all day Sunday piling up the profits on your good investments and running up a bigger bill against you on the bad ones. Take this capital, however, and stir it up a little; buy something, sell this merchandise and buy again. Immediately this active capital begins to accumulate much more profit than when passive. The more restless the capital, guided by judgment, the more will it produce. Restlessness, then, is a condition of our existence: and that plant, animal, man or nation which is most restless in the proper direction is bound to supersede others.

No nation of the globe is at this time more restless than our own, and if guided by good judgment and not by prejudice, no nation has a brighter future. Our restlessness has frequently gotten us into trouble, but it has generally been due to poor direction, to prejudice. One sad accident, the result of prejudice, happened in 1860, and it has left a scar that will never be outgrown, but experience is a good if a hard teacher, and the lesson then taught will be long remembered. We of to-day are enjoying privileges won for us by the many sad experiences of those who have gone before, and I think we who are younger often forget this.

It is the misguidance by prejudice of our restless condition that we are to fear then, as a nation.

Now, while there is undoubtedly much prejudice inherent in us all, yet I cannot but think that a large measure of our petty social prejudice and selfishness is due to the influence of the great political parties. One great party goes before the people and says, "Protection is the thing for you;" another party says, "Free silver is the thing for you;" not one word about country, but "you," personally you. Is this the spirit of the founders of our nation? This is a government for the *people*, by the people; not for you or for me by the people.

We passed a crisis about eighteen months ago. Two great parties approached the people from the side of prejudice, bare-faced and appealing to the basest kind of prejudice; while a third party appealed squarely to their judgment. Men held their breaths, and well they might, for in our condition of unrest the decision of the people meant far more than silver or gold; it meant which power was to control our destinies—prejudice or sound judgment. The decision was registered fairly for judgment, and, gentlemen, that decision is the grandest result in many years, for it proves that deep down in the hearts of our laboring people, for that's where the fight really was, personal prejudice was stifled by sound judgment. The result augurs brilliant prospects for our future, for upon this unselfish basis alone can a republican form of government exist.

It is disheartening that this splendid example was not

Digitized by Google

followed in the municipal election held not long ago in a great city not far off. There prejudice won. I speak of party prejudice. A large proportion of the intelligent people of that great city permitted the defeat of a cultured, respected citizen for a high office, rather than divorce their national party prejudice from municipal affairs, and worse than all else, some prominent men under the very shadow of our national administration lent their aid to this miserable party prejudice. I once heard of a Chicago political boss who made a brilliant speech, urging the people to be true and faithful to one party, and it has since leaked out that this worthy gentleman had six wives. I do not mean to infer that all our political bosses have six wives each; that is impossible; they do not all live in Chicago; I wish they did: but I do mean to say that nine out of ten of our party prejudice leaders will dump you and their party the moment they can make a better deal with some other faction. Greater New York has had her hair plaited in this style of late, and the quicker she cuts off the "Plait" the better she will look. Municipal governments can never be satisfactory until people are willing to cast aside prejudice and "split the ticket." If, as a city, state and nation, we can always stand on the side of judgment in every question, we need have no fear of our restless condition. Activity has put this country where she is, and she is not going to stop. It is activity that to-day enables the ship-building interests of the Delaware to rival those of the far-famed Clyde; American locomotives and American steel rails to carry civilization into the wilderness of new lands. It is American activity that causes every tree in the wide, wide world to tremble from leaf to rootlet at the name of Disston's saws; every tack in the universe to hide its head at the thought of Plumb's hammers, and every cur dog from the Transvaal to the Klondyke to run for his life at the mere mention of the Enterprise sausage machine.

On these lines nothing can hold this country down, with our wonderful resources, ingenuity and imitative ability; but our activities must be guided, and guided properly.

Tempered by judgment,
Blessed be restlessness.

A song by Edmund L. Wunder was next listened to. The address which had been assigned to John Roberts was not delivered because of the gentleman's absence, and the next orator was Paul A. Griffith, who spoke briefly but with effect in answer to the weighty question, "Is the Pen Mightier than the Sword?"

ADDRESS OF ALFRED C. REX.

"We look before and after,
And pine for what is not.
Our sincerest laughter
With some pain is fraught;
Our sweetest songs are those that tell of saddest thought."—SHELLEY.

We scarcely realize how fleeting and transitory is that period of time we call the present. It comes from the womb of the future, and in an instant passes into the grave of the past, carrying with it the record of our deeds. The present is the tiny point of wave-washed rock upon which we stand, leaving before and behind us the illimitable watery washes of the ocean of time. Moore calls it: "This narrow isthmus 'twixt the boundless seas—the past, the future—two eternities." Even this banquet, lately so much in evidence, is now past, or soon will be, but the nightmare is yet to come. The present is prolific of good intentions, but the future too often witnesses their ignominious extinction. One of the notable deities of the Romans was Janus, whose temple stood open during war and was closed during peace. This god had two faces, one turned toward the east and the other toward the west. He gazed with equal placidity upon the rising and upon the setting sun. He welcomed the coming of the day with the same lack of enthusiasm which he bestowed upon its departure. If he had thoughts upon the current topics of the day he veiled them behind a brazen front and shrouded them in a monumental silence. Janus has sometimes appeared to me to be the patron saint of the trafficker in Hardware. In his honor has been named a lock which, like a good rule, works both ways. Those whom an unrelenting fate has caused to come into contact with the purchasing department of a Hardware house will recognize in the buyer some of the characteristic traits of Janus himself. After waiting in the atrium of the temple with a number of other victims destined for the sacrifice, each guarding jealously his lares and penates in mysterious boxes cinctured with straps, the daring one is finally ushered into the presence. The retiring guest is sped, and the coming one is welcomed with the same frapped impenetrability of countenance. The samples are spread out, but neither their beauty of finish, harmony of design, exquisite workmanship, superior quality nor ridiculously low prices, apparently move this man with the iron mask. His nerves of steel repress the thrill of joy he feels at securing a bargain, and an order is finally drawn from him as with a corkscrew, and on purely philanthropic lines.

Then our friend, the buyer, is a victim of the discount habit. No net figure, however low, brings the same joy to his heart as the same price reached by a tortuous stairway of discounts. The crowning triumph after the bottom has been reached is a still lower deep attained through the medium for cash discount. If this cash discount is only 2 %, he is happy until, like the tiger who has tasted blood, he some time strikes a hapless victim whose necessities are greater than his will power for 5 %, and forever after he is a commercial Oliver Twist. This inoculation of the discount virus shows sometimes its baneful effects in other relations of life.

But while, in the light of our Nineteenth century wisdom, we smile at what we may call the foolishness of the ancients, we may yet profit by much which they have written and the ideas they have suggested. As the grain of wheat, wrapped in the mummy's cerements and lost to the world for thousands of years, may grow when planted in the earth, so the germs of truth contained in the writings of these back numbers of humanity may become vitalized when properly used by us. The God Janus may teach us useful lessons. I do not rise here to chant the praises of duplicity, but I do urge the utility of retrospection in its bearing upon the future. Those who only look behind them, like Bellamy, are apt to trip over some obstacle in their path and fall. Those who look only in front of them are apt to be run over by some competitor who is driving the chariot of progress. Those who gaze in the Assyrian way of the god Janus will most probably be on hand when the laurel crowns are distributed.

This is now the time to be sorry and repent. Those of you who as buyers have aided in depressing the manufacturer's prices and thus forced him to degrade the quality of his goods to harmonize therewith, now have the opportunity to undo this wrong. Resolve in the year to come to give him all he asks for, and send sunshine into his home, and gladden the hearts of his little children.

It is impossible for any normally constituted person to live so entirely in the present that the future can be ignored. In the most trivial as well as the most vital concerns of life, to-morrow plays an important part. An Irishman who was looking ahead, entered a jewelry store, beckoned a clerk to one side, and, in a mysterious whisper, asked, "Have ye anny plane goold weddin' rings?' "Eighteen carat?" asked the clerk. "It's none of your domed business," said the Irishman, "whether I've been ating carrotts or onions."

Finally we must be frank with ourselves. We have had the past—what use have we made of it? We have the

Digitized by Google

present—what are we doing with it? The future is not yet ours, but how will we meet it?

To-morrow is a day too far
To trust, what'er the day be.
We know a little what we are,
But who knows what we may be?

To-morrow cannot make or mar
To-day, whate'er the day may be;
Nor can the men which now we are
Foresee the men we may be.

The gathering broke up at a few moments before 11 o'clock. To those who have ever attended an event of this character in Philadelphia, it is needless to say that it was a success in every sense of the word. The gentlemen who acted as a Committee of Arrangements were as follows: William D. Supplee, chairman; James H. Ritter, ex-officio; T. James Fernley, Paul A. Griffith and R. W. Mallon, and it was to the efforts of these gentlemen that the success of the evening was largely due.

Recent Trade Publications.

The Bryan Mfg. Co., Bryan, Ohio, are sending the trade a handsomely illustrated catalogue of their well known line of Champion Wheelbarrows. These articles are shown when set up for use, and also in parts packed ready for shipment, and as the very best quality of paper is used, highly calendered, each article stands out with wonderful distinctness. A great deal of information as to sizes, quality, weight, etc., is given, and each special line is taken up and fully described. In a prefatory note addressed to the trade, they call special attention to the construction of the Champion Wheelbarrows, and refer more directly to the following points: "In this issue of our catalogue No. 30, we are pleased to offer our friends and customers the best as well as the most complete line of wheelbarrows made. We desire to call your attention to the construction of the Champion Wheelbarrow, which embraces many important features not found in any other barrows on the market. 1st. Our patented staple axle bolt for attacning wheel to handles has no equal, as it braces and strengthens the frame and prevents the handles from spreading or splitting. 2nd. Our patented malleable shoe for combining legs and braces makes the strongest and most durable wood frame barrow on the market, as well as the neatest in appearance. 3rd. Our patented folding steel frame garden and railroad barrows occupy the least space for storing and shipping. The frame, handles and bolts of each barrow are in one complete package, so that an order for any number can be easily and quickly filled. The quality of material and workmanship cannot be excelled. We aim to give a complete and accurate description of each barrow in the following pages, and will be pleased to furnish any other description or information upon receipt of inquiry." This catalogue will be sent to anyone who will drop a card asking for the same, and it is needless to say it is one in which every Hardware dealer is naturally interested.

The Joseph Dixon Crucible Co., Jersey City, N. J., have issued two very beautiful catalogues, which are in every way works of art. The first is entitled "Dixon's American Graphite Pencils," and is printed in white, red and gold, with a very beautiful design upon both front and back cover. Inside are a great variety of illustrations and descriptions of the extensive line of pencils which this company manufacture, and which are known wherever civilized man has occasion to record his thoughts or keep a record of his business transactions. The second publication is entitled "Dixon's Graphite Productions," and is also printed in colors with most artistic front and back pages. Upon the cover are shown their works in Jersey City, the graphite mills at Ticonderoga, N. Y., and the cedar mills at Crystal River, Fla. Everything in the way of knowledge concerning graphite that can possibly be wished is found in these pages, and their various lines of manufacture are illustrated and fully described.

Bruce & Cook, Nos. 186–190 Water and 248–250 Pearl Streets, New York, are distributing to their friends and customers their annual calendar printed in colors with a handsomely ornamental border, commemorating the eighty-sixth year in business of this pioneer metal house. We have become so accustomed to awaiting the advent of this handy and convenient calendar each succeeding year, that should it at any time fail to be on hand, as usual, we should feel as though something was lacking in the holiday equipment. This year the calendar is accompanied by a graphically illustrated history of this old house taken from the columns of one of our contemporaries, where it appeared originally; it forms in its present distribution very pleasant and reminiscent reading for the patrons of the house, the individuality of the past and present members of the firm being shown in the array of portraits forming part of its illustrations, and is by no means the least of its attractions.

The Ausable Horse Nail Co., No. 10 Murray Street, New York, have kindly sent us a very attractive and artistic colored calendar. In the background there is a view of the magnificent Hudson, and Grant's monument, while in the foreground, a beautiful daughter of America is seen mounted upon a horse, which it is safe to assume, carries with him the famous Ausable Hot Forged, Hammer Pointed Horse Nails. Upon one side of this artistic picture, in beautiful blue satin ribbon, is a *fac simile* of the medal and ribbon awarded for fine material and finish of the Ausable Horse Nails, at the Tennessee Centennial Exposition at Nashville. This is one of the most artistic and attractive calendars that has made its appearance this year.

The Wilmot & Hobbs Mfg. Co., Bridgeport, Conn., with New York office at No. 253 Broadway, are issuing their new catalogue E, which includes about everything which they manufacture. Thls includes their well-known varieties of steel for pressed, stamped and drawn work; their copperized and nickel-plated oilers, lamps and oiler sets, steel floor tiling, bicycle tubing, etc. These goods are thoroughly illustrated, with extended descriptions, prices, etc., and the book itself makes a very useful compendium for anybody interested in their line of goods. It will be sent upon application.

The Keuffel & Esser Co., No. 127 Fulton Street, New York, have issued a new trade price list of measuring tapes and pocket rules in which their various manufactures in the way of steel tapes, spring bound steel rules, drawing materials and surveying instruments, etc., are shown, with description, prices, etc. This catalogue is very tastefully gotten up, each page being enclosed in red borders, with artistic headings. An index and telegraph code add to the usefulness of the publication, which will be sent to any Hardware dealer on application.

The Coburn Trolley Track Mfg. Co., Holyoke, Mass., have just issued an artistic pamphlet handsomely printed on coated paper and illustrated fully by carefully executed half-tones, the contents of which have reference to their Patented Carrying Track Systems, adapted for machine shops, foundries, printing establishments, cotton mills, etc., in many and various applications, all of which are graphically illustrated in a very instructive and entertaining way, showing how great the utility can be made of a system of this character.

The annual meeting of the Van Wagoner & Williams Hardware Co., New York and Cleveland, will be held in Jersey City on January 27th, for the purpose of electing seven directors to serve for the ensuing year.

Review of the Markets.

Hardware: Reports from our well-informed correspondents from trade centers in all parts of the Union, indicate a much better trade during the winter than is annually anticipated, and a very hopeful feeling for future business prevails in consequence.

Wire Nails: Continue to feel an average demand, devoid of much of the speculative feeling which the agitation of pooling interests was supposed to instigate. Orders for future delivery at the rates now prevailing are not entered for later dates than February. The quotations remain substantially as in our previous issue, with an undercurrent of belief that contracts covering several carloads might be shaded five cents a keg. We quote: For carload lots, $1.45, base, f. o. b. mill. New York quotations, $1.60 for carload lots on dock, and the usual advance for smaller lots from store.

Cut Nails: Although prices are very favorable for larger transactions than are reported, the business in this staple line is only nominal, and quotations remain as last noted, New York quotations being for carload lots on dock $1.25; smaller lots from store, $1.35.

Linseed Oil: The Dean Linseed Oil Co., No. 181 Front Street, New York, quote as follows: In lots of less than 5 barrels, 43 cents per gallon; in lots of 5 barrels or more, 42 cents per gallon. The 5-barrel price only applies to deliveries of that quantity at one time. Boiled linseed oil, 2 cents per gallon higher than raw. Calcutta oil, 54 cents per gallon.

F. E. Kohler & Co., Canton, Ohio, under date of January 12th, announce the following changes in net prices of their specialties to apply to their latest catalogue: Goods delivered f.o.b. cars, Canton, Ohio. For export, all goods are boxed, crated or burlapped.

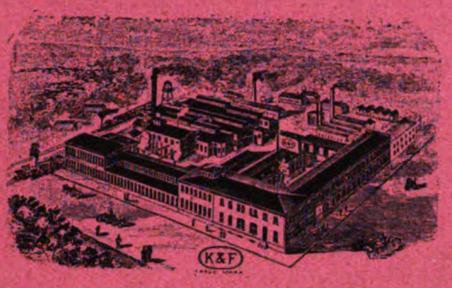
THE MINNEAPOLIS TRADE.

Business is good for the time of year. We are having fall weather instead of winter weather. Building operations can be carried along about as well as any season of the year. No snow. Some little complaint from the lumbermen on this account, as it interferes with operations off from the main hauling road where they use sprinklers, and build what is practically an ice railroad; but the conditions are much more favorable for them than they would be if there were an over abundance of snow, as was the case last winter. There will be a large quantity of logs put in this season, and it is expected that the trade will be exceedingly good, and it is hoped that prices will be somewhat better than have been prevailing for the past few years. The past year as a whole has been unfavorable for the retail Hardware business. Prices have shrunk somewhat, and stocks if properly invoiced would show somewhat of a shrinkage. The last four months of the year show an improvement in the volume of business, jobbers, especially, being quite busy. There will be no extensive building operations going on here the coming year, either in the way of business blocks or residences; but as the mills and factories will undoubtedly give employment to a large force of help, and general trade will be better, we cannot help feeling that the Hardware business will receive some benefit.

W. K. MORISON & CO.

THE CHICAGO TRADE.



Owing to the fact that two of our competitors retired from business during November and December, we have been more than ordinarily busy thus far through the winter, with the largely increased trade that voluntarily came to us. And, in addition, have had a great deal to do in preparing for the road our largely increased force of traveling salesmen, many of whom have been recruited from the ranks of the late houses of John Alling & Co. and Horton, Gilmore, McWilliams & Co. We took advantage of the opportunity that presented itself and secured the services of a number of the very best men who formerly represented these houses.

Our trade during the month of December was the largest we have ever experienced, and at least 25 per cent. larger than that of December one year ago. We never had so many future orders on our books as we have at the present time. Most of our salesmen are out on the road enjoying a first-class trade, and, in addition, our mail order business is increasing in wonderful proportions.

From all sections of the West and Northwest, as well as through Michigan, Ohio and Indiana, we are receiving the

Digitized by Google

Paterson, N. J., works, employing 500 operators.

THIS IS NOT

A FABLE.

Files and rasps have been made by us under our K. & F. brand for thirty years or more, and so excellent is their quality that they are now known in all parts of the world, they even being permanently intrenched in England, that stronghold of file manufacturing. With this large increase of business we have not lost sight of the importance of quality, and to-day make goods excelling all other brands on the market. As our business progressed, new methods of production and a wider knowledge of steel have absolutely resulted in a continued improvement of our K. & F. files and rasps. We say little about these facts but see to it that our customers get all the benefits possible from these improvements. . . . . .

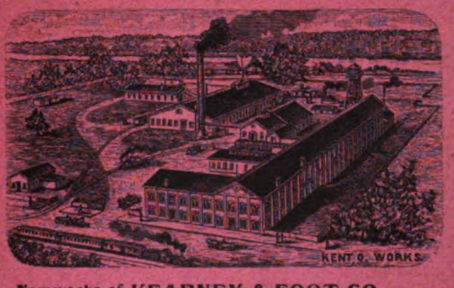
A STRIKE.

FILES.

THE K&F TRADE MARK.

RASPS.

Every manufacturer and merchant realizes that a strike is a very serious matter. We, certainly do. In the past year our Paterson factory was closed for nearly five months by one of the most severe strikes on record. We won the fight, but to do so necessitated our very largely increasing our facilities, which we did by establishing a new plant at Kent, Portage County, Ohio. With this valuable addition to our capacity and with the advantages of cheaper fuel and lower freights we now feel that we are better equipped than ever for supplying the trade with the well-known K & F. full weight, perfectly cut and thoroughly tempered files and rasps. For the great leniency universally shown us by our customers during our late trouble we take this opportunity of thanking them. . . . .



Our Best Friends are our Old Customers.

You Have Troubles, may be, with your files and rasps. Write us for **Relief.** **We will send it.** . . . . .

MAGNOLIA ANTI-FRICTION METAL

Best Anti-Friction Metal for

Locomotives, Marine Engines, Stationary Engines, Electric Light Plants, Saw Mills, Rock Crushers, Stamp Mills, Pulverizing Machinery, Hoisting Machinery, Hauling Machinery, Drilling Machinery, Paper Mills and all other machinery bearings.

Two Thousand Testimonials

received during the last **Ninety Days** all bearing testimony to the fact that **Magnolia Metal lasts longer, runs cooler, shows a lower co-efficient of friction and requires less oil than any form of babbitt or brass.**

Beware of Fraudulent Imitations.

Genuine Magnolia Metal is made up in bars, of which this is a fac simile,

and the trade-mark and name are always stamped on bars and boxes, and besides this the words "Patented June 3d, 1890," and "Manufactured in U. S." are stamped on the underside of each bar.

IMPORTANT INJUNCTION NOTICE.

An injunction was granted Dec. 15th by Lord Chief Justice Russell in the Queen's Bench Division of the High Court of Justice, London, England, enjoining the Tandem Smelting Syndicate, Ltd., and restraining them from passing off their metal for our Magnolia Metal, it being made up so as to counterfeit Magnolia Metal.

One Thousand Dollars Reward

will be paid to any party causing the arrest and conviction of any person or firm infringing our Trade Mark or Patents.

The flower trade mark for **MAGNOLIA ANTI-FRICTION METAL** has been registered in every civilized country in the world.

This metal is being handled by thousands of dealers, in mine, railroad, electric and mill supplies throughout the United States and may also be secured through special agents at all principal distributing points in foreign countries.

MAGNOLIA METAL IS SOLD AT A FIXED SCALE OF PRICES, well-known to most dealers, and if any concern or individual offers Magnolia Metal "AT LOW PRICES" please remember the warning given in this advertisement to BEWARE OF FRAUDS.

If local dealers have not **MAGNOLIA METAL** in stock telegraph us your orders at our expense.

MAGNOLIA METAL CO.,

266-267 West Street, New York. 59 60-61 Traders' Bldg., Chicago.
49 Queen Victoria Street, London, E. C.
32 Victoria Street, Manchester.
Cable address New York, "Magnolia;" Cable address London, "Magnolier." Use A 1 Code.

most encouraging reports, both from our customers and salesmen.

The prospect for a large business in the spring has never been better than at the present moment. Stocks of goods in the hands of the retailers are low. Prices at which we are selling goods are very favorable to the consumer. There seems to be an abundance of money in the hands of farmers and retail dealers throughout the West. Taking all things into consideration, we have every reason for believing that goods will be in active demand through the spring trade, and we have no doubt whatever but that some lines of goods will be higher in price.

WELLS & NELLEGAR CO.

THE PITTSBURG TRADE.

The editor invites us to prophesy for the coming year, no doubt thinking us either "a prophet or the son of a prophet," but he is sadly mistaken.

If our foresight were equal to our hindsight, we would have accumulated our share of this world's goods by this time, and be ready to retire.

However, as Patrick Henry remarked, "I know of no way of judging of the future but by the past," and those of us who have had a good deal of past ought to be able to do a little forecasting from experience. By that rule, we should say that 1898 ought to be a good one. We have had the usual number of lean years, and a fat one is due at this time. Aside from this, the great West has had prosperous times for the farmers in '97, and thus added immensely to their purchasing power. Our manufacturers have found new outlets for their immense producing capacity in foreign markets. The Alaskan region will certainly pour large amounts of gold into our country. This will tend to keep our currency on a sound basis, as well as add to our wealth.

Of course there are "ifs" and "buts" to be considered, such as foreign war contingency, failure of crops or some national calamity which cannot be foreseen; but, taking it all in all, the strong probability is that we shall have greatly improved conditions this year, whereat, if it comes true, this prophet (?) will greatly rejoice.

LOGAN-GREGG HARDWARE CO.

THE TOLEDO TRADE.

Taking a retrospective view of the business for 1897, we must admit that the same has not been the most satisfactory that one could have wished, still we are still in line for something better, and hope that the year 1898 will prove a grand success.

Prices on most all lines of goods are still very low, in fact prices on some goods are even being quoted lower than they were last year, but, on the other hand, staple goods are looking up, and no doubt will soon demand a higher price. A great many goods are seeking to be controlled by combinations or trusts. This we do not object to, providing these combinations do not advance prices to such a high plane that it only remains for a few months, or years, to invite such competition that will demoralize business in general and make losses to the parties holding a stock of the goods.

Looking forward to the year 1898, we hope and expect that the same will prove a successful year. We do not expect any boom, neither would we desire it; what we would like to see, however, would be a steady every-day business, and prices remaining at an equality with prices last inventoried.

We think that when the spring demand sets in that there will be somewhat higher prices on nails, wire, bar iron, steel, galvanized iron, tin plate, bolts and such goods that are close to the raw material, as no doubt the demand will be large, and prices consequently will be higher.

Trade in this section of the country at the present time is fairly good. Most all of our factories are working full time and with a large force of men; in fact there are by far more men employed at this time of the year than there was for the same time last year.

STOLLBERG & CLAPP CO.

THE PHILADELPHIA TRADE.

It is rather early to report on business for the new year, as some time is always necessarily lost in pricing salesmen and getting started on new business, but already a fair amount of business is reported, while prospects are certainly encouraging.

If manufacturers are to be believed, prices must inevitably be higher on many lines, but it naturally takes a revival of business to bring this about.

The wire interests appear to be appraaching consolidation, and if this is done, the effects are so far-reachieg they would be difficult to estimate.

At present there are but few changes in quotations, and manufacturers are narrowly watching the market for an opportunity to advance figures.

One of the most encouraging signs is the improvement in collections which has been manifest for some time, and, owing to the increased amounts being paid for wages, bids fair to be permanent. BIDDLE HARDWARE CO.

THE ST. PAUL TRADE.

The business of the year 1897 is now closed, and its results are a matter of record that interest only as they are referred to for comparison. The new year is so far advanced that most persons can write "1898" without making the usual mistake that occurs so often during the first days of the year. How does the new year open? Weatherwise, we never experienced so pleasant a January in this locality as the one now nearing its end. Bright sunshine, no snow, and no colder than early November.

OUR NEW GARDEN HOSE BOOKLET

Belting,
Garden Hose,
Water Hose,
Fire Hose,
Suction Hose,
Steam Hose,
Air Hose,
Tubing.
Packing,
Gaskets,
Valves,
Rubber Tiling,
Rubber Matting,
Emery Wheels,
Specialties,

WE MANUFACTURE

FIRE POTS, TORCHES, BRAZING MACHINES, CORE AND ENAMELING OVENS,

SELF-HEATING TAILOR IRONS,

Confectioners' Heaters, Bicycle Pumps, Wall Torches, &c.

Union Heater Supply Co.,* 91 Congress St. E., *Detroit, Mich.

Does this condition conduce to a good business? Yes and no. Yes, in that the bright sunshiny days inspire hope and courage, and our customers are more disposed to anticipate their wants than they would be if cold storms prevailed and the ground was buried in snow. No, in that *their* customers cannot haul their farm products, wood ties, etc., to market without large additional expense over what it would cost if sleighing was good, as their horses' shoes will only last a few days on the hard frozen ground, and so they remain at home, hoping and expecting the snow will soon fall.

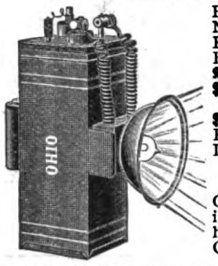
On the whole, business with the jobber is very much better than it was a year ago: the prospects for the future are now more than promising, and the average man is cheerful and courageous. Occasionally we meet a calamity howler who will not have it that we can have good times under present conditions, but it is evident that with him "the wish is father to the thought." We have read of the formation of clubs called "Don't Worry Clubs." Would it not be well for us all to join one?

At any rate, let us all imbibe what we can of the spirit of hopefulness, and *look* for pleasant things in business instead of the disagreeables that we have had so much during the last five years, and we certainly will have more comfort even if we do not have as many dollars as we would like.

C. W. HACKETT HARDWARE CO.

The Abuse of the Circular.

As a means of advertising, the modern circular has been pushed to extremes. It has been multiplied to the point of excess, and in many instances become a declared nuisance. It has become a burden to the mail carrier and an eyesore to the man of business. The one in his line of duty carries it, and the other, to save his eyes and his temper, consigns it to the waste-basket. In a majority of instances it is brushed aside without perusal, while the man who paid the expense of printing and mailing has to subsist on faith rather than on returns. This is to be deplored, as a waste of time and enterprise. All kinds of means are in use to make the circular attractive. Some are really fine specimens of art and also of effective decoration. The printer is lavish with his skill and the lithographer with his tools, but in spite of artistic aids, the ornate missive is generally unappreciated and seldom read. Business men as a rule, while keen enough in scent of business, are not disposed in favor of literary bouquets. The circular is frequently an enflowered communication. In literary, medical and other professional lines, it has its special fitness, but with the manufacturer and merchant it has passed beyond its sphere of usefulness. There is nothing sinister or objectionable in its purpose; it has a clean commercial intent and is praiseworthy in its artistic effort to make its presentation attractive, but in spite of this it has spoiled its mission by glutting the waste-baskets of business houses. It is a matter of question as to whether a dodger given away in the street, or a chromo given with a package of baking powder, is not of more direct advertising value than many of our high-cost circulars. An advertisement to be successful must not be of a vagrant intermittent kind. When placed in the right paper and kept there it becomes familiar to the reader's eye. It takes root in his memory, and if it meets his wants as a business man, that is the particular peg on which he hangs his hat, or the pile on which he places his order. The steady "ad." is a lodestone and if it takes time to attract trade, it eventually does so. Returns are not always prompt, and no doubt are sometimes disappointing, but the advertiser is querulous and unreasonable, who, having put his eggs under the hen, looks for chicks before they have time to hatch. If much of the money now expended on circulars was devoted to persistent and rightly placed advertising, we are of the conviction that it would be better for all concerned.—*Age of Steel.*



C. J. Kimball Co., Bennington, N. H., Allerton, Clarke Co., agents, No. 79 Reade Street, New York, have recently issued their cutlery catalogue for 1898 business. This company succeed to the old established business of C. J. Kimball & Son, so long identified with the manufacture of the "Kimball" shoe, butcher and kitchen knives and small tools generally. The new company having bought out the business of a similar kind formerly run by Wilbur Webster, of East Jaffray, N. H., they can now supply the "Webster" brand of shoemakers' cutlery, maintaining its acknowledged excellence on a par with their own. The catalogue before us embraces all the usual varieties of shoe, bread, butcher and fish knives, including oyster, cigar, paper and banana knives; drawing knives and screwdrivers are also represented in its pages.

Farwell, Ozmun, Kirk & Co., St. Paul, Minn., are sending their customers a number of pamphlets and catalogues having reference to several departments of their large and extensive business. We have received their catalogue of "Crawford" Bicycles, for which they are sole Northwestern distributors. This is very attractively printed on coated paper in two colors, the illustrations being in brown and the text in blue, and the contents of which cover the entire line of wheels made by this company. A pamphlet of sixty pages, covering their entire line of paints of every description, together with paint and kalsomine brushes, sandpaper, glue, varnishes, glass cutters, etc., and other similar goods, that went with a ready sale among their trade.

Western Block Co., Lockport, N.Y., Surpless, Dunn & Co., agents, No. 55 Warren Street, New York, have issued their catalogue for 1898 trade. It is a handsomely printed pamphlet of fifty pages, with stiff cloth covers. It embraces their full line of "Anvil Broad" wood, wrought iron and steel tackle blocks, and including all the usual varieties of rope strapped, roller, phosphor bronze and metaline bushed blocks suitable for the wants of the trade. The catalogue is a very complete one, full of information regarding these goods, and will be forwarded upon request.

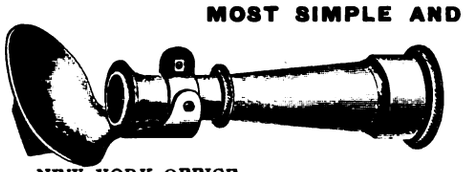
American Plows for Greece.

A dispatch from Washington of a recent date, states that the Greek government wishes to purchase at least ten thousand plows to distribute among the Thessalian refugees in order that they may return to cultivate the land they abandoned at the approach of the Turks. Thessaly is mostly a plain, with sticky, clayey soil, in which wild plants and roots abound. The Thessalians are just now a burden on Greece, and King George has a committee at work testing implements for them on a farm near Athens. Native plows are good but expensive. Wood is scarce and costly, so Greek plows are made wholly of iron and steel, on which there is a high duty. Agricultural implements are, however, admitted free. This good "tip" to American manufacturers came to the State Department recently from George Horton, Consul at Athens. He says a firm in Smyrna sent over some American Oliver plows, which were better than any Germany, England or France offered, but the agents wanted high prices for them, though they were not best grade. Consul Horton told the committee that Americans make better, stronger, lighter and, quality considered, cheaper agricultural appliances than any country in the world. This interested the committee, and if they get catalogues and prices, promptly followed up by visits from agents, Americans will have more than a chance for the contracts.

The Keyless Night Latch.

In these days of chainless wheels, smokeless powder and other thingless things, it is quite natural that some genius should invent a keyless night latch. Keyless locks have been common enough upon safes and cash drawers since the day of Butterworth's original invention, but to this day all of these permutation locks depend upon eyesight. For years it has been the boast of safe-lock makers that their combinations defy the finest sensibilities of sandpapered fingers. That would kill the keyless night latch at the start, because it is a night lock, and must necessarily be worked in the dark. A Jerseyman is the inventor and patentee of the new device, and he is just a little bit afraid that it may add to the volume of profanity in the world, but he feels sure that it will be appreciated by people who invariably go straight home, or home straight, and ordinarily have half a dozen flat keys on a ring, all of which feel alike in the dark.



His latch has no keyhole, and works with a knob which looks like any ordinary doorknob, but is arranged so that it makes a series of sharp clicks as it is turned. These clicks can be felt as well as heard, so that a deaf and blind man can read them as he turns the knob. Two clicks to the left and three to the right will open a door if the combination is set at 25, or it may be set at any figure up to 999, with all of the advantages of the terms involved in a short thousand of numerals.

It is extremely simple in its mechanical details, but it would take a stranger some weeks to open the door if he did not have a tip on the combination. If a rounder has any doubts of his ability to remember the combination of his front door he can set the knob at his age, that of his wife or mother-in-law, or even the street number, straight or transposed, and then there will be little chance of his forgetting it.—*New York Sun.*

The National Saw Co., Newark, N. J., are sending out a very pretty lithographed calendar, printed in several colors. The illustration depicts a characteristic Western scene, where the celebrated cross-cut saws made by this company have been getting in their work, taking the first step in the preparation of timber land for its subsequent use by the industrious farmer.

The Cronk Hanger Co., Elmira, N. Y., the well-known manufacturers of Steel Barn Door Hangers, Tracks, etc., are very successfully placing upon the market Cronk's Patent Fencing Plier and Staple Puller. This excellent tool has just been patented and is selling as rapidly as the manufacturers can furnish it.

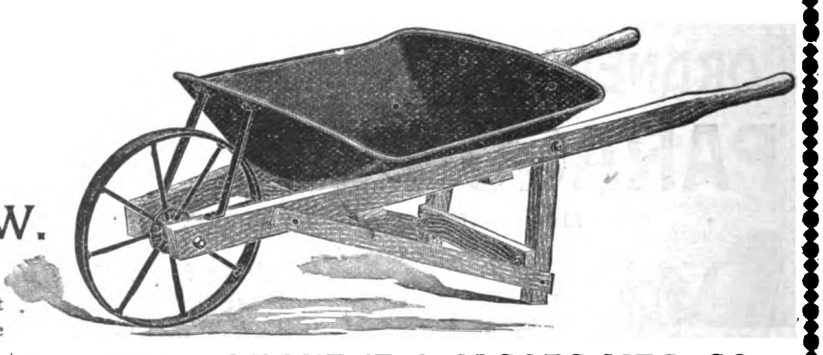
British Goods in the Colonies.

The *Age of Steel* says: "The displacement of British goods in colonial markets has been, and is, of so serious a nature that a searching investigation has been made both as to the causes thereof and as to the articles that are less in demand. An English contemporary classifies the causes under three heads—pride, supineness and absolute neglect. It is not a matter of ability, but pig-headed conservatism. In Queensland 50 to 60 per cent. of Hardware is imported from Germany, America supplies 75 per cent. of implements and of ironware generally and Belgium and Germany monopolize from 75 to 80 per cent. of the trade. In New Zealand imported machinery is largely British, but in the implement trade, such as reapers, binders, mowers and seed drills, the United States supply the greater bulk. In firearms, glassware, saws, axes, nails and hammers American and European makes are preferred to the British article. Adaptability to local tastes, lightness and cheapness and an intelligent effort to push business are not to be offset in securing a market by any false notions of supremacy or a foolish pertinacity in sticking to forms that are becoming obsolete."

The English Way.

Put away season's goods promptly, nothing looks worse than to see paraffin cooking stoves, fly-cheat meat safes, dish covers, and such like articles showing in October or November. Directly the demand for any particular article is on the wane, remove it, for it is not earning you anything, and replace it with something more seasonable. Don't put them aside to do up and put away at your leisure, for that time seldom or never comes in an ironmonger's establishment. Do it at once, and if any article is incomplete or broken, don't put it away so, but order the part wanted at once, and then when you want to show that particular article again you need not fear to open the paper before a customer. It gives a tone to a shop to be able to show a thing out of season which is bright and clean. Apprentices of to-day don't know what cleaning goods means, when compared with the apprentice of by-gone days; his whole time was made up of cleaning goods or nail weighing, and he was not allowed to do any counter work until he was in his fourth or fifth year. They served seven years then.—*Ironmongery.*



Nason Mfg. Co., No. 71 Beekman Street, New York, have recently issued their 1898 catalogue, which is a muslin flexible covered volume of 432 pages, complete with illustrations and lists of prices for wrought and cast iron pipe, etc., brass and iron valves and fittings and general supplies for steam, gas, water, ammonia and oil. The catalogue covers also a full line of steam and gas fitters' and plumbers' tools and supplies, with such necessary specialties as are applicable to steam and hot water heating. Among the several features that make this catalogue of unusual value to the dealer in the goods sold by this company, are a number of pages devoted to general and practical information pertaining to steam and hot water heating, which have been compiled from the leading works on the subject and are here condensed and made more accessible. Added to this desirable information will be found a discount table, showing at a glance the equivalent and net of any amount, from 25 per cent. to 77½ and 10 and 10 per cent., with every possible variation between the two extremes. This catalogue will be found a valuable one, and should be in the Hardware library of all dealers selling such goods as are above referred to.

Situation Wanted.

OFFICE MANAGER, fifteen years' experience in general Hardware business, familiar with all details of manufacturing Hardware specialties, correctly tabulating statistical information, man of ability, judgment and experience, expert financier, with good executive ability, rapid and original letter writer, practical turn of mind, quick, comprehensive and energetic, would like a position by February 1st; expectations moderate; highest integrity. IF IT'S AN ARCADE, IT'S THE BEST.

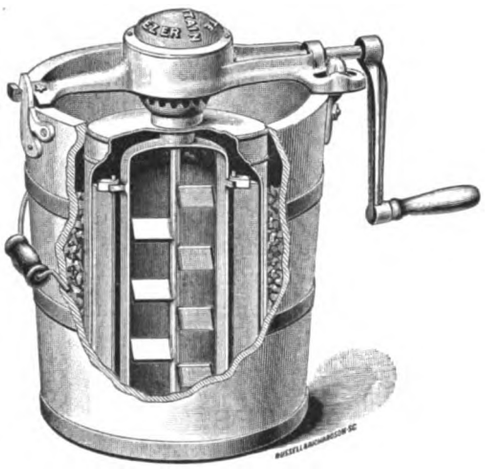
That the ARCADE FILE WORKS at Anderson, Indiana, is the largest and most completely equipped plant for the manufacture of files in the world is a minor point. It's product is what you are interested in and the Arcade product stands at the head of file production for the common sense reason that their methods and facilities are ahead of their competitors.

Mr. Alfred Weed, who is the superintendent and mechanical head of the company, is one of the oldest file makers in the United States, and has probably taken out more patents on file machinery than any other living manufacturer. The entire plant at Anderson is the product of his skill and practical experience, comprising machinery especially designed for turning out every detail of the work, not only by the most careful and systematic methods but with the greatest possible saving of time and money. Fifty cents goes as far here as a Dollar in many of the old fashioned plants. Then, too

WEED'S PATENT INCREMENT CUT FILES.

ARCADE FILE WORKS, ANDERSON, IND., U. S. A.
Established 1842

the company owns a tract of natural gas land from which their fuel supply is drawn—the cheapest fuel in the world; and buyers of ARCADE files get the advantage of all these economies by the increased value of the product.



These facts show why it is safe for us to sell files under our guarantee that THEY WILL CUT FASTER AND WEAR LONGER THAN ANY OTHER FILE ON THE MARKET, OR WE WILL MAKE NO CHARGE. All our files have Weed's Improved Increment Cut, which equals the best English Hand Cut.

If you use files take advantage of this offer on a trial order, however small. There's absolutely no risk to you in the trial.

IF IT'S AN ARCADE, IT'S THE BEST.

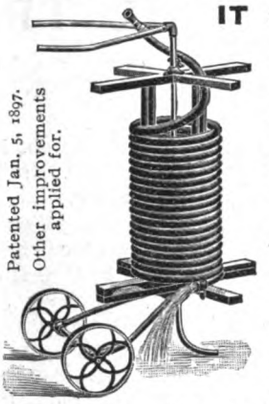
Lightning Repair Tool

We want to correspond with every tire manufacturer and jobber of bicycle sundries in the United States, Canada and Europe. We have the best and cheapest repair tool made. We can interest you.

A. L. DEANE & CO,



DENVER, COL., U. S. A.

The Lightning Repair Tool is made under one or more of the following patents:

United States of America,	No. 571,422, Nov. 17, 1896.
United States of America,	No. 591,443, Oct. 12, 1897.
Dominion of Canada,	No. 55,259, Mar. 15, 1897.
Germany,	No. 73,654, Apr. 20, 1897.
United Kingdom of Great Britain, Ireland, and Isle of Man,	No. 8,298, Mar. 31, 1897.
Republique of Francaise,	No. 265,733, Apr. 6, 1897.

The Hartzell Self-Draining Hose Reel

IT SELLS RAPIDLY.

Patented Jan. 5, 1897. Other improvements applied for.

It is scientifically and mechanically constructed.

It is a nice ornament and a great convenience in spraying and watering a lawn.

The hose is not kinked, twisted, crushed or drawn to a tension, thus avoiding the breaking of either the inner or outer walls of the hose which protects the fabric and prevents it from becoming water soaked, which usually causes the rapid destruction of the hose.

It drains all the water out of the hose, after it has been reeled, and keeps it always in good order, ready for service.

Each section of hose is independent of the others and may be easily detached at the top or bottom.

It sells at sight, because any person who owns a garden hose can readily see its advantages and superiority.

Jobbers are especially solicited to handle our goods to whom lists and prices will be furnished upon application.

DEALERS ask your Jobbers for the HARTZELL SELF-DRAINING HOSE REEL and insist on getting it.

If they will not supply you address us for prices, circulars and lists.

RETAIL TRADE RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Hardware Stores.

Casselton, N. D.—Casselton Hardware Co., incorporated: $15,000.

Dallas, Tex.—The Kelly Furniture, Carpet & Hardware Co. Capital stock, $10,000. Incorporators: William Kelly, F. B. Ingram and A. Kelly.

Decatur, Ala.—Willis Kennedy, formerly with J. D. Wyller, will open up a Hardware store on Bank Street. His brother from Culman, Ala., will be with him.

Elmira, N. Y.—Barker, Rose & Clinton Co., to deal in Hardware. Capital stock, $100,000. Directors: Frederick Barker, Stephen Rose and Arthur Clinton, Elmira.

Friendship, N. Y.—The Drake Hardware Co.; capital stock, $20,000. Directors: Charles L. Howard, Kent, Ohio; Charles A. Day, Jamestown; B. Frank Drake, and Leonard S. Howard, Friendship.

Lowell, Mass.—E. P. Flanders will open a Hardware and paint store at Nos. 663-667 Middlesex Street, about March 1st, 1898, under the name of E. P. Flanders & Co. He would like to hear from the manufacturers in the way of catalogues, price-lists, etc.

Rome, N. Y.—The new Hardware store of Raffauf & Bael, No. 115 South James Street, has been opened for business. The new firm is composed of enterprising young men. Mr. Bael has been in the bicycle business for two years, while his partner has been employed by the Wardwell Hardware Co. for thirteen years. They will carry a general line of shelf and heavy Hardware, blacksmiths' supplies, etc., and bicycles.

Wallingford, Conn.—The Leighton, Boynton & Ives Co. filed articles of association. They have a capital of $3000, and will carry on the business of a general Hardware store.

Changes and Improvements.

Albany, Mo.—W. P. Stapleton, Hardware, now Albany Hardware Co.

Alma, Kan.—Fred Lutz, Hardware, succeeded by Conrad Mueller.

Bloomfield, Iowa.—Higbee Hardware Co., Hardware and agricultural implements, succeeded by E. T. Matthews.

Carroll, Iowa.—Martin & Nurre, Hardware, reported to have sold out.

Elkhart, Ind.—The Jones Hardware Co., Hardware stock purchased by Ed. T. Parker, of Hillsdale, from assignee D. M. Best,

Goliad, Tex.—William Thomas, Hardware, succeeded by J. D. Seeligson & Co.

Groesbeck, Tex.—Finn, Fowlkes & Co., Hardware, J. D. Whitcomb has purchased an interest in the Hardware business, and will continue to do business here.

Henderson, Minn.—L. C. Rudon, Hardware, succeeded by Basel & Hedtke.

Hutsonville, Ill.—Rains & Colliflower, Hardware; H. Rains has disposed of his interest in the business. The new firm name will be Colliflower & Cox.

Lansingburgh, N. Y.—Gray & Temple, plumbers, etc., reported to have dissolved partnership.

Le Sueur, Minn.—Thomas L. Osborne, Hardware and agricultural implements, succeeded by P. J. Huberty.

Lisbon, Me.—A. H. Macurda, Hardware, succeeded by C. B. Allen.

Lock Springs, Mo.—J. Mansfield, Hardware, succeeded by R. Mansfield, Jr.

Lyons, Ind.—R. O. Law, Hardware, moved to Switz City.

Middletown, N. Y.—Ebner Bros., plumbers, etc., succeeded by Joseph O. Ebner.

Minneapolis, Minn.—D. L. Nash, Hardware, succeeded by Leavitt & Nash.

New Albany, Ind.—Huncilman & Co., stoves and tin, succeeded by Barbee & Huncilman.

New Market, N. H.—Young & Young have moved into their new Hardware store, which is fitted up to date, and is the finest Hardware store in that section.

Newport, Tenn.—Ragan & McSween, Hardware, have moved their business to building formerly occupied by Kyker & Harrison.

Pleasant Dale, Neb.—John Koller, Hardware and agricultural implements, succeeded by H. H. Behmerwohld.

Reinbeck, Iowa.—Watson & Sschirgi, Hardware, succeeded by John Watson & Son.

Saranac Lake, N. Y.—H. H. Tousley, who was burned out some time ago, has rebuilt a new store, 30 by 60 feet. The interior is fitted up with solid cherry fixtures. He will have all modern improvements and is ready for business.

Scandia, Kan.—Carstensen & Cullers, Hardware, C. P. Carstensen sold his interest.

Seymour, Iowa.—Prugh & Brooks, Hardware, reported to have sold out.

Stillwater, Minn.—H. F. Emery, Hardware, succeeded by August Loeber.

Ulysses, Neb.—Patrick & Hormel, Hardware, succeeded by E. R. Hormel.

Union Hill, N. J.—G. A. Hoffmann has purchased at public sale the Hardware stock of F. W. Stuke, Union Hill, N. J., and will continue the business at the old stand, under the name of the Anchor Hardware Co.

West Point, Miss.—Deane & Coleman, Hardware, etc., reported to have sold out.

Business Embarrassments.

Hamilton, Ohio.—The Cass Hardware Co., one of the oldest firms in this city, assigned to George Phohngen. Assets, $18,000; liabilities, unknown.

Spencer, Ind.—D. B. Cauble, Hardware; reported to have made an assignment.

Milwaukee, Wis.—The firm of William Peterman & Sons, Hardware dealers, at No. 433 East Water Street, have made a voluntary assignment in favor of William Klug. The liabilities of the firm are $12,000, while the assets are reported to be $2000 less.

Montgomery, Ala.—The Reid Hardware Co. have made an assignment to Maner & Elmore. The liabilities are about $2000. The assets will cover this amount.

St. Louis, Mo.—Hynson Hardware Co.; reported to have made an assignment.

Trenton, N. J.—The assignment of William H. White & Son, Hardware dealers, of North Broad Street, was announced recently. The assignee is John Sykes. The assets are put at $20,000, and the liabilities at $23,000. It is hoped that some arrangement may be effected by which the business may be continued.

Burglaries in Hardware Stores.

Kansas City, Mo.—Burglars broke the fastening of a rear door of the Brunner Hardware store, No. 910 Walnut Street. They robbed the cash till of $6, three counterfeit and plugged coins and a half dozen knives and forks.

Kennett Square, Pa.—The general Hardware store of John M. Chalfant was entered by burglars, and a large quantity of knives razors, revolvers and cutlery was taken. The loss will amount to about $200.

Lake Charles, La.—G. T. Rock, $60.

Minneapolis, Minn.—Joesting & Schilling, $300.

Recent Fires.

Amsterdam, N. Y.—Ray J. Morgan & Co., $12,000.

Baltimore, Md.—John R. M. Adams, Hardware, damaged by fire.

Cherryvale, Kan.—D. O. Candry, Hardware and agricultural implements, destroyed by fire.

Commerce, Tex.—R. C. Hill & Co., damaged by fire at a loss of $1000; no insurance.

Commerce, Tex.—W. E. Sayles, Hardware, damaged by fire at a loss of $6500; insured for $4200.

Denison, Tex.—The Hardware store of Pollard, Hoare & Co., and the dry goods house of Madden, Graham & Co., of this city, were destroyed by fire. Estimated loss, $200,000, partially insured.

Emporia, Va.—A can of oil was overturned and ignited in the store of W. T. Tillar, and but for hard work upon the part of a number of the citizens a most destructive fire would have been the result. Mr. Tillar has a Hardware business and keeps a large stock of loaded shells, and it was a hard struggle to throw them out of the way before the flames reached them. The damage will probably amount to about fifty dollars.

Holly, Mich.—Fire broke out at midnight over the store of the Nicholson Hardware Co., and although there was little destroyed by fire, the entire stock of Hardware was flooded with water. Fire was caused by a small oil stove, which exploded. The stock was insured for $5000.

Minneapolis Minn.—Boughton & French, Hardware, destroyed by fire.

Pittsfield, Mass.—The Pierson Hardware Co.; stock damaged by fire.

Windsor, Vt.—Penniman & Payson, Hardware, damaged by fire at a loss of $10,000.

Hardware manufacturers, the country over are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Companies, Etc.

Baltimore, Md.—The Coale Brass Mfg. Co. has been incorporated by Joseph M. Coale, Frank W. Coale, Joseph G. Coale, Walter I. Coale and William J. O'Brien. Capital stock, $15,000.

Big Rapids, Mich.—H. B. Herrendeen & Co. and Wils. D. Osborn have formed a partnership for the manufacture of a sheet iron stove, under the firm name of Herrendeen & Co.

Bristol, Conn.—A certificate of organization has been filed by the Wallace Barnes Co. of Bristol. The company has a capital stock of $30,000, divided into 300 shares of $100 each. The company is organized for the purpose of manufacturing and selling Hardware and sundries.

Cleveland, Ohio.—While the site of the new factory of the Born Steel Range Co., which is soon to be erected in Cleveland, has not been definitely decided upon, it is pretty certain that the plant will be located on the flats. The space to be occupied will be about 150x600 feet, or 300x400 feet, as the exigencies of location may render advisable. The new works will give employment to about 300 men. The establishment at Galion will remain in operation. The addition was rendered necessary by the increased demand for the goods of the company.

Detroit, Mich.—The Sun Vapor Stove Co. have filed articles of association. The capital stock is $100,000, all paid in.

Deshler, Ohio.—House, Heflinger & Co., H. L. House, Dr. L. M. Gehrett, T. M. Troup and D. S. Troup, have formed a copartnership for the establishment of a plant for the manufacturing of plow points, steam cookers and other implements. They have leased large buildings and expect to be in operation in thirty days with a working capacity for fifty men. G. L. House is general manager. The Troup brothers are the patentees of the plow point.

Lansdale, Pa.—Lansdale is to have a new stove foundry. It will be located on Seventh Street, on the Doylestown branch of the North Pennsylvania Railroad. The main structure is to be 30 by 48 feet, with a foundry attached, 20 by 40 feet. Its cost will be about $5000. The works will be operated by Vanfleet & Nixon, of North Wales.

Milton, Me.—The W. L. Armiger Mfg. Co. has been incorporated by W. L. Armiger and others, to manufacture stoves, etc. Capital stock, $50,000.

Murfreesboro, Tenn.—The Brown Common Sense Harrow Co. has been incorporated with Joe P. McGregor, president; J. R. Nelson, treasurer; W. A. Ransom, Jr., secretary-treasurer. The company will build immediately a factory for harrows, etc. Capital stock, $20,000.

Newburg, N. Y.—The American Brass Works; capital stock, $30,000. Directors: A. E. Anderson, Kingston, and W. G. Ladd and C. B. Riker, New York City.

New York, N. Y.—The Gutta Percha & Rubber Mfg. Co., filed with the Secretary of State a certificate of increase of stock from $800,000 to $1,000,000.

Sheffield, Ala.—The Lizzie Lowman Stove Works, B. J. & S. A. Lowman, proprietors, are now nearing completion, and will shortly start operations. They have a capital stock of $10,000, and capacity for thirty stoves daily, besides other kinds of foundry work.

Springfield, Ohio.—The Champion Furnace & Stove Co. has been organized here. It will occupy a portion of the East Street shops and will start up shortly.

St. Louis, Mo.—The Farnham Mfg. Co. have filed incorporation papers with a capital stock of $100,000. F. Howard Farnham is the principal stockholder. Other stockholders are Walter S. Crane, M. T. Clark and B. F. Wyler. The company is organized to manufacture shears, scissors and other improved cutlery.

Waynesboro, Va. — Jno. H. Giles and Charles Plumb will start a stove foundry under the name of the Reliable Stove Works. They will manufacture cook and heating stoves, do casting and general repair work.

Changes and Improvements.

Aurora, Ill.—Rathbone Sard & Co., proprietors of the stove works, have for a long time contemplated moving their general office to Aurora, and making Chicago a branch office. It is now definitely settled that this will be done, the removal to occur during the coming spring.

Akron, Ohio—The plant of the Falls Rivet & Machine Co., located at Cuyahoga Falls, which went into the hands of a receiver about a year ago, has been sold for $202,000. George G. Allen, who represented the creditors' committee, bought the plant at that figure. The works are one of the largest of the kind in the country. A new company will be organized, which will operate the plant. About 300 men are employed when the works are run on full time.

Beaver Falls, Pa.—H. M. Myers & Co. have started up their shovel factory in full.

Freehold, N. J.—The annual meeting of Stokes Brothers File Mfg. Co. has been held. The capital stock is $40,000, and a dividend of twenty per cent. was declared. A considerable amount was carried to the surplus account, which now amounts to over $12,000.

Muskegon, Mich.—The Crescent Mfg. Co. will at once increase the capacity of its nail keg factory 75 per cent, because of increasing business and the prospect for 1898. The improvements will consist of additions to the dry kiln and steam baths and a new lathe. They must be completed by Feb. 15th.

Recent Fires.

Chicago, Ill.—The F. C. Austin Mfg. Co., agricultural implement factory destroyed by fire, at a loss of $60,000; insured.

Greene, N. Y.—The Lyon Iron Works were burned to the ground. The fire was discovered by parties living near at about 1 o'clock. The firemen made a brave fight and succeeded in saving the large planing mill and pattern house. The machine shop was entirely destroyed and the molding rooms partly. There is an insurance of $17,000. The loss is nearly that amount.

Milton, Pa.—The Milton Mfg. Co.; the washer, nut and bolt department, destroyed by fire at a loss of $16,000.

Worcester, Mass.—The Warren Specialty Co., makers of small Hardware, who had just gotten well started, were among the victims of the recent fires. The concern, which is one of the fruits of the efforts of the board of trade, is a small but lively one, and is now making a fresh start with good prospects before it.

Miscellaneous.

Albany, N. Y.—The Fuller & Warren Co. of Troy, one of the largest stove concerns in the State, has decided to include warehouse and storage facilities to its present business. The location of the company's plant could not be surpassed, as it has direct access to the river and railroad lines.

Anderson, Ind.—The machinery of L. R. Longsworth's handle factory was put on the cars yesterday for shipment to Somerset, Ky. It is expected the plant will be in operation there in a few weeks.

Columbus, Ohio.—The Howe Scale Co. of 1886, of Rutland, Vt., capital stock, $250,600, has complied with the foreign corporation laws. Its Ohio office is at Cincinnati, and the company's State agent is T. B. Linnard.

Covington, Ky.—The Davis-Egan Co. of Cincinnati, one of the largest manufacturers of tools, waterworks supplies, etc. in America, are anxious to locate in Covington. They have all arrangements completed for the purchasing of the late Walton Architectural Works at Seventeenth and Holman Streets, and in less than sixty days they state they will have 150 men at work.

Hamilton, Ohio.—The Niles Tool Works have secured a large contract from Egypt, for machinery to be used in outfitting a railroad shop in that far-away country.

Moline, Ill.—The big Corliss engine which has furnished the principal part of the power in Deere & Co.'s plow works, collapsed on the morning of Nov. 27. The engine and a dynamo in the same room were wrecked, causing about $8000 damage. The engine-house and the adjoinable buildings were shaken as by an earthquake, and there were several narrow escapes from death.

New Castle, Del.—The Boulden Mallet Mfg. Co. will shortly be organized. The principal incorporators will be David Boulden, William Morrison, Lawrence O'Connor and Theodore Hanf. The new company will manufacture mallets out of best wood procurable.

BICYCLE TRADE RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Companies, Agencies, Etc.

Akron, Ohio.—The Diamond Rubber Co. has been reorganized, with a capital stock of $300,000.

Camden, N. J.—The Lee Mfg. Co. has been incorporated by G. F. Fries and others, to manufacture bicycles. Capital stock, $75,000.

Chicago, Ill. — Fowler Cycle Co. has been incorporated by Frank T. Fowler, Frank A. Heilmer and Edwin Terwilliger, Jr., to manufacture bicycles. Capital stock, $50,000.

Chicopee Falls, Mass. — The Overman Wheel Co.'s works have resumed operations with 800 hands. The company went into the hands of a receiver a few days ago.

Denver, Col.—The Eclipse Bicycle Co. has established an agency, with A. L. Deane as manager.

Helena, Ark.—The Standard Wheel Co. will establish a branch at this place. It will employ about 250 persons.

Holyoke, Mass.— The Coburn Metallic Bed & Pneumatic Tube Co. has been incorporated, with a capital stock of $10,000.

Toledo, Ohio.—The Standard Tube & Forkside Co. has been incorporated by Charles M. Fairchild, Chauncey S. Bigelow, Chas. Kohler and A. C. Whittingham, to engage in the manufacture and selling of bicycle tubing and sundries. Capital stock, $25,000.

Washington, D. C.—Arthur D. Bennett has opened a salesroom and general bicycle repair shop at No. 725 North Capitol Street.

Washington, D. C.—Fowler Cycle Co. will establish a bicycle agency.

Washington, D. C.—H. W. Allen, of Chicago, is considering the advisability of opening a bicycle store and repair shop in this city.

Washington, D. C.—McLean & Espey is the name of an establishment, rumor says, will soon open on Pennsylvania Avenue.

Changes and Removals.

Brockton, Mass.—Cameron Wheel Co., bicycles, succeeded by E. S. Cameron, same style.

Charleston, S. C.—Baird Bros., bicycles, have purchased stock of Snyder & Fisher, and are selling out same at big reduction.

Charleston, S. C.—The Southern Cycle Supply Co. will increase its capital stock to $25,000, and intends to establish a bicycle factory.

Chicago, Ill.—The Fowler Cycle Mfg. Co.'s plant has been sold to Frank Fowler, who for some years was president of the company. The price paid was $20,000.

Daytona, Fla.—The Halifax Cycle Co., Griswold & Norris, proprietors, have recently purchased the bicycle livery of George Hawk, which they will annex to their own establishment on Beach Street.

Denver, Col.—Geo. Mayer Hardware Co. have removed to more commodious quarters at Nos. 1512 to 1520 Arapahoe Street. They are dealers in Hardware, bicycles, etc.

Detroit, Mich. — Hodgson, Howard & Marks, sporting goods, etc., Henry H. Hodgson, deceased.

Dyersburg, Tenn.—Dyersburg Hardware Co. have added a repairing shop to their business, and are fully equipped for the repairing of bicycles, guns, sporting goods, etc.

Florence, Col.—Godley & Co., bicycles, reported to have been succeeded by Emmons & Co.

Fort Wayne, Ind.—W. R. Little & Co., bicycles, etc., have dissolved partnership, and W. R. Little is now conducting the business under his own name.

Gainesville, Fla.—Neff & Graham, bicycle dealers, have dissolved copartnership; George Graham will in future run the store in this city, while G. H. Neff takes charge of the business at Tampa.

Greentown, Ind.—C. E. Kelly & Co., bicycles, etc., reported to have been succeeded by Ira Gibson.

Gypsum, Kan.— Baker & Hall, retail Hardware, sporting goods, etc., succeeded by Manning & Hall.

Hagerstown, Md.—The Crawford Bicycle Works, A. R. Vanmater, treasurer, has tendered his resignation to go into partnership with McAllister, the Philadelphia bicycle manufacturer. Edward W. Mealey has become treasurer of the Crawford Co.

Hartford, Conn.— The Lee Arms Co., manufacturers, E. G. Wescott, secretary and treasurer, deceased.

Houston, Tex.—Culmore & Reiler, bicycles, etc., reported to have dissolved partnership.

New York, N. Y.—Camp & Berrian, rubber goods, succeeded by George W. Berrian.

New York, N. Y. — Hall & Downing, manufacturers' agents bicycles, firm name changed to Hall Downing Stowe Co.

Reading, Pa.—Rhode Bros., dealers in bicycles, succeeded by Neff H. Rhodes. Mr. Rhodes will move to larger and more commodious quarters April 1st next.

Rice Lake, Wis.—Putrow & Boddington, bicycles, succeeded by J. B. Putrow.

Sandusky, Ohio.—Gilcher & Donahue, bicycles, reported to have dissolved partnership.

Savannah, Ga.—Holland & O'Byrne, bicycles, reported to have been succeeded by Dan H. Holland.

Somerville, Mass.—Churchill, Kelsey & Co., cycles, succeeded by Kelsey & Chase.

St. Thomas, Ont.—Brownell & Kennedy, manufacturers of bicycles, etc., reported to have dissolved.

Syracuse, N. Y.—Mrs. E. D. Legg, bicycles, reported to have sold out.

Tacoma, Wash.—Ed. Belch, bicycles, reported to have been succeeded by J. T. Eshelman.

Trenton, N. J.—The Phillips Cycle Co., bicycles, reported to have dissolved partnership.

Washington, D. C.—Burr & Jones, bicycles, No. 519 Ninth Street, N.W., have dissolved partnership, Mr. Burr retiring. Harry A. Fellows has purchased the interest formerly held by Mr. Burr, and the firm is to be known as Jones & Fellows. Business will continue at the old stand, with Mr. Jones as manager, Mr. Fellows being a silent partner.

Washington, D. C.—Gaither & Cissel have added bicycle sundries, Eighth and H Streets, N.W.

Washington, D. C.—The Arlington Cycle Co., formerly of H and Ninth Streets, has removed to a new location on East Capitol Street.

Washington, D.C.—The Cleveland Wheel Co. have moved into their new headquarters at Fourteenth Street and New York Avenue.

Wilkesbarre, Pa.—W. H. Bowman & Co., bicycles, succeeded by W. C. Bowman.

Recent Embarrassments.

Chicago, Ill.—Grant Co., manufacturers of bicycles, mortgagee reported to be in possession.

Chicago, Ill.—The Fowler Cycle Mfg. Co.'s insolvent plant, which inventoried $73,000, and the book accounts, amounting to $73,000, have been sold to Frank T. Fowler, who for some years was president of the company, for $25,000.

Haverhill, Mass. — Herbert R. Sawyer, bicycles, reported to have made an assignment.

Montgomery, Ala. — The Montgomery Arms Co., Dexter Avenue, has made an assignment to Carew Powell.

Newport, R. I.—Wm. B. Henderson, bicycles, attached and closed out.

Springfield, Mass.—Warwick Cycle Mfg. Co., reported to have been attached for $1000.

Wallingford, Conn.—The Hall Mfg. Co., bicycle sundries, reported to have appointed temporary receiver.

Recent Fires.

Chicago, Ill.—Wilson-Davy Co., bicycles, destroyed by water at a loss of $1000; fully insured.

Toledo, Ohio.—The Maumee Cycle Co., slightly damaged by fire.

Washington, D. C.—Drew & Goodman, bicycles, Eighth Street between D and E Streets, S.E., damaged by fire at a loss of about $1500, upon which there was an insurance of only $400.

Washington, D. C.—The National Cycle Co., repair shop, G Street near Ninth, slightly damaged by fire at a loss of $100. The inconvenience attending has now been overcome, and work has been resumed.

Digitized by Google

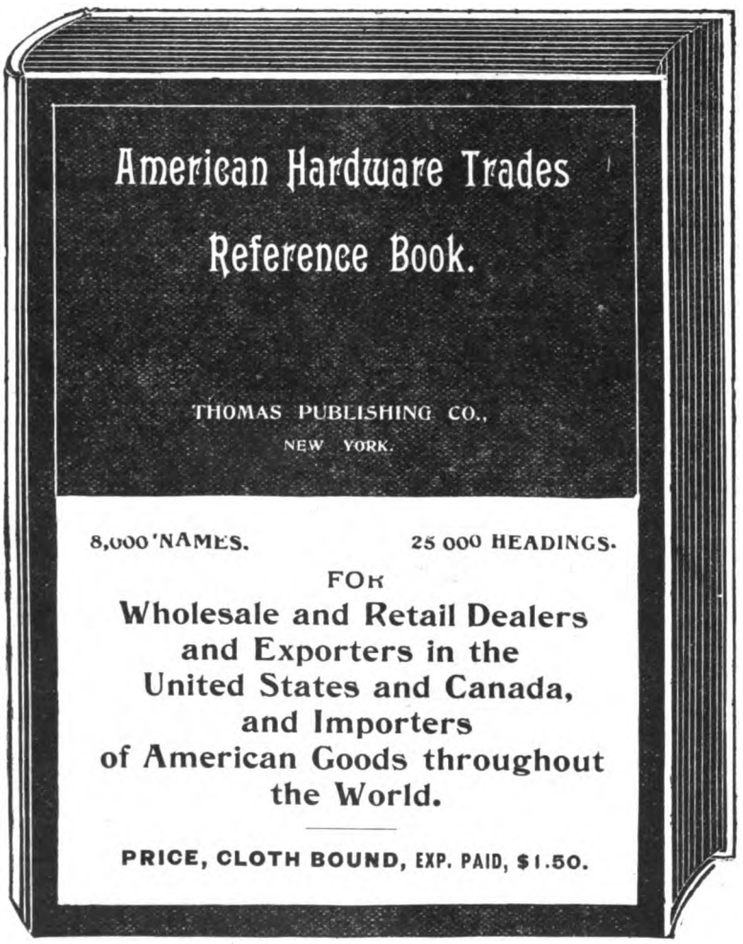
EVERY PROSPEROUS HARDWAREMAN

MUST BE WELL POSTED.

Secure the benefit of all possible Competition in Buying. A Dealer's Reference Book is essential. Here it is. A complete one, independent of any other publication, giving the names of ALL manufacturers, those who do not advertise, as well as those who do. The only work of the kind maintaining this feature. 1898 edition ready in few days. . . . .

IT COVERS THE FOLLOWING TRADES:



Hardware of All Kinds,

Hardware Specialties,

Agricultural Implements and Machinery of Every Description,

Carriages, Wagons, Harness,

Stoves, Ranges,

Tinware, House-furnishing Goods, Bicycles, Plumbing, Steam and Gas Fitting Goods of all Kinds and all Other Articles, Machines, etc., Handled by these Trades.

The object of the work is to enable the above trades to instantly find all the manufacturers of any article desired; the main and branch offices of every manufacturer in the trade, and the financial rating of every manufacturer.

Completeness.—The names of all manufacturers, regardless of whether they advertise or not. We give the names ver 8,000.

Classification.—By our method of classification, we index every manufacturer under every article manufactured. We name some manufacturers under as many as 300 headings. We make no charge whatever for any number of headings required to completely represent every manufacturer. The book gives nearly 25,000, fifty times as many as any other publication gives to these trades. We do not use general headings, such as are used in ordinary directories, as for instance: "Hardware," "Agricultural Implements," "Vehicles," "Plumbing Goods," etc., but state the specific article and the special kind of article, and for what purpose used, as for instance: "Door Locks," "Bicycle Locks," "Refrigerator Locks," "Gang Plows," "Sulky Plows," "Swivel Plows," "Ditching Plows," "Brass Faucets," "Wooden Faucets," "Beer Faucets," "Steam Heating Boilers," "Combination Steam and Hot Air Boilers," "Air Valves for Radiators," etc., etc., throughout the 25,000 headings, naming every article, every special kind of article needed by these trades. It enables the user to instantly find exactly what is wanted. Nothing like this minute classification has ever been attempted before.

Ratings.—The financial rating of every manufacturer is given.

SAVES SUBSCRIBERS 100 TIMES ITS COST.

Special to our Subscribers.

WE have contracted with the Thomas Publishing Co. for 10,000 copies of the 1898 American Hardware Trades Reference Book, which we are offering to the trade of the United States, with a year's subscription to "Hardware" for $1.50; the price of the book alone. . . . . .

« « « ◆ » » »

Those who are already paid subscribers to "Hardware" may take advantage of this offer by sending 50 cents. . .

« « « ◆ » » »

We do not agree to hold this offer open for any specified length of time, as it will be impossible to furnish the Book alone at less than $1.50 after these 10,000 are taken.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

"BROUGHT US MANY PAYING CUSTOMERS."

Defiance Bicycle Co., Defiance, Ohio. [*Bicycles*]: We are much pleased with the results obtained from our advertisement in HARDWARE during the past season. It has brought us many paying customers, and we feel that the money paid you was well invested.

"READ IT FROM THE FIRST ISSUE."

C. E. Neale, Worcester, Mass.: Please find enclosed the cash for the coming year's subscription to HARDWARE. I have read it from the first issue, and intend to keep right along reading it, and wish you success.

"BEYOND CRITICISM."

Wm. Jessop & Sons, New York. [*Steel manufacturers*]: Another five years as proportionately successful as HARDWARE's last will place it almost beyond the criticism of friends or competitors.

"HAVE FOUND IT SATISFACTORY."

The Ideal Mfg. Co., New Haven, Conn. [*Reloading Tools*]: We recognize your medium from time to time, and have found it satisfactory.

"SATISFIED WITH 'HARDWARE.'"

Schoverling, Daly & Gales, New York. [*Bicycles, Guns, etc.*]: We have every reason to be satisfied with our advertising in HARDWARE.

BUSINESS IS BETTER AND THERE WILL BE A LARGER DEMAND THAN EVER FOR OUR

Sheep Skin Mitten.

Acknowledged to be the best article for polishing stoves, as it does away with the old time dirtiness of the work, making this work a pleasure. Also invaluable for polishing brass or glass, or silverware, which it does not scratch. For tan shoes and cleaning bicycles it has demonstrated itself a conspicuous success.

Diamond Hardware Co.,

TRY SOMETHING NEW.

The PLANET LEATHER

Dust Beater.

They are made of leather, with fancy enameled handles. Will not break nor injure finest furniture or upholstery. Made in 4 lengths. Retails popular prices. Write for catalogue and price-list.

PLANET MFG. CO., Holyoke, Mass., U. S. A

We are extremely desirous of interesting you in handling the Planet Jr. Farm Machinery and Implements. The benefits and advantages we offer you will fully correspond with the earnestness of our desire for business dealings.

These inducements are potent for profit—note three of the salient advantages. Quality and workmanship are unquestionably and absolutely the best obtainable.

Generous profits are assured by our method of price protection which prevents the ruinous price cutting so unfortunately prevalent. We find the customer.

Write us for catalogue and full particulars of our goods and business methods.

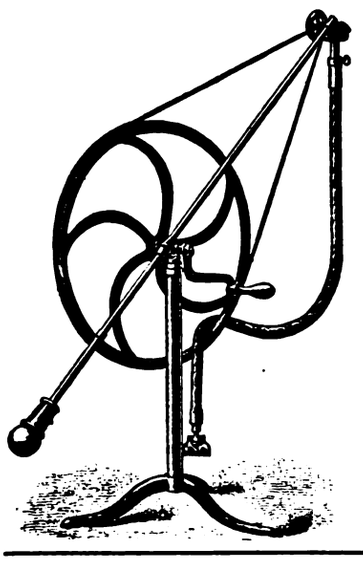
A GOOD THING.

IT'S IN THE TEETH.



The Patent "REFORM" Curry Comb is composed of three shallow, oval trays, with corrugated edges. The parts are struck up from a fine grade of cold rolled steel, heavily tinned and bronze lacquered, firmly riveted together and warranted not to rust. The outer dimensions are 6½x4¼ inches and by reason of the large cleaning surface and peculiar arrangement of teeth, the comb will do its work with a large saving of time and labor, cleaning with equal thoroughness both long and short coats. There are no places to accumulate hair and it will not tear or injure the brush, the comb being quickly freed from accumulation by giving its face a gentle tap.

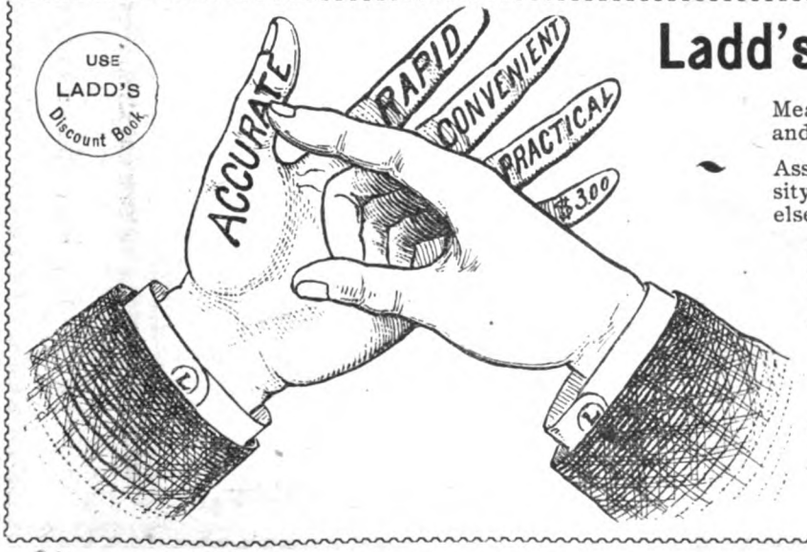
THE FULTON SIGN and PRICE MARKERS



Are the best, most complete and cheapest outfits for Business men to make their own Show and Price Cards, to print Shelf Labels, mark Boxes, Barrels, etc., etc. There is in fact no business where they cannot be used to advantage. Newspapers are using them for their Bulletin Boards, Ministers for Church Notices Theatres for Announcements, Restaurants for Bills of Fare, etc. Their price in comparison to their usefulness amounts to almost nothing; it saves the cost of Sign Painters and Ticket Writers. A Boy can do all the lettering required in the largest Department Store. They last a lifetime and can be used for every language. We have

50 DIFFERENT STYLES

to select from in sizes from ½ to 4-inch letters. For marking Boxes and Barrels for shipping, or labels, they are far superior to adjustable stencils; the work is done quicker and neater and without blurring, making it look as if printed on a printing press. Nearly 100,000 sets of the **Fulton Sign Marker** have been sold, and they are in use daily by all large wholesale and retail business houses in the United States. Goods can be bought direct from us, or through your nearest wholesale house. Complete catalogues in English and Spanish sent free. Address

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

A Hardware Association Number of "Hardware."

On April 10th, 1898, *Hardware* will celebrate the eighth anniversary of its birth.

That there was a large and profitable field awaiting development by a first class Hardware journal, that should devote itself exclusively to the Hardware trade, has been demonstrated by the success which has crowned the efforts of *Hardware* from the initial number.

Despite the fact that recent years have not presented such conditions of prosperity as we all could have wished, *Hardware* has developed and extended its circulation and influence, until to-day it is read and quoted in every quarter of the land, and is a welcome visitor to the commercial marts of the entire globe. It was the purpose of those who founded the journal, and is still the high aim of those to whose hands it is yet entrusted, to keep it upon the highest possible plane of trade journalism; to make it clean, respectable and useful; to see that it properly represents the great Hardware interests of this country; that it gives the news, and all the news, and advocates such measures as best represent the great interests of which it is an exponent. That it has succeeded in a large measure in fulfilling these conditions is evidenced by its success, and the loyal support which it has secured at the hands of the trade everywhere—manufacturers, jobbers, retailers and every other line of labor which is in any way, directly or indirectly, connected with the Hardware trade.

We take occasion at this moment to extend the most earnest thanks of *Hardware* to all who have in the busy eight years past, assisted it in the accomplishment of this purpose.

Hardware has certainly used its best effort for the promotion of neighborly friendship and good fellowship among the members of the trade. It has given freely of its space for the dissemination of news in regard to the great Hardware organizations which, since 189 , have become so grand a force for good in the Hardware world. It has by its voice, encouraged in every possible way the creation of organizations having for their purpose the bettering of trade conditions, and has been an enthusiastic supporter of every movement having for its purpose the good of the trade.

It occurred to us that the celebration of our anniversary of April 10th, 1898, could be made of signal usefulness to the trade everywhere, by the publication of a SPECIAL HARDWARE ASSOCIATION number.

It is our purpose, therefore, with that issue, to present a mass of valuable information in regard to the beginning and growth of the great forces or organizations which have accomplished so much in the way of acquaintance, better business methods, and the cultivation of fraternal regard. These sketches of the rise and growth of the organizations will be accompanied by portraits of various officers of the same, special articles from the pen of men who have been instrumental in the founding of these societies, and much else of interest in connection therewith. We feel that the time has come when the various steps which led to the creation of these forces within the Hardware trade should be gathered and properly placed upon record, and more especially as the information can now be secured at first hands, from those who assisted in this work.

We ask the hearty co-operation of Hardwaremen everywhere in this laudable effort, and our experience of the past leads us to firmly believe that the same will be given with a generous willingness which shall be very effective in its results.

Editorial Trade Review.

By comparison with previous years, the business of the month of January throughout the country has been of an extremely encouraging character and is considered entirely satisfactory and in line with the most hopeful views of the year's trade and traffic.

In the way of prices, manufacturers do not claim they have done much more than stiffen the most favorable quotations at which sales have been made during two months past. The dealers who are in condition to give the orders for stock, which are so essential for a proper start on the requirements and demands for a healthy spring trade, still labor under the belief that a continuance of the low prices so unprofitable in the past should form the basis of a deal for the future. As the manufacturers have no such intention and desire, they are virtually compelled to entertain propositions for combining with other makers in order to sustain a list of prices that will afford a fair margin of profit without discouraging spring orders.

More heavy goods, in which labor enters but slightly,

Digitized by Google

by comparison, are being contracted for than higher grades of goods more expensive in character and about which the relative size of a season's stocks has to be figured more closely.

The market has been well kept up in tone, and no general weakness is apparent. The condition of the general Hardware stocks throughout the country would indicate a large demand was possible for improved tools and other mechanical appliances; the gradual expansion of better conditions of local affairs, in the way of steady employment for the toiler, the weakening of influences forming and sustaining strike conditions, the willingness to keep employed and trust in the future for improved financial advancement—all these have a bearing upon the business of 1898 and bring about the steady feeling of confidence which inspires our present fervent hopes and strengthens our faith in the integrity of our industrial growth. The increased strength shown by the wire-nail market is reflected in other lines that are close to the raw material and will lead to a general improvement of all other and similar lines. Too many goods have been disposed of during the dull periods of trade the past year or two without sufficient attention being given to the profit side of the transaction, the principal wish being either to keep a customer from falling into a competitor's hands or else to move a stock that had already passed the point of a growing surplus. Indications point to a larger distribution of builders' Hardware during the present season, and while the large and widely varying list of fine finishes in this most artistic line of goods prevents the dealer from stocking up too largely, the manufacturers, it is believed, are satisfied to have it so, as, with increased facilities for finishing up stock in accordance with "rush" requirements on special demands, it enables the dealer to solicit any specifications feeling that but little delay can possibly result in supplying all that may be wanted.

Considering how great a feeling exists in the trade inimical to the sale by department stores of Hardware specialties, the idea is well defined in the minds of the older dealers that any inroads upon the general business of the well organized Hardware store will be scarcely felt, except in the way of well advertised specialties, when compared with previous conditions of trade. The legitimate business of the Hardware dealer that requires skill and experience in its distribution will never form an adjunct of the department store. The admission of this fact would seem to make a scale of better profit desirable on this class of business, while at the same time such novelties and specialties now in the stock of every department store in the country should be sold at as close figures as is made prominent by those hustling competitors.

Mr. Pike as an Editor.

E. Bertram Pike, treasurer of the Pike Mfg. Co., Pike Station, N. H., whose genial personality is encountered from time to time in every corner of the country where oil-stones and the like are used, has found leisure in the midst of a busy business career, to divert himself by the preparation of a handsome volume devoted to the "Centennial Anniversary and Reunion of Haverhill Academy, Haverhill, N. H.," where Mr. Pike obtained the foundation of a liberal education. The result is a handsome book of near 200 pages, bound in morocco, illustrated with portraits and views, and filled with matter which is of exceeding interest, naturally, to the ex-students of that old educational institution, and it also well repays an hour's examination on the part of anyone who is interested in educational matters. Mr. Pike has shown great judgment and an unsuspected editorial skill in the preparation of this work, as each part seems to fit into the other in an admirable and complete manner. There has been no lack of expense connected with the preparation of the engravings, and the portraits, all of which reflect skill upon the artistic sense of the editor and his staff of assistants.

Mr. Sickels on the Situation.

We find in the *New York Times* of a recent date, the following interesting remarks in regard to the Hardware business of the country from Robert Sickels, of the wholesale Hardware house of the Sickels & Nutting Co., New York:

"The progress made in this line of business during the last twelve months stands out in striking contrast with that of the year before. There has been much improvement, and the outlook for the present year is quite encouraging. A country does not immediately recover from the effects of long depression, and it is not to be expected that business will be seen in the fullness of activity all at once.

"Western purchases of all kinds of Hardware goods have been unusually large this fall. People engaged in agriculture have added considerably to their supplies for use in field work, causing much activity in manufacturing of this kind. The great outpouring of Western orders was not an immediate consequence of the improved crop returns. It has been gradual and steady. There is evidently a further large purchasing to be done by the farmers, and it will be made in the near future.

"With the great impetus given to business by the wheat-selling movement there were anticipations of a vast amount of purchasing from Eastern points as well. It has not come up to what was anticipated, but, of course, the supplies have not run down so low in the East as in the West, where economizing in such things was the rule in recent years. In the coming season a better demand is looked for in all Hardware commodities.

"Undoubtedly there is an improvement in the tone of general trading and the existence of a confidence that counts for much. Depressing talk is no longer heard, and with conditions as at present, it is highly probable that this will be a prosperous year for Hardware manufactures. Healthy and satisfactory progress has thus far been effected, and we look for a larger future business."

Harvey Hubbell, Bridgeport, Conn., has issued a very handsome catalogue of his Machinery and Tools and Brass Machine Screws. It is thoroughly illustrated, containing prices, etc.

President and Vice-President.

At a recent meeting of the Philadelphia Hardware Merchants' & Manufacturers' Association, new officers for the year were elected, and were practically installed at the recent annual dinner, which was reported in full in the last preceding issue of *Hardware*. The president, whose portrait we take pleasure in presenting in this connection, cer-

JAMES H. RITTER, PRESIDENT.

tainly needs no introduction to the Hardware trade of America. James H. Ritter has so thoroughly identified himself with everything relating to the trade, that he is personally known wherever the name of the Biddle Hardware Co. has been carried—and it is needless to say that there is no part of America into which the fame of this organization has not penetrated.

Mr. Ritter illustrates in his own person the advancement which can come to the American youth, who starts out in life with those qualities so essential to success—a natural ability, backed by industry and determination. While Mr. Ritter is, so far as years go, still a young man, he has had a practical experience in the Hardware trade that has fitted him for the position to which he has been chosen. While still a young boy, he commenced business with French, Richards & Co., wholesale druggists of Philadelphia, and was with them one and a half years. On January 1, 1876, he entered the employ of the Biddle Hardware Co., literally at the bottom, as his first labors consisted in sweeping out the cellar of the store. While he has not yet worked his way to the top of the building, he has certainly worked himself pretty close to the head, in an official sense, as he is to-day the general manager of this great organization. In the twenty-two years that have seen him connected with the company, he has done about everything that can be done in connection with a Hardware establishment, except to travel on the road, and this all-around experience has fitted him admirably for the duties which now fall to his hands. Mr. Ritter served for two terms of two years each, as vice-president of the Hardware Merchants' & Manufacturers' Association, and as was suggested by ex-President Disston, who introduced him at the recent dinner, he has served an apprenticeship that guarantees great success at the head of this famous Hardware organization.

At the same meeting, an admirable selection for vice-president was made in the person of Hugh McCaffrey, the president of the McCaffrey File Co., of Philadelphia. While Mr. Ritter ably represents one branch of this Association, Mr. McCaffrey is an exponent of the other branch, having been for many years identified with the manufacturing interests of this country. Mr. McCaffrey commenced business life by serving an apprenticeship in file-making in Philadelphia. On January 13, 1863, he started in business for himself, and some time later took into partnership his brother John, the firm name being McCaffrey & Bro. Business was continued under this name until July 1, 1889, when the firm incorporated under the laws of Pennsylvania as the McCaffrey File Co. Hugh McCaffrey was elected president, and has continued to hold this office since, being re-elected each year without opposition.

Mr. McCaffrey has taken a deep interest in the Hardware Merchants' & Manufacturers' Association, and at the recent meeting, as stated above, he was elected to the position of vice-president. He has been, and is still, a leading spirit in making and continuing that feeling of good fellowship which exists between the merchants and manufacturers of Philadelphia; is a consistent and bitter enemy of trusts and combines, and has certainly done his share in pushing with energy the reputation of American files abroad.

The Association is to be congratulated on having secured a president and vice-president who stand so high in the respect and affection of the trade.

It is needless to introduce, even by photograph, the secretary and treasurer of this Association to the Hardware trade of America. The name of T. James Fernley is known

HUGH McCAFFREY, VICE-PRESIDENT.

wherever saws buzz, files rasp, lawn mowers cut, axes chop, and dog collars are worn.

Messrs. Bayer & Co., manufacturers of window mirrors, who were formerly at No. 28 North Thirteenth Street, Philadelphia, Pa., have removed to No. 19 North Juniper Street, which is opposite the city hall. They will here have more space, and have added new improved machinery for the manufacture of the Perfection Window Mirrors.

The Boston 20th Century Store, No. 537 Canal Street, New Orleans, La.: "We are overwhelmed with catalogues and correspondence, the greater portion of which is due to *Hardware*."

The first bank was established in Italy, A. D. 808, by the Jews.

The Sportsmen's Exposition of 1898.

When the National Sportsmen's Association was organized, there were some, of course, who questioned the successful carrying out of the very ambitious plans which its sponsors and exponents had in mind. The success of the first annual exhibition, held in Madison Square Garden, was such as to guarantee that the Association had come to stay, and that this annual exposition had become one of the fixed events of the metropolis. Each year since then has seen a gathering which has simply strengthened the Association in the affections of the public and of the trade everywhere, and the fourth annual exposition, which recently closed in the Madison Square Garden, was certainly equal in all respects to those which had preceded it.

It is impossible to attempt a full description of everything that was there to be seen. It is simply necessary to say that there was nothing in the line of sporting goods, including bicycle exhibits, which was wanting. The musical programme of each day added to the attractions, while the various tournaments open to shooters, anglers, bowlers, etc., formed a new feature which was very attractive and successful in its results. The building was very handsomely decorated with flags and pennants, and a great many souvenirs were given away by the exhibitors.

While it is impossible to speak in detail of the various exhibits, a special mention of several will be of interest. A very attractive feature was that presented by the E. I. Du Pont De Nemours & Co., who exhibited a pyramid of packages showing the various products of that company, in a very attractive shape. Among these were the containers for the different kinds of powders, with samples of powder in crystal glasses; also powders for rifles, shotguns and blasting; gun cotton, prismatic powders for army and navy guns, and many other specialties.

The Cleveland Target Co., of Cleveland, Ohio, showed a sample of the Magau Trap, which is an automatic magazine trap for throwing bluerocks for trap shooting. They also exhibited samples of bluerock pigeons for target shooting. Great interest among sportsmen was excited by the Expert and Expansion Traps, which were fitted with Paul North's famous electric pulls.

The Laflin & Rand Powder Co. showed a working model in miniature of one of their powder-producing plants, which displayed in detail the many buildings which are required for the conduct of their business. The danger which surrounds the manufacture of powder is always a subject of interest and curiosity by sightseers, and this exhibit in spaces 5 to 7, was one of the most attractive of the Exposition.

The Remington Arms Co. showed a large number of Remington guns, which included a full line of their Automatic Ejector and Non-Ejector Hammerless Guns, hammer shot guns, in their various styles of manufacture, and a full line of military small bore and large calibre rifles. With these were also exhibited parts of the various guns and rifles, and samples of the execution done by the same at long range.

The Bridgeport Gun Implement Co., in space 78, exhibited a handsome and attractive line of golf goods. Their booth was prepared to resemble a putting green, which was adorned with natural birch trees, with evergreens as a setting.

A very attractive exhibit was that of I. E. Palmer, of Middletown, Conn., who occupied spaces 123-125, showing his hammocks and mosquito net canopies, which have made their way into every corner of the country.

The Union Metallic Cartridge Co., Bridgeport and New York, occupied spaces 135-142, with as fine an exhibit in their line as could possibly be gotten together. The very many products of this old and famous company were shown, consisting of paper shot shells, metallic ammunition case, wads, primers, etc,

In addition to the regular exhibit of sportsmen's goods, there were many scenes of attractive beauty, reproducing the actual business of hunting and fishing, and illustrating by attractive object lessons, the pleasure that can be secured from the rod and the gun and other out-door sports. Many rare specimens of the taxidermist art were to be seen, while sporting craft of all sorts, from the tender to the sneak boat, were seen on every hand.

The exhibition of bicycles was large and attractive. There were exhibits of miniature hunting and fishing camps and a log cabin of spruce logs, a birch bark wigwam, and a realistic reproduction of a hunting camp fire, all of which were accompanied by real live Maine guides, who are not creatures of the imagination, but who make it their business to assist the world in penetrating the forest recesses of that wonderful State.

The close of this fourth annual exposition guarantees that the Sportsmen's Association has come to stay, and that there will be an exposition in every year of the "sweet bye and bye."

A Remarkable Showing.

The Magnolia Metal Co., during the last three or four months, have received through the mails nearly 3000 testimonials on Magnolia Metal, or to be exact, they received 2827 distinct testimonials. These were received from every part of the United States and Canada, and were sent in by railway companies, steamship companies, rolling mills, iron and steel manufacturers, of every kind and description; machinists, paper mills, cotton mills, woolen mills, woodworking establishments of all kinds, and practically every class of mechanical industry that can be mentioned.

These testimonials came to them in response to a circular letter sent out to all the mills and manufacturers of the United States and Canada, accompanied by a fifteen-inch rule sent with their compliments, and simply asking if they were users of Magnolia Metal and, if so, what was their experience. A very small percentage of concerns so addressed ever make response, and taking the number of replies actually received, giving testimony as to the superiority of Magnolia Metal, it has been estimated that at least 100,000 concerns in the United States and Canada are to-day using Magnolia Metal.

The above statement is a very remarkable one, and shows the wonderful success that the Magnolia Metal Co. have had during the past ten or twelve years in introducing their metal among the mills, manufacturers, jobbers and dealers of the United States and Canada, and their trade is equally as large in foreign countries. This shows what can be accomplished by having a good article well exploited and thoroughly advertised.

Among the extensive improvements now being made by the Benjamin Atha & Illingworth Co., Harrison, N. J., is a new steel building known as the tower building. This is 30 feet square and about 40 feet high. Thirty-five feet above the ground is a circular trolley track carried by the roof trusses. The framework of the building is of steel throughout, and the siding and roofing of corrugated iron. The complete contract for furnishing and erecting this building has been given to the Berlin Iron Bridge Co., East Berlin, Conn.

As will be seen in a notice on page 59 of this issue, there is a rare opportunity for some one who wishes to enter the Hardware trade. W. B. Carey, Salem, Ohio, offers one of the finest rooms in Ohio, finished specially in hardwoods for the Hardware trade, and which has been used for such for twenty-six years. Alterations will be made so as to include other lines in the same direction, if desired.

HARDWARE'S "Prices Current" are reliable.

THE NEW ENGLAND HARDWARE DINNER.

The New England Iron & Hardware Association gave their annual dinner at Young's Hotel, Boston, on the evening of Monday, January 31, 1898. The main dining-room was comfortably well filled by the Association and their guests, numbering over 100, and a more dignified body of men it would have been difficult to have got together. Many of them were reverend seigniors who have grown gray over the vicissitudes of this important industry represented by a variegated scale of discounts on standard goods, which the proverbial Philadelphia lawyer would give up in despair. And yet expert honors are borne meekly by many veterans in the business, whose names, surrounding the diagram of the dining tables shown on another page, will be found familiar reading by many manufacturers and their representatives, unable by a combination of circumstances from being there *in propria persona*.

The night, atmospherically, was the worst which Boston has known for thirty years. A severe snow storm, with an accompaniment of a fifty-mile-an-hour wind, had delayed trains on every road, brought down telegraph and telephone wires in wholesale quantities, and ruled the situation with a rod of iron. The members who had profited by previous experience, and upon leaving home in the morning, left their return before the succeeding evening uncertain, were throwing a bouquet or two at themselves for their forethought, which enabled them to take an evening of solid enjoyment rarely experienced under similar outside influences.

Previous to the dinner proper, a reception lasting nearly an hour was held in the parlors of the hotel, where the guests enjoyed the opportunity of being introduced by President Carter to the distinguished Senator, William P. Frye, of Maine, the orator of the evening. The old and new members were brought more closely together, and a feeling of *comraderie* and congeniality was established which bore fruit later in the evening.

The Reception Committee, composed of Samuel A. Bigelow, Charles F. Dowse, A. M. Wiley and Hayward C. Dodge, largely contributed to the ease and comfort of the arriving guests, and were almost ubiquitous.

The excellent cuisine of the widely esteemed Young's Hotel was put to the test, and the following menu amply demonstrates how capably the management responded:

MENU.

Oysters on Deep Shell.

Cream of Celery aux Croutons. Consomme, Dauphine.

Chicken Halibut, a la Toulouse. Potatoes Hollandaise.

Roast Philadelphia Capon, Puree of Chestnuts.

Saddle of Mutton.

Griddled Sweet Potatoes. Peas. Puree of Spinach.

Croquettes of Sweetbreads, Jardiniere.

Bouchee of Oyster Crabs, a la Maryland.

Frozen Tom and Jerry.

Quail on Toast. Escarole Salad.

Frozen Pudding. Klondike Souffle.

Fruit. Cheese. Coffee.

Standard Pale. Haut Sauterne. Pomery and Greno Sec.

Young's Hotel, Boston, January 31, 1898.

There was no set course of toast-giving and speech-making planned, as the local talent are not kept, as they should be, constantly in training for just such events.

Upon calling the members to order while standing beside their chairs preparatory to making an onslaught upon the viands provided, the president of the Association, Leon C. Carter, Esq., requested that all present should join in singing that grand old New England hymn, "America," which was done, and every voice present did its share in enthusing over the

"Land where my fathers died,
Land of the pilgrims' pride,"

every one of the four verses being rendered in a manner worthy of grand opera.

The Rev. F. E. Hamilton being called upon for Divine blessing upon the feast provided, responded in a brief but feeling manner. The banquet being next in order, was at once proceeded with.

We present elsewhere a diagram showing the arrangement of the tables and the location of the members and their guests.

After the dinner had been happily disposed of and cigars passed around, the speech-making of the evening was begun by President Leon C. Carter, who said:

I shall not impose on the patience of the gentlemen present this evening with any lengthy remarks, notwithstanding my fondness for oratorical efforts, and of which I have been reminded at the last two or three meetings of the directors, as I feel personally, and am quite sure I express the sentiments of all present, almost impatient to hear from our distinguished guests.

The past year has been one full of anticipation, but in the case of many, has failed of large realization. We enter 1898, however, with a different outlook. Nature has never been more bountiful in her gifts. "Gold, gold from the mountain, and gold from the mine."

The toiler in both field and mine has been blessed with the full fruitage and reward of his efforts. At no previous period in our history have the farmers received so large a percentage of their labor as in the past two months. Furthermore, in view of the fact that our wonderful production of material and manufactured goods, "so immense that we are the wonder and envy of the whole world," and that the present year will eclipse all that have preceded it, both labor and capital should receive their reward after this long period of waiting.

We are a wonderful nation, and as yet only in the kindergarten department of trade conquests. As an Association, we are growing in good fellowship, and in some departments substantial results have been the reward. A continued unifying of mutual interests will produce the object for which we exist as a body.

I promised myself, however, not to trespass upon your time, and the interests of the Association may and will be discussed at our monthly meetings, as subjects of importance may develop from week to week.

At the conclusion of his brief speech, President Carter called upon His Honor, Josiah Quincy, Mayor of Boston, who, while recognizing the fact that Senator Frye might naturally have been expected to lead the procession, said in substance, that as mayor of the city he warmly welcomed to Boston the guests of the Association who were not "native and to the manner born," and then said he would take a present opportunity of addressing the business men and those present interested in the future of Boston as a city, on the matter of "the better regulation of the city's financial problem," having only recently introduced into the legislature a bill calling for a board of estimate and control. He spoke at length upon the purposes, and presented many arguments in support of that bill, which was of interest to all the merchants present.

The president, at the conclusion of the mayor's remarks, then introduced the star of the evening, as far as oratory

Digitized by Google

was concerned, United States Senator William P. Frye, of Maine, who had been invited to deliver before his New England mercantile admirers, the admirable speech delivered recently before the convention of manufacturers in New York. This speech, which was a masterly plea for American maritime revival, and the extension and dominance of American commerce and shipping in every part of the world, is presented substantially herewith, occupying fully forty-five minutes in its delivery:

"I have been requested to repeat, so far as I could, the speech I made a few days since in New York at the Manufacturers' dinner, where President McKinley was the chief guest.

"I will do so, in part, with pleasure; very much as our minister feels when he makes an exchange of pulpits and can use an old sermon.

"Your interests, too, are identical with that association in New York. The purpose of each is to seek ways and means to open up foreign markets.

"You and I know the absolute need for that now. Our production from this time forth will exceed our demands. If we do not find foreign markets then this great country must begin to crawl, crablike, backward.

"God scattered with a prodigal hand his gifts to our beloved country. A seaboard almost limitless in extent, equipped with splendid and safe harbors, mighty rivers, arteries of trade stretching away across the continent, great lakes planted right where commerce seemed to demand them; boundless forests, mountains of iron, coal enough for the world, gold, silver, copper—every mineral and every metal man needs.

"We have made reasonable use of these gifts, especially since the civil war closed and peace resumed her benignant sway. Agriculture, mining, manufactures, have advanced by leaps and bounds, and our progress has been the marvel of the world. We now lead the nations.

"But four years ago we had a new teacher. He was terribly severe in his discipline, too. The purchasing power of our people was most seriously crippled, and consumption fell off one third. Now, that taught you gentlemen a lesson. What was it? No longer contented with the home market, a determined advance was made upon the foreign market. With what were you confronted when you tried it? An enemy most powerfully entrenched in power all over the world.

"Great Britain, France and Germany, with swift steamship lines making regular trips to every commercial port in the world, with banking facilities and credit systems established, highest commercial agencies, all the appliances for successful trade, and with a fiercely aggressive policy, not only to maintain what they had, but to extend it still further. In the East to-day you see the result. Now, how could you go ahead to scale such barriers as these?

"Gladstone, a quarter of a century ago, said: 'Our daughter beyond the seas may some time or other overtake her mother.' Suppose he should speak to-day, what would he say? 'Our daughter beyond seas has overtaken her mother, as she has distanced her in the race, and can only see her now by looking backward from the dust raised by the winds of our own magnificent industries.'

"We have the best home market in all the world, our people consuming per capita at least one-third more than any others. You are trying to reach another market. The first market you are trying to reach is the market of the Orient. You don't purpose to leave that to be closed against you. Is there any way you can shorten distance, reduce freight, lessen time in your search for the Orient market?

"Let the Nicaragua canal be constructed by the United States, and you have got it. I say, by the United States, because the government can construct that canal for one-half what any private corporation could do it for unaided.

"How far are you from the Orient to-day, as compared with your competitors? You here in Boston are from 3000 to 4000 miles farther off from Japan, from China, from India, from the south-west coast of South America than Liverpool, your great competitor.

"The moment that Nicaragua canal has been constructed Boston is as near Hongkong as Liverpool is, 1200 miles nearer the nearest ports of China, 1900 miles nearer Japan, 1000 miles nearer Australia, nearer British India, and 2700 miles nearer the western coast of South America. I think Yankees can take advantage of all such things as these.

"Look at it from a domestic point of view. That canal would bring Boston, New York and San Francisco and the mouth of the Columbian and the Puget Sound nearer to each other 10,000 miles. It would shorten the distance from the Columbia River to New York by steamer from 50 days to 20. It would shorten the time by sail from 120 days to 40 or 50 days. It would reduce the freight at least one-third. It would save every farmer in the Northwest $2 on every ton of wheat shipped, and an equal saving on all classes of freight.

"Will you say, then, that I am a dreamer when I say that there will be in the United States a quarter of a century hence a mighty empire in population, in wealth and in industries?

"I want this magnificent assemblage of men to use their powerful influence on the Congress of the United States to pursuade it at the earliest possible day to build this canal."

"There is a treaty pending in the United States Senate to-day for the annexation of the Hawaiian Islands. You are business men, and I am not going to sentimentalize with you.

"You are hunting for markets? Do you want to lose that one? Well, if the United States Senate does not give a two-thirds vote in favor of annexation you have lost it. Why do I say that? I say that if the treaty is not ratified by the United States Senate in less than a year the Hawaiian Islands will be under the protectorate of Great Britain.

"Your Nicaragua Canal, which is certain to be built, would more than tenfold increase the value of those islands. They look right exactly into its western mouth. In the hands of an enemy, your canal would not be worth a cent; would be utterly useless to us. In our hands, with a naval and coaling station there, we could protect that canal and our entire western coast against the world.

"Now, will you help us in the Senate?

"Gentlemen, if I were a dictator with absolute power in this republic, I would build the Nicaragua Canal, I would annex the Hawaiian Islands, I would aid in the construction of a railroad from our southern border down to Terra del Fuego, I would establish swift steamship lines to China and Japan, to Australia, and to every commercial port in South America, and then, by reciprocal treaty or in any other lawful way in which it could be done, I would participate largely in the trade of the Orient, and I would take entirely the trade of Mexico, of South America, and of the Central American states by the free admission of all our goods into them.

"Costly, say you? Yes, costly. There was never anything worth purchasing yet that did not have its price. Costly? Not so costly as to find yourself decreasing in profit from year to year, and decreasing in demand at home from year to year; cutting down wages of your intelligent workmen from year to year and finally degrading and reducing them to the condition of the workmen of Europe. Why, gentlemen, that is so costly that it might—it might, I say—risk the life of the republic itself."

Senator Frye next turned his attention to the merchant marine of our country:

"You cannot hope for success in foreign markets until

Digitized by Google

you become the carriers of your own merchandise, until you have regular fleets carrying 'Old Glory' to every port in the world.

"Fifty years ago Great Britain was trying to solve this same problem. She determined that trade follows the flag, and decided to establish and maintain great fleets of fast steamships to every port in the world, and to this day she has never wavered, nor had occasion to waver in that policy. Her exports are to-day perfectly enormous as the result.

"The result justified Great Britain to the fullest possible extent. To-day she owns one-half of all steam and sail that navigate the world's oceans. What is your condition? It is the most humiliating and mortifying that man can conceive. It shames every man who has the blood of American patriotism in his veins. It is a disgrace. It is a crime against the American people. In 1818 you had 1,000,000 tonnage and carried 86 per cent. of your exports. To-day you carry none worth mentioning.

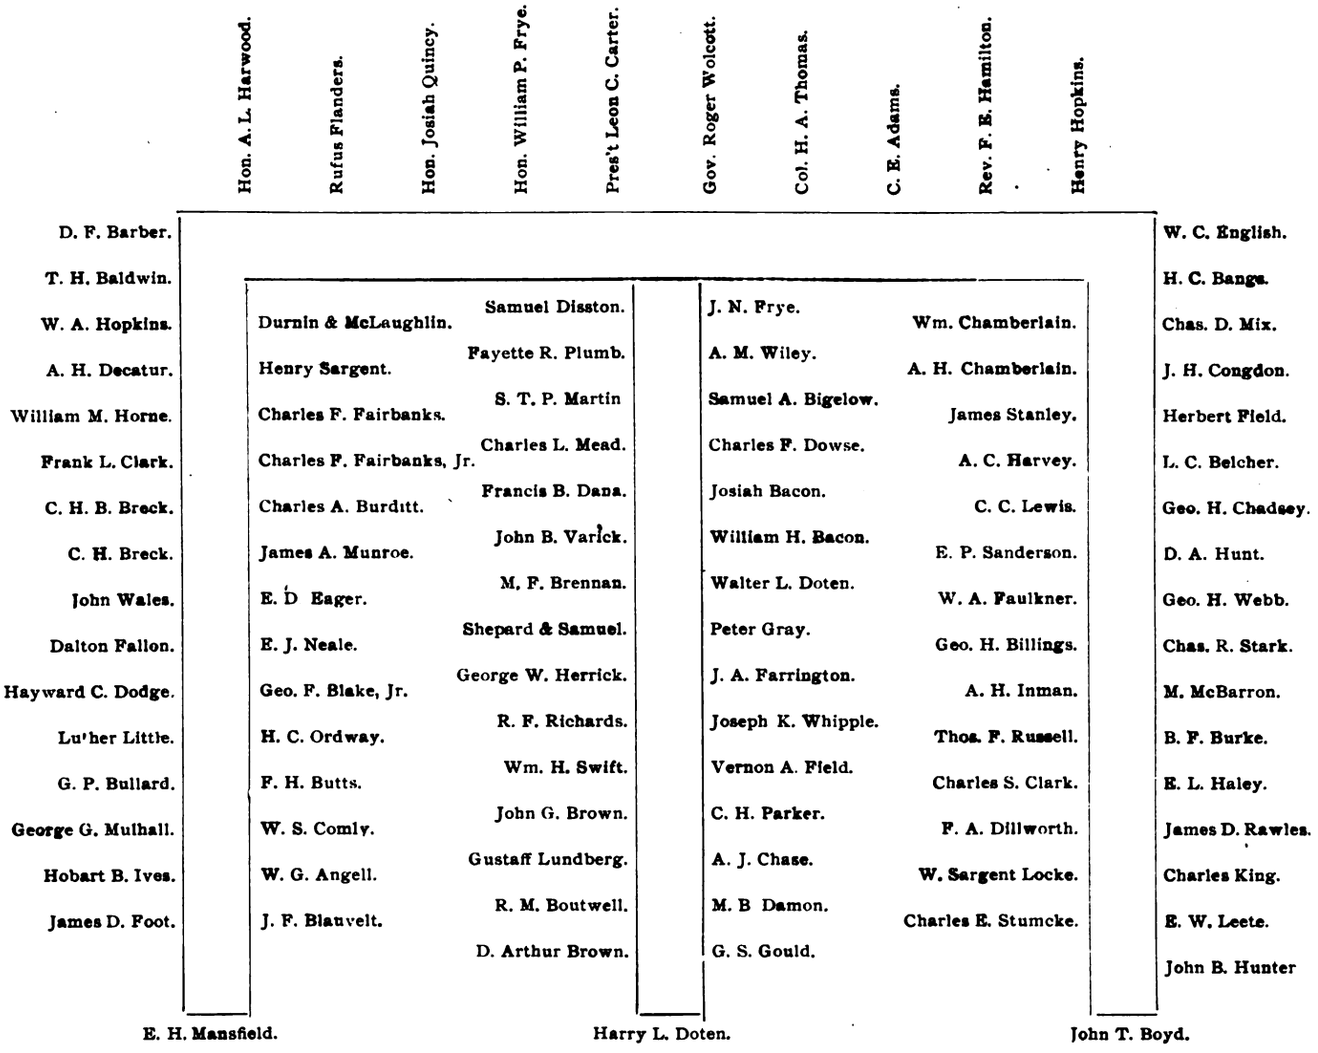
"You pay the freight.

"What are the causes? The free trade theorists say the tariff. Theorists stick to theories and say: 'Damn the facts!' There is no sentiment in business. Exports have increased under the tariff.

"The want of all protection on the ocean did it; that's what did it. In the old days we protected our shipping. The people then did not stand in such awe of Great Britain as you and I do to-day. The fathers saw Great Britain carrying almost all our water freights. They immediately concluded that it was time to stop it. And stop it they did. They put a duty on foreign bottoms. They said that goods brought in American ships should be dutiable 10 per cent. less than in foreign ships. They put a tax of six cents a ton on American vessels and a tax of about 50 cents a ton on foreign craft. Why, they didn't care a snap about Great Britain, did they, or her retaliation?

"We soon practically owned the ocean. We were proud. We were successful, and we concluded we could surrender.

"Great Britain immediately took the advantage. Great Britain was looking out for herself, as she always does. She doesn't have any of our humanitarian ideas as to her duty to other foreign nations. She is as wise as a serpent and not as harmless as a dove.



"Since 1849 our ships on the ocean have been with absolutely no protection whatsoever. They have been handicapped in every way. It cost 30 to 50 per cent. more to maintain them, consequently where a foreign ship can carry goods at a profit for $5 say, it would require a charge of $7 on our ships to cover even expenses.

"There is only one way under the light of the sun to restore our American marine. That is for the government of the United States to put its hand in its pocket and pay the cost of restoration. Our ships to day are unprotected, competing against others protected and encouraged."

Regarding a new tonnage tax the senator talked at some length, saying he hoped to see a bill reported to Congress that would answer the purpose of a discriminating duty to the degree that it would help our shipping a great deal more than it is helped now.

Every time one of the American line steamers goes into Southampton she has to pay an aggregate tonnage tax of about 8½ cents a ton, or four times what the English steamers pay here. In France the tonnage tax amounts to about 18 cents a ton.

"The result of this is," said Senator Frye, "that at pres-

Digitized by Google

ent we are practically paying a bounty of about 16 cents a ton to the steamers of the French line and about six cents a ton to the various English steamers.

"About eight months ago a committee of the leading shipping men in the country called on me at Washington and we had a conference relative to a bill to amend the taxation laws as regards tonnage. The committee was a sub committee, and I understand it is about ready to report to the general committee of shipping men a bill for the raising of the tonnage tax.

"I do not know what the provisions of the bill will be exactly, but my understanding of it is that it will raise the tonnage tax enough to materially help the American merchant marine.

"I don't care for the cost of any action if it will restore American shipping," concluded the speaker, amid cheers.

Senator Frye was greeted with tumultuous cheers as he rose to speak, and could not have asked for an audience which more thoroughly hung upon every word, who were enthused by his convincing arguments and so enthusiastically applauded every telling point he uttered.

Senator Frye speaks entirely without notes, especially upon a subject like this, which has engrossed his deepest thought and pronounced convictions for many years. He makes his points in a manner that carries conviction with it, having an excellent voice and thorough command of language. He says what he has to say because he has opinions behind it, and listening to him becomes a pleasure subject to no necessity for giving him a time allowance. He knows, like an old hand at the business, when he has said enough. It was an object lesson in oratory to hear him give statistical information from some hidden corner of his brain, reaching back to the last quarter of the eighteenth century, without so much as a slip of paper to refresh his memory by. An old Hardwareman present said he'd bet "he could carry the new file list in his head," which he said he had found "was anything but dead easy."

Among the invited guests who were expected to add to the pleasures of the evening were: Hon. Roger Wolcott, Governor of Massachusetts, and Hon. H. A. Thomas, postmaster of Boston. Because of the inconveniences attending the storm and through a pressure of other matters, they were unavoidably absent. The speaking was brought to a close by the delivery of a short address by Charles E. Adams, president of the Massachusetts Board of Trade, who referred especially to the monetary convention at Indianapolis, to which he had been a delegate, representing the board of which he is president. The dinner was in every essential particular a great success. Much of the responsibility for its innumerable details fell upon the secretary of the organization, John T. Boyd, who acquitted himself in a manner so thorough, as to merit the praise due to indefatigable attention to his manifold duties.

The New England Iron & Hardware Association was organized June 14, 1893, and incorporated in 1894.

The officers for 1897–1898 are as follows:

Leon C. Carter, President.
(Dana Hardware Co., Boston.)
H. C. Bangs, Vice-President.
(Congdon & Carpenter Co., Providence, R.I.)
John T. Boyd, Secretary.
(Yale & Towne Mfg. Co., Boston.)
Chas. H. Breck, Treasurer.
(Joseph Breck & Sons, Corp.)

The present number of stockholders is fifty-two, each representing a separate firm, company or corporation.

The St. John (N. B.) Iron & Hardware Association gave its third annual dinner at the Hotel Dufferin, on the evening of January 19th. The invitations were very unique in their way, coming in the form of a hinge, interleaved with the menu, programme of toasts, etc.

Carpet Sweeper Co.

Under date of January 21, 1898, the Bissell Carpet Sweeper Co. make the following announcement to the trade: "In our previous announcements of the change in prices on our high-grade Cyco Bearing Sweepers, we overlooked mentioning the reduction in price that had been made on the original Grand Rapids, and which we are now supplying under the brand Bissell's Standard. It can be said for the original Grand Rapids, that no sweeper ever put on the market equalled it in popularity or selling qualities, and this claim is fully sustained by the fact that there were more Grand Rapids sold during the past fourteen years than all other makes combined. The only change that has been made in the original Grand Rapids is the change of the name to Bissell's Standard; hence you

will appreciate the value we offer you when we quote this justly celebrated sweeper at the low price of $20 per dozen in japan trimmings, former price $24, and $22 per dozen in nickel trimmings, former price $27—subject to rebates for quantity. Bissell's Standard is second only in quality to Bissell's Cyco Bearing Grand Rapids, and for a first-class sweeper to retail at a moderate price, in connection with our high-grade Cyco machines, nothing on the market approaches the Standard or original Grand Rapids. Of course, we need not say to you that no sweeper stock would be complete without our latest improved machines, containing Cyco bearings and dust proof axle tubes, as these goods

represent the highest point of mechanical perfection yet attained in a carpet sweeper, and are as distinctive in their class as chainless wheels, as well as being the only sweepers on the market that are sold at fixed retail prices, thus making the dealer's profits absolutely secure. Bear in mind, too, that the price of the Cyco Grand Rapids, jap., has been reduced from $24 per dozen to $22, and all other high grade Cyco sweepers, nickel trimmed, from $27 per dozen to $24—subject to rebates for quantity."

Recent Trade Publications.

Stanley Rule & Level Co., New Britain, Conn,, and No. 107 Chambers Street, New York, have just issued their new and revised catalogue for 1898, which is the most complete and comprehensive they have yet issued, covering as it does all the latest labor-saving tools recently placed on the market by this progressive company. The catalogue now before us, while following generally the characteristic style of their previous catalogues, forms a pamphlet of nearly 70 pages, well printed and fully illustrated, with clearly defined descriptions of differences between styles of goods at varying list prices. The boxwood rules are attractively shown, printed in natural color of boxwood, all the brass parts being bronzed so that the metallic points of difference, as between a "rule" or "square" joint and a "double arch" joint are seen at a glance, and assist materially in making a selection for stock. We note a number of improvements, which is a noted feature of the "Stanley" production. On account of increased strength and accuracy, only "proved level glasses" are used in the manufacture of all their plumbs and levels; and the proved glasses take the place in their regular stock instead of the ordinary kind. All the Bailey and other iron spokeshaves are now made with a hole in each handle, by which they may be hung up over a workbench when not in use. Their Bailey iron planes, Nos. 3 to 8, will now be furnished if so desired, with "corrugated bottoms," without additional cost, if so specified in order. This catalogue should be in the hands of all "up-to-date" dealers, either in this country or abroad, and will be forwarded upon request.

The Brown & Sharpe Mfg. Co., Providence, R. I., have published a copy of the new edition of their catalogue. This has been thoroughly revised, and contains 437 pages, which are twenty more than are found in the preceding volume. The large number of tables that it contains makes it specially valuable to the workman aa a book of reference. As will be noted in a colored inset in this work, the principal additions this year to the machines and tools they regularly manufacture, are: Automatic cutting-off machine, automatic screw machine, automatic turret forming machine, belt polishing machine, universal grinding machine, improved No. 2, 60-in., arbors for face milling cutters with inserted teeth, face milling cutters with inserted teeth, inside micrometer gauge, micrometer calipers Nos. 9 and 11, micrometer depth gauge, screw slotting cutters ground for clearance, slide caliper rule, spiral gears, tools for use in screw machines, lists added to, twist drill and steel wire gauge No. 776. These catalogues are mailed upon application, to any address without charge, or are furnished by the Hardware and supply dealers.

The Aluminum Sign & Novelty Co., Columbus, Ohio, have issued their illustrated catalogue and price list No. 6, showing their extensive line of aluminum sign letters, street signs and house-numbers, brass drum and sill signs, bar and trade checks, etc. In a note of introduction they say: "Aluminum letters are now so widely used and favorably known that no introduction seems necessary in presenting this section of our 1897 catalogue to our agents and the trade in general. You will find in these pages, prices lower than we have previously quoted, and cuts which illustrate our line to better advantage than any of our previous issues. If you are not already equipped with one of our outfits, we would be glad to receive your order for the one most adapted to your needs. Either of these cases will be sent you C. O. D., with privilege to examine on receipt of one-fourth the price to cover cost of transportation, if not accepted."

Under the heading "Cycle Sundries," the Smith & Egge Mfg. Co., Bridgeport, Conn., are publishing a handsome little catalogue showing their line of goods for bicycle purposes. Among these are bicycle wrenches, sprocket locks, cycle locks, "The Club" toe clip, the "Giant" toe clip, cycle coasters, lamp brackets, screw driver and nipple grip, etc. These articles are all illustrated, and prices and other information concerning the same given in full. In a note of introduction to the trade, the company say: "The success of our business in Bicycle Sundries has been obtained by careful attention to the selection of material, and improved methods of manufacture which have ensured uniformity of quality in our products. The demand among riders for our sundries demonstrates this fact. For the season of 1898 we have added to our line improved Wrenches and toe clips. Although lower prices are the rule, yet the high standard of quality will not be impaired. Prompt attention will be given all enquiries, and samples will be furnished to reliable houses. Estimates made on all kinds of sheet metal specialties."

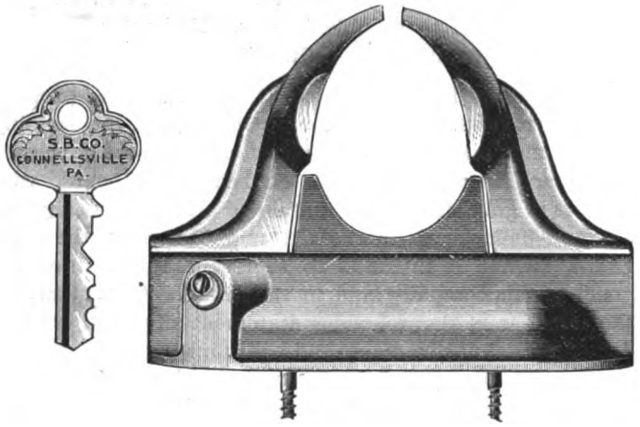
The estate of P. D. Beckwith, Dowagiac, Mich., proprietors of Beckwith's famous Round Oak Stoves, are sending their friends one of the handsomest calendars we have seen this year. Printed in colors on heavy cardboard, with borders of gold, is a reproduction of a very famous painting, and underneath is the title: "Always in the Vanguard," which is intended to represent the position the goods of this company hold in the trade. Accompanying the calendar is the following statement of facts: "New decorations, improvements and additions to the Round Oak family have been perfected for 1898, which will, we believe, surprise and highly please all customers, making it desirable for them to defer any arrangements for the season of 1898 until the new attractions are exhibited to you by our travelers."

P. J. Conroy, Island Avenue and Seventy-fifth Street, Philadelphia, Pa., has issued an attractive little catalogue for 1898 of his Automatic Refrigerator Door Fasteners and Locks. This shows his full line, with illustrations, accompanied by descriptions and prices. Mr. Conroy calls special attention to the fact that his door fasteners and locks "are in use by the largest manufacturers, and are for sale by all of the leading Hardware dealers in the country."

The Logan & Strobridge Iron Co., New Brighton, Pa., have issued some leaflets illustrating their coffee mills, fruit presses, iron toys, and a number of hot weather specialties, among which are ice chisels, ice hatchets, ice shredders, lemon squeezers, etc. A number of these articles are new, and possess many attractive features.

The Miller Lock Co., Frankford, Philadelphia, are sending their friends a catalogue illustrating the locks manufactured by them. This catalogue is well printed on heavy paper, and the various illustrations stand out in fine shape. It is bound in heavy boards, and makes an attractive addition to the literature of any Hardware concern.

We have received from the Parlin & Orendorff Co., manufacturers of agricultural implements and vehicles, Canton, Ill., their illustrated catalogue G, covering the lines which they produce. It is thoroughly illustrated, giving prices, etc.



The American Coffee Co., Brooklyn, N. Y., are erecting a new power house in connection with their plant, which is about 70 feet wide and 120 feet long. The power house and boiler house have brick side wall construction and steel supports and roofing. Adjoining the boiler house is a coal bunker about 20 feet wide, which carries the supply of coal in a steel bin about 30 feet above the ground. The whole plant has been designed with convenience and economy in view, and when completed will be a complete plant which can be economically operated. The contract for furnishing and erecting the steel framework of the building has been let to the Berlin Iron Bridge Co.

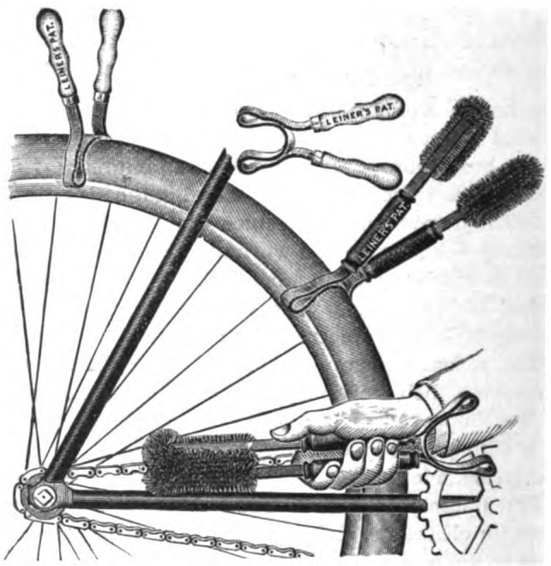
NEW GOODS AND SPECIALTIES.

Slaymaker-Barry Co.'s New Bicycle Stand.

The Slaymaker-Barry Co., Connellsville, Pa., John H. Graham & Co., general sales agents, No. 113 Chambers Street, New York, are placing before the Hardware trade, and dealers in bicycle sundries, a Self-adjusting Bicycle Lock Stand that is certain to be approved and appreciated

KEY, FULL SIZE. SIDE VIEW, HALF SIZE.

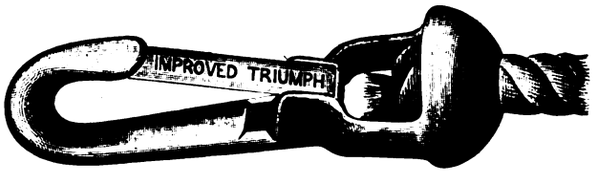


by the cycle riders of the country. We give herewith several illustrations showing parts of this automatic device, which, by the use of Pin Tumbler Lock, combines with its perfect security, the absolute prevention of all unauthorized removal of stand from its fastening, the fastening screws being completely covered when the wheel is locked in the stand. All the working parts being of wrought steel, and the springs formed in shapes giving additional security, it gives evidence of exceeding durability and strength, the grip on the wheel being firm and close, and positive in character. The adjusting jaws are so shaped, the size of the tire makes no difference, the space between jaws being

3⅜ inches, with a self-adjustment of ¼ inch at a time, until the jaws are entirely together, making the space sufficient to grasp firmly the smallest racing tire. It would seem to be a very desirable bicycle stand for securing wheels conveniently in public places or for home use. As the small and light keys belonging to the locking device are made in a very large number of changes, it is claimed to be extremely difficult for anyone unprovided with the proper key to remove it from its security.

Leiner's Bicycle Appliances.

M. Leiner, No. 1267 Boston Road, New York city, is manufacturing with great success, a line of bicycle articles, which, with their application, can be readily learned by an examination of the comprehensive illustration here shown. These comprise Leiner's patent bicycle tire brush, which cleans and polishes the tire and rim at the same time without trouble or soiling the hands; is made to fit any size wheel, and the material being of Russian bristles, can be washed out in hot or cold water without injury. It also shows his bicycle chain brush, made of pure bristles only, and which will clean both sides of the chain at one operation, and can be washed in hot or cold water; Leiner's patent tire scraper, which cleans neatly down to the rim, while a pressure on the handles adjusts for easy or tight movement on any size tire; and Leiner's duplex patent chain



brush and tire scraper combined. This brush cleans both sides of the chain and the inside of the links at the same time, and can be washed out with hot water, soda or soap. The brush and scraper work by a double spring action, which is regulated by pressure on the handles. In regard to these most excellent articles, the manufacturer says: "The tire and the chain brushes were brought out late last season and had a phenomenal sale wherever shown, and are sought for from most of the trade centers of the globe. The tire scraper and the Duplex (chain brush and tire scraper combined) are just now completed, and no less success is expected for them. They, as well as the former, possess every desirable feature without any drawback. Each of them is warranted in every respect. These various articles, though intended to a certain extent for similar purposes, will not by any means interfere with the sale of each other, being different in feature and price. The Tire Brush, for example, will always be preferred by those who delight in having their mount in an immaculate condition, as it can always be used on the rim, frame, spokes and other parts, while each of the others has its own special merits. However, variety in any line is a stimulator to trade." In addition to the articles here shown, Mr. Leiner manufactures many novelties in the brush line, among

Digitized by Google

which are wire twisted brushes for cleaning tumblers, milk jars, a very unique shutter cleaner, etc. Full information as to these attractive articles will be furnished by application to the manufacturer at the address given above.

The Triumph Snap.

Covert's Saddlery Works, Farmer, N. Y., are placing upon the market with success the Triumph Rope Line

Snap, shown in this connection. It is explained that in attaching the rope to the Snap, it is only necessary to insert the rope, tie a knot in one end, and draw back the rope into the socket provided for the knot. The snaps are made in different sizes suitable for rope, from one quarter to three quarter inches in diameter. The manufacturers state that the Snap is largely used in the manufacture of rope plow lines.

Parker Ice Tool Co.'s Combination Tool.

The Parker Ice Tool Co., Worcester, Mass., are, for their first season, putting upon the market two new and very practical and desirable Ice Shavers. Figure 1 shows their family combination Shaver and Awl combined. This is

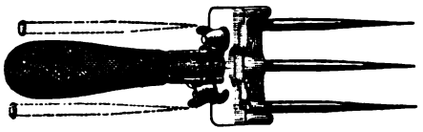


FIG. 1.

described as certainly an excellent ice-pick as well as shave, because of its practibility; can be quickly changed from one to the other by simply turning the thumb nuts and swiveling of the top, allowing the steel points, one or all of them to be removed at once. An excellent feature is that when used as an ice-pick there is but little danger of puncturing the ice box, and if you wish to crack a piece of ice, you can do so without reversing ends of the tool, as in the case with single picks. Besides, when you lay it down it stays where placed, because it cannot roll, and if the

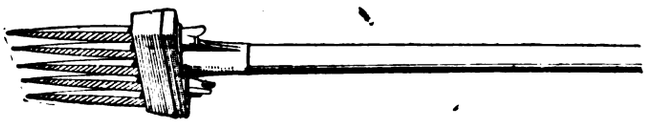

FIG. 2.

points ever break, a new one costs only 5 cents and can be had of the dealers or manufacturers. The ice-cart men size, Fig. 2, is equally as ingenious in its mechanical construction, and made upon scientific principles that leaves the ice in flakes when shaved. The especially desirable feature is that if by any accident any part of the tool is dulled, it is not necessary to wait until returning to the ice depot or house to sharpen. All that is required, is to have an extra set of points upon the cart, and can easily remove the dull and replace with a sharp tool. This will be seen

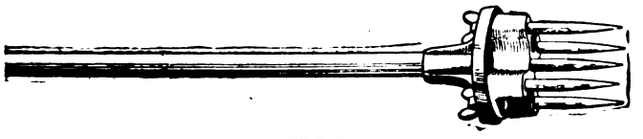

FIG. 3.

to be an important feature whenever sharpening is necessary, either upon the route or at the repair shop. These points are three square and all angles sharp. The shaves have been thoroughly tested by local dealers for one season, and spoken of by them as first class in every respect. The Parker Ice Tool Co. are expecting a large demand. They also make several other patterns of ice tools, from the cheap single pick that they sell large quantities of to ice dealers that supply their customers with picks, and with these they will place upon the handles the name of the ice company if especially ordered, either nicely nickeled or tinned. They also make a high grade awl for ice cart use, and have taken special pains to make them of the

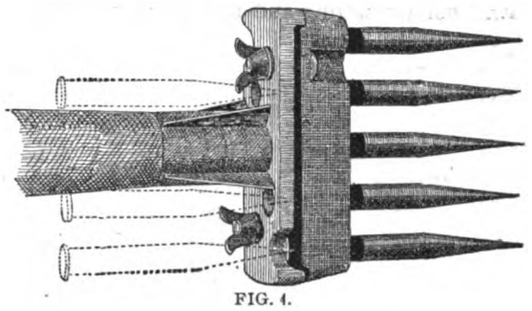

FIG. 4.

best quality of steel and spring tempered by expert mechanics. The Parker crusher for ice cream manufacturers' use, Fig. 3, has been upon the market for five years, and is evidently an excellent article. They also manufacture two smaller sizes similar in every way for family or other uses. These can be changed into a chisel when not wanted for crushing ice. In addition to the tools mentioned they make an excellent chisel upon improved ideas for uses upon ponds, Fig. 4. Catalogues can be had by addressing them.

Scattergood Mucilage Pot.

This is a very handy little article for the desk of any business man, and has just been introduced to the market by the Scattergood Co., No. 491 Philadelphia Bourse, Phila-

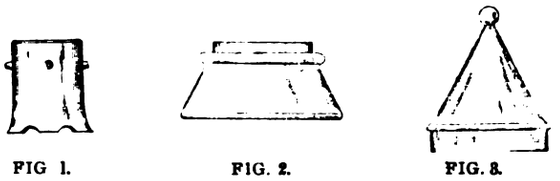

FIG 1. FIG. 2. FIG. 3.

delphia, Pa. Anyone who has experimented through long years of suffering with the average old-fashioned mucilage bottle, will hail this innovation with pleasure, as the brush is always where you want it to be, and the mucilage is kept within prescribed limits. An examination of the illustra-

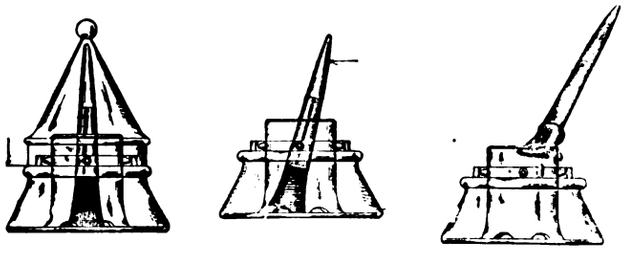

FIG. 4. FIG. 5. FIG. 6.

tions herewith shown will give a very good idea of the article itself. In Fig. 1 is shown a glass tube which sets into the bottle; in Fig. 2 the bottle itself, and in Fig. 3 the pyramidal glass top, which serves not only as a cover, but to keep the brush in position, and from being covered with mucilage throughout its whole length. The article com-

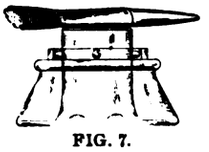

FIG. 7.

plete is seen in Fig. 4; without the cover in Fig. 5; in actual use in Fig. 6, and with the brush laid away in temporary safety in Fig. 7. In active operation, Fig. 1 is placed carefully in the centre of Fig. 2, the mucilage is poured in through the inner well, the brush put in, and the cover placed over all. If care is taken in filling, covering and uncovering, and wiping the surplus mucilage from the

Digitized by Google

brush, the fluid will not evaporate, and will always be clean and sweet, ready for constant use. Liquid glue can also be kept in these pots without evaporation, if directions are carefully followed.

Bennett Combination Saw Tool.

We are pleased to present in this connection illustrations of a Saw Tool for setting and filling crosscut saws, which

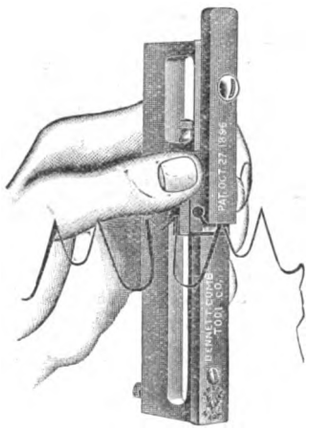

FIG. 1.

is now ready for the market. It is described as very simple and durable, not at all liable to get out of order. Everyone acquainted with the timber business knows something of the importance of the crosscut saw, but few realize the enormous quantities of them that are in constant use; and there is one thing that the woodsman does realize. It is, that while there are many excellent crosscut saws made, there are many that after having been used a short time, are not in a condition to do good work. "Often saws are thrown aside and condemned as unfit for use when the real trouble is there has been no proper tool for putting the saw into shape. The importance of having all the teeth set alike is easy to understand. Unless they are set perfectly

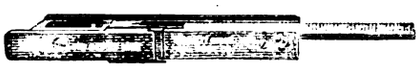

FIG. 2.

some of the teeth will make a groove outside of the regular path, and the saw will drag and jump. When the saw is properly set, the cutting teeth will sever the fiber on each side of the groove, and the raker teeth will carry out the cut fiber. In a properly set and filed saw, the sawdust is coarse, fine dust only being produced by irregular setting of the cutting teeth. The proper set of a saw for the different kinds of wood in which it is to be used is learned more by experience than anything else. As every woodsman knows hardwood, especially if frozen, demands very little set, but every tooth needs to be the same." The Bennett Combination Saw Tool, manufactured by the Bennett Combination Saw Tool Co., No. 159 East Houston Street, New York City, is described as entirely filling this want. Five of the

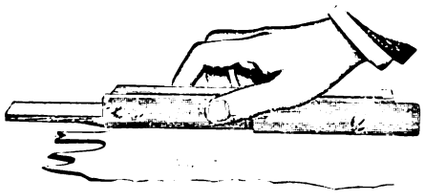

FIG. 3.

illustrations presented with this article are from the one tool. Fig. 1 shows the tool in position to set the tooth, and it is well to remember that each tooth can be set to the one-hundredth part of an inch. Fig. 2 shows the tool in position to side dress; Fig. 3 shows the tool in the operation of side dressing; Fig. 4, jointing to the tooth; Fig. 5, cutting down the raker teeth. As the crosscut saw is used more in the woods than anywhere else, a good feature is the fact that this tool can be used without a vise, or rather a vise can be improvised by sawing two or three inches into a log, then placing the saw into the notch so that the teeth will be uppermost. The blows on the setting member may be given with any strong piece of wood at hand, sliding the saw along into the groove so as always to strike on a solid place. There are several ideas in regard to the best form or shape of a saw tooth. Before the Champion tooth saws came into use, the common V-tooth was the most in use, and many sawyers still prefer to have cutting teeth of this

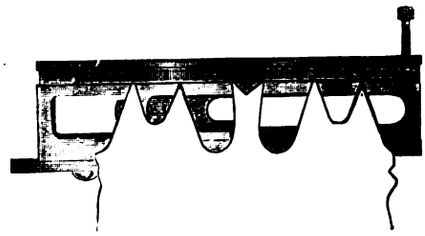

FIG. 4.

pattern. This, however, is a wrong idea, as the cutting teeth should not do any clearing. In all saws equipped with raker teeth, cutting teeth should have the shape shown in Fig. 6. They will cut deeper than any other style and will run easier. With a little practice, anyone possessed with the Bennett Combination Saw Tool can perfectly fit up a saw by following these instructions. Set a saw in accordance with Fig. 1, side dress as shown in Figs. 2 and 3; joint the saw according to Fig. 4. It is not necessary to joint a saw at every filing, but only when the teeth are uneven in length. Cut down the raker teeth as shown in Fig. 5; file the cutting teeth until they assume the shape shown in Fig. 6. To bring this about, the sides of the teeth must be filed first, and the transverse bevel, E, cut afterward.

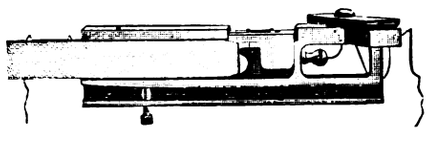

FIG. 5.

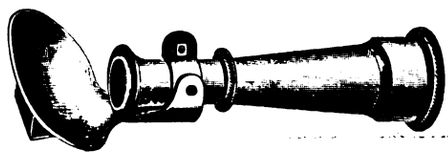

FIG. 6.

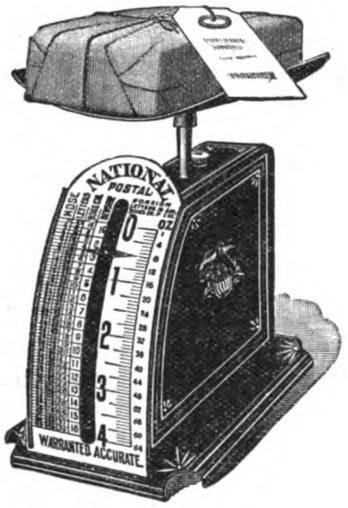
Take great pains not to file away any of the points of the teeth. Then bring the raker teeth to a sharp edge, and be careful not to continue filing after this edge has been obtained. Side dress the saw once more to take off the wire edge, thereby insuring a fine cutting edge."

"Paragon" Lawn Sprinkler and Nozzle

The Ordner Mfg. Co., Cleveland, Ohio, with New York office at No. 394 Canal Street, are placing upon the market the "Paragon" Lawn Sprinkler and Nozzle, illustrated herewith. This sprinkler can be adjusted to almost any nozzle at present on the market. When the nozzle is held in the hand the sprinkler will hang naturally out of range of the stream of water. When the nozzle is placed or dropped on the ground the sprinkler automatically comes into the position shown in the illustration, causing a spray.



In using this device there is no back pressure on the hose, as the device sprays the water after leaving the end of nozzle. The nozzle can be taken up and transferred from one place to another without turning off the water and without getting one's self wet. Placed on the edge of walks the grass is sprinkled without wetting the walks. Flowers can be sprinkled by holding the sprayer on top of the nozzle. The deflector always remains below the nozzle no matter what may be the torsional action of the hose.

Digitized by Google

National Postal Scale.

The National Postal Scale herewith illustrated, apparently well deserves the success it is achieving. It has become one of the necessary fixtures of a well equipped office, and has now found its way very appropriately to the library. In our day of progressive ideas, we have come to regard, "Time saved as money earned," and this is what the Pelouze Scale & Mfg. Co., of Chicago, claim as one explanation for the success of their National Scale. The National indicates instantly the exact cost of postage in cents on letters, merchandise, books and newspapers, from ½ ounce

up to 4 pounds. It also weighs foreign postage. The scale is made for offices in steel, artistically japanned and striped by hand. For the library, it is nickel-plated throughout. There is no tedious maneuvering of a poise on a beam, as in the old style of scale, but it shows the cost of postage instantly, as well as the exact weight. The reasonable price of $3 places it within the reach of all. It is one of those useful contrivances that soon pays for itself, if only in the saving of stamps. The National Postal Scale is warranted to remain accurate. The Pelouze Scale & Mfg. Co., in addition to the National Postal Scale, manufacture an attractive and inexpensive line of family, confectionery and counter scales.

Bush Cutter; Pruning Hook.

The Bemont Mfg. Co., South Glastonbury, Conn., are placing upon the market two excellent tools, the Lightning Bush Cutter and the Daisy Pruning Hook. The Lightning

FIG. 1.—BUSH CUTTER.

Bush Cutter is described as having many advantages over old style bush hooks. It will cut large or small bushes with ease, and is admirable for cleaning hedges along a fence and stone walls. "No bending over," say the makers; "you can stand up to your work and save many a backache." The Daisy Pruning Hook will be appreciated by the

FIG. 2.—PRUNING HOOK.

berry growers and gardeners for cutting out the dead canes and cutting back the growth of blackberry and raspberry vines; for trimming currant bushes, rose bushes and all kinds of shrubbery, and for a thousand and one other things. Full particulars, and terms to dealers can be had by writing the Bemont Mfg. Co., South Glastonbury, Conn.

The Cincinnati Tool Co., of Cincinnati, Ohio, have issued a very handsome catalogue of Hargrave's Mechanics' Tools, in which their line of goods is thoroughly illustrated and described.

In Favor of the Bissell Co.

The following is the text of an important decision of the English Courts, in favor of the Bissell Carpet Sweeper Co. It is a case of acquiring good will in a title or name, which could not be registered as a trade mark:

In the High Court of Justice,
Chancery Division. 1897 B. No. 2906.
Mr. Justice Stirling
at Chambers. Friday the 3rd day of Dec., 1897.

Between The Bissell Carpet Sweeper Co., Plaintiffs,
and
G. Greiner & Co., Defendants.

P. E. Reeve, Clerk of Entries. Upon the application of the plaintiffs by summons dated the 26th November, 1897, and upon hearing the solicitors for the plaintiffs and for the defendants, and upon reading the plaintiffs' statement of claim, and the plaintiffs and defendants by their solicitors respectively consenting thereto,

The Judge doth order that the defendants, G. Greiner & Co., their servants and agents, be perpetually restrained from selling or offering or advertising for sale under the term "Grand Rapids," "Grand Rapids Moquette" or "Grand Rapids Sweeperette," any carpet sweepers not manufactured by the plaintiffs, under any name or description of which the words "Grand Rapids" form part, without clearly distinguishing such carpet sweepers from those of the plaintiffs.

And it is ordered that the defendants, G. Greiner & Co. do deliver up upon oath to the plaintiffs, the Bissell Carpet Sweeper Co., all documents (if any) in the possession or power or under the control of the defendants, their servants and agents which exhibit the term "Grand Rapids," "Grand Rapids Moquette" or "Grand Rapids Sweeperette as the name of any carpet sweepers not manufactured by the plaintiffs.

And it is ordered that the defendants, G. Greiner & Co., do pay to the plaintiffs, the Bissell Carpet Sweeper Co., the sum of two pounds by way of damages.

The Hardware & Iron Dealers' Association of Eastern New York and Vermont was recently organized in Albany, N. Y. The following establishments were represented: McCormick & Dunn, Troy; J. E. Sawyer & Co., Glens Falls; L G. Kingsley, Rutland, Vt.; Albany Hardware & Iron Co.; Guilford Dudley, Poughkeepsie; Norton Hardware Co., of Fair Haven, Vt.; C. F. Drake, Troy; J. T. Johnson, Rondout; Williams & Tanner, Fort Plain, and M. Croissant, Albany. These officers were elected: President, Jas. L. Dunn, of Troy; secretary, Charles H. Turner, of the Albany Hardware & Iron Co.; treasurer, Guilford Dudley, of Poughkeepsie. Dinner was served at Keeler's, on Maiden Lane, and then an inspection was made of the model store of the Albany Hardware & Iron Co., on State Street.

The Grand Rapids Refrigerator Co., of Grand Rapids, Mich., on page 46 of this issue, present their new designs for 1898, of the famous Leonard Cleanable Refrigerators. This company have been in the market for so many years, and have won so enviable a reputation, that little need be said in regard to the quality of their product. Special attention is called to the movable flues, the advantages of which will be seen at a glance. Among the other special points made by the manufacturers, are the air-tight locks, solid iron shelves and the all-metal ice rack. One of the mottoes of this concern is "Eight Walls to Save the Ice." Full details, with prices, etc., will be sent upon application.

At the recent election of the Hardware Merchants' & Manufacturers' Association of Philadelphia, the following gentlemen were unanimously elected to serve during the coming year: President, James H. Ritter; vice president, Hugh McCaffrey; secretary-treasurer, T. James Fernley. The board of directors is comprised of William W. Supplee, Samuel Disston, John R. Griffith, Charles M. Ghriskey, William C. Peters and Thomas Devlin.

Another File Plant for the Nicholson File Co.

The circulars below, copies of which are just at hand from the offices of the Nicholson File Co., of Providence, R. I., and the McClellan File Co., Saginaw, Mich., respectively, explain themselves, and will interest the Hardware trade as recording another extensive addition to the plant of the Nicholson Co.

Office of Nicholson File Co.

We herewith beg to inform you that on Jan. 31, 1898, this company, operating through the Great Western File Co., of Beaver Falls, Pa., its Western branch, concluded a lease of the real estate, machinery and good-will of the McClellan File Co., situate in Saginaw, Mich., for a term of years, and will hereafter control the product of this company.

We have not as yet definitely decided whether or not to resume operations immediately at the Saginaw factory. For the present, however, we propose to fill all orders for the McClellan brand of files and rasps in hand by the McClellan Co. at the date of its lease, or which may come to hand in the near future, as the result of its long established reputation, from our Great Western factory; and in the execution of all orders for such brand every care will be taken and every attention paid to the maintenance and improvement, if possible, of the present excellent quality of that brand.

The services of Mr. William McClellan, the founder and manager of the McClellan Co., have been engaged for the direction of the manufacture of the McClellan brand at our Great Western works. The many friends of Mr. A. J. McClellan will be pleased to learn that he will continue to solicit their business in the capacity of a representative of the McClellan and Great Western brands. This, in addition to the fact that our Great Western works leased the entire good-will of the McClellan Co., will assure to the friends of the latter company a continuance of the careful attention hitherto bestowed upon their needs in files and rasps.

In accordance with the policy in vogue at the factories of this company, adopted after careful study and an experience in file manufacture extending over thirty years, the practice of recutting files, as engaged in by the McClellan Co., will be discontinued.

Trusting to be accorded the full support of the trade in our assumption of the lessor's interests, we are,

Very respectfully,

NICHOLSON FILE CO.,

Samuel M. Nicholson, Prest.

Providence, R. I., Feb. 17, 1898.

Office of McClellan File Co,

We take this opportunity to state that on Jan. 31, 1898, the entire real estate, machinery and good-will of this company were leased for a term of years to the Great Western File Co., Beaver Falls, Pa., branch of the Nicholson File Co., of Providence, R. I.

The lessees have not as yet determined whether or not to continue operations at this factory. For the present, however, they propose to fill all orders for new files in our hands at the date of our lease, together with such as we may be favored with in the near future, from the Great Western factory. Such is the name and reputation of the Nicholson File Co., which operates the Great Western works, that we have little need to assure our friends that every attention will be paid towards maintaining and improving the standard of our brands. For orders in hand requiring immediate attention, our trade will be privileged to specify the Great Western Brand, made in the lessees' plant, in place of the McClellan Brand, should they so desire, at prices at present ruling upon the McClellan brand.

The undersigned will continue to exercise oversight over the manufacture of the McClellan brand as an official of the lessee company; the services of Mr. A. J. McClellan will also be retained in the interests of our brand.

Inasmuch as we have transferred our entire good-will in our business to the Great Western Co., we ask and trust that the support and friendship which you have accorded us throughout our business career will be extended in turn to those who have assumed our interests.

In accordance with the policy of the Nicholson File Co., to whom thorough investigation and an experience for over thirty years as the most successful file manufacturers in America have proved that recutting is not advantageous to either consumer or dealer, we beg to state that the practice of recutting will be discontinued.

Thanking you very sincerely for your past encouragement and support, and trusting for a continuance to our lessees and to ourselves in our new capacity, we are,

Very respectfully,

MCCLELLAN FILE CO.,

William McClellan.

Saginaw, Mich., Feb. 17, 1898.

With this addition to their plant, the Nicholson File Co. now control and operate five distinct factories, with a joint capacity of 6400 dozen, or 76,800 files daily. The Nicholson File Co. have been making additions and increasing their facilities in all of their factories for some time past to enable them to satisfy the domestic and foreign demand for their goods, and the acquisition of this new plant will put them in a position where they can handle their orders with greater ease.

Death of Edward Bernard.

Edward Bernard, who for upwards of thirty years had been the Southern trade representative of the Charles Parker Co., died suddenly on February 3rd, of apoplexy, at his late residence in Brooklyn, N. Y.

He was 68 years of age, and until a decade ago, had been actively before the Hardware trade, since he started as a youth with the old-time commission house of Cox & Wright. Nos. 4 and 6 Gold Street, N.Y., about 1850. The firm friendships made with his Southern customers in those early days have been continued through the succeeding generation, for few men have so thoroughly enjoyed the warmth of friendships long continued as "Ed" Bernard, as he was affectionately known and called by his friends and associates.

He was a man of the warmest impulses, possessing a social and convivial temperament, which continually showed the sunny side of a big heart. He is remembered to-day by those who knew him intimately, as a firm and conscientious friend, a kind and congenial companion—one

Digitized by Google

whose hearty hand grasp gave an honest assurance of loving friendship and sincere esteem.

His early training in the Seventh Regiment, N. G. S. N. Y., always noted for its high military efficiency, was of such a character that at the outbreak of the Rebellion, Mr. Bernard, as captain, organized a company in what was known as the 1st U. S. Chasseurs, Lieut-Col. Shaler, commanding, but being badly wounded in the leg at the battle of Malvern Hill, he was early placed in a disabled condition, from the effects of which he suffered to some extent all his life. Always a bachelor, he had for many years made his home in Brooklyn, with a devoted sister.

Funeral services were given on Saturday evening, February 5th, and interment in Greenwood Cemetery took place on the following day.

Schollhorn Suit Won.

The William Schollhorn Co., manufacturers of Hardware specialties, scissors and shears, announce, under date of January 28th, the following to the trade:

Notice to the Trade: A decision in our favor has been rendered by Judge Townsend of the United States Circuit Court in the suit instituted by us against the Bridgeport Mfg. Co., Willis F. Hobbs, Ellie N. Sperry and Adolf Schatz, for infringement of the Bernard Plier Patent, No. 427,220, owned by us.

The decision of the court is, that the Pliers and Punches made and sold by the above named parties, are an infringement of this Bernard Patent, and therefore the court grants us an injunction restraining them from manufacturing, selling or using any of the infringing Pliers and Punches; and also orders that they shall render us an accounting of profits and damages, for all past infringement.

The court also decides that "the Bernard Plier is a New Tool, with a greater possibility of application of power, and adapted to more extended uses, and that the Bernard invention has produced a much stronger and more effective instrument with a firmer and more even grip than ever made before."

Therefore, we would caution and warn the trade, and others, against manufacturing, selling, or using any such infringing Pliers and Punches.

Yours truly,

THE WM. SCHOLLHORN CO.,
J. J. Henderson, President.

The fourth annual session of the Ohio Hardware Association will be held at the Hotel Chittenden, Columbus, Ohio, on Wednesday and Thursday, February 23d and 24th. Among the many interesting features of the session will be a question box. A large and interested attendance is looked for by the officers.

Review of the Markets.

Hardware: So far, the season of 1898 has opened auspiciously, although the West, under the influences that follow the flush period they have just gone through, are feeling more fully confident of an early rush that will be filled with urgent wants over a territory that for several years has been virtually out of a buying market. In the East the prospects look less lively and more conservative in character. The manufacturers are not booking so many advance orders as their Western brethren, and while they feel sanguine about the season being one more successful than we have lately been accustomed to, it will be at a little later date than they had hoped.

Wire Nails: The general tone of the market in this important staple has been greatly strengthened by the announcement of a settled policy governing the trade for the months of February and March, beyond which date prices are unobtainable, as they may then be dictated by the organization now in process of completion to control the wire and wire nail output. The price adopted and agreed upon by the leading mills is for carload lots f. o. b. mill, either Pittsburg or Cleveland; $1.45 for February and $1.50 for March. New York price for carload lots on dock is $1.60 to $1.65, smaller lots from store being held at 5 to 10 cents a keg advance. Business at the mills is reported as being fully up to the anticipated demand for February delivery.

Cut Nails: There is no extraordinary business being done in this line. Notwithstanding the price is very low at present quotations, demand is only normal and quotations firm. Carload lots on dock, New York, $1.25, and smaller lots from store, $1.30.

Machine Bolts, Carriage Bolts, etc.: This line of goods is having marked attention given to it by the dealers, the prices on this line since the slight advance a few months ago having been well sustained under a steady demand for current wants. The Western manufacturers are fairly well supplied with orders for early delivery. Eastern mills find business a little slower, but the unseasonable weather conditions of late have had something to do with the less urgent demand. Few, if any, other than improved changes in quotations are anticipated by the trade.

Files: At a meeting of the File Manufacturers' Association of the United States, held at the Astor House, New York, on February 3, 1898, it was unanimously agreed to maintain present discounts on the New File List for Canadian trade.

Linseed Oil: The Dean Linseed Oil Co., No. 181 Front Street, New York, under date of February 3, 1898, quote as follows: In lots of less than 5 barrels, 46 cents per gallon; in lots of 5 barrels or more, 45 cents per gallon. The 5-barrel price only applies to deliveries of that quantity at one time. Boiled linseed oil, 2 cents per gallon higher than

Common sense tells us to buy certainty every time, in preference to uncertainty. A reputation for high quality, means high quality not only to-day, but to-morrow—and next day, too. Certainty of this kind is slow in growth; but when it comes is powerful and lasting—goods with a name have an advantage right at the start; they are easy to sell. Our brands of belt—**1846 Para, Double Diamond, Carbon**—are household words all over the country—simply because we have always put into our belts the best rubber—the best duck—the best workmanship—**and everybody knows it.** We want good agents in every town; if we haven't one in yours, it will pay you to write us.

THE PITTSBURG TRADE.

January was a good month in Hardware in Pittsburg, yet it might have been better. If the present cold snap had visited us a month earlier, many seasonable goods would have moved, which the mild weather prevented, and which will hardly go this late in the season.

It is wonderful how hungry manufacturers are for orders, despite the low prices and the fact that they are already fairly well employed. They all have increased their capacity for big output and it takes tremendous quantities to keep them busy. It is this fact which prevents any advance in prices. Very few manufacturers have the backbone to advance until they are satisfied their competitors have all they can do and will maintain an advance. The wire and nail men seem to have the requisite amount of backbone, in view of their prospect of consolidation and the rush of spring orders, and have made a moderate advance, to which we think they are fairly entitled. "Everybody" looks for a good year's business, which will help towards that desirable end. The bank clearings throughout the country show a big increase in commercial transactions for the past month. We believe this is the year we expected twelve months ago, and that it will be all the better for having been held back. LOGAN-GREGG HARDWARE CO.

THE BIRMINGHAM TRADE.

The new year starts off well. January has been a very active month with us, even though our trade in January, 1897, was large; the same month for 1898 is more than ten per cent. increase, and if we can hold out at this rate, 1898 will break the record of all predecessors. We confidently expect a good trade. There is some talk about extending new lines of railroads, and if this is realized, it will create trade and help business. Notwithstanding the winter has been very mild, the coal operators have good orders and are working full time. We learn they are receiving many orders for export. The furnaces also are running full time and find demand for their product. They have learned it is well to export their surplus at least, and now that they have begun this business, we do not think they will give it up. To take the surplus off the market here leaves the trade at home healthy and enables them to obtain a better price. We think that all manufacturers would do well to learn this lesson, and feel that many of them have learned it. American ingenuity, together with the improved machinery, will always be able to hold the field against the competition of the world, and the more we can export and the larger trade balances which will thus be in our favor, will do very much to dispel the delusion that we need more money and cheaper money. Our people in the South are gradually learning that to build cotton mills and send to the markets our great staple in the manufactured condition instead of the raw staple, thus getting 12 cents a pound where they would otherwise obtain 5 to 5½ cents, leaving the difference at home, is what should be done. Last year three large cotton mills were projected in pursu-

ance of this idea, and we look for others to follow. It does not look as if this business would be easily overdone as long as two-thirds off the product has to be exported to find a market. Why not send away the manufactured goods instead? When the many advantages of soil, climate and natural products are considered, it is wonderful that the progress has not been more rapid.

MOORE & HANDLEY HARDWARE CO.

THE COLUMBUS TRADE.

Our business for January was very satisfactory, and the outlook for this month is encouraging. The weather has checked the sale of early spring goods somewhat. With the thermometer bobbing around the zero mark in February, retail merchants have not had much trade, and naturally hesitate about buying as freely as they would if the weather was milder. That same old ground hog was around February 2nd, and he could admire himself in the sun's mirror most of the day.

The writer has a personal dislike for the animal that most people call the woodchuck. In my boyhood days I lived on a farm, and owned a hound, and had great times after rabbits, or anything that went on four legs in the way of game. One day that hound ran a rabbit into a hole at the base of a tree. I, of course, wanted the rabbit and reached into the hole to get him. I was surprised to get hold of a long tail and thought I had found a long-tailed rabbit. I pulled with all my might, but could not pull the tail off, or the animal out. I did the same as the Irishman; I let go to get a fresh hold. The animal decided to change ends, so he could get a fresh hold also. It was a woodchuck, and he was the fellow who got the fresh hold, and it was on my finger. I took my hand out immediately—strange, wasn't it? Of course I was mad, and bound to see what kind of a rabbit I had to deal with. So after tearing away some "wood," I "chucked" the life out of him in short order. I never had any love for a woodchuck since. And I can think of a great many that did not see their shadows February 2, 1898.

There is quite a demand for wire and nails, and the recent advance has stimulated trade on those articles considerably. We are glad they did not make much of an advance, and hope they will not. Wire has become one of the necessities of the farmer, and a difference of twenty-five cents per 100 pounds keeps many a farmer from building a new fence. Quite a number of articles have been slightly advanced, while a number have been reduced, so they will about average up. The usual cutting of prices by jobbers under manufacturers' prices on season goods has begun. Screen goods, poultry netting, steel goods, etc., are the jobbers' delight.

The retail Hardware dealers will hold their annual convention in this city on the 23rd and 24th of this month, and the prospects for a large attendance are favorable. The Wholesale & Retail Hardware Association of Columbus will give them a smoker on the evening of the 24th. We think they will enjoy it. In fact, we propose to see that they do enjoy it, and knowing them to be a jolly lot of good fellows, we expect to have a flow of feast and souls "and mineral water." Why can't the genial editor of *Hardware* make it convenient to enjoy the occasion with us? We know he would be welcome, and think he would find Columbus a pretty good town, and the "*only right*" place for the Ohio Centennial. SMITH BROS. HARDWARE CO.

THE BUFFALO TRADE.

The first month of the year is now history. To many it brought bright hopes and anticipations for improvement over the corresponding period of 1897; to some it left full realization. We are glad to be accorded the privilege of being counted among the number who can report progress. It is difficult to assign any one reason for our being able to give this information, as many things have contributed to it. Stocks in the hands of the retailers have been low for some time, and they have been obliged to replenish them to some extent The mechanic has been idle for months, and has again taken up his tools.

Collections have shown an improvement, and last, but not least, the reported advances in price, from time to time, have caused some to make purchases in the hope that they might regain a portion of that which they have lost in the steady decline of the past. These we consider among the chief reasons for our being able to report improvement in our cash receipts, together with increase in number and volume of orders.

We feel that the present year will bring good business,

STUBS' TOOLS.

DIRECT IMPORTERS

209 BOWERY NEW YORK.

Digitized by Google

not in the sense of a boom, or spasmodic character, but a steady trade. Much can be done by manufacturers to bring about this state of affairs if they will be reasonable in their advances, and not attempt to overdo it.

May this be the banner year. WEED & CO.

THE CHICAGO TRADE.

We are pleased to report a business for the past month, of more than thirty per cent. increase over our trade for January of one year ago.

When the present low price of goods is considered, we feel warranted in calling this a first-class increase, even for a Chicago firm.

On February 1st we received notice of an advance of five cents per hundred pounds on plain and barbed wire, fence staples and wire nails, with the additional information that a still further advance is contemplated.

With the rapidly increasing demand for Hardware, that is sure to come as the spring trade approaches, it would not be at all a matter of surprise if both manufacturers and jobbers would be able to secure something better than the present exceedingly low values for most articles in the Hardware line. In the meantime, our firm expect to be at the bottom in the way of prices and make our customers feel as much at home as if we were making money out of their trade.

Prospects were never brighter for a good spring business, and we are fully prepared to take advantage of it.

WELLS & NELLEGAR CO.

THE BOSTON TRADE.

January business has been fully up to the average of the winter months, and the first weeks of the year always find the retailer placing small orders to keep his stock in good condition for the season's trade.

The bright warm days of January were suggestive that spring would come sometime, and orders were taken for many seasonable goods. The low ruling quotations were also an incentive to buy such items on which there seem to be no possibility of a decline.

The bicycle trade may be said to be fairly opened, and the tendency is to see who has the best wheel for the smallest amount of money. A first class warranted wheel is to be retailed from $35 to $40, and from the sales already made of this grade, it looks as if there might be a scarcity of wheels to be sold at this figure.

The wire trust is more in evidence than ever, and the firm prices on barbed wire and nails are creating a demand for these goods. The quotations for February delivery, with a possible advance in March, have already been the means of receiving many orders for these staples.

Collections are much better than a year ago, and we firmly believe that the outlook for a good spring business is much better than for several years past.

FRYE, PHIPPS & CO.

THE DAVENPORT TRADE.

The storm of the 25th ult. interfered with business for several days. Snow came too late to help the sleigh-bell or hand-sled trade in this vicinity.

The monetary convention at Indianapolis attracted attention; Davenport was well represented there.

Some manufacturers are making a desperate effort to divert trade from jobbers, and the fight is on; but after the smoke of battle clears away the conservative jobber will be seen doing business at the old stand.

Our savings banks here have reduced their rate of interest on time deposits from 5 to 4 per cent., which shows that money is plentiful.

The Crescent Bridge Co. have a large force of men at work on the new railroad bridge across the Mississippi at this point, and claim they will be ready for traffic on or before Nov. 1st.

Much building is promised for early spring. Prices are steady, with a slight upward tendency on wire, barb wire and wire nails. Farm implements, known to the trade as steel goods, are selling in advance of wants on account of the prospective shortage in supply. Advance orders are also coming in freely for poultry netting, screen doors and screen wire. These goods are, however, sold for fun and not for profit. Competition is getting to be the death instead of the life of trade.

SICKELS, PRESTON & NUTTING CO.

THE OMAHA TRADE.

January business shows a liberal advance over the corresponding month of a year ago, and the outlook for February is even more satisfactory. The conditions prevailing throughout the country could not be improved upon.

The winter has been a particularly favorable one for fall wheat, and the ground is in a condition that has not been equalled for many years, and the hopeful feeling that pervades both mercantile and farming communities is the best evidence of things hoped for, but not yet seen. There seems to be no reasonable doubt but that the present year will be the most satisfactory one for a long time, and it is to be hoped that too many combinations will not materialize to impair confidence. Prices are holding their own in good shape locally. The Exposition is progressing at a rate that surprises not only the people at home, but visitors from abroad, and the retail trade is generally reported better than for a number of years past.

RECTOR & WILHELMY CO.

THE DENVER TRADE.

Since writing you last, we have passed the holidays and seen the end of the freight war in this territory. We have entered well into the new year, and January proved a surprise to the local wholesale Hardware trade. It was a cold month, is usually dull, and with the heavy shipments in December under the low rates, less than the average was expected this year. It is a pleasure to record a 35 per cent. improvement over last year. May the "pace" be kept until the year is run out.

GEORGE TRITCH HARDWARE CO.

THE PHILADELPHIA TRADE.

The intense cold weather and heavy storms of the past few days have made travel difficult, and doubtless retarded business to some extent, but on the whole, seasonable weather is always an advantage, as in this case it enables trade to work off seasonable goods, and thereby leaves them with empty shelves ready for replenishing in the spring.

So far the call for spring goods has not been anticipated to any extent, except, perhaps, in the line of one or two items which were considered low in price and likely to advance. Indications, however, all point towards increased trade, while from the West come reports of the most encouraging character. It is an almost universal report that jobbers in the West are exceedingly busy, and, as for ourselves, we find that Eastern manufacturers are more than busy in filling orders which have come largely from the West.

It is only a question of time when this business will find its way East, and as Western orders mean increased employment to Eastern workers, they likewise mean more money to be spent through the channels of trade.

The event of the past few days has been a marked stiffening in the wire market, which not only takes in wire nails and barbed wire, but which promises to include all goods made of wire, and the long talked of consolidation of wire interests appears now on the point of accomplishment. Opinions differ largely as to the desirability of such consolidation, but we have to deal with facts as we find them, and not with theories.

The bicycle business is now firmly started, and although the roads have not been in condition for use, still sample

Digitized by Google

orders are being placed in a way that seems to point towards a fair spring trade, with lower prices, of course, ruling than ever before. BIDDLE HARDWARE CO.

THE GRAPHITE TRADE.

The "Advance Agent of Prosperity" has taken up his abode with us, and evidently is pretty well contented with his quarters, for we are simply booming in all departments.

January closed with a big percentage of sales over the 1897 January. Our secretary expressed a fervent desire to be left alone for two weeks without any added duties, that he might be enabled to catch up with his desk work. This desire is an echo all along the line, including the factory superintendents.

Of course, these desires might as well be unexpressed, for the work piles up just the same.

One impatient customer telephoned this week, offering a bonus if we would only put his shipment ahead of a promised date.

"Please ship by first express" is a familiar heading to orders, and we had a rubber stamp, "hurry," made to save the order clerk the labor of writing it innumerable times.

Blacksmiths are ordering crucibles, and inquiring if they can melt metal in their forge fires.

Every big roof and structure in the country seems to need Dixon's Silica-Graphite Paint; and as to pencils, we may have to hire a second-hand grain elevator and ship them in sacks.

The demand for special brazing crucibles and the antiflux brazing graphite, indicates a lively business in bicycles.

We hope the rose color of this article will not discourage any of your readers from sending in orders for anything in the Graphite line. They will be taken care of, and will be stamped with the rubber stamp "hurry" if so desired.

JOSEPH DIXON CRUCIBLE CO.

Enameline Growing.

J. L. Prescott & Co., the proprietors of Enameline, the well-known stove polish, will remove their New York offices from No. 11 Jay Street to the Gerken Building, corner of West Broadway and Chambers Street. This change becomes necessary on account of an enormously increasing demand for the product of this house. The new offices of Enameline are being elegantly fitted up with the latest improvements, and will be a credit to the owners of one of the most popular proprietary articles in the stove trade of America.

One of the features of the new offices will be the export department, to meet the requirements of the constantly increasing European trade, which has already reached enormous proportions.

The new offices will occupy the eleventh story of the Gerken Building, where the outlook from the windows is one of the most superb in the city of mammoth office structures. There is general gratification in the trade that Messrs. J. L. Prescott & Co. have secured offices in so central a location for not only the New York jobbers, but for their friends in all sections of the United States and Europe.

Brace Hayden, who was suddenly called to San Francisco by the death of Mr. Dunham, of the Dunham, Carrigan & Hayden Co., made his appearance in the Hardware Club on Monday last, and his right arm is still sore from the violent exercise it was compelled to undergo. Mr. Hayden is very popular in the trade and in the Club, where he has served as an efficient member of the board of governors from the beginning of the organization, and the news that he has definitely decided to make San Francisco his permanent home, will be received with sincere regret in the East. Mr. Hayden will remain in the city until after the Hardware Dinner.

The Hardware Dinner.

Chairman Clinch reports that the outlook for the great Hardware Dinner at the Waldorf-Astoria, New York, on the evening of Monday, February 21st, is very promising, and that the event gives indication of being one of the most successful of the annual dinners yet held. Senator Thurston and Representative Taylor have agreed to be present, and other well-known speakers will also be there. All of the boxes on the first tier have been taken, and a number also secured on the second tier. This is the first occasion on which the ladies have graced the Hardware dinners with their attendance, and this feature will add, of course, very largely to the interest.

The fire which destroyed the building at No. 65 Cortlandt Street, New York, on Monday, January 31st, did not in any way affect the parts and fittings for bicycle sundry departments of Robert H. Ingersoll & Bro., as these departments are located at No. 165 Washington Street. They are ready to fill orders for these goods. In their general departments, they give us authority to say, that although their business was temporarily interfered with, they are able to fill orders for watches right along, without delay.

A reference to the card of the Putnam Nail Co., Neponset, Boston, found on page 18 of to-day's issue, will show that this company have made "A New Departure," which is there explained. Because of the action of the National Hardware Association, they propose to sell direct to the general jobbers of the country, and all restrictions have been removed as to quotations to be made by the trade from ocean to ocean.

The C. R. Meres Heater Mfg. Co., Norwalk, Ohio, has been sold to its president, S. W. Owen. Its name has been changed to the Duplex Heater, and hereafter will be manufactured by the S. W. Owen Co., at their old stand. Their recent improvements and late patent, combining hot water supply, are making this system very popular. They report a largely increased trade. Their catalogues will soon be ready for distribution.

The recent meeting of the East Tennessee Hardware Association at Knoxville was a pleasant and profitable gathering. Several new firms were added to the membership. The next meeting of the Association will be at Rogersville, on May 8th. An interesting programme was carried out, and resolutions of respect to the memory of George E. Speck were adopted.

Situation Wanted.

POSITION wanted by an elderly man as salesman in a retail Hardware store; city or country; over twenty years' experience. Reference, Peter Duryee & Co., New York City. JOHN BARRETT, Hudson Boulevard, West Hoboken, N. J.

SITUATION wanted as superintendent, assistant or general foreman of machine works or factory. Have extensive experience in managing the manufacture of general and wood-working machinery, machine tools and bicycles; well up in modern machine shop practice, designing and draughting; successful in reducing cost and estimating. Address R U. S., care HARDWARE, No. 143 Chambers Street, New York.

BICYCLE repairer and builder would like position with Hardware house handling wheels. Capable to take charge of bicycle department entirely; can handle fittings. GEO. GOULD, No. 114 Freeport Street, Dorchester, Mass.

Side Line Wanted.

TRAVELING salesman wishes to add good selling line for Hardware, paint, cycle or general store trade. References; state particulars, and address "36," care HARDWARE, No. 143 Chambers Street, New York.

Agency Wanted.

A WELL-KNOWN Hardwareman, with a continuous experience of 20 years, desires to represent a few leading manufacturers as sales agent in this city, or would be willing to accept the position of purchasing agent for some corporation where his services would be valuable. Competency undoubted. Address B. B. B., care of HARDWARE, No. 143 Chambers Street, New York.

RETAIL TRADE RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Hardware Stores.

Athens, Tex.—Miller & Carroll, Hardware, have opened store.

Berrien Centre, Mich.—A. J. Ford will open a new agricultural implement store.

Fitzgerald, Ga.—The Watt & Holmes Hardware Co. has been incorporated by James Watt and others, with a capital stock of $15,000.

Hillman, Mich.—The Hillman Hardware Co. has opened new store, with W. F. Devlin as manager.

Sturgis, Mich.—H. H. Feek, Hardware and tinware, has opened a new store on Nottawa Street.

Tonganoxie, Kan.—The Sephousen Hardware Co. has been incorporated by M. Senhousen, J. J. Senhousen, D. B. O'Brien and M. Jones. Capital stock, $1250.

Changes and Improvements.

Almena, Kan.—W. Malcolm, Hardware, sold to Ed. Burnap.

Alton, Iowa.—H. W. Minten, Hardware, succeeded by J. P. Steichen.

Bangor, Me.—Tyler & Conant, Hardware, etc., succeeded by C. M. Conant & Co.

Boyd, Minn.—Swan Bros., Hardware, etc., succeeded by E. N. Swan & Co.

Burt, Iowa.—John Kerr, Hardware, succeeded by Werner & Link.

Cadillac, Mich.—Cloud & Morgan, Hardware, store purchased by Morgan & Murray.

Centralia, Kan.—The Clippinger Hardware Co., reported sold to A. B. Clippinger.

Clarinda, Iowa.—Cox & Cross, Hardware, succeeded by Plank & Cross.

Danville, Va.—Hodnett & Vass, Hardware, etc., successors of Schoolfield, Vass & Co.

Ellsworth, Me.—P. H. Stratton has purchased the stock and store fixtures of the Hardware store formerly owned by the late James F. Davis in Main Street, and took possession immediately. Mr. Stratton will carry on the business.

Fremont, Neb.—The announcement of the sale of the large Hardware business of Theodore Huette & Son to Messrs. Hobbs & Jones of St. Louis, Mo., will be learned with surprise. An invoice is now being taken, and at its conclusion the new firm will take possession of the business. The firm of Theodore Huette has done business at the corner of Sixth and F. Streets for eighteen years, succeeding E. H. Barnard, Fremont's oldest Hardware business. The firm has always done a large business.

Grand Ledge, Mich.—J. Vandervolgan, agricultural implements, has sold business to J. Walsh.

Great Barrington, Mass.—Bennett & Hammer, plumbers, etc., succeeded by Hammer Bros.

Holland, Tex.—George W. Birchfield, Hardware and farm implements, has sold his entire business to C. J. Wilkinson.

Houston, Tex.—E. L. Wilson Hardware Co., Joe Simmons will sever his connection with that firm and establish a Hardware business.

Houston, Tex.—The Whittlesey Hardware Co., Nos. 309 and 311 Main Street, closing out entire stock, preparatory to going out of business.

Lisbon, Me.—C. B. Allen has purchased A. H. Macurda's Hardware stock and will continue business in the same place.

Los Angeles, Cal.—The W. C. Furrey Co., Hardware, etc., W. C. Furrey retires.

Louisburg, N. C.—The Gannaway Hardware Co., entire stock bought out by Louisburg Hardware & Supply Co.

Mabel, Minn.—Gilmore & Jones, Hardware, succeeded by Gilmore Bros.

Manchester, N. Y.—Oscar M. Humphrey, Hardware and stoves, moved stock to Caledonia.

Marquette, Mich.—The Hardware firm of I. E. Swift is building a warehouse for the larger pipe kept in stock on the old foundry lot adjoining the other buildings occupied by the firm.

Northville, Mich.—Yerkes & Harmon, Hardware, and A. K. Carpenter, Hardware, have consolidated, and will do business under the firm name of Carpenter, Yerkes & Harmon.

Paulding, Ohio.—The Hardware firm of Finan & Crain has dissolved partnership by mutual consent. Mr. Crain retires from the firm, and Mr. Finan continues the business at the old stand.

Peoria, Ill.—Tobias Bros., Hardware, reported to have sold out.

Phoenix, Ari.—H. E. Kemp Co., Hardware, succeeded by Henry E. Kemp Hardware Co.

Punta Gorda, Fla.—Sandlin & Earnest, Hardware, will move into new building which is being erected.

St. Paul, Minn.—Joe Michel has bought the business of McDonough & Bowers; James T. McDonough, agent; Theo. Michel, trustee, No. 747 Wabasha Street, St. Paul, Minn., dealers in Hardware, tinware, stoves, mechanics' tools, cutlery; also plumbers', tinners' and steamfitters'. The business will continue as James T. McDonough, agent; Joe Michel, proprietor.

Strang, Neb.—Kutch Bros., Hardware and agricultural implements, succeeded by S. S. Pennel.

St. Stephen, Ala.—W. A. Moseley & Co., Hardware, etc., closing out.

Sycamore, Ohio.—Hurd & Beebe, Hardware dealers, have sold to E. C. Crosby, of Delta. The stock is being invoiced, and Mr. Crosby will take possession as soon as this work is completed.

Tipton, Neb.—J. N. Russell, of the firm of Shortle & Russell has sold his interest in the Hardware firm to Frank Mahan.

Troy, Kan.—Culp & Hautzenrader, Hardware, etc., succeeded by Hautzenrader & Dubach.

Watertown, Conn.—F. E. Wheeler & Co., stoves and tinware, succeeded by F. L. Hitchcock.

Waterbury, Conn.—Norman Cottielle Co., Hardware, will move to Thompsonville.

Weimar, Tex.—L. Fahrenthold, dealer in stoves, tinware, pumps, windmills, etc., has sold out his business to G. Buske.

Wills Point, Tex.—Perry Bros. & Rice, Hardware, succeeded by Blanks & Russell.

Business Embarrassments.

Appleton, Wis.—The Hardware firm of Huetter & Petersen have assigned to August Ruhlander. The firm's assets are $10,000, and its liabilities $8000. The failure was due to slow sales. Milwaukee and Chicago houses are the principal creditors.

Boston, Mass.—James O'Brien, Hardware, etc., reported to have made an assignment.

Butler, Pa.—Henry Beihl, dealer in Hardware, has made an assignment. Liabilities, $6000, with assets not given.

Chester, Pa.—H. B. Taylor, Hardware, has made an assignment to D. F. Rose. Liabilities will not exceed $20,000, and an arrangement is likely to be made whereby he can continue business.

Dayton, Ohio.—George E. Winter, successor to Wust & Winter, dealer in Hardware, stoves and tinware, at Nos. 8 and 10 Valley Street, in North Dayton has filed a deed of assignment to John W. Clark. The assets and liabilities are equally estimated at $2000.

Dayton, Ohio.—John H. Welsh and Moses E. Collins, Hardware, have made an assignment. Estimated assets, $3500; liabilities the same.

Dunn, N. C.—The Lee Hardware Co. has made an assignment.

Jacksboro, Tex.—H. B. Hensley, Hardware, has made an assignment. Assets about $1200; liabilities not known.

Liano, Tex.—The Western Hardware Co. has gone into voluntary bankruptcy.

Spencer, Ind.—D. B. Cauble, Hardware dealer of this city, has made an assignment. Liabilities about $2000, with assets the same.

Trenton, N. J.—Ralph E. Hibbard, plumber, etc., reported to have made an assignment.

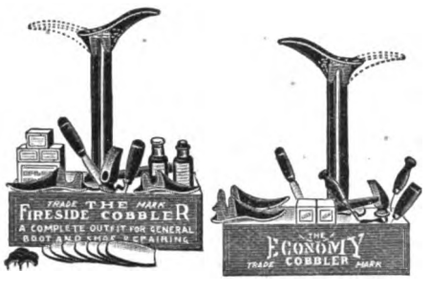
Recent Fires.

Amsterdam, N. Y.—Ray J. Morgan & Co., Hardware, destroyed by fire; insured.

Dennison, Tex.—Pollard, Hoerr & Co., Hardware, damaged by fire, at a loss of $10,000.

Holly, Mich.—Nicholson's Hardware store, damaged by fire.

Ionia, Mich.—H. B. Webber & Co., Hardware, damaged by fire, at a loss of $12,000; insured for $9000.



Morganfield, Ky.—H. L. Mart & Bro., Hardware, etc., damaged by fire at a loss of $20,000, with no insurance.

Temple, Tex.—T. L. Hollingsworth, Hardware, damaged by fire, at a loss of $150; insured for $5500.

Wharton, Tex.—G. C. Gifford, Hardware destroyed by fire.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc, will be gladly received, and promptly published.

New Companies, Etc.

Big Rapids, Mich.—Herrendeen & Co. have formed a company for the manufacture of sheet iron stoves.

Camden, N. J.—The Davis Hartman Co. has been incorporated to manufacture metal castings.

Chicago, Ill.—Extension Handle Co. Capital, $2000; to manufacture bicycles, vehicles, etc. Incorporators: William H. Gole, Harry A. Gole and Ralph R. Bradley.

Chicago, Ill.—National Shovel Works & Stamping Co. has been incorporated by F. A. Sanford, George Mangson and R. T. J. Martin. Capital stock, $100,000.

Chicago, Ill.—Universal Bander Co. has been incorporated, to manufacture tools, machinery, etc. Capital stock, $20,000.

Cleveland, Ohio.—The Crown Computing Scale Co., composed of Cleveland men, has been incorporated with $10,000 capital. The following officers have been selected: Clifford A. Neff, president; Ira L. Beary, treasurer; John D. Erthel, manager and secretary, and Dumas Pejawo, superintendent. Mr. Pejawo is the inventor of the computing scale.

Detroit, Mich.—The Michigan Heater Co. has been incorporated, with a capital stock of $15,000.

Detroit, Mich.—The Sun Vapor Stove Co. has been incorporated by E. G. Mummery, W. G. Hastie, R. S. Sutton and N. S. Wright; to manufacture vapor stoves. Capital stock, $100,000.

Indianapolis, Ind.—The plant of the Indianapolis Stove Co. is now about completed, and is one of the largest establishments of this character in the West. The company is preparing to manufacture every article in the way of furnishings for stoves. This will require considerable increase in force, and when in full operation the company will give employment to at least 400 people. Manufacturing stove furnishings is a new undertaking of this company. The company has its own electric plant, and at night, when the large foundry and the stock manufacturing department are lighted up, it gives one some idea of the size of the works, and gives that part of the city a thrifty appearance.

Knoxville, Tenn. — The Knoxville Tinware Mfg. Co. has been organized, and established a plant for the manufacture of all kinds of tinware.

Menominee, Mich.—Marinette (Wis.) capitalists have subscribed $300,000 and organized a stock company to carry on the manufacture of farming implements. The big plant of A. W. Stevens & Co., at Auburn, N. Y., is to be removed and located in Marinette, just across the river from this city.

New York City, N. Y.—Spiral Nail Co. Capital, $5000. Directors: John Carnrick and Albert Cardozo, Jr., New York City; A. H. Brundage, G. A. Kay and F. E. Baird, Brooklyn.

San Francisco, Cal.— Myers Stove Co. has been incorporated by John F. Myers, W. R. Myers, F. A. Hatch, Jacob E. Troviel and W. H. Jordan. Capital stock, $20,000.

St. Louis, Mo.—The Columbia Lead Co. has been incorporated by H. J. Cantwell and others. Capital stock, $35,000.

Wytheville, Va.—F. Reed will manufacture a steel range, recently designed.

Changes and Improvements.

Albany, N. Y.—Rathbone, Sard & Co.'s stove works have resumed operations.

Anderson, Ind.—The Middletown Tin-Plate Works have resumed operations.

Lowville, Ky.—S. D. Nevins has bought the Lowville Iron Works of the receiver, Dr. A. H. Gebbie. Mr. Nevins is a practical machinist.

Thompsonville, Conn. — Arrangements were completed recently by the Board of Trade for the removal here of the Norman Cottielle Co. of Waterbury. The transfer will be made at once. The company employs fifty hands and manufactures Hardware.

Recent Fires.

Chicago, Ill. — F. C. Austin Mfg. Co., makers of agricultural implements, destroyed by fire at a loss of $60,000, which is covered by insurance.

Louisville, Ky.—B. F. Avery & Sons, plow factory, damaged by fire at a loss of $75,000. Loss fully covered by insurance.

Miscellaneous.

Alliance, Ohio.—The stockholders of the Salem Wire Nail Co. held their annual meeting and elected the former board of directors and officers. The company owns three wire nail mills, one located at Salem, one at Findlay and one at New Philadelphia. The one at Salem has been shut down, but will soon start up. The company about six weeks ago submitted a proposition to sell these plants to the American Steel & Wire Co., which is endeavoring to effect a consolidation of all the wire nail mills in this country. The proposition has not as yet been accepted.

Anderson, Ind.— The Anderson Iron & Bolt Co., of this city, have reorganized, Major C. T. Doxey retiring as president. His successor is Geo. Nichol, of this city. At a meeting in Cleveland this factory became a member of the trust. It was one of the largest plants to hold out against the combination, and employs 200 men.

Bloomington, Ill. — The stockholders of the Bloomington Stove Co. have held their annual meeting. The reports for the year showed business in good condition. Directors were elected as follows: William Van Schoick, Henry Heyer, Ed H. Miner, Henry Chrisman and Mont Evans. The directors chose the following officers: President, William Van Schoick; treasurer, John W. Evans; secretary and superintendent, Henry Heyer.

Chattanooga, Tenn.— The Chattanooga Stove Works are running full time at present, the demand for their product having been unusually good during the past three months. The force has been increased.

Defiance, Ohio.—At a meeting of the stockholders of the Clipper Plow Co., the following directors were elected: Frank Seither, Cleveland; Henry Seither, William Martin, E. W. Hoffman and C. C. Hoffman, Defiance. The old officers were re-elected for the coming year as follows: Henry Seither, president; William Martin, vice-president; C. C. Hoffman, secretary and treasurer.

Denver, Col.—General Passenger Agent Hooper of the Denver & Rio Grande road recently received a copy of the photograph of the famous Hardware train sent out from Denver to Telluride over the Rio Grande. In dimensions the picture is about four and a half by one and a half feet. It is clear, showing every detail of the train, the seventeen cars composing the train, with their banners and bunting, against the dark background of rocks. The picture was taken near Howard's, a station about fifteen miles this side of Salida.

Easton, Pa. — The stockholders of the Phillipsburg Stove Works have re-elected these directors: L. E. Mattes, B. F. Riegel, W. E. Buckman, S. C. Pursell J. M. Hackett, W. M. Davis and John Maxwell. The directors organized by electing Mr. Maxwell president and treasurer and Mr. Buckman secretary. The officials deny any knowledge of a report to the effect that a new company had been formed and made an offer for the plant.

Marietta, Ohio.—The Westford Mfg. Co. shipped 5000 plow handles to the Empire Plow Co., of Cleveland, recently. They have another order of 4000 to be filled for the Empire Co. For some time past it has been necessary for Messrs. Grubb and Kraps to run extra hours, and yet they are unable to keep up with their orders.

Pueblo, Col.—Solid train loads of freight of different sorts have been coming from the various Western Slope points of late, but seldom is it that a solid train goes into the mountains of Colorado. Recently, however, nineteen narrow gauge cars loaded with Hardware and agricultural implements for a Hardware company, left Pueblo over the Rio Grande. They were gayly decorated and attracted not a little attention, since the entire train will go through to Durango and Telluride.

Springfield, Mass.—Smith & Wesson, the revolver manufacturers, have posted notices stating that as fast as each man finished the piece work in progress his services would not be required until further notice. This means that in a few weeks the works will be entirely shut down. The reason for stopping is that there is a large stock of revolvers without a sufficient market.

OPERA GOWNS SPOTTED.

Something Broke Over One of the Lobby Doors and Showered Grease.

While the audience at the Metropolitan Opera House was filing out of the theatre last night somebody gave one of the doors opening from the lobby into the street a sudden jerk, the force of which exploded the arrangement at the top of the door which prevents the door from slamming.

The report was as sharp as a pistol shot, and following it was a shower of brown grease, which spattered a number of fine gowns.

BICYCLE TRADE RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Companies, Agencies, Etc.

Chicago, Ill.—Extension Handle Co. has been incorporated by William H. Gole, Harry A. Gole, Ralph R. Bradley, to manufacture bicycles, vehicles, etc. Capital stock, $2000.

Cordele, Ga. — William Fitzsimmons, of Clinton, Ill., has purchased a site on which he will erect a bicycle factory and novelty works.

Denver, Col.—The Smith Cycle Co. has been organized for the manufacture of chainless wheels in Denver. This is the first company to embark in the chainless business here, and proposes to compete very successfully with chainless wheels made in the East. Officers have been elected as follows: President and general manager, W. D. Smith; vice president, Dennis Sullivan; secretary, S. S. Downs; assistant secretary, M. H. Van Fleet; treasurer, William Prackwinkle; attorney, John M. Maxwell.

Gilmerton, Va.—A company of capitalists from Maine have located a plant on the Choate farm, on the Southern branch, adjoining Gilmerton, and will manufacture bicycle crates, etc.

Hamburg, Pa.—Wilhelm Bicycle Works incorporated, with a capital stock of $50,000.

Lanes, Ill.—Lane & Co., sporting goods, etc., have opened a new store.

Marion, Ind.—The Frank Krein Mfg. Co. has been incorporated by Frank Krein and others, to manufacture chains, etc. Capital stock, $100,000.

Newberry, Pa.—The new bicycle shop of the Ames Bros. Repair Co. is nearly completed. They have built a large two-story factory and are about ready to begin their season's work. One of the departments is fitted up as a nickel-plating room; another is an enameling room, while the main part of the building will be used as a repair shop and factory. A new engine and boiler were put in during the winter, and yesterday, for the first time, fire was put under the boiler and the engine started. Newberry can now claim the ownership of at least one bicycle factory.

Pittsburg, Pa.—The Sidwell Pedal Co. has been incorporated, with a capital stock of $60,000.

Rocky Mount, N. C.—Jones & Knight have opened a bicycle repair shop at the Lancaster building, Tarboro Street.

San Francisco, Cal.—The Columbian Supply Co. has been incorporated by Alfred Fuhrman, Thomas J. Neslan, Carl W. Muller, John Heenan, P. B. Donahor, to deal in bicycles, etc. Capital stock, $100,000.

Sayre, Pa.—The Collins Pneumatic Hub & Wheel Works has been incorporated, with a capital stock of $200,000.

Trumansburg, N. Y.—The Morse Chain Co. has been incorporated by E. F. Morse, F. L. Morse, E. T. Turner and H. H. Westinghouse.

Changes and Removals.

Beaver Falls, Pa.—Unique Mfg. Co., successors to Morado Bicycle Co, have purchased the machinery of the latter, and removed it to a more commodious location, on the water power at Beaver Falls. The new company are manufacturing the Morado and Unique bicycles.

Bradford, Pa.—B. L. Fellows & Co., bicycles, sporting goods, etc.; business purchased by H. A. Harvey.

Doylestown, Pa.—Pollock & Ruos, manufacturers of bicycles, succeeded by Henry D. Ruos.

Gainesville, Fla.—Neff & Graham, bicycles, reported to have been succeeded by George Graham.

Kenneth Square, Pa.—John M. Chalfant, wholesale and retail Hardware, sporting goods, bicycles, etc., improving and enlarging store.

Macomb, Ill.—F. A. Whitman has sold his bicycle hospital and repairing outfit, together with his other tools and business, to Luther Cale. Mr. Whitman has been in the repairing business for eleven years, and during that time has built up a good trade and reputation for good work.

Morristown, N. J.—J. H. Carlson, bicycles, reported to have been succeeded by J. H. Carlson Bros. Co.

New Haven, Conn. — The firm of C. Cowles & Co., Water Street, has absorbed the business formerly conducted by the Bishop & Benton Co., in making the B. & B. bicycle stand. The Bishop & Benton Co. dissolved last week. Cowles & Co. are filling a large number of good orders from abroad, and their domestic trade in the stands promises to be excellent.

New Haven, Conn.—The Seamless Rubber Co. has increased its capital stock from $100,000 to $130,000.

New York, N. Y.—Dr. Heinrich Traun, Excelsior Rubber Works, succeeded by Traun Rubber Co.

Norwalk, Conn.—Fred S. Ambler, dealer in bicycles and sporting goods, has sold out his branch store in New Canaan to his former manager, Geo. H. Stevens, who will continue under his own name.

Paterson, N. J.—Healy & Browne, bicycles, reported to have dissolved.

Redlands, Cal.—C. G. Gaylord, bicycles, reported to have been succeeded by Furst & Barnum.

Sandusky, Ohio.—P. L. Van Alstyne, bicycles, etc.; business purchased by F. J. Donahue & Co.

Recent Embarrassments.

Cleveland, Ohio. — Bowersox & Beck, manufacturers of bicycles, reported to have made an assignment.

Lexington, Ky.—The Vanarsdall Spoke & Wheel Co. has made an assignment. No schedule filed.

Milwaukee, Wis.—The Milwaukee Mfg. Co., manufacturers of bicycles, have made voluntary assignment. Assignee bonds were fixed at $50,000.

New York, N.Y.—The Hoffman Machine Co., manufacturers of bicycle parts, reported to have appointed a receiver.

Recent Fires.

Cortland, N. Y.—Cortland Wrench Co., manufacturers, destroyed by fire.

Philadelphia, Pa.—Albert. Bateman, bicycles, No. 457 East Girard Avenue, damaged by fire, at a loss of $300.

Philadelphia, Pa.—H. Kolman, bicycles, No. 1328 Fairmount Avenue, damaged by fire, at a loss of $500.

Reading, Pa.—Star Machine Screw Co., manufacturers of bicycle parts, damaged by fire.

Miscellaneous.

Charleston, S. C.—The Southern Cycle Supply Co., No. 335 Broadway, are open for proposals for machinery and supplies for bicycle works.

Cincinnati, Ohio.—At the annual meeting of the stockholders of the Alpine Safe & Cycle Co., the following directors were elected: J. R. Kinsley, A. J. Conroy, Joel C. Clore, M. K. Allan and George D. Allan, they being also all the stockholders of said company. The directors organized by electing J. R. Kinsley, president and general manager; A. J. Conroy, vice president; Geo. D. Allan, secretary and treasurer.

Denver, Col.—Charles P. Conrad, a machinist, employed at the bicycle factory of C. H. Myers, has invented and patented two important bicycle improvements. One is a combination coasting sprocket, and the other is a brake. The coasting device enables the rider to release the rear wheel from the control of the chain by simply stopping the pedals. The rear wheel continues to revolve, but the pedals remain still. To reapply the power it is only necessary to push forward on the pedals. The brake device is a steel spool, covered with rubber just back of the saddle post. Its axle bears on a metal roller, at each end, which rests on the bars of the lower part of the frame. The brake is set by reversing the pedals and the wheel is released by pushing forward on the pedals.

New York, N.Y.—The firm of A. S. Baker & Co., of the Produce Exchange, this city and London, has recently closed a contract for 10,000 bicycles for shipment to Europe, deliveries to be made monthly during the season of 1898. One shipment has already been made. This is said to be the largest transaction of the kind in the bicycle trade that has transpired for more than a year past, and indicates that the American wheel is fast taking the lead and only needs to be properly handled in order to overcome any possible competition abroad.

Pittsburg, Pa.—The Shelby Steel Tube Co., with a capital stock of $5,000,000, is licensed to transact business in Illinois, with a capital of $2500.

Springfield, Ohio.—The Visitor Rubber Tire Co. has increased its capital stock from $10,000 to $50,000.

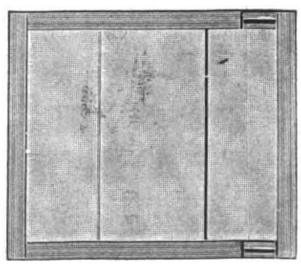
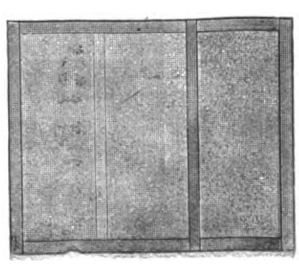
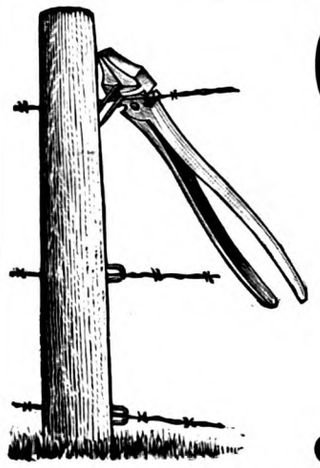
PHILLIPS' SCREEN GOODS





Have won for themselves the confidence and respect of the best posted buyers.

Where quality is considered as well as price, these goods are apt to have the preference. They are not rough. They are not "hustled," nor are they "degenerated" from other people's patterns.



What is a cent on a Window Screen or two cents on a Screen Door, when you consider that you wish to sell them again at a profit? Poor goods always have to be sold cheap! Of course, all manufacturers claim their goods are A1. But—what is your experience?

If your jobber will not sell you genuine Phillips goods, you can get them of the manufacturer.

THE A. J. PHILLIPS CO., Fenton, Mich.

The Hartzell Self-Draining Hose Reel

IT SELLS RAPIDLY.

It is scientifically and mechanically constructed.

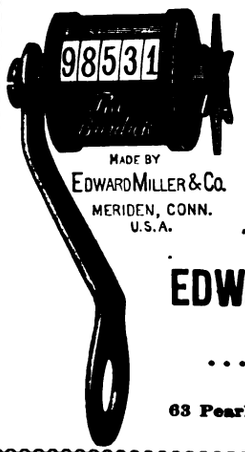
It is a nice ornament and a great convenience in spraying and watering a lawn.

The hose is not kinked, twisted, crushed or drawn to a tension, thus avoiding the breaking of either the inner or outer walls of the hose which protects the fabric and prevents it from becoming water soaked, which usually causes the rapid destruction of the hose.

It drains all the water out of the hose, after it has been reeled, and keeps it always in good order, ready for service.

Each section of hose is independent of the others and may be easily detached at the top or bottom.

It sells at sight, because any person who owns a garden hose can readily see its advantages and superiority.



Jobbers are especially solicited to handle our goods to whom lists and prices will be furnished upon application.

DEALERS ask your Jobbers for the HARTZELL SELF-DRAINING HOSE REEL and insist on getting it.

If they will not supply you address us for prices, circulars and lists.

"TOO VALUABLE TO BE WITHOUT."

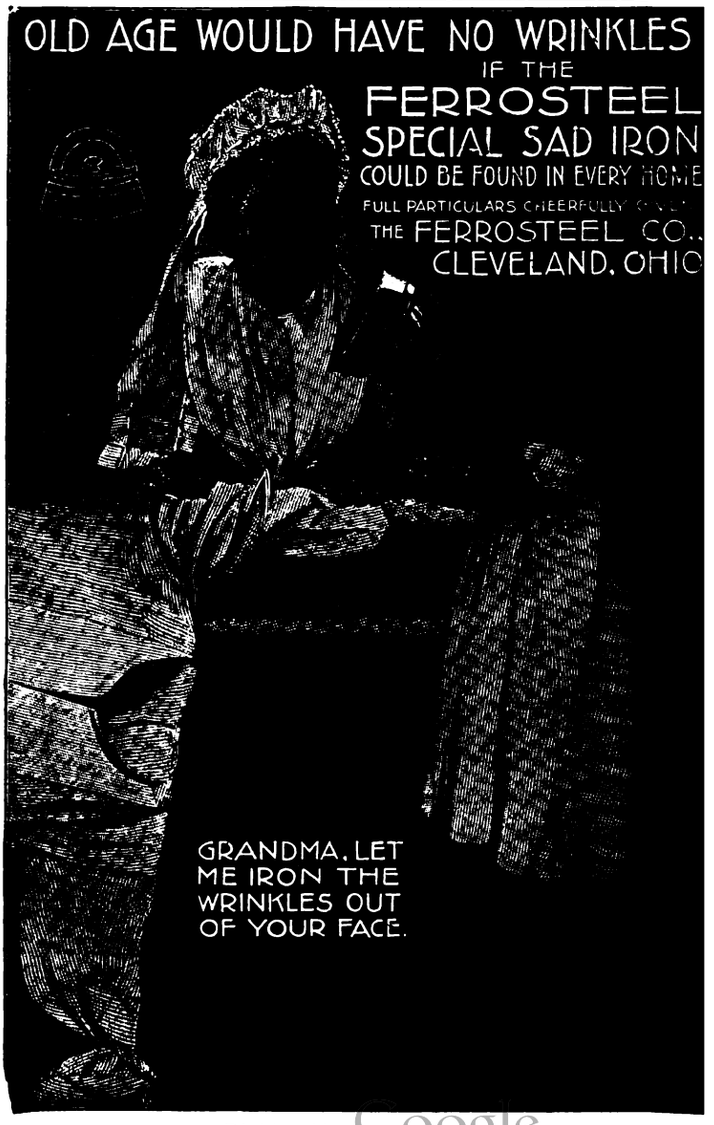
Charles T. Mitchell, Baltimore, Md.: HARDWARE is too valuable to be without.

To Bicycle Riders.

WE MAKE OUR TUBE OF FIFTY CARBON STEEL

Because a Tube like this of our .50% CARBON STEEL Is just as strong as a Tube like this of .25% CARBON STEEL

While weight for weight in a Bicycle our FIFTY CARBON Steel will last so long [redacted] and TWENTY-FIVE CARBON Steel will last only so long [redacted]



NOTE THE FULL IMPORT OF THE PARALLEL LINES.

The comparison which they graphically make indicates the result of the prolonged investigations of the most practical experts of the world.

That the tests in our own laboratory corroborate these results is merely so much to its credit; that the same is true of actual trial on the road equally proves the trial to have been made in bicycles of correct design and construction. THE FACT REMAINS.

The margin of safety is greatly increased by the use of this tube. Every bicycle manufacturer should use it; every dealer should insist on having it; every rider should demand it. Send for catalogue.

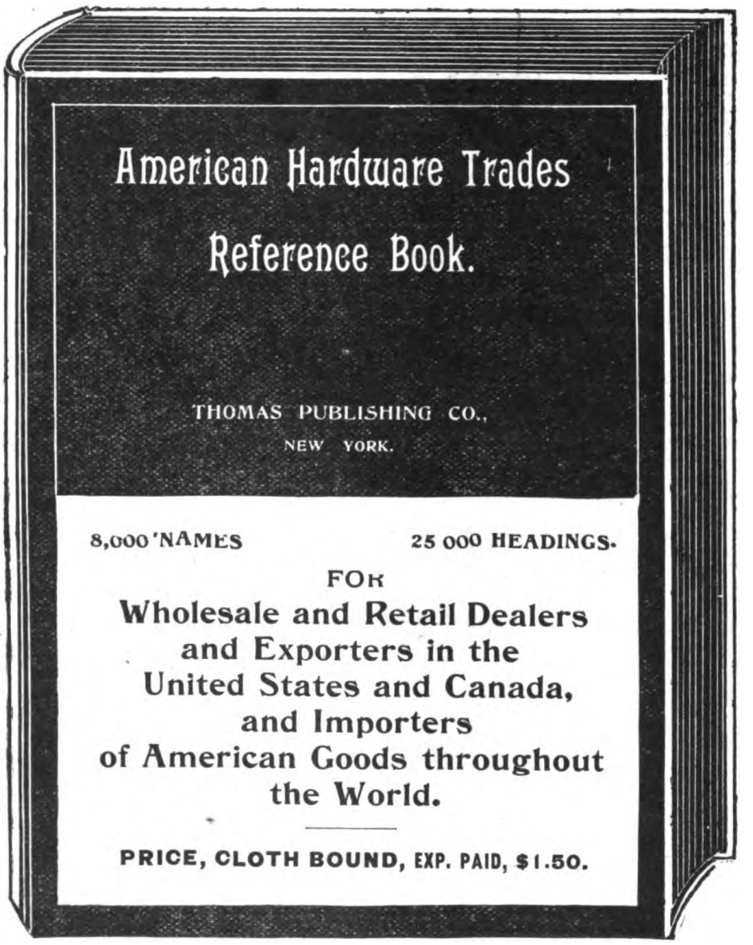
EVERY PROSPEROUS HARDWAREMAN

MUST BE WELL POSTED.

Secure the benefit of all possible Competition in Buying. A Dealer's Reference Book is essential. Here it is. A complete one, independent of any other publication, giving the names of ALL manufacturers, those who do not advertise, as well as those who do. The only work of the kind maintaining this feature. 1898 edition ready in few days. . . . .

IT COVERS THE FOLLOWING TRADES:



Hardware of All Kinds,

Hardware Specialties,

Agricultural Implements and Machinery of Every Description,

Carriages, Wagons, Harness,

Stoves, Ranges,

Tinware, House-furnishing Goods, Bicycles, Plumbing, Steam and Gas Fitting Goods of all Kinds and all Other Articles, Machines, etc., Handled by these Trades.

The object of the work is to enable the above trades to instantly find all the manufacturers of any article desired; the main and branch offices of every manufacturer in the trade, and the financial rating of every manufacturer.

Completeness.—The names of all manufacturers, regardless of whether they advertise or not. We give the names ver 8,000.

Classification.—By our method of classification, we index every manufacturer under every article manufactured. We name some manufacturers under as many as 300 headings. We make no charge whatever for any number of headings required to completely represent every manufacturer. The book gives nearly 25,000, fifty times as many as any other publication gives to these trades. We do not use general headings, such as are used in ordinary directories, as for instance: "Hardware," "Agricultural Implements," "Vehicles," "Plumbing Goods," etc., but state the specific article and the special kind of article, and for what purpose used, as for instance: "Door Locks," "Bicycle Locks," "Refrigerator Locks," "Gang Plows," "Sulky Plows," "Swivel Plows," "Ditching Plows," "Brass Faucets," "Wooden Faucets," "Beer Faucets," "Steam Heating Boilers," "Combination Steam and Hot Air Boilers," "Air Valves for Radiators," etc., etc., throughout the 25.000 headings, naming every article, every special kind of article needed by these trades. It enables the user to instantly find exactly what is wanted. Nothing like this minute classification has ever been attempted before.

Ratings.—The financial rating of every manufacturer is given.

SAVES SUBSCRIBERS 100 TIMES ITS COST.

THOMAS PUBLISHING CO., SOLE PROPRIETORS, 40 Broadway, New York.

"WE ARE RECEIVING GOOD RESULTS."

Clayton & Lambert Mfg. Co., Ypsilanti, Mich. [*Gasoline Fire Pots and Paint Burners.*] We are receiving good results from the advertisement which is running in your paper, and bel eve the service which you are g ing us, is extra good. We trust that our relationship for the coming year will be as pleasant and profitable as have those of the past, and feel very confident that it will.

Digitized by Google

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

TROY NICKEL WORKS
ALBANY, N. Y.

"OF INTEREST TO LIVE DEALERS."

Van Voorhis & McNair, Crawford, Neb.: We like the journal very much. It always comes to our desk full of bright, sound matter, that cannot but be of interest to all good live dealers.

"GREAT VALUE AS AN ADVERTISING MEDIUM."

Buck Bros., Millbury, Mass. [*Tools*]: We appreciate the great value of your paper as an advertising medium.

"JUST THE PAPER RETAILERS WANT."

Henry E. P. Pritchard, Philadelphia, Pa.: Enclosed find $1 for which please send me HARDWARE for one year. It's just the paper retailers want.

"LIKED 'HARDWARE' FROM THE START."

Gibbs Mfg. Co., Canton, Ohio. [*Hardware Specialties*]: We liked HARDWARE from the start, and have no reason to think otherwise now.

Digitized by Google

THE POPULARITY

Of our premium list, evidenced by the eagerness with which new subscribers are availing themselves of the opportunities offered, has compelled us to extend the time limit We will therefore continue this offer until further notice to **NEW 1898 SUBSCRIBERS.**

ALL THE NEWS. **HARDWARE** HARDWARE EXCLUSIVELY.

Needs no introduction to the Hardwareman. He already knows what a va'uab'e adjunct to his business this semi-monthly visitor is, with its reliable "Prices Current," its "Market Reviews" and its general news of interest to the Hardware trade

FOR $1.00 We will send "**HARDWARE**" for one year, and ANY **ONE** of the following articles:

A dating stamp that will last till 1902, with 12 special entries for marking letters and bills.

Huebsch's Year Book.

A 365-page Cloth Bound Diary—one page for each day in the year—4½x9 inches, bound in flexible cloth covers. Invaluable to merchants, manufacturers, bookkeepers, clerks, etc.

Indexed Coupon Books

representing one hundred dollars—to enable you to put your business on a cash basis—do away with pass books——to prevent bookkeeping erro s. No disputes over accounts—no delinquent debtors or bad accounts. Used throughout the country now instead of credit system.

A numbering stamp, which will number from 1 to 999,999. You can number every article in your store with this stamp. It is indispensable to the careful retailer.

FOR $1.25 We will send "**HARDWARE**" for one year and your choice of the following six premiums:

1. A Perfect Fountain Pen . . . . with 14 kt. gold pen and a filler, warranted to give the most satisfactory results. Made by one of the oldest fountain pen houses in America, and fully guaranteed. . .

2. A Silver Mounted Stationery Set. Seal, letter opener, and paper knife with pearl blade—that gives an air of elegance to your desk. . . .

3. Huebsch's Year Book . . . . (large size), 6x9 inches, bound in flexible cloth, made to last. IT IS YOUR BUSINESS MEMORY, and will not fail you

4. If You Have a Good Name . . . you may like to see it in your window. We send you ten of the best white enamel 4-inch letters, with a half pound of best cement and full instructions for putting up. If 4-inch letters are too large, send for twenty 2-inch letters. If you require more than the quantities specified, we will send you extra letters; 4-inch at 6 cents each, and 2-inch at 3 cents each. . . . . .

5. Half Dozen Photographs. . . . . Send us any photograph, with your name and address written plainly on the back, and we will return it to you together with six medallion copies of the original, mounted on celluloid, with a wire stand. We guarantee the medallions to be as good as the original. . . . . .

6. Bushnell's Price Book . . . bound in seal morocco, 4¾x6⅞ inches, 200 pages, adapted to the use of the traveling man, the home salesman and the office. Neatly indexed, red edged, ruled faint, printed headings. This practical Price Book is in almost universal use. . . . . .

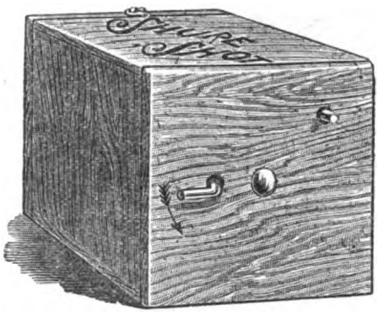
HARDWARE PUBLISHING CO., No. 143 CHAMBERS STREET, NEW YORK CITY.

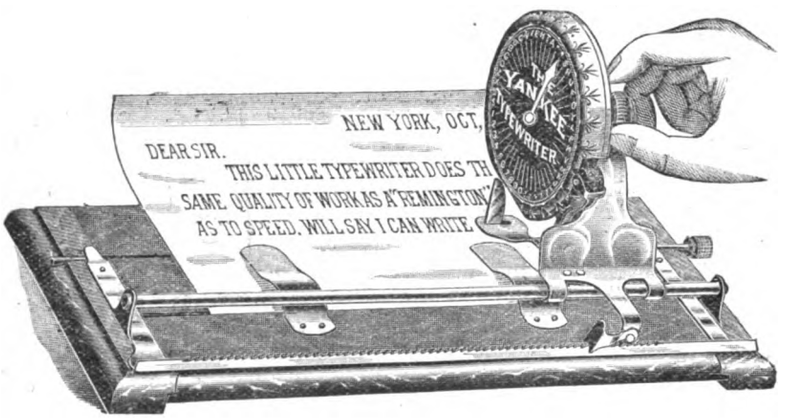
Digitized by Google



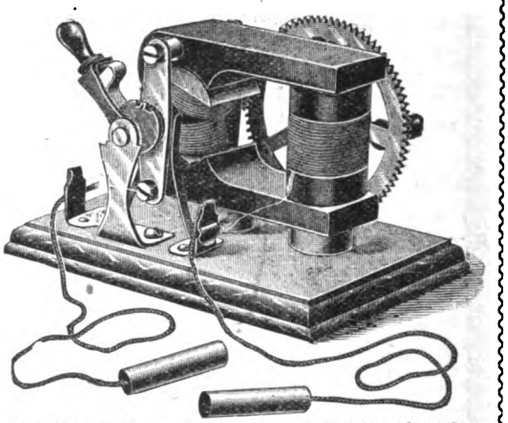
You Live

In hopes of always securing the greatest "helps" to your business, "*HARDWARE*" is a "help." It helps the dealer to buy economically, and helps the manufacturer to sell extensively. "*HARDWARE*" for one year, and any one of the following attractive premiums sent post paid for ***$1.50.*** This offer applies to

NEW 1898 SUBSCRIBERS ONLY.



A perfect Sewing Machine. "The Baby" It uses regular Wilcox & Gibbs needles and ordinary machine thread. It is strong and simple; won't get out of order; can be clamped on any table, and is so constructed as to make it almost impossible for the smallest child to injure itself with the needle.



Just think—a complete Camera and an outfit to print, develop and mount. Makes a picture 2½x2½ inches, and its work compares favorably with higher-priced ones of which it possesses the best features, including an instantaneous shutter, adjustable to time exposures if desired, and operated by a lever and button just as your $50 outfit is.

An Open-Faced Nickel-Plated Watch; fully guaranteed for a year. Winds and sets in back of case, and will stand rough usage, and keeps as good time as an expensive watch.

The Yankee Typewriter.—Will write 15 to 20 words a minute; will take any size paper, from postal card to foolscap size. Has automatic carriage and paper feed. Mounted on highly finished hardwood base, and packed in a strong wooden case.

An Electric Magnetic Machine—A wonder of mechanical perfection. Supersedes the old style medical batteries, and gives a stronger current without the expense of renewals. It has a current regulator which can be adjusted to a nervous child or to overpower the strongest man.

OF COURSE, YOU TAKE A MAGAZINE,

Probably one in the subjoined list, if it is not, let us know, and we'll put it there. The first column shows the price you would have to pay for the magazine alone. The second column indicates the price at which we will send you "HARDWARE" and the magazine for a year. In many cases you will find the combined price is no more than the single one, and you know you can't afford to do without "HARDWARE." This offer applies to **New 1898 Subscribers only.**

OLD SUBSCRIBERS AND NEW

May take advantage of the following liberal offers:

1. "American Hardware Trades Reference Book," published by Thomas Publishing Co., with "HARDWARE" for one year, will be sent on receipt of **$1.50.** Those who are already paid subscribers to "HARDWARE" will receive the book, on sending **50c.** This book is a complete directory of the manufacturers of Hardware in the United States. Each manufacturer is classified under the name of every article he makes. The financial rating is given in each case; 8000 Names; 25,000 Headings.

---

2. "Ladd's Discount Book," with "HARDWARE" for one year, for **$3.00** Single Index, and **$4.00** Double Index. Present subscribers will be credited for one year in advance. If you have to calculate discount this comprehensive work will save many times its price in time, trouble and mental strain. Its comprehensive character may be realized from the fact that it contains nearly 200 pages of positively accurate tables or more than 120,000 computations giving at a glance the net of any sum at all discounts from 1 per cent. to 95 per cent. together with a great range of combinations.

---

3. "American Hardware Store," with "HARDWARE" for one year, for **$3.00.** The "AMERICAN HARDWARE STORE," containing 450 pages and 500 illustrations, is an exhaustive treatise on the most approved methods used by the successful merchants of this country to arrange, display and sell Hardware. It is edited by R. R. Williams, editor of the *Iron Age*, and published by the David Williams Co., of this city, at $3.00. By a special arrangement, we are enabled to combine "HARDWARE" with the book at the same price. Present subscribers will be credited for a year, in advance of their present subscription.

Fill out Order, and address as below:

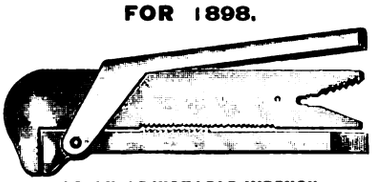
Special Machinery

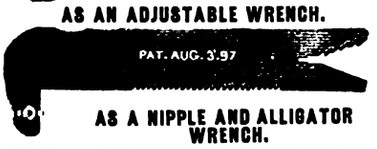
Estimates made on all kinds of Special Machinery, Boiler Tube Expanders, Bicycle Tire Moulds, Moulds for all kinds of Rubber Goods, Hangers, Shafting, Clay Working Machinery, etc. Write for Estimates.

"LEINER'S PAT. TIRE SCRAPER."
Cleans neatly down to the rim. Pressure on handles adjusts for easy or tight movement on any size tire.

"LEINER'S DUPLEX"
Patent Chain Brush and Tire Scraper Combined.
Brush cleans both sides of the chain and inside of links at the same time. Can be washed out with hot water, soda or soap. The brush and scraper work by double spring action, regulated by pressure on the handles.



Trade Supplied by



M. LEINER,
1267 BOSTON ROAD, NEW YORK.

Can be retailed at very popular prices. Superior to anything ever made for these purposes. . . .

THE BURR PATENT STEEL

Safety Lift Block

A Perfect Self-Locking Rope Tackle Block.

Runs as freely as an ordinary rope tackle block.
Holds more securely than a chain block.
Locks instantly and does not cut the rope.
Allows the load to be lowered safely and slowly, the operator using only one hand.
Cannot stick nor jam when the load is to be lowered.

"I have tested the Burr Self-locking Steel Tackle Block and find it the most practical, quick and reliable Safety lift I know of."

IS A GOOD ONE.

Morgan & Wright, Chicago Ill. [*Bicycle Tires*]: There can be no question about the advisability of using the Hardware trade as a means of disposing of bicycles and bicycle parts, and as to the efficiency of HARDWARE, we can only say what we would say in reply to an inquiry from any other publisher, i. e., we have no direct means of knowing whether our "ads" do us good or not. If we insert an "ad," it is on our judgment that the publication is a good one.

Digitized by Google

A GOOD THING.

IT'S IN THE TEETH.

The Patent "REFORM" Curry Comb is composed of three shallow, oval trays, with corrugated edges. The parts are struck up from a fine grade of cold rolled steel, heavily tinned and bronze lacquered, firmly riveted together and warranted not to rust. The outer dimensions are 6½x4¼ inches and by reason of the large cleaning surface and peculiar arrangement of teeth, the comb will do its work with a large saving of time and labor, cleaning with equal thoroughness both long and short coats. There are no places to accumulate hair and it will not tear or injure the brush, the comb being quickly freed from accumulation by giving its face a gentle tap.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

Editorial Trade Review.

But little additional improvement is noticeable since our last issue. The weather conditions have not been favorable for the transaction of a naturally increasing local trade, and the general business was held in abeyance in consequence. Orders keep coming in to the manufacturers and jobbers from their representatives now on the road. The only drawback to a more complete resumption of business, in a volume especially favorable, is the continual effort made by nearly all buyers to place orders at prices too low for the manufacturers to entertain, with a profitable year's business fairly in sight. In lines of goods where a combination among the manufacturers enables them to be more certain of a controlled competition, stiffened quotations prevail and but little weakness is manifested, but in many other lines it seems very doubtful if the contemplated advances can be successfully maintained until the order books have their pages crowded with requisitions for the future at specified dates of delivery. The increase in trade generally throughout the country is, however, extremely encouraging, and comparisons made with previous years gratify the merchant, and impress him with the belief that 1898 will foot up finally in a manner satisfactory to all concerned.

The present stability of the Wire and Wire Nail market has had a good effect in strengthening the belief in a steady market for these staple productions. Any retrograde movement following the announcement of a combination seemingly so powerful would prove a disastrous element in the endeavor to place the Hardware market on a solid basis for spring trade. But the dealers are not ordering these goods with anything but a conservative spirit. Orders have been given without much speculative energy back of them. Retailers appear to be buying for their immediate wants only, and caution seems to prevail to a great extent. The export trade is in a condition of gratifying promise, and more attention than ever will be given to it this year by those progressive manufacturers who invariably need a safe outlet for a possible surplus product.

The Bicycle business of 1898 is gradually but surely recognizing the fact that the most desirable agents for the sale of wheels will be found among the aggressive Hardware dealers of the country who are firms of admitted probity and character, industrious and reliable. The cutting of list prices in two on wheels held only a year ago at a price of $100, lessens the net amount of profit that can be realized from a sale, and makes expensive the handling of cycles by special establishments controlled and paid for by the manufacturers, who find the expenses of distribution reaching figures on the sum total of which they need to call a halt. It would be better in the long run if all reputable wheels were handled under special privileges by some leading Hardware house in the principal towns, and without any especial limitations as to number of stores, in the larger cities. They would have every incentive to correct dealings and the business could be as directly under factory influences as though they ran their own stores under a doubly increased ratio of expense.

Now by St. Paul the Work Goes Bravely on!

A large number of Hardware buyers are in New York at the present time, many of them attracted, no doubt, by the dinner given on Monday evening last under the auspices of the Hardware Club.

In an exchange of views with a number of these representatives from many parts of the country, it is evident that a constantly growing sentiment is prevailing among the trade in the several States toward the formation of Hardware Associations, even more generally than at present.

It is not only important to notice that while the jobbers have formed their own associations, closely promoting important interests in their especial line of business, the retailers of the several States, having a much larger number of merchants from which to obtain the necessary accessions, are very generally taking advantage of the willingness of the trade and will form associations of their own in every State. These associations, while extending carefully the legitimate advantages arising from organization, will be able more thoroughly to concentrate their strength toward the limiting of the detrimental influences affecting all regular dealers by department store methods.

Good work may be looked for from this concerted effort on the part of the dealers who have everything at stake, and thus the power for evil to legitimate business at present prominent in the methods of this guerilla class of dabblers in Hardware shall be brought to bay. No methods could be conceived more demoralizing to all legitimate effort for marketing Hardware, or so injurious in the last degree to the well-being of an old established business, that in all large cities has taken years to build up and patience and skill to manage profitably.

The tried and steadfast Hardware dealers of the country have our sincere sympathy in the extending in every way possible the lines of goods naturally belonging to their commercial character and local supremacy, and we shall deem proper and desirable every

Digitized by Google

commendable effort put forth under the combined influence of an aggressive convention of Hardware Associations. Let them be promulgated under the resourceful influences of the jobbers of the country, or through the powerful force and concerted energy of the retailers who in this matter admittedly "sit at the head of the table."

The Hardware Dinner of 1898.

Another annual festival of the Hardware and metal trades of New York has come, and in all the essentials of pleasant success must be counted by the side of the annual dinners which have preceded it.

A perusal of the full report, found elsewhere in this issue, of the annual dinner of the Hardware Club of New York, at the Hotel Waldorf-Astoria, on the evening of Monday last, will show that these occasions do not grow less successful and pleasant as the seasons pass. These dinners are a part of the history of the great movement toward better friendship and closer fraternal relations with the Hardware trade, that had its inception less than a decade ago, and out of which have grown the many associations that are now making history in all parts of the country.

New York Hardware Club.

At a recent meeting of the board of governors of the Hardware Club of New York the following gentlemen were unanimously elected to membership:

Hon. J. Donald Cameron, No. 253 Broadway.
W. P. Hatch, No. 253 Broadway.
Durant McLean, No. 299 Broadway.
Frederick M. Shepard, No. 86 Reade street.
Rufus E. Eggleston, Philadelphia.

At the same meeting a committee on nominations were appointed for the presentation of candidates to fill the places of the following members whose terms expire in March, 1898: Alfred D. Clinch, Charles Daly, Brace Hayden, Mortimer C. Ogden and Webster R. Walkley. The gentlemen constituting the committee on nominations are as follows:

Charles L Mead, chairman, Stanley Rule and Level Co.; George A. Graham, John H. Graham & Co.; Benjamin A. Hawley, Russell & Erwin Mfg. Co.; George Munson, Sargent & Co.; Thaddeus Smith, Union Nut & Bolt Co.

Inasmuch as Brace Hayden has been compelled by the death of his partner, Mr. Dunham, of the house of Dunham, Carrigan & Hayden, to make his permanent home hereafter in California, he will, of course, be unable to accept a renomination.

On Tuesday night last, the board of governors of the club transformed their regular monthly meeting into an occasion of farewell to Mr. Hayden, and all the members present expressed themselves in a most hearty and earnest manner in appreciation of Mr. Hayden's work as a member of the board since the inception of the club, and regret at his loss from an organization for which he had done so much. Mr. Hayden, although taken entirely by surprise, responded in a very happy manner, and expressed the sentiment that while he might be absent in body, his heart would always be with the club.

The annual meeting of the club will be held on March 19th, which is the third Saturday of the month.

The general offices of the National Association of Manufacturers, including the office of the president, Theodore C. Search, have been removed from No. 1743 North Fourth Street, Philadelphia, Pa., to the Bourse, Fourth Street below Market.

A Hardware Association Number of "Hardware."

On April 10th, 1898, *Hardware* will celebrate the eighth anniversary of its birth.

Hardware has certainly used its best effort for the promotion of neighborly friendship and good fellowship among the members of the trade. It has given freely of its space for the dissemination of news in regard to the great Hardware organizations which, since 1890, have become so grand a force for good in the Hardware world. It has by its voice, encouraged in every possible way the creation of organizations having for their purpose the bettering of trade conditions, and has been an enthusiastic supporter of every movement having for its purpose the good of the trade.

It occurred to us that the celebration of our anniversary of April 10th, 1898, could be made of signal usefulness to the trade everywhere, by the publication of a SPECIAL HARDWARE ASSOCIATION number.

It is our purpose, therefore, with that issue, to present a mass of valuable information in regard to the beginning and growth of the great forces or organizations which have accomplished so much in the way of acquaintance, better business methods, and the cultivation of fraternal regard. These sketches of the rise and growth of the organizations will be accompanied by portraits of various officers of the same, special articles from the pen of men who have been instrumental in the founding of these societies, and much else of interest in connection therewith. We feel that the time has come when the various steps which led to the creation of these forces within the Hardware trade should be gathered and properly placed upon record, and more especially as the information can now be secured at first hands, from those who assisted in this work.

We ask the hearty co-operation of Hardwaremen everywhere in this laudable effort, and our experience of the past leads us to firmly believe that the same will be given with a generous willingness which shall be very effective in its results.

A representative of *Hardware* who called at the works of the Putnam Nail Co., Neponset, Boston, Mass., was informed by W. W. Whitmarsh, treasurer of the company, that their new system "has been successful and satisfactory to all concerned." "Although the company," Mr. Whitmarsh added, "deal more largely with the general jobbers of the country, the present system seems to be gaining in favor with the large jobbers, as well as with the trade generally." He also stated that a majority of the large jobbing trade are now handling their goods.

A valued subscriber to *Hardware* wishes to correspond with the manufacturers of machinery for making wood baskets, both splint and stave. If anyone who is able to fill this bill will kindly notify *Hardware*, we will take pleasure in seeing that this information is put into hands where it will do somebody good.

The cost of space is the least important element in advertising.—*Exchange.*

HARDWARE is printed for men now on earth.

Digitized by Google

COMMENDING OUR SPECIAL EDITION.

PRESIDENT HARDWARE CLUB OF NEW YORK.

Editor Hardware: I have read with no little interest your editorial of February 10, 1898, in which you state that on the eighth anniversary of *Hardware*, in your edition of April 10th, 1898, you intend to publish a special number devoted to the Hardware Associations of America.

While congratulating you upon the great success of your paper, and believing that the value of such a publication to the trade, not only in this country, but throughout the world, cannot be estimated, I wish to commend you specially for your decision to publish the special edition above noted.

No one can understand, who has not thoroughly studied the question, the great amount of good which has been done to the Hardware trade, and to the business world generally, by the formation of the various Hardware Associations which are now found in almost every State in the Union, many of which are national in their character, and nearly all of which have been established during the eight years which have elapsed since the beginning of your journal.

It seems to me an appropriate time to gather up the points of history connected with these various associations, and to place the same upon record. Personally and officially, I shall be pleased to assist you in all possible ways in the carrying of this excellent project into execution.

Yours very truly,

PETER MCCARTEE,

President Hardware Club of New York.

New York, Feb. 14 1898.

PRES'T MERCHANTS' & MANUFACTURERS' ASSO. OF PHILADELPHIA.

Editor Hardware: It gives me great pleasure to learn that *Hardware* is to celebrate its eighth anniversary, especially as I have watched its growth from the very start, and have done so with considerable interest, as I have always found it a bright, newsy paper, and one which has probably been a benefit to the trade in general.

I understand that it is your purpose on April 10th to issue a special edition devoted to the Hardware Associations of the United States, and as, as far as I know, these associations have never been treated as a whole, we think that a presentation of the subject in this way would be of considerable interest, and will be very happy to aid you as far as is in my power—particularly in view of the fact that I believe our Philadelphia Hardware Jobbers' Association to be the oldest in the country.

With congratulations on your anniversary, and best wishes for your future prospects, I am,

Respectfully yours,

Philadelphia, Feb. 12, 1898. JAMES H. RITTER.

NEW ENGLAND HARDWARE DEALERS' ASSON.

Editor Hardware: I have read your editorial in the issue of February 10th, and it meets with my hearty approval. It seems to me that your paper can do no better work than to encourage in every way the Associations which were formed, and are forming so rapidly in the several States. The New England Hardware Dealers' Association, organized March 15, 1893, remember with pleasure your efforts in their interests. While our Association is flourishing, and we believe that the association of its members with each other has done much toward mitigating the evils attendant upon close competition, we still need the influence of the press, and especially of our Hardware papers, to extend the knowledge of the Association and its doings. I would like to take this occasion to say that in my opinion any National Association should be, in fact, as well as in name, broad enough to include representation from every association in the United States. I took occasion to state my views on this subject at the forming of a National Association in Chicago, at the time of the World's Fair, as I did not think that Association was broad enough in its scope, and it seems to me that the present National Association is hardly able to take in every association in existence. We would say that the New England Hardware Dealers' Association includes in its active membership both jobbers and retailers, and you will know that the distinction between these two classes in a great many cases is very fine.

Trusting that the issue in question will accomplish the results for which you are seeking, and that *Hardware* may have a prosperous new year, I am,

Yours truly,

D. FLETCHER BARBER,

Boston, Mass., Feb. 12, 1898. President.

NEW ENGLAND IRON & HARDWARE ASSOCIATION

Editor Hardware: It is with much pleasure that I learn of your intention to celebrate your anniversary with a "Special Hardware Association number."

It has been proved beyond doubt that intelligent and brotherly co-operation, as exemplified in national, state and city organizations, have produced wonderful results during the depressed conditions of the past four years. The support and endorsement accorded through your columns is fully appreciated.

May long years of activity and prosperity be your reward. Very sincerely yours,

L. C. CARTER,

Boston, Mass., Feb. 15, 1898. President.

PRES'T MINNESOTA RETAIL HARDWARE ASSOCN.

Editor Hardware: I read with much interest your editorial in *Hardware* of the 10th inst., and your idea of making the anniversary edition of the same, one devoted to Hardware Associations, is a good one. The retail Hardware trade throughout the United States is suffering from many evils which could be alleviated through organized effort, and a full discussion of these evils and their remedies, through the medium of trade papers, would assist in the formation of such organizations when they do not already exist and would aid those already formed.

Any information or assistance we can render you in this work will be cheerfully given.

Respectfully,

St. Cloud, Minn., February 18, 1898. CHAS. F. LADNER.

PRESIDENT MICHIGAN HARDWARE ASSOCIATION.

Editor Hardware: I am very glad to learn that you will devote your anniversary number, April 10, especially to the history and interests of the Hardware Associations of America. This is a splendid idea. The vast amount of capital invested by very many of the most progressive, enterprising and intelligent citizens of this country in the Hardware business is entitled to the favorable recognition and encouragement of your valuable paper, and no doubt will be read in every quarter of the land.

As you are thoroughly familiar with the organization and progress of the Michigan Hardware Association, I will not encroach very much on your good nature or valuable time,

Digitized by Google

only to say that the future of the Michigan Hardware Association looks brighter than ever, and no doubt we will have the largest representation at our next annual meeting in July at Detroit that we have ever had.

I am now preparing a route and list of names of dealers in all the larger cities in the State, on whom I shall personally call during the month of March, and endeavor to explain the objects and advantages of the Association to them and solicit additional memberships.

I cannot understand why so many of the wide-awake dealers in Michigan and other States have not identified themselves and taken an interest in the State Associations, but have no doubt very many will do so, when the benefits to be derived by membership in State Associations are better understood, and I hope will eventually lead to the organization of a National Retail Hardware Dealers' Association.

Wishing your valuable paper HARDWARE continued success and prosperity, which you so much deserve, I am,

Yours truly, CHAS. F. BOCK,
President Michigan Hardware Association

Battle Creek, Mich., Feb. 17, 1898.

SECRETARY OHIO HARDWARE ASSOCIATION.

Editor Hardware: I am greatly pleased to notice by your editorial in the HARDWARE of February 10 that you contemplate a special Hardware Association number in the near future.

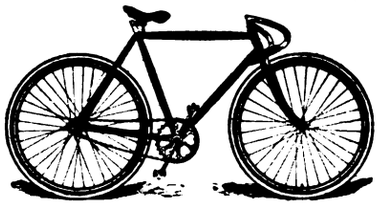
As one who is now and has been deeply interested in the welfare of the Ohio Hardware Association, I hasten to express my hearty approval of this project.

This is an age of organization. The intelligent, progressive, active Hardware dealers are found in these associations, in order that they may avail themselves of advanced business ideas and methods. Such a number of HARDWARE must surely be of great benefit to both State and local organizations, and also in an indirect way to the dealer.

Respectfully,

JOHN F. BAKER,
Secretary Ohio Hardware Association.

Dayton, Ohio, Feb. 16, 1898.



They All Like the Ladder.

A representative of *Hardware* who called at the office of the Bicycle Step Ladder Co., Chicago, was informed by the manager of the company, E. M. Murray, that the new year had begun very auspiciously, orders showing decided improvement over the corresponding period last year. This is particularly significant in view of the fact that the company have done a very large business ever since the specialty was placed upon the market. They are in constant receipt of unsolicited testimonials from users as to the efficiency of the ladder. A recent purchaser in McGregor, Iowa, in forwarding exchange in payment for ladders purchased by him, adds: "I wish to say right here that this is the best investment I have ever made in its line. The ladders do all that is claimed for them and attract a good deal of attention. I would not run the store without them under any circumstances." A purchaser in Marion, Iowa, writes that his concern is well pleased with its purchase. A buyer in Mankato, Kan., says: "The ladders are perfect. We could not do without them." A letter from Greeley, Colo., reads: "We find the ladder without a fault and just as convenient as it is complete." A firm in Ely, Minn., writes: "The ladder works perfectly, and proves to be all that is claimed for it." A purchaser in Carey, Ohio, writes: "We have the ladder up and it works like a charm. We conld not ask for anything better." A Hardware dealer at St. Charles, Ill., says: "The bicycle ladder is a great success with us. I believe it is one of the best investments I have ever made."

HARDWARE'S "Prices Current" are reliable.

The Tryon Co.'s Line of Wheels.

Edw. K. Tryon, Jr. & Co., Philadelphia, Pa., who are so well known because of the high quality of the goods which they handle, have issued an attractive catalogue of their Apollo, Vesper and Juvenile bicycles, two of which we illustrate in this connection. The catalogue has been very artistically prepared and beautifully printed in colors, with illustrations of the wheels, and the various parts connected therewith. The company state that "Nothing but praise comes from those who have ridden the Apollo, and although no defects or weaknesses in construction have appeared, we have gone on improving the wheel wherever it was possible to do so. It has always been our policy to keep in the front rank with improvements, and this year is no exception to the rule." In reference to their 1898

Apollo they say: "Our '98 Model embodies in its construction all the latest improvements that mechanical skill and device have thus far suggested, taking care not to allow theory to interfere with strength and safety. The materials used are the best that money and experience can purchase, and the equipment throughout is the best. Frames are made of 1¼-inch Shelby tubing, swaged to 1⅛-inch at connections. Flush Joints reinforced at every point, solid seat-post lug by which we discontinue the use of bolts and nuts. The seat-post and handle-bars are held in place by patent expanders, which gives the machine a neat and trim appearance. To insure a true and easy running machine, we have fitted a spool, turned from bar-steel, into the hanger which forms the cups. The spool is placed in a chuck and both cups ground, making the bearings absolutely parallel. This mode of construction obviates the

trouble found in most cheap wheels, where the bearings will be tight at one point and loose at another. We will furnish three heights of frame—22, 24 and 26 inches in men's; 20, 22 and 24 inches in women's. Drop of frame in regular road wheel, 2½ inches; road racer, 3 inches."

This description is followed by full mention of the various parts, and anyone who examines the catalogue carefully can fully understand the character of the product therefrom.

They further state that two years ago they placed on the market the Vesper wheel, which has given first-class satisfaction, and fills the demand that has arisen for a cheaper wheel. In juvenile bicycles they handle the Cycloe for boys and the Fairy for girls, both of which are fully described in the catalogue, which will be sent on application.

A lock especially designed for use on freight cars has been devised, whereby the doors may be securely closed by a lock located within the car, with only its operating spindle appearing at the outside. The lock is provided with a dial or disk containing a combination, which, together with the handle or knob, may be quickly and conveniently removed from or placed in engagement with the locking spindle to bolt or unbolt the lock.

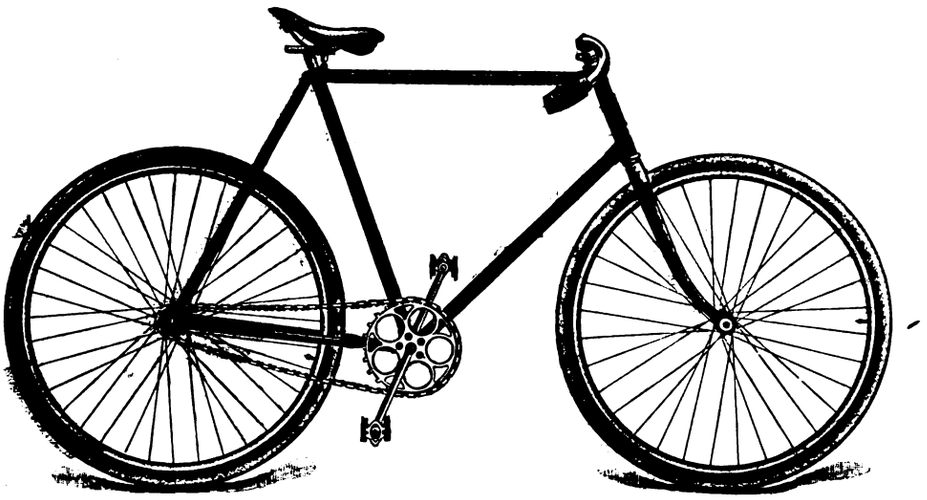
The Speirs Mfg. Co. Wheels.

The Speirs Mfg. Co., Worcester, Mass., are very busy at their large factory getting out orders for 1898 goods. This concern has always been able to secure all the business it could take care of, and as they make almost the entire bicycle in their factory, are able to keep the cost of manufacturing down to the lowest point, at the same time keeping the same high standard of excellence as in the past.



This concern, which is one of the oldest in New England, has recently added a very large addition to the factory and put in some of the finest bicycle machinery yet produced, and is fully equipped with tools for making of each separate part; constructing each part of the wheel at their factory and know it is made of the very best of material, and that each part is given the care it needs.

The Speirs barrel hub is turned from the solid bar of special steel, and is fitted with removable ball cases and retaining washers. The rear sprocket is detachable and is forged from special steel and accurately made. "Each cone, ball track, etc., is carefully gauged, tempered, ground and tested before being put in its respective place, thereby insuring a perfect running bearing. All parts of the Speirs bicycle are interchangeable, which will readily be appreciated by the riding public." As they make their own drop forgings, it may be of interest to some to know that out of 15 tons of forgings there are 13½ tons of borings, leaving 1½ tons of stock to be used in frames, which shows the large expense they go to to get the desired results. While it is admitted that some stampings apparently give good service, this concern is satisfied that the only way to secure perfection is to use nothing but forgings throughout, even at a much greater cost.

Their factory is one of the finest equipped factories in New England, being well lighted and ventilated and having its own water supply and electrical power. The factory at present is running night and day, and in the busy season employs 500 skilled hands. The company pride themselves on the fact that they run their factory twelve months in the year, while a great many of the bicycle manufacturers shut down during the summer months and start up again late in the fall.

The Speirs Mfg. Co. manufacture five different styles of pedals and three different styles of hubs, and while they sell many thousand pairs to American manufacturers, the larger part of their product finds its way to England and the Continent. Speirs' hubs and pedals are well known and well thovght of throughout the European countries. The firm's export agents for America are Guiterman, Rosenfeld & Co., No. 35 South William Street, New York City, and for England, S. Guiterman & Co., Nos. 25 and 36 Aldermanbury, London, E. C.

The company say: "The Speirs bicycle is made to meet the requirements of the average rider who wants a light wheel and one that will stand up on all kinds of roads. We make two styles of '98 wheels. Model A is made of the best cold drawn seamless steel tubing, 1¼ inches in the front diamond, ¾ inch in the rear forks, 1⅛ inches head, 1 inch seamless steel fork sides, all flush joints. Model B machine is made of the best cold drawn seamless steel tubing, 1⅛ inches in the front diamond, ¾ inch round in the rear forks, 1¼ inch head and 1 inch seamless steel fork sides. All connections are forgings, and all are on the outside, with the exception of the seat post clamp, which has a flush joint. Both machines list at $60. There are three heights of frames in both ladies' and gents', with 2¼ inch drop in crank hanger. Ladies' are 20 inches, 22 inches and 24 inches. Gents' are 22 inches, 24 inches and 26 inches. Drop forged oval nickeled fork crown and two piece cranks are used. Model A has round and Model B has oval cranks. Machines are highly finished in colors: black, maroon; Brewster and Sterling green. Forks will be nickeled part way up if desired. All bearings are positively dust proof, being fitted with dust shields, and all are fitted with ball retainers. Handle bars furnished are with either raised or drop curve, adjustable wood or Speirs' adjustable steel bar. Chain used is the Speirs' ¼ inch, B block and B link, hardened steel blocks and pins, which is carefully tested at 1200 pounds before using. It is accurately made, running over the sprockets very smoothly and with very little friction. Any gear furnished up to and including 100. Correspondence is solicited from jobbers and dealers." A very pretty catalogue can be had for the asking.

Ferracute Machine Co.

The Ferracute Machine Co.. Bridgeton, N. J., manufacturers of presses and dies, have for many years past made a specialty of foot presses for working thick sheet metals. They have taken up a number of difficult problems in the way of producing various articles from sheet metal, which were formerly cast. They some time ago furnished a large outfit to a government shop for making a sheet metal box, which was formed up from the flat at sixteen operations, all of the holes and shoulders, etc , coinciding so perfectly that rivets were inserted without reaming the holes. This was considered by those who have seen it one of the most perfect pieces of die work that has ever been turned out.

They have furnished to a number of the large Hardware manufacturers outfits for making knobs in two pieces, (which are forced together so they resemble a cast knob), which are much lighter, and can be produced at a fraction of the cost of the cast and turned knobs. They have also produced various other articles in sheet metal in the Hardware line. They make a specialty of presses and dies for shells and other deep drawn work. They have just issued a large circular or poster, illustrating a number of their presses.

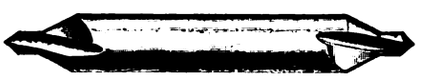
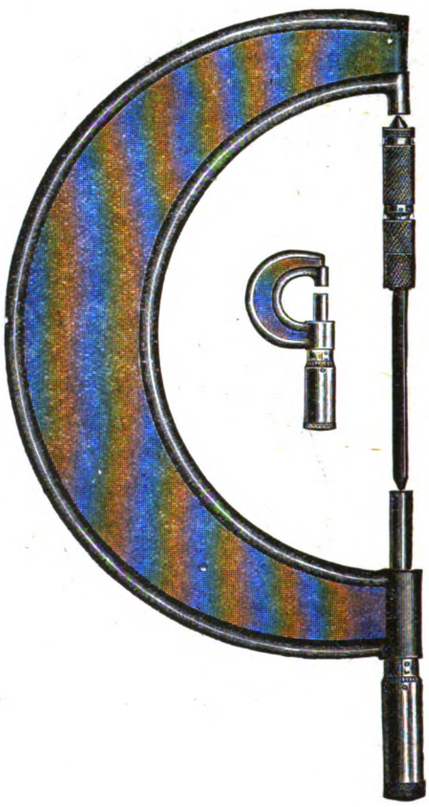
Saw Factory of E. C. Atkins & Co.



We find in the *Indianapolis (Ind.) Journal* for February 6th, the following interesting description of the great saw factory of E. C. Atkins & Co., of that city; it is a very comprehensive description of a famous establishment:

"Manufacturing concerns in these days of trusts and combines begin where their fathers left off. They start big and strong with a million dollar capital and a capacity for supplying the country with everything in their line before a wheel is turned. But it's the old-fashioned, slower-growing kind, after all, that we believe in—the concerns that start small, and, by push and merit, grow big and strong. Indianapolis itself has grown this way from a little town to a big, healthy city, and she has seen some of her big manufactories growing up with her. Atkins saw factory is one of these. Few of us can remember when E. C. Atkins & Co. were not making saws at the corner of South and Illinois Streets, but we of the present generation have noted a great growth in the business, have seen it go forward with strides, until to-day it has become an immense concern, its plant covering acres of ground and requiring at least a dozen big fire-proof buildings, three, four and five stories high, in which to carry on its vast business. Nothing can be more interesting than a walk through this factory. A single saw seems a small affair, but when these small saws are made by the ten thousand one can realize that it takes a great deal of room, a great many men and powerful machinery to make them. Yet most people can have very little idea of how much must be done to make even one good saw, the many processes it must go through and the many intricate machines that must handle it from the time it ceases to be a bit of plain block steel until it becomes a finished tool, bright, sharp and true, ready for work.

"Then there are saws and saws, big circular saws seven feet in diameter, and little circular saws two inches in diameter and all sizes between, band saws from ten feet long, one-eighth of an inch wide, to fifty-six feet long, fourteen inches wide; cross-cut saws of endless variety; hand saws, buck saws, meat saws, kitchen saws, pruning saws, saws for cutting iron and brass and special saws for every use that saws can be put to. And as saws are the one thing that the whole world uses, it can be seen what a market there must be. E. C. Atkins & Co. send their product pretty much all over the world. Maine furnishes them some of their best customers, and they ship to the Pacific coast by the carload. Branch houses at Memphis and Chattanooga look after the South, and another branch house at Minneapolis, with the parent house here, supply the North. Just now they are filling large orders for Alaska. Their foreign trade is regular and steadily increasing. Over five hundred men are now employed, and the factory is running day and night to keep up with the orders."



Products of J. T. Slocomb & Co.

J. T. Slocomb & Co., Providence, R. I., are a co-partnership between John T. Slocomb and Charles E. Barlow, and started in business in 1890 for the manufacture of machinists' small tools. The first tool which they placed upon the market was their combined drill and countersink, which is

used for centering lathe work. This tool was not a new feature at that time, having been thoroughly tested in everyday shop work for several previous years, but at that time it had not been placed upon the market, and there was no special machinery in existence for its economical manufacture. This firm undertook the regular manufacture, and placed it upon the market at a price that enabled it to compete with other tools of the same characeter. These tools are made double-ended, a drill and countersink on each end. To get the best results, they should be speeded high and fed slowly. In the firm's own shop practice, they have drilled and countersunk 1200 centers in annealed tool steel, with one end of one drill, leaving the tool in good condition for as many more. This was done with an E drill (13-64 countersink, 1-16 drill), running one thousand per minute. The special advantage of this tool for this purpose is said to be cheapness in first cost, a saving of time, and a certainty of having all the centers drilled deeply enough, and an improvement in work generally.

J. T. Slocomb & Co. afterward undertook the manufacture of micrometer calipers and micrometer depth and height gauges. At present they make seven sizes of outside micrometer calipers, running from 0 to 6 inches in diameter, by thousandths. The largest and smallest sizes of these are shown in the illustration presented herewith, and also an inside micrometer is shown between the meas-

uring surfaces of the large micrometer. The smaller illustration shows the combined Drill and countersink.

These micrometer calipers were, the manufacturers say, "designed to meet the requirements of everyday machine shop work, by men who had experience in the use of such tools in this line of work."

The frames or bows are bent I beams, giving great rigidity for the weight, and affording a convenient finger hold. There are improved adjustments for wear, and a small coil spring is introduced in such a way as to give the slight continuous friction to the measuring spindle, which is described as a valuable feature, "as the screw cannot get loose enough to move of its own accord." They are sold in sets, put up in neat and substantial cases, or singly, as the customer desires.

The advertising department of the Bissell Carpet Sweeper Co. are just announcing to their customers their willingness to prepare for them specially designed show card matter gotten up very uniquely for such of their dealers as may patronize street car advertising. This plan was originally suggested really by one of their largest customers in the East. For further particulars write to the Grand Rapids or the New York offices of the Bissell Carpet Sweeper Co.

THE HARDWARE DINNER OF 1898.

Another milestone has been passed in the history of the Hardware Club, and of the Hardware trade, of New York.

This important event occurred on the evening of Monday, February 21st, at the Hotel Waldorf-Astoria, in New York city. It had been heralded for some time in advance, as the great Hardware dinner of 1898, and all who were there, or those who have heard by report of that which was said and done upon that evening of festivity, united in the agreement that there was never a more enjoyable or successful dinner given in the series of dinners which have marked the annual gatherings of the trade. Friends from all parts of the country were present, St. Louis greeting Chicago, Boston and the South, while the great Middle States were represented by well-known manufacturers and merchants.

The magnificent main dining hall of this great hostelry, with the surrounding suites of reception rooms and parlors, were devoted exclusively to the use of the club, and there never was seen anywhere within the Hardware trade

GEORGE J. LAIGHTON.

of this country a more beautiful and artistic assemblage than that which was observed from the upper tier of boxes when the guests had taken their seats, which effect was heightened and increased when the boxes in the two galleries surrounding the dining hall were filled with the lovely and accomplished ladies who were kind enough to lend their presence for the evening.

All the preliminary arrangements had been made with that completeness which characterizes the dinner work of Alfred D. Clinch, chairman, and his associates of the Dinner Committee, and when the guests began to arrive shortly after six o'clock they found a courteous and genial welcome at the hands of the Reception Committee, of which George J. Laighton was chairman, seconded by the efforts of the president, officers and governors of the Hardware Club of New York.

An hour and a half were spent in greetings and social converse, and at 7:20 P. M. a procession was formed, with the president in lead, for the dining room, each guest being escorted in person by a member of the Reception Committee. When the guests entered the great and magnificent dining hall, the fame of which is known throughout the world wherever hotels are mentioned, a scene of wonderful beauty burst upon their vision. Across the farther end of the dining hall, on a raised dais, was the guests' table, while all through the room, ranged at convenient intervals, were round tables at which the diners were grouped. There was a profusion of flowers everywhere, while the main table was festooned along the entire length with smilax; and as the bright lights from the ceiling shed their lustre upon the scene below, the effect was one of great artistic beauty, of color and of motion; while the presence of the ladies in the boxes above served as a fitting crown and complement to the whole occasion.

As the gentlemen stood in their places, President Peter McCartee rapped for silence, and grace was said by the Rev. Boardman B. Bosworth. The following attractive and choice menu was then discussed:

MENU.

Huitres Aperitives.

Potage. Croute au Pot, Menag re.

Poisson. Alose sur Planche.

Pommes, Parisienne. Salade de Concombres.

Entree. Ris-de-Veau en Coquilles, Gourmet.

Piece de Resistance.

Filet de Boeuf Pique a l'Espagnole. Choux-Fleurs au Gratin.

Sorbet Metallique.

Gibier. Pigeonneau roti en Casserole.

Salade Chiffonade. Fromages, Camembert et Roquefort.

Entremets de Douceur. Glaces Fantaiise.

Petits Fours. Cafe. Fruits.

The programme for the literary portion of the evening was as follows:

GRACE, - - - Rev. Boardman B. Bosworth.
Who giveth us richly all things to enjoy.—Saint Paul.

TOASTS.

GREETING, - - - - - Mr. Peter McCartee.
President of the Hardware Club.
Magnificent spectacle of human happiness.—Sidney Smith.

THE DOMESTIC POLICY OF THE UNITED STATES, - - - - Hon. John M. Thurston.
In proportion as the structure of a government gives force to public opinion, it is essential that public opinion should be enlightened. Washington.

LEADERSHIP IN DEMOCRACY, - Rev. W. H. P. Faunce, D.D.
Let this great example stand,
Colossal seen of every land,
And keep the soldier firm, the statesman pure,
'Till in all lands and through all human story
The path of duty be the way to glory.—Tennyson.

OLD SAWS RESET, - - - - Hon. R. W. Tayler.
Our dates are brief, and therefore we admire
What thou dost foist upon us that is old:
And rather make them born to our desire
Than think that we before have heard them told.—Shakespeare

At exactly 9:30 P. M., President McCartee arose and called the assemblage to order. The hold which the president has upon the hearts of the trade was shown in the tremendous applause which greeted him upon rising, followed by three memorable cheers for that "friend of everybody, Peter McCartee." When silence was partially restored Mr. McCartee covered his confusion as best he could, and welcomed the members of the club and their guests in the following eloquent manner:

SPEECH OF PRESIDENT M'CARTEE.

It again becomes my pleasant duty to say a few words of greeting, and to welcome you to our annual festival and to this regal hall, in all its magnificence and beauty. Most fitting it is that we should meet as we do to-night, for thus, as we "chide the lagging hours" with festive song and speech, we mark the mile-stones along life's highway, and garland them with roses.

How is it that on such occasions our thoughts go backward and not forward, to the past rather than to the

Digitized by Google

future? Why do we strive to see the pathway we have travelled, too often strewn with shattered Argosies and the wrecks of disappointed hopes? True, it is the fashion of the day to admire the old; we talk of Colonial dames, Colonial houses and Colonial furniture, and the maiden sighs for hoops and farthingales, patches and powder, while the young man of to-day in his knickerbockers, bids fair to lead us back to the ruffled shirts, silk stockings and pumps of our revered ancestors. But a voice speaks to us across thirty centuries, "Say not thou, what is the cause that the former days were better than these, for thou dost not inquire wisely concerning this?"

In an ancient city once stood a statue with two faces, and my imagination has pictured the backward looking countenance as scarred and torn with the conflict of the past, its expression that of disappointment, defeat and despair. But

PRESIDENT PETER McCARTEE.

the forward-looking face is bright with a smile of hope, and the eyes flash with eager expectation.

So I say to the young men here, to-night, look to the future, and not the past—you, in whose hearts is that thirst for achievement which is the prerogative of youth—you, who dare all, and fear nothing—it is to you the nation looks for the accomplishment of its destiny. Some of us stand in the afternoon shadows with our faces towards the sunset, let yours be bright with the promise of the coming day.

See to it: see to it that in the future truth and honor and justice shall prevail in the land. See to it that the government of our city, our State and our nation be administered in righteousness. Let your watchword be, "God and our Country," and when you have graven this deeply in your hearts, then all the sordid and petty things of time shall be swept away in the passion of patriotism that shall fill your souls, and then, and then only, will you have vindicated your right to be called citizens of this great Republic.

Mr. McCartee was loudly cheered at the conclusion of his speech. He then arose, and with a few well-chosen words explained that, because of very important public business which had arisen in the Senate of the United States, the Hon. John M. Thurston, Senator from Nebraska, who had accepted an invitation to speak, was unable to be present. He expressed the regret of himself and the club in a happy manner, and then introduced the Rev. William H. P. Faunce, D.D., pastor of the Fifth Avenue Baptist Church, New York, in the following felicitous manner:

Dear Friends: It is somewhat embarrassing for the presiding officer on such an occasion as this to introduce a friend, for if I should say of him all that is in my heart to say, you who do not know him so well as I would think it excessive eulogy; and if I should say less, I should do him but scant justice. So my only recourse is to introduce the gentleman, confident that when he shall have finished his address to you he will have won his way to the depths of your heart as he has to mine, and gain your lasting honor and esteem.

DR. FAUNCE'S SPEECH

in response to the toast of "Leadership in Democracy," was an eloquent and thoughtful presentation of the fact that wise statesmanship is required at all times in the care of a country's interests, and at no time was the subject of more pressing importance than at present. He made it evident to all that it was the duty of each man, and especially of each earnest business man, to take a part in public affairs, and to show that they appreciate the privileges of citizenship by making the most of the opportunities which that citizenship offered. He spoke in the highest terms of the efforts made by the government to meet the present tremendous crisis in foreign affairs, and countenanced moderation of action and suspension of opinion until the facts in regard to the terrible catastrophe in the waters of Havana should be thoroughly established, but was of the belief that patriotic measures should be taken to preserve the honor and defend the rights of the country. He was loudly cheered. Dr. Faunce paid a few happy compliments to the ladies who overlooked the scene from their point of vantage in the gallery, and on the conclusion of his remarks the applause showed that all were gratified at his presence, and endorsed the sentiments which he had uttered.

When Dr. Faunce was seated President McCartee arose and paid a brief tribute to the memory of the dead of the Maine. He then asked the gentlemen to rise and drink in silence a toast to their memory.

President McCartee then introduced the Hon. R. W. Tayler, member of Congress from President McKinley's home district in Ohio, in the following words:

What a stirring State is that State of Ohio! It was only a year ago, in 1896, when they kept the whole country stirred up on a presidential election, and two months ago they stirred us all up again on a Senatorial election, and now here comes Congressman Tayler from that stirring State, and proposes, with his learning and eloquence, to stir us all up tonight, in the usual Ohio fashion. Gentlemen, Hon. R. W. Tayler.

Mr. Tayler's theme was "Old Saws Reset," and he spoke as follows:

ADDRESS OF HON. ROBERT W. TAYLER.

The kind, the too kind words of your chairman rather embarrass me, and this is known to be a remarkable result to produce on an Ohio man. Really, I must wait a moment until I recover. Recently, at Washington, a visiting statesman from New York or South Dakota, I don't remember which, happened to be invited to a dinner of some social consequence, at which a number of persons of considerable importance were present. In recounting his experience to a friend the next day, he said: "I never saw so many prominent people before in my life, and was

Digitized by Google

scared half to death; and by thunder when the British Ambassador spoke to me I was so embarrassed I could hardly get my knife in my mouth!"

Really, you give me hope and courage.

Some one has said that the Puritan's idea of hell was a place where people have to mind their own business. Having some of the instincts of a Puritan myself, I may as well admit that here, to-night, I am in heaven. I have the opportunity of minding other people's business to my heart's content. Besides that, I am given the opportunity to exhibit myself in the usual attitude of a so-called statesman of talking about the things of which he knows the least. You are a hospitable crowd, and you make me feel at home.

The chief beauty about all this is, that, while you are resting your brains in the process of listening, I am resting mine while I talk. After the last speech we need rest, and, perhaps, spirits. And speaking of Dr. Faunce, to whom I have always listened with delight, I am reminded of one of his most ardent admirers, who said that Dr. Faunce was always enchanting and inspiring, but he never listened to his concluding words without a transport of delight. I have assumed that this meant an intellectual relish of an

REV. WILLIAM H. P. FAUNCE, D.D.

eloquent peroration, and not a mere rejoicing over the fact that the speaker was about to quit.

Since some reference has been made to Ohio I can, without impropriety, add that I come from the heart of the iron producing district of the country, midway between Pittsburg and Cleveland. We produce the raw material which you consume in making the infinite variety of your productions.

I am honored, too, in representing the district so long and so honorably represented by William McKinley, than whom no man is inspired with a profounder love of country. He is the embodiment of patriotism; he stands now, as always, on the declaration "America for Americans!" We may be sure that the country's honor is safe in his hands, and that he will no more permit the waging of a dishonorable war than he will suffer a dishonorable peace. He is most striking to-day in that he has the courage of patience in the midst of alarms.

"Old Saws Reset." This is not a subject of my choosing. It was fixed up by a friend of many years standing; and in all that time he never exhibited so valued a friendship as in this selection. You will notice that it is picturesque and effective, but it is as comprehensive as knowledge and as handy as a pocket in a shirt. It gave me a chance to go to my scrap bag without apology and with the clearest conscience. I have spent more time in trying to think of something not covered by the subject than in reflecting on what I ought to say. I have as yet discovered nothing, and I now offer a reward for any robust idea that is not strictly related in the first degree to the subject. Take any old truth you please and dress it up in new clothes and behold the relevant result.

But my friend of whom I spoke would probably reply that I was not sufficiently acquainted with truth, whether old or new, to be permitted to dress it over: that there would be a shameful incongruity between the truth and the clothes. Well, that may be so.

I seek refuge in the thought, if I am permitted to think, that the subject also permits me to tell any old lies in a new way; and in this my friend would doubtless class me as strictly a first class risk. Think of the chestnuts, hoary headed and venerable, which I might reset; but that I leave for my friend and the other speakers.

But I have an idea or two, or what I imagine to be an idea, and in that unwonted condition I must suffer until their burden is lifted from my intellect—Intellect with a large I, please.

I am an optimist by temperament and have the largest hope for the future of Society; yet there are perils and pitfalls which only the blind cannot see. Our mode of escape is through the awakened thoughtfulness of the American people, especially of the American business men; especially of such men as you, who, I assume, are not politicians, or if interested in politics are concerned chiefly about the government of Greater New York or the stability of currency conditions.

But, after all, these are only surface conditions; broadly speaking, they are only incidents.

Whether Tammany or some other kind of reform controls New York; whether we have a war with Spain or not; whether free silver triumphs in 1900 or something else—these do not, except incidentally, strain the roots of our social growth or seriously impair the fabric of our civilization. There may be a rent here and there, but the general integrity of the fabric remains.

Liberty, patriotism, these are subjective conditions. They are sentimental rather than concrete. It rarely sustains any physical relation to the person who harbors it. A citizen of the German Empire may, perhaps, pass from the cradle to the grave and feel no more physical interference with his liberty than if he were a citizen of the United States. A subject of the Czar of All the Russias may live his life and perhaps suffer less restriction upon his personal freedom than if he were a citizen of the French Republic.

Physical surroundings have much to do, of course, with the mental and moral attitude of men; but after all, it is this attitude of mankind, this sentimental condition, which determines the physical surroundings, and at the last determines the form and proportions of the social structure.

What is going on in the American mind? and what are the subjective necessities of the hour?

We hear much talk of social unrest; we hear much of the suffering of men and women; of the grinding of the poor; of low wages, and these are deemed a menace; so they are and ever were. But there was always suffering of men and women; there was always grinding of the poor, but there is less now than ever before; the purchasing power of a day's labor was never as large as during the past decade. These complaints we have always with us, and they serve their part, their useful part, in ameliorating the conditions under which men live.

But they have no more to do with social revolutions than they have always had.

Something else has been going on in the public mind and other results are threatened. How far away they may be, or whether they will ever arrive, no man can tell.

There is in the air a distinct drift toward Socialism. I do not care how scientifically you define Socialism if you note my use of the word "drift."

And this drift while it may be accentuated by, is yet

Digitized by Google

practically independent of, the immediate physical conditions and surroundings of the body of the people.

Let us inquire into this a moment and see if the causes for such a sentiment really exist and how far-reaching they seem to be.

It is not my intention to discuss partisan politics though what I say has a necessary relation to it.

The forces which operated in the Campaign of 1896 effected, as I view the subject, a distinct decadence in the moral sense of a large body of the American people. The proposition to enter upon the free coinage of silver at the ratio of 16 to 1 had many plausible and honest supporters. It was contended for with strong arguments and by many on purely philosophical grounds. The fact that I could not be convinced of the soundness of the argument is apart from this inquiry. Indeed, that is so irrelevant at this moment, that I might admit that I am wrong and the advocate of free silver is right.

The important thing is this, that in the midst of that discussion and as a logical result of it, there was reared the hated head of repudiation and with it of commercial dishonesty; men were taught with more and more boldness as the campaign progressed, that they had been wronged, bitterly and premeditatedly wronged. That

HON. ROBERT W. TAYLER.

there had been, and were then, sinister forces at work, having the purpose of chaining the multitude to the service of the few; that the accumulation of money was not due to the natural evolution of business and commerce but to the wicked designs of the powerful. Thus it came to pass that men concluded, first, that there was no wrong in scaling their debts and in repudiating the obligations of contracts and, second, that the fabric of society had been unequally woven to their permanent disadvantage. Thus was the stifled conscience kept quiescent. If the cause of free silver was a righteous one, it is not the first time in history that a righteous cause has been made to serve an unholy purpose or bring about an unrighteous end.

The immediate result of all this, aided of course by antecedent facts, was to focus the public attention upon the means adopted to acquired money, and to view these methods with inflamed imagination. Every exercise of power by the Federal Government and by the Courts was looked upon as a new expression of the power of money and especially of the money concentrated in corporations and trusts. Men with grievances magnified their grievances; men without causes of complaint speedily conjured them up; and everywhere the agitator and the demagogue were in evidence.

When this aroused, but distorted intelligence looked about, what did it see?

It found Wall street gambling in stocks and betting fabulous sums on the rise and fall of securities. It found Wall street fixing the value of conservative properties according to the whim or necessity of a gambler. They had always known that it was so, but the mental and moral condition which accompanies knowledge is the factor which gives it character. And all this business took on a new and unholy light. The shearing of lambs became an incident of slight consequence in view of the sinister aspect of the business as a whole.

Turning their eyes elsewhere, what did they observe? They saw with a new light and from a different standpoint the stupendous aggregation of capital controlling almost every line of business possible of consolidation, and raising or lowering prices, and stifling competition at will. The result produced of cheaper cost to the consumer by improved methods and economy of management left little impression before the, to them, appalling power of the aggregation. The trust had formerly been the weapon of one party to strike at the doctrine of protection which was supposed to encourage them.

But the new light disclosed that, tariff or no tariff, the trust was here and that it sustained no necessary relation to the economic principle involved in free trade or protection. It was now looked upon as a concentration of power arising out of our social and general economic conditions and as such were a menace to the liberty and happiness of mankind.

It is easy under these circumstances to magnify dangers; and the result is a grievous inflammation, accelerated by the constant and insistent spectacle of the trust.

So much for the subjective condition of the man. What else do we see? Speaking for myself, I see this: that the forces that make for Socialism are not the Mosts, the Debs and the Populists, but the Rockefellers, the Havemeyers and the Pierpont Morgans. When the oil interests are in the hands of one small unified group; the sugar interests in another; the railroads in another; and so on, it will take but one step more to consolidate all of them into the hands of a small unified group. It will then become a concrete fact which the narrowest view can comprehend; the group will be the masters, benevolent and kind perhaps, but still masters, and the rest of the people will be slaves or subjects. Will they be willing subjects? If they are supplied with the necessities and comforts of life at lower prices than ever, will they be willing subjects? If their physical surroundings are more comfortable than ever, will they still be willing subjects? Far from it. They will be on the very eve of Socialism. No, rather will they be in the midst of it. For, if the control of every moneyed enterprise is in the hands of a single group, it will present not only a fascinating object of attack, but an exceedingly simple one. Turn out the owners, or better and easier still, simply compel the owners to abandon the policy of administering their business for their own benefit, and administer it for the benefit of all the people, and there is your Socialistic Society born in an instant.

I have described conditions. My personal views are of little consequence. In the awakened intelligence of such as you I see the promise of a continuance of the present social order, developing along the lines of a proper evolution.

This is a time, not for apathy, but for effective thinking and from such as you who represent neither extreme we look for that conservatism which contains the largest promise of good.

Frank Wyman, of the Simmons Hardware Co., St. Louis, Mo., was then called upon, and responded with a recitation, humorous in its character, and received with marks of favor.

During the evening a number of patriotic songs were rendered in an attractive manner by a vocal quartette,

Digitized by Google

consisting of the following gentlemen: Cornelius J. Bushnell, John Young, William Young and Edward S. Roe.

At the conclusion of the banquet, Mr. McCartee dismissed the company with these words:

"Gentlemen, accept my congratulations on the success of our entertainment to-night. May many, many years of useful, honorable life be given to each one of you, and may we treasure the memories of this and past occasions with unfailing pleasure and delight."

While there was some disappointment, of course, at the absence of Senator Thurston, the speeches which were delivered were patriotic and to the point, and all who were present felt that the evening was one of rare enjoyment.

The presence of the ladies in the gallery, which was a new feature of the Hardware dinners, was one that commended itself to everybody, and there is little doubt that it will be a permanent part of the annual proceedings hereafter. The ladies were interested in the speech-making, and showed this appreciation by taking part in the applause which greeted the orators from time to time. Very

CHAIRMAN ALFRED D. CLINCH.

many of the gentlemen present made it a point to pay their respects to the ladies during the evening, and supper was served to the latter in their boxes while the gentlemen were dining below.

THE DINNER COMMITTEE

who had charge of the arrangements for the evening, were as follows:

DINNER COMMITTEE.

Alfred D. Clinch, *Chairman.*

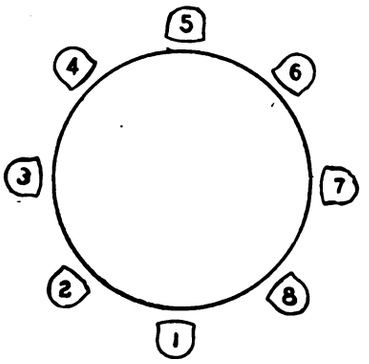
Eugene Bissell,	Edward C. Van Glahn,
James H. Kennedy,	J. Leonard Varick,
George H. Sargent,	Richard R. Williams.

It is needless to say that the main portion of the work of preparation fell upon the shoulders of Chairman Alfred D. Clinch, who has been the head and front in like work of all the Hardware dinners that have yet been given. His rare executive ability, his knowledge of the proper things that should be done, and his industry in seeing that they are done, were shown in the results of the evening, and Mr. Clinch was congratulated by very many upon the success which had attended his efforts. It may be permitted here to say that the officers and reception committee appreciate to the fullest extent the artistic work of Mrs. Alfred D. Clinch, who made a labor of love of the preparation of the badges worn by the various officials and committees.

THE SOUVENIR PROGRAMMES.

At each plate was a handsome souvenir programme, printed in colors upon heavy boards, in a most artistic manner. It contained the menu, the order of toasts, list of guests, location of tables, portraits of officers and pictures of the interior of the Hardware Club, interspersed with appropriate quotations, and admirable from every point of view. It was prepared and presented with the compliments of the *Iron Age*. The outside cover of the programme is shown on the following page.

RECEPTION COMMITTEE.



George J. Laighton, *Chairman.*

Frank P. Abbot,	James D. Foot,
Thomas J. Atkins,	George A. Graham,
William H. Baker,	George E. Harding,
Charles J. Billson,	George P. Hart,
George W. English,	Richard P. Rothwell,

Henry L. Shippy.

A LIST OF THOSE PRESENT.

We give herewith a list of those present, with the number of the tables at which they were seated. The guests' table, which is also shown, occupied one end of the dining hall, while the other tables were grouped about the room.

The illustration shown herewith gives a general idea of the manner in which the guests were seated at the various tables.

TABLE 1.

1. Alfred D. Clinch, Underhill, Clinch & Co.
2. Samuel M. Nicholson, Nicholson File Co.
3. Henry L. Coe.
4. Asa D. Bigelow.
5. William W. Glover, Underhill, Clinch & Co.
6. William P. Uhler, F. A. Ferris & Co.
7. Charles J. Stebbins.
8. Frank H. Thompson, Stanley Rule & Level Co.

TABLE 2.

1. Thaddeus Smith, Union Nut & Bolt Co.
2. Charles C. Lewis. Chas. C. Lewis Co.
3. Lester L. Ensworth, L. L. Ensworth & Son.
4. George T. Montgomery, Montgomery & Co.
5. Irving S. Ventres, Union Nut & Bolt Co.
6. Joseph Hardie, N Y. Metallic Bedstead Co
7. Louis F. Tissot, Union Nut & Bolt Co.
8. John B. Clapp, John B. Clapp & Son.
9. Louis M. Way. Way Hardware Co.

TABLE 3.

1. J. Leonard Varick, Union Nut & Bolt Co.
2. Emanuel B. Sheffer, Erie Railroad Co.
3. James C. Peabody, Swan & Finch Co.
4. Samuel J. Johnson, Union Nut & Bolt Co.
5. J Albert Van Winkle, J. A. Van Winkle Co.
6. S. Otis Livingstone, Livingstone Nail Co.
7. Edward P. Coughton, Millers Falls Co.
8. George E. Rogers, Millers Falls Co.
9. Edward White; Erie Railroad Co.

TABLE 4.

1. Jas D. Foot, Kearney & Foot Co.
2. James H. Ritter, Biddle Hardware Co.
3. Thos. F. Burgess, Dean Linseed Oil Co.
4. Jno. B Varick, J. B. Varick Hardware Co.
5. Sandford D. Foot, Kearney & Foot Co.
6. Cleveland Foot.
7. C. Clinton Smith, J. L. Mott Iron Works.
8. Wm. D. Supplee, Supplee Hardware Co.

TABLE 5.

1. William M. Taussig, Wiebusch & Hilger, Ltd.
2. Charles F. Wiebusch, Wiebusch & Hilger, Ltd.
3. F. K. Priest, American Shearer Mfg. Co.
4. W Dormitzer, A. D. Straus & Co.
5. Clemens Kloefkorn, Challenge Razor Works.
6. W. S. Brewster, Denny, Poor & Co.
7. H. S. Dormitzer, Wiebusch & Hilger, Ltd.
8. Henry T. Seymour, Woods Specialty Co.

Bissell Carpet Sweeper Prizes.

In a recent issue we announced the competition which had been inaugurated by the Bissell Carpet Sweeper Co., Grand Rapids and New York, for the best display of Cyco-bearing Carpet Sweepers made during the holiday season of 1897. We publish in this connection the report of a committee that was appointed to pass upon the various photographs of window displays in response to the announcement. The report of the committee is in full, as follows:

We, the undersigned committee, selected by the Bissell Carpet Sweeper Co., to pass upon the merit of the several photographs submitted in accordance with the cash prize offer of the Bissell Company, for the best display of "Cyco" bearing carpet sweepers made during the holiday season of 1897, do hereby certify that we have carefully examined all the photographs of the several displays, and acting in accordance with the conditions governing this competition, give it as our best judgment that the following are entitled to the prizes in the order named:

1st prize, $40.00, Bryson, Graham & Co , Ottawa, Ont.
2d prize, $30.00, Geo. W. Snaman, Allegheny, Pa.
3d prize, $25 00, L, J. A. Surveyer, Montreal, P. Q,
4th prize, $20.00, The Bush & Bull Co., Williamsport, Pa.
4th prize, $15.00, Kellogg, Drake & Olson, Galesburg, Ill.
6th prize, $10.00, Wm. E. French & Co , Evansville, Ind.
7th prize, $5.00, John Huff, Bremen, Ind.
8th prize, $5.00, W. F. Tietz, Appleton, Wis.

(Signed) DAVID DOWNIE,
Window Draper, Chas. Trankla & Co.
W. L. ADAMS,
Window Draper, Voigt, Herpolsheimer & Co.
J. C. CUTTING,
Window Draper, Spring & Co.

Grand Rapids, Mich, Jan. 19, 1898.

The illustration here shown is a photograph of the display that took first prize.

New York State Hardware Jobbers.

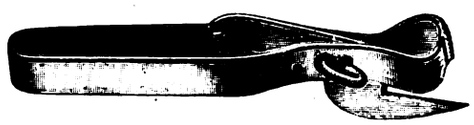
A regular business meeting of the New York State Association of Hardware Jobbers was held in the governors' room of the Hardware Club, New York, Monday, February 21. The meeting was called to order by its president, Charles H. Turner (Albany Hardware & Iron Co.) Its proceedings were entirely confined to matters of a routine character. As the Hardware Club had extended its privileges to the merchants visiting this city, an opportunity was afforded the Association to hold its meeting as above. At the Hardware dinner given on the same evening at the Waldorf-Astoria the faces of nearly all the members of the State Association were recognizable, in the enjoyment of which occasion the members participated with their accustomed spirit. At Elmira, N. Y., and the date March 24, will be held the next regular meeting.

Cycle Manufacturers Meet.

A meeting of the board of directors of the National Board of Trade of Cycle Manufacturers was held at No. 320 Broadway on February 23 for the election of officers and appointment of committees. Walter Wardrop was elected secretary and William A. Redding treasurer. These committees were appointed: Membership—A. L. Garford, J. A. Carter and R. S. Crawford. Charges—C. S. Dikeman, W. A. Redding, and counsel. Legislation—F. J. Stimson, W. T. White and George R. Bidwell. Transportation—Joseph McKee, A. R. Peck, A. L. Moore, C. F. Smith and Kirk Brown. Arbitration—W. A. Redding, R. L. Coleman, R. Phillip Gormully, and counsel.

Thomas Mf'g Co. Bicycle Agency.

The Thomas Mf'g Co., Springfield, Ohio, manufacturers of the "New Thomas Bicycles," have established an agency at No. 10 Warren Street, New York, which is under the management of E. W. McCarty, well known to the bicycle and Hardware trade as the son of J. C. McCarty, the senior member of the firm of J. C. McCarty & Co. Possessing as he does the characteristic energy and industry of his father, combined with a thorough knowledge of the requirements of the bicycle business, his large acquaintance in the trade makes him admirably fitted to distribute the product of the Thomas Mfg. Co., which includes a line of juvenile cycles as well as those intended for adults.



Bath rooms in public schools are a novelty that Boston will introduce in its new buildings. The latest structure of an educational nature in that city is to cost $350,000, and will be fitted with toilet, dressing and bath rooms for both sexes, with eleven shower baths and foot baths as well.

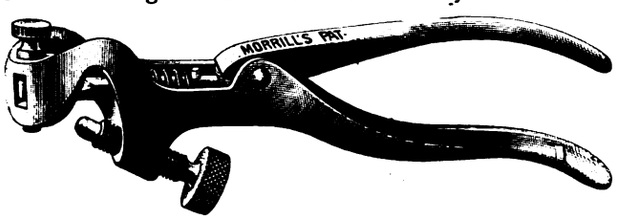
NEW GOODS AND SPECIALTIES.

The Klondike Can Opener.

In this connection we show the Klondike Can Opener, manufactured by the F. J. Hall Co., manufacturers of specialties, Wallingford, Conn. A personal examination of this tool leads to the belief that the manufacturers are not extravagant when they describe it as not only new in construction, but as first-class in every respect, and finely finished. A glance at the illustration will show the method by which the combination is worked. By turning the set

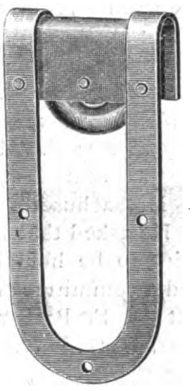


screw the blades revolve, and either tool is brought into position. A large fulcrum is furnished for the tack puller, so that the tack is raised out straight before the tack strikes the floor. The purchaser, in fact, gets two first-class tools for the price of one. The tool is made of crucible steel, blades tempered and sharpened to a keen edge. The handle is of Bessemer steel, plated and highly finished. These tools are handsomely put up in a novel and attractive manner of one dozen in a case.

Morrill's "New No. 1" Saw Set.

The "New No. 1" saw set manufactured by Charles Morrill, No. 35 Warren street, New York, has entirely superseded the old pattern formerly in vogue, and the sales for the same are claimed to be far in advance of all anticipations. The essential parts of the old saw set which made

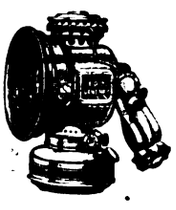
TRADE MARK.



it formerly so popular have been made doubly efficient, by the new and correct devices for positive adjustment which form the important features of the "Morrill's New No. 1" saw set. The great advantage of setting saws by the Morrill saw set, over any other on the market before its advent is the principle of direct pressure. The old method was to use a hammer or hammer set, or a punch and steel block, but this manner of setting was rarely perfect in its operation, for if the saw proved soft it was apt to fibrate, and if it was too hard it would granulate, either of which conditions was fatal to the cutting qualities of the saw; for after undergoing the hammering process the grain of the steel became so distorted it would not hold an edge. The Morrill method by which success

was attained by direct pressure, was proved to be more favorable to the saw. If the operator will only study the principles involved in its construction he will find it is not necessary to injure the most delicate saw made if this new saw set is used. The saw should be set frequently, as the teeth wear at the points on the outside, forming a wedge, and the saw necessarily binds in consequence. By setting the teeth over again, even one-hundredth of an inch, will enable your saw to go on cutting smooth and straight. It is a well-known fact that many saws are spoiled, bent and broken, through the lack of proper attention at stated intervals. The adoption by Mr. Morrill of the now well-known "trade-mark" illustrated herewith, which trade-mark will be found on all goods of his make, has made it extremely difficult to market any similar saw set that might be substituted for the genuine article.

A New Hanger.



We show in the accompanying illustration a new Hanger just put out by Lane Bros., Poughkeepsie, N. Y. It is called No. 25, being somewhat similar to their No. 30 and

No. 50, but is designed especially for light doors. The makers will gladly give full information, circulars and prices to those interested.

Twentieth Century Lamps and Cyclometers.

The Twentieth Century headlight, one of the standard lamps of the century, has been radically improved for 1898, the new model being a much improved and simplified article. The front is now hinged, opening like a door, so that the glass does not require removing to be cleaned. The manner of attaching the oil fount is now easy and effective, as is the way of locking the wick. The oil-spout, too, has been placed on the outside of the fount, rendering filling and refilling possible without detaching the fount from the body of the lamp. The reflector is

now on the same parabolic lines, but increased in reflection surface, and gives even a greater volume of light, although it is well known that the Twentieth Century lamp always did give a great light. The gossamer hood, quite original with the Twentieth Century, will continue to be supplied.

A rigid bracket of their own patent has been adopted by the Twentieth Century Mfg. Co., No. 17 Warren street, New York, which is adjustable at any angle, on the post or either side-fork, and is also so arranged that it can be placed on the handle-bar post, when there is an outside brake on the machine. It can also be adjusted to the

Digitized by Google

dashboard or side-iron of buggies and runabouts, for it is fast becoming a deservedly popular driving lamp.

The company will have but one style and size of lamp in 1898 model, known as the Standard, made of brass, nickel-plated and aluminum reflector. But they are placing on the market this year a cyclometer of the latest design and improvement in mechanism, which bids fair to become popular, their reputation with the lamp being a guarantee of accuracy and reliability in the cyclometer. It has been thoroughly tested.

In appearance nothing is lacking, the cyclometer being small and well-figured and handsome. It will be packed in boxes of attractive style. Its success should be instantaneous and great.

The New England Hardware Dealers' Association.

The fifth annual meeting of the New England Hardware Dealers' Association was held at the United States Hotel, Boston, on the evening of February 9th, and was a success in every sense of the word. A banquet was served, presided over by President D. Fletcher Barber, who in calling the assemblage to order for the speech-making, happily introduced Hon. Albert L. Harwood, who spoke upon the questions of builders' materials and laborers. An address was also delivered by Charles E. Adams, of Lowell, president of the Massachusetts State Board of Trade, in regard to the exhibition of Massachusetts products at the Paris Exposition in 1900. He asked that the Association be represented at a hearing to be held before a committee on federal relations, and a committee of six were appointed, as follows: President D. F. Barber, Secretary James A, Farless, H. L. Sawyer, H. G. Janvrin, G. W. Burditt and A. M. Wiley.

The annual election of officers was then taken up, with the following result:

Secretary: James A. Farless, Boston.

Treasurer: James L. Work, Boston.

Vice-Presidents: First, Chas. E. Adams, Lowell; Second, Chas. O. Tukey, Chelsea; Third, Lewis W. Thompson, Woburn.

Directors: Hiram G. Janvrin, Boston; John H. Sayward, Haverhill; Edgar H. Bowers, Needham; Arthur C. Lamson, Marlboro; Myron H. Tarbox, Boston; John M. Fiske, Nattick; Harry H. Hale, South Boston.

James A. Farless, secretary, then presented his annual report, in which he stated that the Association had held its own during the recent depressed times, and that the membership remains about the same as it was a year ago, and that the treasurer had a balance on the right side of the cash book. He further said: "During the past year the association has held nine monthly meetings and eight Executive Committee meetings. The attendance at all our meetings has been excellent, and the business of the association has been transacted with harmony and fairness—every member having had a full opportunity to express his views. It is worthy of notice that since our organization no speaker has been called to order by the presiding officer on account of irrelevant remarks."

The final business of the evening was election of president, and D. Fletcher Barber was re-elected by unanimous vote on the first ballot, but on his absolute refusal to hold the office for another year, and as no result occurred on several ballots which followed, the election was postponed until the meeting of March 9.

The new American Steel & Wire Co., which has been formed for the purpose of managing the wire interests of the country, has decided upon officers as follows: President, George T. Oliver; vice president and general manager, Philip W. Moen; secretary, E. J. Buffington; directors, H. W. Oliver, William Chisholm, Wilson B. Chisholm, W. Edenborn, W. E. Rice, and W. Patterson.

Recent Trade Publications.

The N. N. Hill Brass Co., East Hampton, Conn., are sending for the season of 1898 an illustrated catalogue and price list of their extensive line of bicycle bells. This is well printed upon heavy paper, and for a frontispiece shows their extensive works at East Hampton. Full illustrations and descriptions of the bells are given, showing all the details of the same. In a note of introduction the company say: "In presenting our new illustrated catalogue to our patrons, we consider it not out of place to invite their confidence, because of our long experience in the manufacture of bells. We manufacture all of our goods from the raw material, consequently we can give you better goods at the same prices than any other manufacturer. For excellence of castings and finish of workmanship, clearness and resonance of tone, our cast bells, made from pure bell metal, cannot be excelled. Warranted to give satisfaction in every way. Your line will not be complete without these bells."

The Troy Nickel Works, Albany, N. Y., who are always getting out something original in the way of exploiting their line of "Always Cold" goods, have sent us a "full hand," each of the five cards being sufficient to make the other fellow look scared. There is a note of explanation which says: "Imitation is the order of the day. The real and the unreal live side by side. The good and the bad are neighbors. All first-class men are successful. All honest men succeed. Dishonest men try to, and sometimes do, on the brains of others. But we are the 'Real Stuff,' and have only the best goods."

Farwell, Ozmun, Kirk & Co., wholesale dealers in Hardware, St. Paul, Minn., are favoring their friends with a handsome colored map of the world, which shows the latest changes in the boundaries of the nations, upon which is printed a calendar for 1898, and some brief remarks as to the various specialties which they handle. According to this map, St. Paul, Minn., is the chief city in the world, as it is designated with red ink, while Rome, London, New York and Asbury Park are compelled to content themselves in plain black. This is a very attractive map, and at present adorns the walls of the *Hardware* editorial rooms.

The North Bros. Mfg. Co., Philadelphia, Pa., are sending their friends a very attractive little publication entitled "Ice Cream Freezer Perfection." This is printed in black and white, and is very tempting in appearance, as the front and back pages are covered with dishes of ice cream, prepared, we suppose, with the good offices of the freezers made by this company, among which are the Lightning, the Gem and the Crown. This publication gives a full description of their extensive line, and must certainly be a matter of interest to Hardwaremen.

Allerton-Clarke Co., Nos. 97 Chambers and 79 Reade Streets, New York, have recently issued an illustrated catalogue of bicycle sundries manufactured by them and for which they are sole agents. The price list includes an extensive line of bicycle bells, covering twenty-four different varieties; tandem gongs, spoke wrenches, chain lubricants, repair kits, toe clips, lamp brackets, luggage carriers, bicycle saddles, lamp locks, cycle and sprocket padlocks, bicycle stands and home exercisers; wrenches, lamps and cyclometers.

The Coates Clipper Mfg. Co., Worcester, Mass., makers of the well-known line of Clippers that for so long have borne their name, are sending their friends a handsome standard desk calendar for 1898, finished in heavy morocco, with gelatine surface. It is an ornament that will adorn the desk of any business man.

HARDWARE costs only One Dollar a year.

Minnesota Hardware Dealers' Association.

It was a representative body of Hardwaremen that filled the Commercial Travelers' Hall, Minneapolis, Minn., on the 9th inst., when the Second Annual Convention of the Minnesota Retail Hardware Dealers' Association took place.

They were made welcome by the President, Charles F. Ladner, who, while expressing his intense gratification at the large turnout of the members and their friends, dwelt upon the advantages which such associations conferred upon their associates, the usefulness of which was greatly increased by the addition of such analogous branches of trade as would be benefited by Association contact.

The convention was a very harmonious one, representing as it did a membership of over 330, which it was felt would be largely increased by additions during the current year; for from the secretary's report, which was a long and exhaustive one, it was shown that a revised list of retail dealers for Minnesota covered 1500 names, and could be more largely drawn upon.

The election of officers for the ensuing year was the first business disposed of. The members showed their appreciation of the work which had been done by re-electing most of the old officers. The list elected is as follows:

President, Charles F. Ladner, St. Cloud.

Vice president, Hon. A. T. Stebbins, Rochester.

Executive committee: W. H. Tomlinson, Le Sueur; C. F. Stremel, Minneapolis; John Schleck, St. Paul; James E. O'Brien, Crookston; J. P. Watson, Marshall; E. A. Moye, Duluth; Clement Schroeder, Mankato.

The president and vice president are members of the executive committee by virtue of their office. The secretary and treasurer are elected by the executive committee.

The convention was then addressed by C. N. Barnes, secretary of the North Dakota Retail Hardware Dealers' Association, who spoke at some length, expressing his pleasure at the opportunity afforded him of meeting his Minnesota brethren. He referred with pride to the good work in the way of organization of retail interests, forwarded by the association of which he was secretary. It was work that was full of continuous effort, and showed a grand result in the securing as members of 100 out of the 180 dealers doing business in that State.

Secretary C. A. Peck of the Wisconsin Retail Hardware Dealers' Association, being invited to address the convention, made an impressive speech in which he set forth the advantage of association, which he thought provided the members with new and broader views of the trend of trade, and the confidence in co operation of effort made popular by a better acquaintance with their competitors, and fostering a community of ideas and harmony of business methods. He believed it would result in a better average profit being made by the associated dealers, as the distribution of information constantly improving economic advantages would be well worth all it cost.

B. W. How, of Sauk Centre, upon being introduced by the chairman, read an extremely interesting paper on the subject of "Unselfish Loyalty to the Association." Among the many thoughtful reflections which filled his address he said:

Members of this organization subscribe to the resolutions that they will not buy merchandise from any house which opposes the objects of our association, or which sells to any corporation or firm which would be defined as a catalogue house or department store. Unswerving loyalty to such resolutions means often some sacrifice of convenience and even profit, but a merchant who honestly subscribes to our resolutions must temporarily suffer this inconvenience and loss, and decline outright the purchase of any article offered him by a firm unfavorable to the objects of our association. Whether goods so offered seem an absolute necessity or not, the ultimate success of our organization and the final achievement of our purpose depend upon the unselfish and steadfast observance of this rule.

An exceptional few who in a half-hearted way subscribe to these objects, and are faithful to them in just so far as they do not conflict with personal interests or immediate profit, are a positive damage to the association and should not enroll themselves as members. While numerical strength is of the utmost importance, unity of purpose is equally vital, and the disloyalty of but a few members means our disruption, because it would be reckoned as the early sign of weakness, and houses unfavorable who note this would feel less discouraged, while houses now favorable would feel less encouraged.

Other addresses were made by members, one on "The Success of Our Organization," by E. A. Moye, of Duluth, and James E. O'Brien, of Crookston, read one on "The Work of the Association," which were listened to with eagerness and appreciation, and added greatly to the interest of the work of the association. The visiting members from other associations were also heard from, which list included J. Newton Kind, secretary of the Northwestern Lumberman's Association, and President Clark W. Kelley, of the North Dakota Retail Hardware Dealers' Association. After listening with interest to an amusing paper read by S. M. Davis, of Minneapolis, the convention a little later went into executive session for the purpose of discussing matters of a private character. During the executive session the Committee on Resolutions reported in favor of all that had been referred to them, except the one admitting implement dealers to membership. The question of forming a Northwestern Association was referred to the Executive Committee with power to act, and a joint meeting was immediately called at 4 o'clock in the afternoon. St. Paul was selected as the place of meeting next year, although the Duluth members extended a warm invitation to the association to visit the Zenith City on that occasion. The convention adjourned to meet in February, 1899.

"The Best" Wrench for 1898.

The above caption is found upon some attractive circulars issued by the Best Wrench Co., No. 21 Quincy Street, Chicago. A very comprehensive idea of the character of this wrench may be learned by an examination of their card upon page 81 of this issue.

The manufacturers call attention to the fact that this wrench has been improved for 1898, and that it carries the recommendation of many expert cyclists. As will be seen by the illustration, this comprises four complete tools in one, or an adjustable wrench, an alligator wrench, a nipple wrench, and a screw-driver, all in one. In further explanation they say that they can be quickly adjusted; are perfectly rigid; there are no springs or screws to rust or wear out; the length when closed is five inches, and the weight four and a half ounces; and that they are case-hardened, nickel-plated, and nicely finished. Full particulars as to prices, etc., can be had of the manufacturers on application.

The Boston Gas Light Co. are erecting a new gas plant at Commercial Point, in the vicinity of Boston. This new plant consists of a building about 52 feet wide and 185 feet long, having brick side walls and brick partition walls dividing the building into three distinct parts, made up of a generator house, blower room and condenser room. No wood is used in the construction of the building, and it is absolutely fireproof. The floors are of steel throughout. The roof is covered with slate supported on steel roof trusses and framing. The contract for furnishing and erecting the steel roof work complete has been let to the Berlin Iron Bridge Co., East Berlin, Conn.

WESTERN TRADE MATTERS.

Editor Hardware:—The new year is opening with brightest prospects. Travelers book a better quota of orders than at this time last year, and collections are much easier. The happiest feature of new year transactions is that country merchants are entertaining more liberal views. In the cities, the policy of from-hand-to-mouth buying is rapidly disappearing.

The dealers are preparing for a busy bicycle season. Interest in this line is already awake. From present forecasts, $75 will be the ruling cash price for standard makes of the chain model; only a moderate demand is expected for chainless wheels, and but few dealers seem to take any interest at all in the novelty. The managers of several big houses are of the opinion that the manufacturer of a first-class wheel, which can be profitably handled at $50 retail, will mark an epoch in the bicycle history of 1898. Economic conditions seem to demand such a wheel, and the sooner it is brought out, the quicker will bargain or department store wheels cease to make propaganda.

BICYCLE BUYERS' CLUB.

A Western merchant advertises "Advance Sales of Bicycles Greatly to the Interest of the Economic Buyer." His scheme is to induce clerks, mechanics and other wage earners to join a buyers' club. Every week or month the members pay a stated sum to the merchant, who is the self-constituted treasurer of the buyers' club. The club's life is six months—the extent of the winter season. When spring arrives, every buyer will have paid enough into the club's treasury to secure him a first-class wheel. As a special inducement to increase the membership of the club, this merchant-banker offered to pay 5 per cent. interest on all moneys received by him, beginning with the date of the first payment. The merchant informed me that the club had fifty members, and that this instalment plan is proving a very satisfactory venture all around.

THE ARCHITECTS AND CONTRACTORS.

All the live Western cities are busy with plans and specifications to be executed during the spring and summer months. Not since the great boom years of our history, was there such an avalanche of prospective builders. This will insure a season of great activity to manufacturers of structural and builders' Hardware. The merchants in the distributing centers are already preparing for the rush, and are buying larger stocks than ever before known at this time. This is probably a very wise move, for, last fall, when capital became inspired with confidence, a great many building enterprises were at once planned and executed. The demand for material came so fast and furious that manufacturer and dealer were put to great disadvantages in meeting this demand on time. Many contracts went by the board, owing to the inability of manufacturers and supply men to furnish material on time, and these delays entailed great loss to the parties involved. Such contingencies will be avoided or minimized by the policy as outlined above.

SOME ADVERTISERS.

Extract from an ad.: "If we sell you a defective file, file your complaint with us, not with our competitors. They will probably sell you a poorer file than ours, and give you a 'good jolly,' while we would gladly explain the defects away by giving you a perfect one."

"A big demonstration in nail pullers," was the announcement of a Chicago merchant. The window had been transformed into a shipping department. There were boxes of all kinds. They were nalied together with all kinds of nails. Some of the nails were driven to further the purposes of the demonstration. In the other window were exhibited the nail pullers of which the firm would make a fiasco of. Six negroes had been engaged to "pull off" this nail-pulling match. They were divided into two factions, each given an equal amount of work and a stated space of time to do it in. Nail pulling brigade No. 1 operated with the firm's pullers; No. 2, with those proscribed by the firm. Brigade No. 1 were instructed to do their work with promptness and dispatch—and they did it; No. 2 were instructed to enact a rough-and-tumble nail pulling pantomime—which was to constitute the "real" show—and they did it, too. Anyway, they drew large audiences, and to judge by the applause, they were well pleased. The "show" ended with brigade No 2 being carried away on stretchers. A bulletin was then posted in the window, with the following text: "Our nail-pulling demonstration ended in bloodshed. The snide pullers did it. The three gentlemen operating with our pullers are in our private office, ready to receive your congratulations and to explain how they did it."

A wire salesman sends out the following postal to his trade: "The 'whole thing' wire salesman is born, not made. I was born wiry. I can even stretch my conscience, spin endless yarns, unwind a lot of red tape, but never become entangled in my own meshes. Look out for me on the 'teenth instant. I am slick as a wire trap."

A Detroit dealer got hold of a carload of iron enamel at a big discount—enough he thought to outlast his commercial career. The stuff did not move, however, and space in an up-to-date Hardware store is always valuable. The erstwhile pleasant bargain reminiscence soon degenerated into a bugaboo in the dealer's mind, and every time iron enamel was mentioned to him, he felt like a poor success. One day he read something about printers' ink as an efficacious remedy for commercial ills. Ordinarily, he would have branded this a lie—for he was a chronic non-advertiser. But circumstances alter cases. They did here. After an hour's attempt at ad. writing, the following announcement was sent out to the dailies: "A consignment of iron enamel for sale at cut prices. Adapted for smoke-stacks, stove pipe , fire-place casings, fences and any iron thing about your house or premises which needs a coating. Lay in a stock for spring renovations."

"Well, How's the iron enamel?" quizzed a friend who was on to the merchant's "bargain ghost," when they met at the store a couple of days later.

"Iron enamel? I haven't a package in the house. All sold, and through a damfool advertisement. Who would have thought it? Hereafter, I'll advertise every blamed thing in the house that stays longer than necessary."

The friend took the latter remark as a hint and departed. On the sidewalk he stumbled across the man who writes *The Sights in Town.* The reporter quickly noticed that something unusual had happened to this citizen of his acquaintance. And he got the full story. He printed it with the heading: "How a recruit to our list of advertisers was made."

"The wire chain, as a substitute for the German welded chain, is coming into strong favor. It is so ideally American that it recommends itself on sight." Extract of an ad. in a Pittsburg paper.

"The demand for plating outfits, nickel plating, especially,

Digitized by Google

is becoming so large that it would pay any venturesome city merchant to make a specialty of them," was the remark of a traveler handling plating outfits as a side line. But, by the way, the commissions derived from the line exceed the salary paid him by his house, which goes to show the strength of his remarks. The American householder must have found a new and agreeable pastime.

Here's an ad. attempt committed at Cleveland: "While you are busy shoveling snow, we would not invite you to an inspection of our '98 lawn mowers. We only desire to replace your snow shoveling emotions with the happy lawn-mowing thoughts which are superinduced by our perfect clippers and trimmers."

A Kansas City merchant bethought himself of making a specialty of horse clippers and curry combs. He found the line very compatible with his trade, and bought every novelty that came out. But horsehair clipper inventors have become as numerous as lightning-rod agents, and some unreliable. Thus many of his investments "turned out bad," but even a Kansas City merchant can become wise. Now, if any horse clipper or curry comb man wants to talk business with this merchant, he must produce "tangible and evident" proof of his claims. By "tangible and evident" proof the merchant means that the salesman must bring a real live horse to the store. A window has been especially constructed to accommodate him. This done, the demonstration of the clipper or curry comb merits may be proceeded with. If, in the opinion of the merchant and the crowd which is always attracted by such an exhibition, the articles thus tested are possessed of market value, the merchant will invariably add them to his stock. It's an unique way of buying, but it's pretty safe.

Cleveland, Ohio, Jan. 31, 1898. J. B. RINDFLEISCH.

A Washington Burglary.

The cutlery and sporting goods store of D. N. Walford, No 909 Pennsylvania Avenue, N. W., Washington, D. C., was broken into and robbed shortly after ten o'clock Thursday night, February 10th. The thieves climbed on the roof from the rear of the store, and in some manner effected an entrance through a window near the roof, and carried off 500 or more pocket knives, mostly Rodgers and Wostenholm, ranging in price from 25 cents to $7 50 each. Half a dozen revolvers, Smith & Wesson and Marlins, several North Star Bicycle Lamps and a valuable compass, were also taken. The robbery was not discovered until the following morning, and was immediately reported to police headquarters. Besides the cutlery and sporting goods, the cash drawer was broken open and $18.90 in change taken. Not a thing was left behind which would give a clew to the identity of the thieves.

The Iver Johnson's Arms & Cycle Works gave an elaborate smoker at their branch house in New York on Wednesday afternoon of last week. The entire establishment was handsomely decorated with plants and bunting, and the manager, W. H. Cole, did the honors for the occasion. It was very largely attended by the dealers and agents who had been invited. Souvenirs of several kinds were distributed, and altogether it was a memorable affair.

Walter W. Woodruff & Sons, Mount Carmel, Conn., have purchased of The Wm. Schollhorn Co., New Haven, Conn., their patterns, tools etc., for the manufacture of carriage spring locks, spring box locks, seat locks, anti-rattling box lock strikers and dovetails, and will continue the manufacture of them in connection with their own large variety of carriage locks and other lines of carriage Hardware.

The million general circulation may be valueless to the man who wants a particular thousand.—*Exchange.*

Review of the Markets.

Hardware: Local trade has experienced no remarkable impetus during the past two weeks. Orders covering quite a variety of shorts are being received from the retail trade by the jobbers, but the orders to manufacturers and their agents here, are very conservative as to quantities. The trade generally appear to think any important advance in price as being unlikely under existing conditions, and are not stimulated to add largely to present stocks at this early date under any speculative influences.

Wire Nails: No weakness is indicated in the market price of this important commodity, and the prices agreed upon for February and March are being fully sustained under an increasing enquiry and a steady booking of orders for present requirements. Mill quotations are represented by the carload price f. o. b. mill of $1.50 at either Cleveland or Pittsburg; with a reduction of 5 cents a keg for above quantity to jobbers. New York quotations for carload lots are: $1.60@$1.65 on dock; smaller lots from store 5@10 cents a keg advance. These are the present quotations applying to February. For March delivery it is agreed that an advance of 5 cents a keg be demanded. Prices are held very firm, no weakness being manifested, and the present conditions seem favorable for a satisfactory business without any drawbacks.

Cut Nails: But little if any change is shown in the conditions surrounding the cut nail market. Prices are quite low, and at the quotations prevailing of late have held their own, further concession being scarcely anticipated. We quote carload lots on dock, New York, $1.25; smaller lots from store $1.30.

Agate Nickel Steel Ware, etc.: Lalance & Grosjean Mfg. Co., No. 19 Cliff Street, New York, as applying to their new catalogue, announce the following discounts:

Agate Nickel-Steel Ware	40%
Pearl-Agate Ware	40%
Peerless Ware	70%
Crystal Steel Ware	50%
Blue and White Ware	50%
White Ware	33⅓%

Linseed Oil: The Dean Linseed Oil Co., No. 181 Front Street, New York, under date of February 15, 1898, quote as follows: In lots of less than 5 barrels, 44 cents per gallon; in lots of 5 barrels or more, 43 cents per gallon. The 5-barrel price only applies to deliveries of that quantity at one time. Boiled linseed oil, 2 cents per gallon higher than raw. Calcutta oil, 54 cents per gallon. Above prices are subject to change without notice.

The Van Wagoner & Williams Hardware Co., Cleveland, Ohio, and No. 14 Warren Street, New York, make the following quotations, under date of February 12, to apply to catalogue of September, 1897:

THE BALTIMORE TRADE.

It is gratifying to report a marked improvement in trade during the past fortnight. Nothing phenomenal, but a healthy demand stimulated by the gradual betterment of industrial conditions and the certainty of higher prices for agricultural products than ruled last year. The enforced economy practiced by the farmer and planter may result in conservative buying on their part, but the reduction of their indebtedness will be a sufficient inducement for the merchant to order freely such seasonable goods as his trade requires. Lean, skeleton stocks will not produce a fat bank account, and bare shelves cannot be expected to yield a large dividend. If indications count for anything prices will be higher on many lines in the near future. A slight stiffening is already noted on wire and wire nails, screws, bolts, tacks, wrought padlocks, loaded shells, etc., with but few, if any, declines during the present month.

Seasonable goods are moving freely; handled hoes, picks and mattocks, poultry netting and wire cloth perhaps receiving the most attention. Builders' Hardware shows signs of improvement, and advance orders for screens are being placed for the better grade of goods. We look forward to a continuance of the improved conditions, and when the diminutive war-cloud vanishes, believe a fair volume of business will be done.

THE TABB & JENKINS HARDWARE CO.

ST. PAUL TRADE.

There is little to be said about the business situation at the present time that could not have been said a month ago. The fine weather that we were then favored with continued until this morning, when a snowstorm set in, that, while not severe, bids fair to give us some sleighing.

The volume of business up to the present time is far in excess of that for the corresponding time in 1897. The country tributary to this city is largely interested in wheat, and the recent advances in this commodity, have, of course, largely benefited the farmers who have wheat to sell. It also gives fresh courage and hope to those who have sold their crops, as there is every prospect that the next crop will command a price much better than the price ruling in 1896 and the early months of 1897. All this serves to stimulate business.

In brief, the situation can be summed up as follows: The present business is very good for this season of the year, which is usually the most quiet of any part of the year. The outlook for the future is better than it has been at any time since the panic of 1893 first overtook us.

C. W. HACKETT HARDWARE CO.

THE CLEVELAND TRADE.

The January and February trade has not been entirely satisfactory. The constant decline in prices for so long a term has created a timid conservatism that is not easily overcome.

The benefit of this is that it is likely to prevent a boom, as speculators cannot create one unless the public can be induced to participate. Retailers, as a rule, are buying for immediate wants only.

The talk of a combination of wire and nails has not induced purchases on speculation. The possibility of their failing to perfect the organization, and the demoralization which usually follows when such attempts fail, has suggested caution The usual advance orders have been placed for these goods, and the purchases are likely to prove profitable. The marked advance in pig iron recently, caused by an unusually large purchase by Carnegie, will not, it is thought, permanently affect the market, as stock seems to be accumulating, and there will be very little advance, if any, in ore for next season. The Northwest can spare us twenty million tons per year, and boats are plentiful to transport it. The advance in hemp has increased the price of rope and binder twine, so that orders that have been placed for these goods will prove profitable.

The bicycle trade just now is getting more attention than other lines, as agencies are being established. The trade is steadily falling into the hands of Hardware dealers, and unreliable makers and dealers are being weeded out. Profits are less and the goods much better, so that responsible parties can afford to handle them as a legitimate line.

The country is likely to be busy, but as the surplus to be exported fixes the price for home consumption, we are to have an era of low prices. Expenses must be reduced if the balance sheets are to please proprietors. Some modification of our financial system is necessary if confidence is to be maintained and American money now deposited in Europe and in our home banks is to be invested in business, and then if we can avoid foreign complications, we ought to be prosperous and happy and fairly contented with our lot. THE LOCKWOOD-TAYLOR HARDWARE CO.

THE COLUMBUS TRADE.

We have had all kinds of weather during the past two weeks. One day the blue birds would be singing, and the next the boys would be skating. You would go home at night without an overcoat, and the next morning slip down on the icy pavement and break your back. We do not have the glorious climate of California enjoyed by some. Still we are happy and cannot complain of trade.

We are receiving notices almost daily now of advances, and but few of declines in prices. This is a healthy indicator. If merchants have sense enough to get the advanced prices on goods, it will help their balance sheet at the end of the year.

Rope and binder twine have been gradually advancing, and it would not surprise us to see both go still a little higher.

This is the week of the State Hardware Association Convention here, and the indications for a good attendance are encouraging. SMITH BROS. HARDWARE CO.

THE PITTSBURG TRADE.

Fire insurance is an important matter to the merchant and his creditors as well. This is called to mind by the very large losses by fire in Pittsburg during the past few days. Even what are called fireproof buildings burn with astonishing frequency and great loss results, for it is in these buildings that immense stocks are carried. Our idea of insurance is that it is one of the legitimate expenses of a business and should be always carried to as near the full value of the stock as possible. The only persons who have a right to assume the risk themselves are those so well able to bear the loss if it comes, that their creditors need have no concern about it.

Business is quite good for this time in the season. Orders by mail and through travelers are well assorted, showing better call for the general line. Early orders for bicycles are being taken and sample lots sent out. The rider will get a good wheel for very little money this year, but the profit to the jobber is small. Bicycle sundries promise to have a large sale this season.

The large increase in the clearing house balances for the past few weeks is an index of the growth of business transactions. Pittsburg shows its full share of this increase.

LOGAN-GREGG HARDWARE CO.

THE DAVENPORT TRADE.

A gentleman said to the writer this morning: "It is only a question of time until jobbers, especially the Hardware jobbers, must go; that soon the retail dealer will make his purchases from the manufacturers direct, and then there will be no room for the middle man."

This was rather sudden to a person who had spent thirty-four years in this wholesale Hardware house, and had grown gray in its service. Judging from the size of the

Digitized by Google

store, and the amount of business done at the time he entered it as an employee; watching its developments and continuous growth through all these years up to the present time, and knowing what it is doing to-day, concluded that the jobber was appreciated and had become not only a convenience but a necessity. Astounded at the statement of the visitor, who is an old Hardwareman, we wondered if it was true. In looking over our sales of yesterday we find one bill of miscellaneous Hardware amounting to $362.20, and that it represented by actual count one hundred and twenty-nine manufacturers. If our customer had known the address of each of these factories; could have bought at the same prices as ourselves; had had credit with each one; if each of the makers had been prepared to ship goods on the day order was received, would it have been more profitable to have bought direct than to secure them in one bill and have them on his shelves in twenty-four hours, where he has them to-day? Counting the stationery, postage and work of writing orders at 5 cents each,

129 would cost	$6 45
Manufacturers for mailing invoices	6 45
Dealers remitting for same	6 45
Exchange on 129 drafts at not less than 10 cents each	12 90
Being a total of	$32 25

or about 9 per cent. If packing and carting had averaged on each invoice 25 cents the cost would have been $32.25, or nearly 9 per cent.—suppose the freight in each case was 50 cents in excess of what it was from Davenport it would amount to $64.50 or 18 per cent, a total of 36 per cent.; to say nothing of the annoying delays and the use of goods so long in transit besides the necessity of buying in larger quantities than capital would warrant or trade demand. Would it have paid him to have bought direct?

SICKELS, PRESTON & NUTTING CO.

THE PHILADELPHIA TRADE.

It is pleasant to report a very steady movement in trade, and while buyers are still conservative, still day by day the feeling deepens that better times are in prospect, and that conditions are steadily improving.

Financial reports of the past week are most encouraging, and there does not seem to be a cloud on the business horizon except those arising from the Maine disaster, and from the newspaper jingoes who seem anxious to precipitate war. In the present crisis it seems wise to suspend judgment until the facts are known, and in the meantime the effect on business is fortunately very slight.

Spring goods are a little slow, owing, perhaps, to the rainy weather, but the bicycle and bicycle sundry trades are opening up, and seasonable goods will doubtless follow.

Prices show but little change in either direction, although manufacturers are anxiously awaiting an opportunity to advance their prices.

It is noticeable that money seems easier throughout the country, and collections are better in consequence.

On the whole a much more hopeful feeling prevails, while we all feel that the coming improvement may be all the more positive and lasting if of slow development.

BIDDLE HARDWARE CO.

H. B. Rusler's advertisement of the Comet Sprayer in another column of this paper is worthy of notice. The Comet is a Lawn and Garden Force Pump as well as a Fruit Tree Sprayer. If you will write to H. B. Rusler at Johnstown, Ohio, he will forward you free catalogue and hints on spraying, and will be able to convince you that the Comet is all that he claims for it. The very low price at which the Comet is sold places it at once within the reach of every one in need of a Sprayer. Mr. Rusler is one of the oldest manufacturers of Sprayers, having been making the Comet for the past nine years, adding valuable improvements from year to year.

A. Weed, of the Arcade File Works, brought back from his ranch in Wyoming, last Fall, several results of his prowess as a hunter, and the Hardware Club of New York City has been fortunate in securing a magnificent elk-head and antlers, one of this collection, with which to adorn the walls of the dining-room. The officers of the Club trust that future trips may result in further donations of this character, as they add largely to the elegance of the Club dining-room.

M. C. Henry & Co, New York City, are enlarging their plant and making some extensive improvements. Their new steel stone shed, which is about 50 feet wide, is to be extended about 70 feet in length. The metal work, which consists of the steel framework of the building, the covering upon the roof and sides, and the metal runway for traveling crane, is being furnished and erected by the Berlin Iron Bridge Co., East Berlin, Conn.

The growing popularity of the bicycle in Mexico is causing the attention of American capitalists to be turned toward the manufacture of the wheel in that country. The government has granted two concessions for the establishment of bicycle factories. One will be started in the City of Mexico, and the other at Monterey. Bicycles of American make are exclusively used in Mexico.

L. L. Hull, Clinton, Conn., under date of February 1st, makes the following announcement: "I beg to announce that I have sold my scale and Hardware specialty business to Sturges G. Redfield, who has been my assistant during the past fifteen years. Mr. Redfield will continue the business under the name of the L. L. Hull Co."

North Dakota Retail Hardware Association.

The second annual meeting of the North Dakota Retail Hardware Association was held in the city of Fargo on Wednesday, February 16th, and although the Association was young in years, it proved a very enjoyable and interesting occasion. Nearly seventy firms were represented. The president of the Association, Clark W. Kelly, called the convention to order, introducing at the same time the Mayor, who extended a hearty welcome to the city of Fargo of all the delegates present. President Kelly then proceeded to deliver his address, which was listened to attentively, and in the course of which he said:

"Most of our time has been devoted to the increase of membership, and while the expectations have not been realized, a report is to be given showing nearly 100 members, including most of the strongest dealers in the State. I feel confident that if outside dealers could know of the derived benefits in other States, and what we are determined to accomplish in this, they would join at once."

The president was followed by C. N. Barnes, of Grand Forks, the secretary of the Association, who made an extremely interesting annual report, giving evidence of the important labors connected with this honorable position. He was very proud of such results as the following:

During the four months of our organization we have added to our membership over 60 members, but it has mostly been done by correspondence and the good words spoken of our association by some of the traveling men who are with us. I am proud to be able to say that at the present time the North Dakota Retail Hardware Association has the largest number of members in its organization in proportion to the number of available dealers in the State of any similar State Hardware Association. This membership covers every part of the State, and we have members from every county where there is a Hardware dealer, except in three instances.

The first matter taken up was the election of officers. Clark W. Kelly was nominated for re-election as president, receiving a unanimous vote. He thanked the members for the demonstration of confidence that followed the vote, and assured them that he would give association affairs as much of his time as possible.

C. F. Jacobs of Hillsboro was nominated for re-election as vice-president, and received a unanimous vote. A committee of five was selected by the president to name an Executive Committee, viz.: H. A. Moe, Church's Ferry; A. Tanguay, Willow City; G. W. Wolbert, Casselton; H. L. Eastman, Wahpeton; M. Upham, Grafton.

The Executive Committee reported by the committee were promptly elected, as follows: W. R. McIntosh, Bottineau; H. Hafrington, Fargo; J. F. Newgaard, Grafton; H. B. Allen, Jamestown; O. A. Gallup, Edgeley; A. J. Smith, Fesenden; W. H. Pinkerton, Lakota, and the president and vice-president.

In the executive session, which was held later in the day, a number of interesting and instructive papers were read, among which was one by L. P. Strong, of Neche, on "The Importance of Small Things," and another by H. F, Strehlon, of Casselton, on the subject, "What are the Benefits of this Association to us?"

Make a Note of This.

Accidents are common in all trades, and where they are apt to be of a sudden and acute nature, it is but humane to be prepared for emergencies. In this connection the following is worthy of note: A Parisian doctor has discovered that a solution of 1 part of picric acid to 75 parts of water will surely and speedily cure the most terrible burns and scalds, and recommends that barrels of the solution be kept in foundries, etc., in which workmen could be immersed. The pain is instantly removed, sores and blisters prevented and a cure completed in four or five days.—*Ex.*

C. W. Casper has purchased the general Hardware establishment that has heretofore been run under the name of French Bros, No. 170 State Street, Marshall, Mich., and proposes, with his usual energy, to make it one of the live concerns of that very much alive portion of Michigan. He intends to add many new lines, and, to quote his own expression to a representative of *Hardware:* "See if a modern Hardware store will not pay out here." Mr. Casper is in the market for Hardware of a miscellaneous character, and to that end, would be pleased to receive catalogues and discount sheets from jobbers and manufacturers everywhere.

What the man of to-day needs most is not athletics in a gymnasium, but plenty of fresh air in his lungs. Instead of a quantity of violent exercise that leaves him weak for several hours afterward, he needs to learn to breathe right, stand right and sit right. And if the woman who spends so much time and strength getting out into the air would dress loosely and breathe deeply and so get the air into her, she would have new strength and vigor, and soon be freed from many aches and pains and miseries.—*Phrenological Journal.*

League Tires.

Would you hire a one-legged salesman to show your wheels?

Cheap tires are one-legged salesmen. Always and everywhere lifeless and slow, they are a direct and positive injury to any decent wheel. Speed is not an accident it's a result, and springs invariably from the same causes—the right rubber, the right fabric. And there aren't half a dozen right rubbers and fabrics. Only one grade of each produces speed—Fine Para rubber and selected Sea Island fabric. The supply of both is limited, *and the price always high.* No manufacturer can afford to use either in cheap tires.

Now you want your wheels to run their best and look their best, don't you? Then give them able-bodied tires—made of live, springy Fine Para rubber, and strong, elastic Sea Island fabric.

These two go into Leagues—and nothing but these; no soft rubber, no substitute, no cheap fabric. That's why "Get there and get back" tires fairly bound with life and lightness—why John M. Nobre made 253 centuries and the American Record during the year just closed. Mr. Nobre rode 28,718 miles in ten months, **and every mile on League Tires.** No other tire in this country ever made such a record. Specify Leagues on your wheels.

The Folly of Over-Charging.

If a merchant does not make a profit out of the goods he sells it is only a question of time before he will be compelled to go out of business. That is just as certain as it is that a river will run dry if its source is cut off.

But there is a wrong way as well as a right way of securing profit. And to follow the wrong way is almost as bad as to make no profit at all.

One of the ways in which some merchants follow in their desire to make profit is by charging one or two cents per pound more for this commodity, or a dollar or two more for that article than the ruling market price warrants.

Aside altogether from the injustice of such a proceedure, it is a most foolish one.

Nine out of every ten of the customers thus taken advantage of will discover the fact before a great while, and then nine times out of ten there will be a parting of customer and merchant.

We have no reference to the fact that one merchant often finds himself being undersold by another who is cutting prices. We merely have reference to the man who makes a practice of persistently charging his customers in excess of the market prices for his wares.

That there are those who are doing it is not suppositious. We know it for a fact, and could give names if necessary.

In these days of keen competition it is not the merchant who exacts for his wares more than the ruling market price that obtains success and earns a competency. It is the merchant who is energetic, up-to-date, rich in ideas, and who turns his stock over frequently.

Verily, he that overchargeth his customers is like unto the man who goeth into his cellar and pulleth the plug out of the tap-hole of his wine cask, for when he overchargeth a customer he certainly releases the plug of confidence that is so essential to the keeping of trade.—*Hardware and Metal Merchant.*

Exports of Manufactures.

"The statement of the exports of manufactures from the United States has been less satisfactory during the last quarter of 1897 than for several years," says the *Industrial World.* "There had previously been a steady growth in this branch of our international trade. Thus for 1896 the manufacturing exports were $253,681,541, which was an increase of $52,500,000 over 1895.

"During 1897 the monthly statements continued to show gains of about $3,000,000 per month until October. In that month there was a decrease of $1,230,000, as compared with October, 1896. November showed a slight gain and December fell off again to the extent of $436,000. The export of manufactures for the year, however, reach $279,616,898, which is an increase of about $26,000,000 over the similar exports of 1896.

"This decrease in manufactures exported does not include any shrinkage of the iron and steel trade. On the contrary the latter has steadily grown. The export of iron and steel and manufactures thereof include about 25 per cent. of all manufactures exported, and during the year 1897 increased about 30 per cent. over 1896, the gain for all manufactures being less than 10 per cent."

Considering how great even this improvement is, it should prove to the manufacturing interests that close attention paid to the needs of the export trade will produce results of a very satisfactory kind.

An Irish conductor on a branch of Boston's West End railroad came into the car one day and called out: "Wan seat on the roight! Sit closer on the roight an' mek room for the laddy phwat's standing." A big, surly-looking man who was occupying space enough for two, said, sullenly, "We can't sit any closer." "Can't yeez?" retorted the little conductor; "begorry, you niver wint coortin', thin." It is needless to add that room was made "on the roight" for the lady.—*Exchange.*

Tin Plate Statistics.

The production of black plates amounted to 436,438,035 pounds, of which 377,588,412 pounds was lighter than 63 pounds to 100 square feet. The total production for the previous year was 334,014,798, so that the increase is more than 30 per cent.

Of the fifty firms reported as producing tin and terne plates, one only used foreign-made plates during a portion of one quarter, the amount being 57,208 pounds, out of a total production by the firm for that quarter of 2?3,687 pounds. Among the fifty-three firms reported during 1896, fifty used wholly American rolled sheets and three used both American and foreign, with an aggregate output of 15,503,154 pounds.

Of this amount 4,226,523 pounds, or about 27 per cent., was made from foreign rolled sheets.

The quantity of tin plates and terne plates imported into the United States in the last fiscal year amounted to 244,407,601.

In the same period the tin plate imported and manufactured for export amounted to 139,246,?30 pounds. From the foregoing figures it is shown that the net imports were 105,161,471, the total domestic production was 446,982,063, the approximate domestic consumption was 552,143,534, and the average capacity of mills on June 30, 1897, was 600,000,000 pounds.—*N. Y. Sun.*

Japanese Swords in England.

People who are fond of rummaging about in curio shops are no doubt surprised at the cheapness of Japanese swords. They are cheap because there are plenty of them. When the natives threw off the native costumes and adopted European ways they took to European customs also, and seemed to acquire a distaste for many of the things that had been personal or house belongings. The short, needle-pointed, razor-edged swords worn by the damios and their retainers, though of the finest steel and beautifully ornamented, were discharged for English sabres and dress swords, and came to this country by thousands.

The price has advanced a little of late years, according to the condition of the blade, the richness of the lacquer on the scabbard, the ornamentation in gold and bronze on the handle; but plenty of good ones are still to be had. One odd freak of collectors is to break up the weapons, preserving only the bronze and iron guards, which are often decorated with flowers and figures of exquisite workmanship in gold and silver. One man in Liverpool is said to have dismantled over 500 swords for this purpose.—*The Dublin Herald.*

Love Your Business.

A man can no more be successful in a business he does not like than can a man be happy with a wife he does not love.

Enthusiasm is the power which impels men onward in any and every vocation. Without it men are lethargic. They will drift. But to pull against the tide they are as unable as they are unwilling.

Drifting, however, does not win the race, either in business or aquatic events. There must be the long pull, the strong pull, and the pull with vigor.

Men in business to-day have no easy task. There is a great deal to discourage and very little to encourage. There are foes within and foes without to contend against.

Under such conditions it is no wonder so many either fail altogether or eke out a mere existence.

The antidote for despair is enthusiasm, and the germ of enthusiasm is love for or pleasure in that business or vocation in which you are embarked.

Therefore, if you would succeed, get in love with your business.—*Exchange.*

If it's an ARCADE it's the best.

CAN YOU TELL WHICH?

One of these is a hand cut file.

One is the ARCADE—Weed Increment cut.

The irregular spacing and difference in height of the teeth which cause a hand cut file to bite the work with only a comparatively slight pressure of the workman's hand, are reproduced with scrupulous fidelity in the Weed Increment cut, and if there is any difference between the two makes it can be distinguished only by an expert, for in many shops the file hands use unmarked Arcade files under the impression that they are using hand cut.

If you use files we ask you simply to TRY a sample of Arcades at our risk, not at yours. If, on a fair trial, the Arcade Files do not cut faster and wear longer than any other file in the market, send them back.

If you want a fairer proposition than this, tell us what it is and we will meet you.

THE POPULARITY

Of our premium list, evidenced by the eagerness with which new subscribers are availing themselves of the opportunities offered, has compelled us to extend the time limit. We will therefore continue this offer until further notice to **NEW 1898 SUBSCRIBERS.**

ALL THE NEWS. **HARDWARE** HARDWARE EXCLUSIVELY.

Needs no introduction to the Hardwareman. He already knows what a valuab'e adjunct to his business this semi-monthly visitor is, with its reliable "Prices Current," its "Market Reviews" and its general news of interest to the Hardware trade.

FOR $1.00 We will send "HARDWARE" for one year, and ANY ONE of the following articles:

A dating stamp that will last till 1902, with 12 special entries for marking letters and bills.

Huebsch's Year Book.

A 365-page Cloth Bound Diary—one page for each day in the year—4½x9 inches, bound in flexible cloth covers. Invaluable to merchants, manufacturers, bookkeepers, clerks, etc.

Indexed Coupon Books

representing one hundred dollars—to enable you to put your business on a cash basis—do away with pass books—to prevent bookkeeping errors. No disputes over accounts—no delinquent debtors or bad accounts. Used throughout the country now instead of credit system.

A numbering stamp, which will number from 1 to 999,999. You can number every article in your store with this stamp. It is indispensable to the careful retailer.

FOR $1.25 We will send "HARDWARE" for one year and your choice of the following six premiums:

1. A Perfect Fountain Pen . . . . with 14 kt. gold pen and a filler, warranted to give the most satisfactory results. Made by one of the oldest fountain pen houses in America, and fully guaranteed. . . .

2. A Silver Mounted Stationery Set. Seal, letter opener, and paper knife with pearl blade—that gives an air of elegance to your desk. . . .

3. Huebsch's Year Book . . . . (large size), 6x9 inches, bound in flexible cloth, made to last. IT IS YOUR BUSINESS MEMORY, and will not fail you.

4. If You Have a Good Name . . . you may like to see it in your window. We send you ten of the best white enamel 4-inch letters, with a half pound of best cement and full instructions for putting up. If 4-inch letters are too large, send for twenty 2-inch letters If you require more than the quantities specified, we will send you extra letters; 4-inch at 6 cents each, and 2-inch at 3 cents each. . . . . .

5. Half Dozen Photographs. . . . . Send us any photograph, with your name and address written plainly on the back, and we will return it to you together with six medallion copies of the original, mounted on celluloid, with a wire stand. We guarantee the medallions to be as good as the original. . . . .

6. Bushnell's Price Book . . . bound in seal morocco, 4¾x6⅞ inches, 200 pages, adapted to the use of the traveling man, the home salesman and the office. Neatly indexed, red edged, ruled faint, printed headings. This practical Price Book is in almost universal use. . . . . .

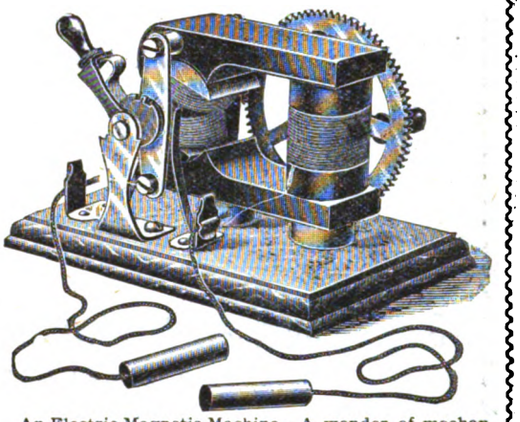
You Live

In hopes of always securing the greatest "helps" to your business. "*HARDWARE*" is a "help." It helps the dealer to buy economically, and helps the manufacturer to sell extensively. "*HARDWARE*" for one year, and any one of the following attractive premiums sent post paid for ***$1.50.*** This offer applies to

NEW 1898 SUBSCRIBERS ONLY.

A perfect Sewing Machine. "The Baby." It uses regular Wilcox & Gibbs needles and ordinary machine thread. It is strong and simple; won't get out of order; can be clamped on any table, and is so constructed as to make it almost impossible for the smallest child to injure itself with the needle.



Just think—a complete Camera and an outfit to print, develop and mount. Makes a picture 2½x2½ inches, and its work compares favorably with higher-priced ones of which it possesses the best features, including an instantaneous shutter, adjustable to time exposures if desired, and operated by a lever and button just as your $50 outfit is.

An Open-Faced Nickel-Plated Watch; fully guaranteed for a year. Winds and sets in back of case, and will stand rough usage, and keeps as good time as an expensive watch.

The Yankee Typewriter.—Will write 15 to 20 words a minute; will take any size paper, from postal card to foolscap size. Has automatic carriage and paper feed. Mounted on highly finished hardwood base, and packed in a strong wooden case.

An Electric Magnetic Machine.—A wonder of mechanical perfection. Supersedes the old style medical batteries, and gives a stronger current without the expense of renewals. It has a current regulator which can be adjusted to a nervous child or to overpower the strongest man.

OF COURSE, YOU TAKE A MAGAZINE,

Probably one in the subjoined list, if it is not, let us know, and we'll put it there. The first column shows the price you would have to pay for the magazine alone. The second column indicates the price at which we will send you "HARDWARE" and the magazine for a year. In many cases you will find the combined price is no more than the single one, and you know you can't afford to do without "HARDWARE." This offer applies to **New 1898 Subscribers only.**

OLD SUBSCRIBERS AND NEW

May take advantage of the following liberal offers:

1. "American Hardware Trades Reference Book," published by Thomas Publishing Co., with "HARDWARE" for one year, will be sent on receipt of **$1.50.** Those who are already paid subscribers to "HARDWARE" will receive the book, on sending **50c.** This book is a complete directory of the manufacturers of Hardware in the United States. Each manufacturer is classified under the name of every article he makes. The financial rating is given in each case; 8000 Names; 25,000 Headings.

---

2. "Ladd's Discount Book," with "HARDWARE" for one year, for **$3.00** Single Index, and **$4.00** Double Index. Present subscribers will be credited for one year in advance. If you have to calculate discount this comprehensive work will save many times its price in time, trouble and mental strain. Its comprehensive character may be realized from the fact that it contains nearly 200 pages of positively accurate tables or more than 120,000 computations giving at a glance the net of any sum at all discounts from 1 per cent. to 95 per cent. together with a great range of combinations.

---

3. "American Hardware Store," with "HARDWARE" for one year, for **$3.00.** The "AMERICAN HARDWARE STORE," containing 450 pages and 500 illustrations, is an exhaustive treatise on the most approved methods used by the successful merchants of this country to arrange, display and sell Hardware. It is edited by R. R. Williams, editor of the *Iron Age*, and published by the David Williams Co., of this city, at $3.00. By a special arrangement, we are enabled to combine "HARDWARE" with the book at the same price. Present subscribers will be credited for a year, in advance of their present subscription.

Fill out Order, and address as below:

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over are requested to contribute to this page. News of new factories or companies, changes, improvements, etc, will be gladly received, and promptly published.

New Companies, Etc.

Allentown, Pa.—The Lenox Mfg. Co., of Allentown, has been incorporated with a capital stock of $35,000. The incorporators are: John D. Shoemaker, J. Sidney Heilig, Oliver Williams, Jacob Roberts and Edwin Thomas. The object is manufacturing sewing machine attachments and other machine devices and articles of iron, steel, brass and other metals, commonly known as light Hardware tools and appliances.

Austin, Tex.—Rose Mfg. Co., of Dallas, Tex., with a capital stock of $50,000. The purpose of this corporation is the manufacture and sale of Hardware. The incorporators are P. A. Norris, J. E. Rose and J. D. Crawford.

Bangor, Me.—The Swanton, Jameson Co. has been organized at Bath for the purpose of conducting the business of ship chandlery and Hardware, with $25,000 capital stock, of which $500 is paid in. The officers are: President, H. W. Swanton, of Bath, Me.; treasurer, J. C. Jameson, of Bath, Me.

Bridgeport, Conn.—A new firm is to commence business in this city in a short time. It will be called the Excelsior Cooler Co. The large frame building opposite the Bullard Machine Tool Co.'s factory on Railroad Avenue will be used. The new company has purchased the property from the estate of Peter Condon. It has been improved and made over to suit the use of the Excelsior Co.

Camden, N. J.—The Edwards Sad Iron Co., with a capital stock of $100,000. The company will manufacture implements of metal. The corporators are Thomas Cross Edwards, Joseph L. Harbinson, Harry L. Day and George M. Thomson, of Philadelphia, and James Finley, of Camden, N.J.

Chicago, Ill.—Universal Sharpening Machine Co. Capital stock, $30,000. Manufacture tools, etc. Incorporators: William A. Vincent, Michael F. Sullivan and Hollis F. Dougherty.

Detroit, Mich.—The Michigan Heater Co. has been incorporated by F. Zannoth, A. Knebusch, H. Brehm and others. Capital stock, $15,000.

Enfield, Conn.—The Norman - Corthell Mfg. Co. has been organized, to deal in machinery, tools, Hardware, etc., with a capital of $25,000, in 250 shares of $100 each, $5000 paid in.

New York, N. Y.—George W. Church Co.; to manufacture machinists' supplies. Capital stock, $10,000. Directors: George W. Church, William T. Church and W. M. Kinder, Jr., New York City.

New York, N.Y.—The Johnson & Brother File Co., with a capital stock of $20,000. The company is to manufacture files and other Hardware. The corporators are William H. Johnson and Charles W. Johnson, of Newark, and Robert Stewart Miller, of Orange, N. J.

New York, N. Y.—The Sun Vapor Stove Co. has been incorporated by E. G. Mummery, W. G. Hastie, R. S. Sutton and N. S. Wright, of Detroit, to manufacture vapor stoves, with a capital stock of $100,000.

Ocala, Fla.—Notice has been given that application has been made to the governor for a charter of incorporation for the Lightning Hoe Co. of this city. The names of the incorporators are Edward Holder, Charles Munroe Brown, and Decatur W. Davis, all of this place. The capital stock is $30,000, represented by 300 shares of the par value of $100 each. The company will at once erect a manufacturing plant in this city for the manufacture of this Lightning hoe that has been invented and patented by C. M. Brown.

St. Louis, Mo.—St. Louis Aluminum Casting Co., capital stock, $25,000. Incorporators: Louis J. and Theo. E. Crecelius. Gustav A. Plens and others.

Changes and Improvements.

Auburn, N. Y.—The business of making agricultural implements formerly conducted by G. W. Stevens & Co., is about to be transferred to Marinette, Wis., where local capitalists have raised $300,000 to promote the enterprise.

Detroit, Mich.—The plant and machinery of the defunct Schoolcraft Table Co. have been sold to local parties, who propose to manufacture refrigerators.

Dubuque, Iowa.—The Norwegian Plow Works, which went into the hands of a receiver a year or more ago, has been started up again under a new management, of which J. R. Deming, of the Second National Bank of Dubuque, is the head.

Elwood, Ind.—The Iowa Farming Tool Co., employing 200 men and manufacturing all kinds of farming implements, will remove its plant from Ft. Madison, Iowa, to this city.

Peru, Ind.—The Indiana Mfg. Co., of this city, is enjoying a boom, the employees working eleven hours a day. Among the last orders received by the company is one for 4000 refrigerators.

Randolph, Vt.—It is understood that the Porter Screen Co., of Winooski, will not release the screen mill here after March. They are intending to make additions to their mill property there and have all of the business close together. This will be quite a loss to the place, as the mill employs about one hundred hands, who will be thrown out of work.

Reading, Pa.—The Reading Stove Works, one of the most important industries in this part of the State, have resumed operations, giving employment to many men. This is the first time in a long while that this plant has been in operation with a full complement of employees in every department.

Taunton, Mass. — The Taunton Iron Works and the Weir Stove Co. have resumed operations.

Miscellaneous.

Ansonia, Conn.—The Winsted Mfg. Co., which makes scythes and other small farm implements, received a few days since an order from one customer of 195 dozen scythes. That is 2340 scythes shipped to one dealer. It took all the scythes the company had on hand to fill the order. It goes to show, however, that there are still places in this country where the mowing machine has not yet succeeded in running the scythe out of business.

Cincinnati, Ohio.—The big increase of orders from Japan and Russia that the Bickford Drill & Tool Co. has received has compelled it to increase its capacity, and in consequence it has given a very healthy order to the Bradford Mill Co. for needed machinery.

Cincinnati, Ohio.—The Davis & Egan Machine Tool Co. have begun the work of preparing the new quarters in Covington for occupancy. President Charles Davis said they would probably begin operations in the Covington branch at the end of sixty days.

Contoocook, N.H.—O.P. Berry has manufactured 1300 dozen axe handles during the past five weeks.

Hamilton, Ohio.—At the annual meeting of the Niles Tool Co. the old board of directors were re-elected, as follows: Thomas T. Gaff, J. D. Parker and Miles T. Watts, of Cincinnati; Alex. Gordon, R. C. McKinney, James K. Cullen, Geo. T. Reiss, of Hamilton; Wm. McKinney, of Pittsburg, and Colonel Burke, of Cleveland. The board organized by electing Alex. Gordon, president; J. D. Parker, vice-president; J. K. Cullen, secretary; R. C. McKinney, treasurer and general manager, and George T. Reiss, superintendent.

Kenton, Ohio.—The manufacturing of toys by the Kenton Hardware Mfg. Co. has become a great feature. They have begun the manufacturing of toy pistols and gardening tools and now have more orders in than they can fill in two months.

Moline, Ill.—The Moline Plow Co. is having such a rush of orders that it is necessary to begin running extra hours. The fitting department began running twelve hours a day last week, from seven in the morning until eight o'clock at night.

New Britain, Conn.—A portion of the lock room of the P. & F. Corbin Co. works has received a raise of ten per cent. in wages.

New Haven, Conn. — The Marlin Fire Arms Co. have begun to work on a twelve-hour schedule, owing to the fact that there is considerable increase in contract work and quite a large demand for firearms.

Utica, N. Y.—The board of directors of the Savage Arms Co. met, February 8th, at their office in this city. Routine business occupied the attention of the board mainly. In addition, an order was passed for the procurement of additional machinery for the temporary factory on Broad Street.

New York, N. Y.—John S. Leng's Sons & Co., bicycle supplies, etc., reported to have formed limited partnership.

Ottawa, Ont.—A new bicycle company is seeking incorporation to do business in Brantford under the name of the Knowles Bicycle Co. The capitalization is to be $50,000.

Passaic, N. J.—The Passaic Cycle Co. is the name of a new firm which has opened a store at No. 270 Main Avenue. Thomas Leeper, of Rutherford, is manager. The firm will sell Orient and Lyndhurst wheels, and deal in general sporting goods. Mr. Leeper is the rider who rode the famous hundred-mile road race with Milton Brown two years ago.

Sacramento, Cal. — Columbian Supply Co.; formed to deal in sewing machines, bicycles, etc. Principal place of business, San Francisco. Directors: Alfred Fuhrman, Thomas J. Neslan, Carl W. Muller, John Heenan, P. B. Donahor, all of San Francisco. Capital stock, $100,000. Stock actually subscribed, $250.

Springfield, Ill. — Standard Pneumatic Tool Co., Chicago. Capital stock, $50,000. Incorporators: C. A. Williams, Frank T. Kinnare and Hugh J. Kearns.

Springfield, Ill.—The Mead Cycle Co., of Chicago. Capital stock, $100,000. Incorporators: James L. Mead, Frank Johnson and Dwight Lawrence.

Springfield, Ill.—The Springfield Novelty Co. has been incorporated to manufactnre bicycles, etc. Capital stock, $10,000.

Syracuse, N.Y,—Stearns Bicycle Agency. Capital stock, $6000. Directors: Edward C. Stearns, H. E. Maslin and William A. Doubleday, Syracuse.

Toledo, Ohio.—A new bicycle will be placed on the market in a few weeks by the Gem Light Mfg. Co., which has taken out papers of incorporation. The company consists of Deputy Prosecuting Attorney William G. Ullery, Robert B. Pate, E. B. Wheeler, J. W. Baldwin and B. Grantham. The capital stock subscribed is $5000.

Washington, D. C.—Gaither & Cissel, H and Ninth Streets, will manufacture bicycles.

Washington, D. C.—Saks & Co., clothing, have taken the agency of the Spaulding bicycle and sporting goods, and will remove the stock now in the Pennsylvania Avenue (Spaulding) store, to their own building at an early date.

Changes and Removals.

Champaign, Ill.—R. C. Lowery has sold out his bicycle business on Neil Street to E. M. Nicolet. The business will be conducted under the firm name of Nicolet & Co., with J. G. Nicolet as manager.

Chicago, Ill.—The Excelsior Supply Co., bicycles, Nos. 276 and 278 Wabash Avenue, corner Van Buren Street, store has been remodelled, and they have added a complete line of bicycle sundries. Among the latest addition to their line of wheels is the Orient, made by the Waltham Mfg Co., of Waltham, Mass.

Fond du Lac, Wis.—O. H. Musgat, bicycles, etc., admitted John Guepe.

Hackensack, N. J.—Harry Fosdick has formed a partnership with H. W. Fishbaugh in the bicycle business.

Holyoke, Mass.—Lynch & Walsh, bicycles, reported to have dissolved partnership.

Milwaukee, Wis.—F. J. Green has been elected secretary of the League Cycle Co., to succeed A. F. Schult, resigned. Mr. Schult has become manager and secretary of the Milwaukee Cycle Mfg. Co.

New York, N. Y.—Hodgman Rubber Co., manufacturers of a large line of rubber goods, including cycle sundries, have removed from No. 461 Broadway to No. 593 on the same thoroughfare, between Prince and Houston Streets.

Pittsburg, Pa.—The Duquesne Mfg. Co., manufacturers of the Duquesne bicycle, W. L. Abbott, president, commenced the erection of a plant at Liberty Avenue and Twenty-sixth Street.

Washington, D. C.—Black Mfg. Co., of Erie, Pa., have removed from No. 1146 Connecticut Avenue to No. 1015 Fourteenth Street, N.W.

Washington, D. C.—The Enterprise Cycle Co. has gone out of the bicycle sales business, and will this year conduct only repair shops and a rental department.

Washington, D. C.—William Gettinger, bicycles, has removed his bicycle establishment to No. 813 G Street.

Recent Embarrassments.

Chicago, Ill.—Szabkliski & Maniurka, bicycles, etc., reported to have appointed receiver.

Madison, Wis.—D. D. Warner Co., manufacturers of bicycles, reported to have made an assignment.

Milwaukee, Wis.—The Milwaukee Mfg. Co., bicycle manufacturers, have made an assignment.

Minneapolis, Minn.—Lautner, Peterson & Uesevich, bicycles, reported to have made an assignment.

Vancouver, B. C.—J. J. Woods, bicycles, reported to have made an assignment.

Recent Fires.

Chicago, Ill.—Barnum Mfg. Co., pedals, destroyed by fire.

Chicago, Ill.—Wilson Davy Mfg. Co., bicycles, destroyed by fire.

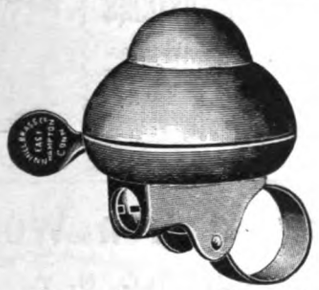
Fort Worth, Tex.—The Fort Worth Cycle Co., factory destroyed by fire.

Scranton, Pa.—Clarence M. Florey, bicycles and sporting goods, stock destroyed by fire at a loss of $8500; insured for $7500.

Miscellaneous.

New York, N. Y.—The stockholders of the National Board of Trade of Cycle Manufacturers held their annual meeting on January 19th. A committee was appointed to take steps to urge the government to remove the duty on German bicycles. The following officers for the ensuing year were chosen: President, C. S. Dickerman, of Chicago; vice-president, R. L. Coleman, of New York and G. H. Day, of Hartford, Conn. Executive Committee: R. L. Coleman, G. H. Day, R L. Garford, Joseph McGee and R. P. Gormully.

Washington, D. C.—Pope Mfg. Co. will enlarge on sundries.



Washington, D. C.—The U. D. Stebbins Mfg. Co. is seeking a suitable location for an agency.

The Hartzell Self-Draining Hose Reel

IT SELLS RAPIDLY.

It is scientifically and mechanically constructed.

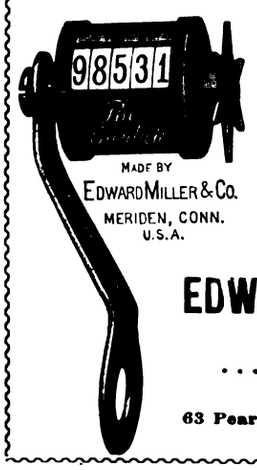
It is a nice ornament and a great convenience in spraying and watering a lawn.

The hose is not kinked, twisted, crushed or drawn to a tension, thus avoiding the breaking of either the inner or outer walls of the hose which protects the fabric and prevents it from becoming water soaked, which usually causes the rapid destruction of the hose.

It drains all the water out of the hose, after it has been reeled, and keeps it always in good order, ready for service.

Each section of hose is independent of the others and may be easily detached at the top or bottom.

It sells at sight, because any person who owns a garden hose can readily see its advantages and superiority.



Jobbers are especially solicited to handle our goods to whom lists and prices will be furnished upon application.

DEALERS ask your Jobbers for the HARTZELL SELF-DRAINING HOSE REEL and insist on getting it.

If they will not supply you address us for prices, circulars and lists.

To Bicycle Riders.

WE MAKE OUR TUBE
OF FIFTY CARBON STEEL

Because a Tube like this of our Is just as strong as a Tube like this of

.50% CARBON STEEL

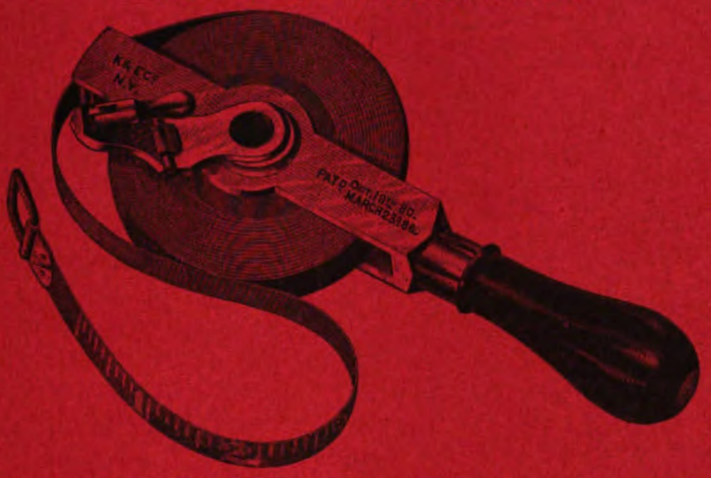
.25% CARBON STEEL

While weight for weight in a Bicycle our FIFTY CARBON Steel will last so long [redacted] and TWENTY-FIVE CARBON Steel will last only so long [redacted]

NOTE THE FULL IMPORT OF THE PARALLEL LINES.

The comparison which they graphically make indicates the result of the prolonged investigations of the most practical experts of the world.

That the tests in our own laboratory corroborate these results is merely so much to its credit; that the same is true of actual trial on the road equally proves the trial to have been made in bicycles of correct design and construction. THE FACT REMAINS.



The margin of safety is greatly increased by the use of this tube. Every bicycle manufacturer should use it; every dealer should insist on having it; every rider should demand it. Send for catalogue.

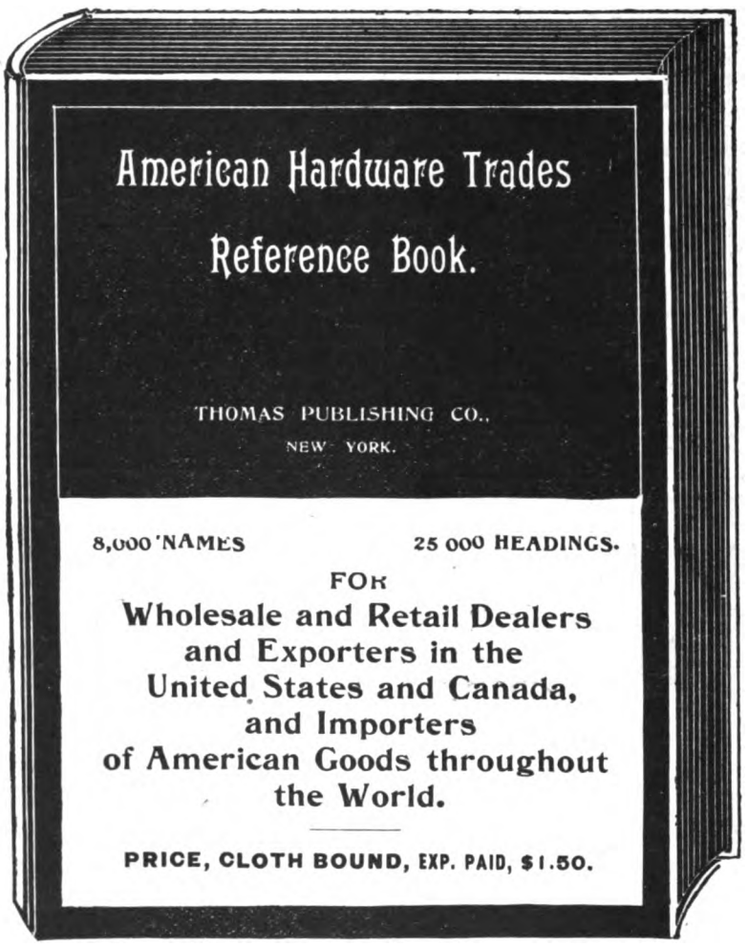
EVERY PROSPEROUS HARDWAREMAN

MUST BE WELL POSTED.

Secure the benefit of all possible Competition in Buying. A Dealer's Reference Book is essential. Here it is. A complete one, independent of any other publication, giving the names of ALL manufacturers, those who do not advertise, as well as those who do. The only work of the kind maintaining this feature. 1898 edition ready in few days. . . . .

IT COVERS THE FOLLOWING TRADES:



Hardware of All Kinds,

Hardware Specialties,

Agricultural Implements and Machinery of Every Description,

Carriages, Wagons, Harness,

Stoves, Ranges,

Tinware, House-furnishing Goods, Bicycles, Plumbing, Steam and Gas Fitting Goods of all Kinds and all Other Articles, Machines, etc., Handled by these Trades.

The object of the work is to enable the above trades to instantly find all the manufacturers of any article desired; the main and branch offices of every manufacturer in the trade, and the financial rating of every manufacturer.

Completeness.—The names of all manufacturers, regardless of whether they advertise or not. We give the names ver 8,000.

Classification.—By our method of classification, we index every manufacturer under every article manufactured. We name some manufacturers under as many as 300 headings. We make no charge whatever for any number of headings required to completely represent every manufacturer. The book gives nearly 25,000, fifty times as many as any other publication gives to these trades. We do not use general headings, such as are used in ordinary directories, as for instance: "Hardware," "Agricultural Implements," "Vehicles," "Plumbing Goods," etc., but state the specific article and the special kind of article, and for what purpose used, as for instance: "Door Locks," "Bicycle Locks," "Refrigerator Locks," "Gang Plows," "Sulky Plows," "Swivel Plows," "Ditching Plows," "Brass Faucets," "Wooden Faucets," "Beer Faucets," "Steam Heating Boilers," "Combination Steam and Hot Air Boilers," "Air Valves for Radiators," etc., etc., throughout the 25.000 headings, naming every article, every special kind of article needed by these trades. It enables the user to instantly find exactly what is wanted. Nothing like this minute classification has ever been attempted before.

Ratings.—The financial rating of every manufacturer is given.

SAVES SUBSCRIBERS 100 TIMES ITS COST.

THOMAS PUBLISHING CO., SOLE PROPRIETORS, 40 Broadway, New York.

Digitized by Google

Special to our Subscribers.

WE have contracted with the Thomas Publishing Co. for 10,000 copies of the 1898 American Hardware Trades Reference Book, which we are offering to the trade of the United States, with a year's subscription to "Hardware" for $1.50; the price of the book alone. . . . . .

« « « ◆ » » »

Those who are already paid subscribers to "Hardware" may take advantage of this offer by sending 50 cents. . .

« « « ◆ » » »

We do not agree to hold this offer open for any specified length of time, as it will be impossible to furnish the Book alone at less than $1.50 after these 10,000 are taken.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

"EVERYTHING IS COMING UP."

BUSINESS IS BETTER AND THERE WILL BE A LARGER DEMAND THAN EVER FOR OUR

Sheep Skin Mitten.

Acknowledged to be the best article for polishing stoves, as it does away with the old time dirtiness of the work, making this work a pleasure. Also invaluable for polishing brass or glass, or silverware, which it does not scratch. For tan shoes and cleaning bicycles it has demonstrated itself a conspicuous success.

Diamond Hardware Co.,

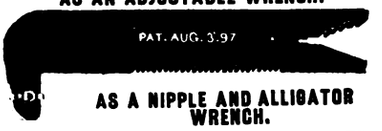
624 Atlantic Ave., Boston, Mass.

SHOOT BLUE ROCKS.

For Sale by all Jobbers.

Foreign Trade Supplied Direct or Through Exporters.

The Cleveland Target Co.,



Cleveland, Ohio.

IMPROVED UNIVERSAL BEVEL PROTRACTOR.

No. 495, Protractor with 6-in. blade, Price, $8.00.
No. 496, Protractor with 12-in. blade, Price, $9.00.
This Protractor is well adapted for all classes of work where angles are to be laid out or established.
The Dial is ACCURATELY graduated, in degrees, the entire circle, and when set can be clamped in position. The blades are about 1/8-in. thick, can be drawn out to their full length, and clamped independently of the dial.
Special circular mailed on application.

ANY DEALER knows that a Stove Polish which other manufacturers try to imitate, is the Polish for him to sell. The enormous sale of

Enameline
The Modern **Stove Polish**

Proves that dealers are friendly to it, and that consumers will accept no substitute for ENAMELINE. Why? Because it's

THE BEST!

The Hartzell Self-Draining Hose Reel

IT SELLS RAPIDLY.

Patented Jan. 5, 1897. Other improvements applied for.

It is scientifically and mechanically constructed.
It is a nice ornament and a great convenience in spraying and watering a lawn.
The hose is not kinked, twisted, crushed or drawn to a tension, thus avoiding the breaking of either the inner or outer walls of the hose which protects the fabric and prevents it from becoming water soaked, which usually causes the rapid destruction of the hose.
It drains all the water out of the hose, after it has been reeled, and keeps it always in good order, ready for service.
Each section of hose is independent of the others and may be easily detached at the top or bottom.
It sells at sight, because any person who owns a garden hose can readily see its advantages and superiority.

Jobbers are especially solicited to handle our goods to whom lists and prices will be furnished upon application.

DEALERS ask your Jobbers for the HARTZELL SELF-DRAINING HOSE REEL and insist on getting it.

If they will not supply you address us for prices, circulars and lists.

IS A GOOD ONE.

Morgan & Wright, Chicago Ill. [*Bicycle Tires*]: There can be no question about the advisability of using the Hardware trade as a means of disposing of bicycles and bicycle parts, and as to the efficiency of HARDWARE, we can only say what we would say in reply to an inquiry from any other publisher, i. e., we have no direct means of knowing whether our "ads" do us good or not. If we insert an "ad," it is on our judgment that the publication is a good one.

Digitized by Google

IT'S IN THE TEETH.

The Patent "REFORM" Curry Comb is composed of three shallow, oval trays, with corrugated edges. The parts are struck up from a fine grade of cold rolled steel, heavily tinned and bronze lacquered, firmly riveted together and warranted not to rust. The outer dimensions are 6½x4¼ inches and by reason of the large cleaning surface and peculiar arrangement of teeth, the comb will do its work with a large saving of time and labor, cleaning with equal thoroughness both long and short coats. There are no places to accumulate hair and it will not tear or injure the brush, the comb being quickly freed from accumulation by giving its face a gentle tap.

THE FULTON SIGN and PRICE MARKERS

Are the best, most complete and cheapest outfits for Business men to make their own Show and Price Cards, to print Shelf Labels, mark Boxes, Barrels, etc., etc. There is in fact no business where they cannot be used to advantage. Newspapers are using them for their Bulletin Boards, Ministers for Church Notices, Theatres for Announcements, Restaurants for Bills of Fare, etc. Their price in comparison to their usefulness amounts to almost nothing; it saves the cost of Sign Painters and Ticket Writers. A Boy can do all the lettering required in the largest Department Store. They last a lifetime and can be used for every language. We have

50 DIFFERENT STYLES

to select from in sizes from ½ to 4-inch letters. For marking Boxes and Barrels for shipping, or labels, they are far superior to adjustable stencils; the work is done quicker and neater and without blurring, making it look as if printed on a printing press. Nearly 100,000 sets of the **Fulton Sign Marker** have been sold, and they are in use daily by all large wholesale and retail business houses in the United States. Goods can be bought direct from us, or through your nearest wholesale house. Complete catalogues in English and Spanish sent free. Address

THE FULTON STAMP WORKS, **22 Beekman Street, NEW YORK.**

IMMENSE REDUCTION IN PRICES.

"Model B" reduced from $35.00 to $20.00; "Model E" from $25.00 to $15.00. Two cutters with each machine. Order direct, or from any dealer or agent.

"SATISFACTORY RESULTS ON INVESTMENT."

Aladdin Lamp Co., Newark, N. J. [*Bicycle Lamps*]: We think that the Hardware trade is one of the best to handle the side line of bicycles and bicycle sundries, as it seems to be in perfect keeping with the other lines of goods which are kept in stock. We are also of the opinion that the trade will, in time, be controlled by a very few exclusive stores, and a large number of Hardware and carriage warehouses, where the bicycle can be sold at a legitimate price as a side line. Regarding HARDWARE it has always given us satisfactory results on investment made.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

Editorial Trade Review.

A steady improvement in business is noted so far this month in the accustomed channels of local trade, and our reports from the interior bear witness to the fact that a similar state of affairs is apparent in the trade centres in other directions. In almost every line of goods, it is safe to assume from the visible signs, that a volume of business is already in sight that will prove by comparison with recent years fairly unprecedented.

Current prices on staples and materials are aggressive in character rather than otherwise. Heavy transactions in iron, steel and contributing lines give every indication that orders for products for months ahead are already on order books, with the resultant advantages of stiffened quotations, and there exists a willingness to give the go-by to specifications that promise more of employment than remuneration in the way of profit. When even pig iron under conditions that show an unprecedented production, feels the influence of an advancing market, without materially affecting sales; with copper also held at an advance of nearly one cent a pound over January prices, it may safely be assumed that manufactured goods will be held at increasing quotations for some time to come.

The bank clearings for January and February appear almost phenomenal in character, and show palpably how great is the impetus given to current commercial transactions and financial movements, the average daily clearings for February being reported as six per cent. in excess even of 1892, the heaviest for that month previously on record. Greater attention than ever is being given by our Hardware manufacturers to the export trade, the volume of which is rapidly and profitably extending. Competition in this trade, with the low bids of foreign producers, stimulate to the utmost a comparison of costs, involving frequently the necessity for economic saving and possible advantages by a combination of competing plants, a reduction of an office force, too often of an ornamental or supernumerary character, and the employment of the most skillful machinery that can be constructed by our productive energies. Once we obtain a foothold in a market previously controlled by the organized commercial forces of Great Britain or Germany, the high grade manufactures, bearing the trade marks of American makers, are found so superior for the purposes for which they are employed as to give us a prestige it would take an entire change of industrial methods on the part of our formidable trade adversaries ever to dislodge us or discredit our superior advantages. Let us hope these commendable efforts will continue their present success and prove a prominent factor for the future.

"The Blast of War."

It is just possible that this agitation of the question of a war with Spain will prove of benefit rather than a detriment to the business interests of this country, even if it reaches a bloodless conclusion and never progresses beyond the confines of a diplomatic settlement.

Its discussion brings in its train a harmony of sentiment among political adversaries, which has a tendency to dispel under the folds of the waving bunting, party animosities and political diversity of sentiment, that have been long standing and desperately fought for.

It enables us to glory in our strength and learn largely in what consists the foundation of our glorification. As a country we are in admirable condition to show the envious nations of the globe the fearlessness with which we dare assert ourselves. The feeling underlying it all with our countrymen is that Spain is among nations well represented by the boy king among rulers. We seem too strong and stalwart to need to do more than shake our fists and listen to an apology from the disordered Dons who have more to lose than gain even under diplomatic conditions, with the future of the island of Cuba anxiously awaiting the decision.

How will this agitation affect this year's business? Can it prove anything but an advantage, taking our minds from the weaknesses of the past, and strengthening our confidence in the future?

Let us suppose the prospect of a war with Spain is among the possibilities of the coming months, even if scarcely possible; the distribution of $1.000,000 contracts for projectiles as well as for ammunition, which have been given so urgently by our Secretary of War, that authority had to be obtained subsequently, will stimulate the manufacturers of all analogous branches of trade.

The very fact of an appropriation of $50,000,000 to support the stand we are taking, throwing about our movements the ardor of a warlike preparation, stirs the blood and revives in our veins the patriotic fires that have long been smoldering, and makes the business man view the present war cloud with feelings of national exaltation instead of nervous apprehension.

If the soldierly element in our citizenship to-day, both North and South, could but once more appear in battle array beneath Old Glory, no vestige would remain in our otherwise perfect civilization of any disturbing memories still surviving from the associations of our civil war.

Indiana Retail Hardware Dealers Association.

The annual meeting of the Indiana Retail Hardware Dealers' Association, which was held at South Bend, Ind., saw a fair representation of the membership, and was successful in a marked degree. The first session was called to order at 2:30 P. M., on Wednesday, February 23rd, by George E. Nichol, president of the association. M. L. Lewis, of the Marion Hardware Co., Marion, secretary of the association, made an interesting statement of the work during the year, after which Charles F. Bock, of Battle Creek, Mich. president of the Michigan Hardware Association, delivered an interesting address. Several minor matters of business were disposed of, and on Wednesday evening the election of officers was taken up, with the following result:

President: George E. Nichol, of Nichol, Makepeace & Co., Anderson.

Vice President: George W. North, Columbia City.

Secretary and Treasurer: M. L. Lewis, Marion Hardware Co., Marion.

Executive Committee: Irving A. Sibley, South Bend, and Sharon E, Jones, of the Jones Hardware Co., Richmond.

An investigating committee to adjust complaints and grievances was also appointed, consisting of the following gentlemen: O. E. Lang, O. E. Lang & Co., Mishawaka; M. L. Corey, Corey & Stevens, Argus; Charles B. Frame, D. Frame & Son, North Manchester.

Several discussions of an interesting nature occurred, and it was decided that the next meeting shall be held at Indianapolis, at a date to be fixed by the executive committee.

They Never Sleep.

Has the fact ever impressed you that spring hinges do by far the hardest duty of any Hardware? Not only do they carry the weight of a door and suffer the wearing friction of constant usage, but must besides automatically close it. The Bommer Spring Hinges are made of wrought steel, and where this famous spring hinge is ordered in bronze metal, there is a continuous steel core from end to end, the bearings being solid steel turned from the rod. "Practically unbreakable," says the World's Fair Award.

A valued subscriber sends us the following unique specimen, culled from the many orders with which his desk is stored. While it is unique in its way, it has an expressive earnestness, which shows that the writer knows just what he wants, and expects to have it:

"Deare Sir: I will write you and in form you that your clarke Sould me a Corne Shellar and for got to put in tow Boulghts Witch fasen it on the box please send them by express by sodoing you Will faverme very mutch."

S. H. Harman, Bloomsburg, Pa., Surpless, Dunn & Co., sole agents, No. 55 Warren street, New York, is placing upon the market a desirable line of sheet metal goods, including solid steel spout oilers and curry combs, the quality and styles of which have proved very popular with the trade. Mr. Harman also manufactures a roller skate which, in the recent revival of this healthy sport, has met with steadily increasing sales, and will be found by the trade to possess selling merits worthy of an extended introduction. Quotations will be furnished the trade upon application.

The offices of the Minnesota Retail Hardware Association are now located in the Boston Block, Minneapolis, in charge of J. W. Clark, secretary. The same headquarters also belong to the Northwestern Retail Hardware Association, covering the States of Minnesota, Wisconsin and North Dakota.

A Hardware Association Number of "Hardware."

On April 10th, 1898, *Hardware* will celebrate the eighth anniversary of its birth.

Hardware has certainly used its best effort for the promotion of neighborly friendship and good fellowship among the members of the trade. It has given freely of its space for the dissemination of news in regard to the great Hardware organizations which, since 1890, have become so grand a force for good in the Hardware world. It has by its voice, encouraged in every possible way the creation of organizations having for their purpose the bettering of trade conditions, and has been an enthusiastic supporter of every movement having for its purpose the good of the trade.

It occurred to us that the celebration of our anniversary of April 10th, 1898, could be made of signal usefulness to the trade everywhere, by the publication of a SPECIAL HARDWARE ASSOCIATION number.

It is our purpose, therefore, with that issue, to present a mass of valuable information in regard to the beginning and growth of the great forces or organizations which have accomplished so much in the way of acquaintance, better business methods, and the cultivation of fraternal regard. These sketches of the rise and growth of the organizations will be accompanied by portraits of various officers of the same, special articles from the pen of men who have been instrumental in the founding of these societies, and much else of interest in connection therewith. We feel that the time has come when the various steps which led to the creation of these forces within the Hardware trade should be gathered and properly placed upon record, and more especially as the information can now be secured at first hands, from those who assisted in this work.

We ask the hearty co-operation of Hardwaremen everywhere in this laudable effort, and our experience of the past leads us to firmly believe that the same will be given with a generous willingness which shall be very effective in its results.

As will be seen by the special announcement elsewhere, E. Bissell, Son & Co., the well-known auctioneers, at No. 12 Murray street, and No. 15 Park place, New York, on March 16th, at 10 o'clock, offer a fine line of Hardware and tools, shovels, scoops, hoes, rakes, etc. Full details are given in the announcement referred to, and the auction is one of no small importance, and affords an opportunity not often offered for the purchase of goods of this character.

John W. Buckley, No. 156 South Street, New York, illustrates on page 46 of this issue his Invincible Rubber Hose, which is wound with heavy steel wire throughout the length, and is complete with brass couplings and bands. The exceptional terms upon which he is willing to send sample lengths of these goods are also stated in the card referred to, where he also calls attention to his other grades of rubber and cotton hose.

MR. ALLERTON ON THE MONEY QUESTION.

To the Editor of Hardware: Your readers are active business men and not politicians, and no doubt are governed by true patriotism, and if they would use their influence for good government, they would aid largely in molding public opinion. There are five great questions that should be settled by this nation for the best interest of all our people that party spirit should not govern: The finance question, the tariff, the emigration, the marine, the navy, and how to create a greater diversity of labor; the business element leaves these great questions to be settled by politicians.

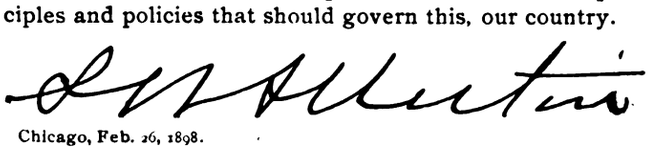
The United States Senate is supposed to be a conservative body made up of all the ablest men of the nation. One would suppose that the last election would have settled the silver question, and yet we see the Senate voting affirmatively for Teller's resolution, a resolution meaning free silver, "sixteen to one." The Republican party are rejoicing that the lines of the political parties are formed for 1900; this should convince the business element of the nation that they have a duty to do, which is to try and mold public opinion in the interest of true patriotism, and that we must now begin to educate the people for the battle of 1900. This talk of bimetalism is a delusion; there is no such thing as bimetalism; we may as well talk of making corn wheat. We must believe that the free silver Senators are honest in their convictions. It would seem as though they were governed by prejudice against bond holders. And yet it is the middle classes who own the bonds; the wealth of the nation is invested in railroads and manufactures, with very few exceptions. The advocates of the Indianapolis Monetary System believe the true way to better the financial system of our country is by allowing banks to issue currency against bills receivable. The great trouble with all these financial doctors is, they do not understand what is money. I learned when a boy what money was. A gentleman of character and credit said to me he thought hogs were going up, that as I was active and a good buyer I ought to go out and buy. I said I had no money. "He replied, I will take a half interest with you. I will sign checks which you can take that are just as good as money, pay the farmer by a check given in his name, tell him it is good, and if it gets stolen or burned up he can get another check." I bought the hogs and shipped them to New York, got back with a New York draft before one-quarter of the checks got in the bank. I learned then that credit was money.

We have a great many bright, intelligent men who would love to promote some industry that would benefit the nation, but they have no credit, and this is why they are failures in the world as business men. I worked on a farm ten years of my life to accumulate $3,200; with it I made a reputation and a credit, so I could go into a bank and borrow from five to ten thousand dollars without an endorser. I started in life buying and feeding cattle in Illinois, which seemed to be an honest business, but in 1857 William Sturgis "broke" in Cincinnati, and the national financial system was so weak that it threw our country into a panic and wiped out all I had except my credit. The business of our country is done on 92 per cent. credit and only 8 per cent. cash. If the three billions and five hundred millions of silver in the world was coined into a forty-four-cent dollar as primary money, the credit of the nation gone, the credit amongst ourselves gone, the silver to do the business would be a bagatelle, and the business of our country would be paralyzed. We have one billion five hundred million of currency at the present time that does 8 per cent. of our business, and if our credit was gone it would take fifteen billions of silver to do the business of this country. A practical fact is a great deal better than a theory.

From 1694 to 1696 the English nation was in war with France. They were in great financial distress, because their coin, consisting of shillings, crowns and pounds, had been chipped so that it had only one-half its value. At that time their money was hammered money. They organized a mint to coin shillings, crowns and pounds of full value, but it left the country as fast as it was coined, or was hoarded by the people, and they had only poor money, because poor money always drives out good money. They knew they could not succeed with shillings, crowns and pounds at half their value, and something must be done to restore their credit. They tried to start a land bank but it would not go; they were in great distress to know what to do to raise the money to carry on the war against France. They said it was not right for the people to lose who had received this debased coin, yet they must restore their credit; how could it be done? They decided that the Government should receive this depreciated coin at its actual weight; they would return coin at its full weight and value, and for what it lacked in value the Government would give its note to the people. This act immediately restored credit; they raised the money to carry on the war against France, and the English nation learned away back in 1694 that credit was money. They established a sound financial basis, and then became the credit nation of the world. If they wanted to raise one hundred million they would buy forty million of gold and increase their credit sixty million. To-day they are the richest nation on the globe, made largely by establishing their credit and having a sound financial basis, and the bank notes of England are taken all over the world. We, the richest nation in material wealth in the world, should establish a financial system that should be sound—one that would give confidence to the world, and in ten years New York would be the financial center of the universe; but our trouble is, we have one party who want a forty-four-cent dollar and another party who want the banks to issue the currency. The banks would have their currency to take care of besides their other obligations, and when there came a flurry they would all call in loans and cause a panic. If our public men would forget party strife, and be governed by manly patriotism, issue one billion five hundred million of greenbacks, take up all their other outstanding obligations, have one uniform currency redeemable in gold, increase the currency as we increase in population, so the money interest would have no advantage over other industries, there would be no contraction or expansion to demoralize our country by panics. If our Government would adopt this system no one would want to hoard gold, as the banks and people have done for the last four years, because they were afraid of the silver agitation. Our Government would soon have one billion of gold in its Treasury, for when the Government adopted this system no one would want gold and no one would hoard gold. This would give us the soundest financial basis of any nation on the globe. Congress would have to empower the Secretary of the Treasury to issue and sell gold bonds to protect the Treasury. If Congress had authorized the Treasurer in January or March, 1893, to issue gold bonds to protect the

Digitized by Google

Treasury, we would not have had the panic of 1893, which was the principal cause of our depression of the last four years. The greenback would be the civilizer that would be respected and pass current in every market of the world. Under a sound financial basis of this kind the rate of interest would be lower, and we would soon have money to loan to the world.



The financial question is a simple question to settle if our national legislatures would only adopt business principles. When an intelligent merchant has a lot of rejected goods he sells them. Silver has filled its mission even the same as the mule and the bobtail car, and as long as the Government hangs on to its five hundred million of silver there will be silver agitation in this country; possibly a portion of it could be used as subsidiary coin, but the remainder of it ought to be sold.

The tariff question should be taken out of politics. The emigration law should be so amended that any foreign citizen who wanted to come to this country must have a certificate of good character from the proper authorities of his own country, and possess at least one hundred dollars when he landed. The Government should give a bounty to stimulate the marine so our flag should float in every harbor of the globe.

In the last forty years the American people have invented so many labor-saving devices that it has in a measure necessarily reduced the demand for labor. Our statesmen should study how to promote a greater diversity of labor. We import from one hundred to one hundred and twenty million dollars worth of sugar, all of which we could raise at home if a bounty was given; now, how would doing this affect all parts of our country? Nebraska, Utah, and States west of the Missouri River have proved that they have the best soil in the world for producing sugar beets. If these States cultivated their land to produce sugar they would not raise the other cereals to come in competition with other States. It would furnish employment for our idle labor, set our mills and factories running to produce the machinery and goods to supply the laborer, make transportation for our great railroads, and save the Government from furnishing one hundred million dollars per year to pay for sugar. There is not a man, woman or child in the United States that this would not benefit.

The song of President Cleveland and his admirers was that "greenbacks were an endless chain and a source of weakness to the Government." If the Government intends to maintain its honor and credit it must redeem all its currency in gold, so if the greenbacks were retired the other currency would become the endless chain. The greenbacks are the intermediate between gold and our currency; a benefit to the Government not a detriment. Had Congress maintained the revenues of the Government, President Cleveland would not have had to sell upwards of one hundred millions of gold bonds to maintain the credit of the nation. The Government has already saved two hundred and forty-four million dollars in interest by the greenbacks.

The elective franchise was the greatest gift man ever had presented to him, yet business men cannot afford to spend a few hours to go to the primaries but leave it to the politicians. No man is a good American citizen who does not do his political duty to his country. For it is the administration of the affairs of our Government that gives us prosperity or adversity; so how important it is that business men should take a personal interest in the principles and policies that should govern this, our country.

Chicago, Feb. 26, 1898.

The rate of transmission on Atlantic cables is eighteen words per minute, but by "duplexing" this rate is doubled.

He Discourses on the Manager.

"The Man at the Corner Desk" in the great store of the W. Bingham Co., Cleveland, Ohio, devotes himself in the February publication to the manager of the wholesale department in a Hardware store, who, according to this expert testimony, has troubles of his own. According to this man in the corner, "the manager of the wholesale department is probably called upon to exercise in a day the greatest variety of mental activity; for it is by his direction, under the general management of the concern, that the whole machinery connected with the sale of the immense line of Hardware moves. An undecisive man would be as much out of place here as a butterfly in a blizzard; nor is there a place in the house where a lack of knowledge or an error in judgment is more liable to do injury. By an intuition born of long habit he gauges the wants of the dealers and the house's ability to supply them. It is he who detects the changing favor of the trade, as lines of goods wax and wane in popularity: who knows whether or no articles will be 'takers' and in what section; where the competition is strongest and how best to meet it; and when to push a line hard, and when to cease.

"And he has more troubles than a married man: Every complaint or bit of dissatisfaction; each infraction of rules or mistake of employees; all indefinite orders or inquiries —every variation of any kind from the regular course of things in his department comes to him for adjudication. It is he who fixes the selling prices and keeps the salesmen informed of every detail that has an effect upon the sale of goods. When a traveler wants a change in territory (as is their regular custom) he has him to satisfy; when the buyers want to know why goods don't move faster, it is his to explain; when a salesman runs into a mare's nest, it is he who must be able to ferret out the trick by which an opponent demonstrates an apparent difference in his favor."

Fraudulent Failure s

At a recent meeting of the various local associations of credit men throughout the United States the investigation of fraudulent failures has been discussed. This work has proceeded under the immediate supervision of the national officers, and will result in the adoption of definite and uniform methods for use by the entire membership of the organization. The following resolutions, approved by the Board of Administration of the National Association of Credit Men, at its regular meeting in September last, are an indication of what is to be done where suspicious failures occur:

Whereas, Fraudulent failures constitute a serious menace to the mercantile community, and,

Whereas, Such failures are as dishonest and reprehensible as any form of robbery, and the safety of the business public demands that all persons involved therein be brought to justice, therefore be it

Resolved, By the Board of Administration of the National Association of Credit Men that the plan of dealing with suspicious failures presented be, and the same is hereby approved, and the board recommends that the proposition contained therein, to select legal correspondents throughout the United States to actin conjunction with some well-known detective agency, in investigating such failures, be especially emphasized in carrying out such plans. And be it further

Resolved, That the officers of the Association, together with the Committee of Investigation, be authorized to make such changes and modifications in the plan presented as they may deem expedient.

Pavements made of granulated cork mixed with asphalt have proved successful after two years' trial in London and Vienna. They are never slippery, are odorless, and do not absorb moisture, besides being clean, elastic and lasting. Near the Great Eastern Station in London, the wear in two years amounts to about one-eighth of an inch.

THE OHIO HARDWARE ASSOCIATION.

The Fourth Annual Session of the Ohio Hardware Association was held at Columbus, Ohio, on Wednesday and Thursday, February 23 and 24, 1898, in the Assembly Hall of the Hotel Chittenden.

The attendance was the largest in the history of the Association, a gratifying feature being the large number of new faces seen among those present. After cordial greetings among the members, the president, J. P. Duffey, of Greenville, took the chair and called the Association to order, after which he made a brief address congratulating those who had attended previous meetings upon the continued increase in the membership and also upon the fact that this Association and its principles were no longer an experiment, but an assured fact. He said:

ADDRESS OF PRESIDENT J. P. DUFFEY.

Gentlemen: Nothing since my connection with the Ohio Hardware Association has given me so much pleasure as the large number who are assembled here to-day. We feel that our efforts to interest the retail Hardware merchant in our organization are being successful.

Members of the Association and others who are with us, we hope to become members, we bid you welcome. Could we have had this number with us at our first annual meeting, held in this city three years ago, and have had the same percentage of increase in our membership we have had to-day, we would be recognized throughout this country as a power, and our influence in the interest of Ohio's retail Hardware merchants would be felt everywhere.

We have too many waiting to see what we will amount to as an association. At our Dayton meeting in 1896 a dealer who accepted an invitation to attend our annual banquet, when asked by our toastmaster for a remark, said: "I would like very much to become a member of your association, and will do so when I find you are going to be a success." A reply was made to him then that when we succeeded in our undertaking we would not be seeking members. That we needed him now and wanted him, but when the time came that we would not need him, we would not want him.

That reminds me of a lecturer who told of a preacher who in his selection of subjects for sermons aimed to please some particular member of his congregation. A feeble old man, very poor, half starved, nearly naked, but withal a very devout Christian member—for him the pastor prepared a very able sermon; subject, "Heavenly Recognition." In the midst of the sermon the good doctor, thoroughly warmed up to his subject, made the startling discovery that the good old brother was sound asleep. The service concluded, the minister came down the aisle, grasped the hand of the pious old gentleman, censuring him for sleeping during the delivery of a sermon especially prepared for him. The old man said, "When I get to Heaven and hear the glad tidings, 'Well done, thou good and faithful servant,' when I am permitted to parade the gold-paved streets of the New Jerusalem, it will matter very little to me whether I am recognized or not. What I need most now is a little earthly recognition." What the Ohio Hardware Association needs is instant recognition from Ohio's retail dealers.

In August, 1894, this Association was organized with less than 1 per cent. of Ohio's retail Hardware dealers as members. In the accomplishment of the purpose for which we are organized, as far as it concerns the number of members, it is very unfortunate that we are the pioneer State Association of Retail Hardware Dealers in America, Michigan, Minnesota, Wisconsin, Indiana, South and North Dakota organized in the order named, each State with an increased percentage of her dealers as members, North Dakota last, with 199 Hardware merchants, 105 members. Reverse this order if you will. It's Ohio's turn to organize. Instead of 53 per cent, of the Hardware men of the State we have as yet less than 10 per cent., but we will go on in our way, and some day we will reach a membership of over 60 per cent. of the retail dealers of this State. The numbers here today indicate a very healthy increase.

Last year I took great pleasure in saying death had not entered our association. I am very sorry I cannot make the same declaration again. Two of our very best members have died, F. F. Stone, of Urbana, and Mr. Gillum of Chillicothe. Mr. Stone was one of our original members. He was the especial friend of every one of us, an active, agreeable, dignified, genial, interesting member. I want to repeat the expression of Mr. Wiseman at our '96 meeting, that while Mr. Stone had been a competitor of his in a neighboring city for nearly 20 years, he had never met him, and his time, trouble and expense of attending his first meeting of the Ohio Hardware Association had been fully repaid in becoming acquainted with Mr. Stone, and his only regret was that he had not known and become his personal friend 15 years before. This last statement applies to us all, that we knew him too short a time. I do not want to speak disparagingly of any member of our association, but I do want to say that the absence from our meetings of F. F. Stone will be regretted more than that of any member I now think of.

With Mr. Gillum we were not so well acquainted. He met with us last year for the first time and impressed all of us with his dignified, gentlemanly manners, more retired and conservative than most of us, hence our knowledge of him is more limited, and I desire that some of his personal acquaintances will, during the afternoon, speak of him fully.

To our efficient secretary, who has labored in and out of season, who has toiled early and late, is due the praise for the success that now promises for this, our fourth annual session. He has been untiring in his efforts for the good of our association, has devoted much of his valuable time and given a good part of his best thought for our benefit. He has done a vast amount of work, but has done it easily, for the very simple reason that he knows how. His modesty may prevent him contending for his rights, but I take this occasion to speak for him. He received no pay for his services for the year 1896, and while it may be the sentiment of our association to curtail expenses, I appeal to you that you make no cut in your secretary's salary for the year 1898.

Gentlemen, again I welcome you here and hope every one of you will go home feeling fully satisfied with your attendance. I thank you for your kind attention.

The secretary, John F. Baker, of Dayton, was then called upon to read the minutes of the last meeting, which on motion were approved. He followed this with his yearly report, and it was found by those present that a vigorous policy had been pursued during the year; that quite a number of grievances which had been brought before the executive committee had been satisfactorily disposed of, and that in several instances certain jobbers and manufac-

Digitized by Google

turers had consented to abide by the principles of the Association.

The secretary also presented his report of the finances, showing the excellent condition of the treasury. After some routine business, the president appointed the following committees:

On Resolutions: Messrs. Angle, of Piqua; Marquis, of Bellefontaine, and Ewing, of Lima.

On "Question Box": Messrs. Harrison, of Toledo, and Ross, of Bowling Green.

On Nominations: Messrs. Morris, of Lima; Clark, of Gettysburg; Gray, of Coshocton; Scott, of Marysville, and Cosley, of Troy.

On the death of Mr. Gillum: Messrs. Haberman, of Marion; Stahler, of Waverly; Harner, of Bellefontaine, and Reid, of Greenville.

A number of communications were read by the secretary, one of great interest being from J. W. Clark, secretary of the Minnesota Association, regarding State and National Associations. Several other communications were received from various members of the Ohio Association regretting their inability to be present. Invitations were read also, one from the Columbus Hardware Association, inviting the members to a Bohemian Smoker at the Neil House on the following evening, and one from the Smith Bros. Hardware Co., extending a cordial invitation to visit their establishment. After some minor matters had been disposed of, Mr. Wiseman, of Springfield, favored the Association with a very able paper on the subject "The Progressive Hardware Dealer." He was followed by Mr. Haberman, of Marion, with an interesting paper on "The Silent Salesman." He said:

MR. HABERMAN'S ADDRESS.

It is not expected that this brief article will contain anything particularly new, for the entire field of business experience has been so thoroughly threshed over in the columns of the trade journals and in papers read at meetings similar to this that there remains nothing new under the Hardwareman's sun. At the best, it is aimed but to emphasize old truths and to direct renewed attention to some established facts of which we are already aware. If this end is attained, well and good; if not, there is no harm done beyond the wasting of the few minutes that follow.

Silent Salesmen! Those inanimate aids to business which yet speak louder than the men who make use of them, and make or mar the merchant's prosperity, according as they are controlled; that work night and day, week days, Sundays and holidays. rain or shine; that don't go to funerals in the baseball season, don't throw business to the winds every time a brass band comes up the street, nor try to flirt with lady customers; exacting in their requirements as a tax gatherer, yet yielding faithfully good return for fair treatment.

The name of the first is the store front. It stands to an establishment as the face to a man, and the wayfarer is attracted or repelled by the first impression of the outside of a place just as he is by the first sight of a person's countenance. One does not associate thrift with an unpainted building any more than with an unwashed face, nor does he expect courteous, intelligent, satisfactory service when he enters a store the very outside of which proclaims a man indifferent to appearance. A dingy, weather-beaten sign, second story windows rendered light-proof with dirt, a broken step or badly arranged entrance, old worthless samples displayed outside, ashes dumped into the road before the door—each and all betoken a laxity that will in all probability find further expression within, and cause a prospective purchaser to seek further.

Nor should the merchant go to the other extreme. A door front can be made to assume a too smart appearance that is as fatal to confidence as slovenliness. A book could be written on individuality in store fronts. The dude, the smark aleck, the sluggard, the solid citizen and the pretentious humbug find their exponents in the fronts of different Hardware stores, just as certain types of femininity are exhibited in others in other lines of trade, The store front should be made inviting in appearance and in general effect set forth the character and magnitude of the business done within—or perhaps carry an impression a little in advance of the real truth, just as the proprietor's ideal is above the reality.

Next in order, and equal in importance, come the show windows, the eyes in the store's face, through which the business looks forth at the buyer, ogling and cajoling him, captivating his errant fancy and creating hot desire, or repulsing by indifference to his opinion, even as is the way of a maid with a man. There is a general recognition of the importance of having the show windows well and frequently dressed, and yet one does see lamentable cases of neglect and ill judgment in this regard—where the goods from a dozen different lines are arranged in a jumble that fails to make any impression whatever upon the casual observer, or where the same articles are displayed week after week without change. The average Hardwareman has a consuming desire for dollars, and is not wont to be sparing of exertion where anything is to be gained. So it is pretty safe to say that when his show windows are not all they ought to be it is through lack of proper knowledge or taste. The former he can remedy when he discovers his need, but if the fault lie in the latter he will do well to cast about among his clerks for latent talent or call in outsiders to help him, for the show windows, commanding the attention of the people more surely and constantly than any other one thing he can devise, can be made his very best salesman.

Window trimming. Bottles of ink have been spilled and reams of paper wasted in endeavor to tell the merchant how his windows should be trimmed, but there is one thing that the self-styled experts all seem to miss, and that is, that the window should show forth the merchant's personality. Give Jones, Brown and Smith the same assortment of cutlery for the windows and the three displays will be widely different—and they should be, with a difference founded in the peculiar quirks of the make-up of each, though to get the best results all must observe a very few—two or three—plain rules that form about all there is to three-fourths of the articles that are written concerning window display:

Cleanliness, neatness and light.

But one line of goods at a time.

Frequent changes.

The third of the silent salesmen is the advertisement, whose work lies outside the store, going to the homes and business places of the purchasing public and soliciting favors for the merchant, with accounts of bargain sales, dear to the heart of the good housewife, tools for the artisan, implements for the farmer, hammocks and bicycles for the summer girl, sporting goods for the swaggering youth and all sorts of things for the head of the family. It catches its victims when they are in a receptive mood, seeking for new impressions and devouring what is set before them in their paper. It silently tells its tale, and if it fails to interest the first time, it retires with honors and comes again and again with new temptations until it makes a customer for its sender.

This is the age of printers' ink. Great are the "ad," the "write up," the "free puff," the "reading notice" and the "fake" scheme, and thrice blessed is that ironmonger who knows how to employ them to get the maximum of results with the minimum of expense. The advertising manager of one of the great monthlies says in a burst of confidence that only about 10 per cent. of his patrons make it pay to advertise, but of the purely local

Digitized by Google

advertisers it is probable that less than 10 per cent. find that it does not pay. A merchant must advertise, or spiders will spread their nets across his doorway. The public expects it of him and goes to buy at stores the proprietors of which pronounce them as the best and largest, with finest stocks and lowest prices—and if the proprietor doesn't know, who does?

If a fellow will tell us a thing often enough and forcibly enough, we will in time accept it as truth and finally announce it as a fact we ourselves evolved, with additions and enlargements according to the scope of our imagination. In this fact lies the power of the press to mould public opinion, and it also furnishes the wise advertiser a powerful lever for advancement if he will claim for himself and his business every advantage he truthfully can (truthfully, mind!), do it persistently and forcibly, and see to it that the people whom his advertisements draw to his store do not go away disappointed. "He that bloweth not his own horn the same shall not be blowed," and it behooves the wise blower to see that his neighbor's trombone does not drown the sound of his own penny whistle.

Fourth comes good stationery, and it is surprising how little value is often placed upon this valuable assistant to a good impression. It is recognized that the largest firms in the country all use good stationery, and the appearance of the letter alone will generally determine the commercial importance of the writer. It costs very little if any more for good, well-arranged letter heads, bill heads, statement blanks and envelopes than for poor ones, and the increased effect produced upon a prospective customer is tremendously cheap at the price, and will at times alone suffice to turn the scale of a wavering buyer's favor.

Fifth is punctuality, promptness in delivering goods, sending bills and collecting accounts. The customer who gets his goods quickly is pleased. He wants his bill at once to see that all is right regarding the price, and if payment is exacted when due he is apt to remain the merchant's friend. It is the fellow to whom extended credit is given, and who lets his bills stand until they are long past due, who falls out with the merchant, leaves him for a competitor and repays his kindness by making slurring comments to his injury.

And still the force of silent salesmen increases. The dodger, labor savers, full stocks, convenient stores, all deserve due credit for the good work they do in aiding the merchant to increase his sales. His "silent salesmen" form a longer list than that which is found upon his payroll, and the wise Hardwareman will see that they are all employed and doing their best to help him in his race for supremacy in his field of endeavor.

These papers were well received by the Association and a vote of thanks tendered to both Mr. Wiseman and Mr. Haberman.

In the evening the Annual Banquet took place in the large ordinary of the Chittenden, covers being laid for seventy-five guests. It was a most enjoyable affair, the toasts of the evening being "Our Association," being responded to by President Duffey; "Columbus," by Mr. J.H. Smith, of the Smith Bros. Hardware Co.; "Mercantile Amiability," by Mr. O. M. Scott, of Marysville; "The Traveling Man," by Mr. Fred. Smith, of the Nicholson File Co. During the evening Mr. B. W. Payne of the Payne & McDonald Hardware Co., of Columbus, favored the Association with some sentimental and humorous songs.

The speech of Mr. Smith was entertaining and witty, and is here reproduced:

SPEECH OF J. H. SMITH.

I have been requested to respond to the toast "Columbus." It is a good subject, but too big for a novice. Now if it were some small town like Toledo or Shadesville the undertaking would not be so great, as there would be less to talk about. I can tell you only a few of the many good things that Columbus can boast of.

You all know that Columbus discovered America and Americans discovered Columbus about 100 years ago. Hundreds of people yearly are discovering that it is one of the best cities in the Union. The yearly increase in the population is ample proof that this statement is true. In 1888 her population was in round numbers 83,000; in 1898 it is 140,000, nearly 65 per cent. increase in ten years. The enumeration of pupils in the schools from 1896 to 1897 was 5861. This is evidence that most of our citizens are doing their duty. If Christopher was here to-night I know he would be proud of his namesake. I wish he were here to respond to this toast.

Columbus is an old city, but she is also young and lively as a two-year-old colt. She is a city of varied and numerous prosperous manufacturing interests, and the equal of any city in the State as a shipping and trading point. Every branch of trade has good energetic representatives. A few statistics may not be amiss. The area of the city is 10,400 acres, and there are still a few lots for sale. The area of parks is 215 acres. This does not include Minerva and Olentangy Parks. If we were like some cities we would have them in the ring quick, but we want to drive out in the country occasionally. Cincinnatians cannot drive out of their corporation limits from the centre of the city and get back the same day. It will not take them any longer, however, to drive out into the country and back than it does Columbus citizens. We haven't all the farms of Franklin County in the corporation.

Columbus is not considered a manufacturing town, but if you will take the trouble to go up in the State House dome or to the top of the Wyandotte Building and look over the city you will see smoke stacks as thick as a forest in some sections, and you cannot look in any direction and not see the smoke coming out of busy factories. Even Toledo tried to slander us by saying, "We had to shovel the smoke out of the way so as to get around." They don't have to shovel it up there, but they wish they did. Goods manufactured in Columbus are sold in every civilized country in the world.

The Kilbourne & Jacobs Wheel Barrows are on the dump in foreign countries as well as at home. The Heathen Chinee rides Columbus Bicycles alle samee like Melican man. The blarsted Hinglishman takes his best girl out riding in Columbus-made buggies, and no doubt can hug her as hard as any other chap.

The Scotchman uses steel goods made by the Brown, Hinman & Huntington Co. Jeffrey's mining tools are used in many foreign mines. The Ohio Tool Co.'s planes, chisels, drawing knives, etc., are popular the country over. Harness trimmings made by the P. Hayden Saddlery Hardware Co. are on harness all over the world. The sky is lighted up every night by the King, Gilbert & Warner's steel plant, who turn out tons of steel billets, slabs and sheets daily. The Hallwood Cash Register is keeping tab on the cash in hundreds of business houses. Columbus makes paint enough to paint red, white and blue stripes clear around the United States, and could take in Hawaii and Cuba if necessary. She can also make the varnish or hard oil finish to shine it up if a fine job is wanted. We manufacture bolts, chain, files, wagon skeins, castings of all kinds, carriage Hardware, stoves, plumbing goods, cast hollow ware, brushes, iron force pumps, bar iron, steel ceilings, iron pipe, lanterns, mantels and grates, saws and many other articles that Hardware dealers sell. You see, gentlemen, that Columbus is quite a Hardware manufacturing town. If I were to try to tell you of the hundreds of other lines of merchandise that are made here it would take all night.

I will cover the ground by saying that we make everything from a Dago to a full jeweled watch. I might men-

Digitized by Google

tion a few of the good things we have. One of them is our intercepting sewer that runs up hill at both ends, and our beautiful river is a thing to be proud of. It will be all right, however, when Mayor Black has the vacant lots utilized for potato patches. You could raise enough potatoes in the bed of the Scioto River to supply the city. It might be too wet early in the spring, but July, August and September would be all right.

We have three beautiful public parks and two of the finest pleasure resorts in the State. We have the fastest race track in the country, but it is generally a little too slow for the horse you bet on. We have as fine, if not the finest, Union Depot in the United States, and more lines of railroads enter Columbus than any other city in the State. One hundred and thirty-three passenger trains enter the Union Depot daily. This is one of the chief reasons why the Ohio Centennial should be held in Columbus. Ohio is a wheel and Columbus the hub. People can come from any part of the State quickly and cheaply. Toledo is part of the tire to the wheel, and you all know that a tire is liable to get loose and come off. For that reason it makes us tired to think that Toledo could even expect the Centennial. I lived in Toledo for two years and had to have a mosquito net over the bed, and then stay right in the middle. Even then some of the old-timers would reach me and give me the nightmare.

Columbus as a distributing point is not equaled in the State. We have hotels that any city would be proud of. The State institutions and the Ohio State University are all specimens of architectural beauty. Those you help to pay for and we thank you. The United States Barracks is another great attraction, so much so that Cleveland has been trying to steal it for two years. Columbus as a port of entry received $172,626 worth of goods in 1896 direct from foreign countries. We have 103½ miles of improved streets. They cost $4,904,289. They are not all paid for, either. The contractors got their pay all right, but the bloated bondholder will clip coupons for many a day yet. Hickory Alley is one of the liveliest streets in the city, but is not paved. It would be necessary to put down blocks a yard square, or they would be used for weapons in the numerous pitched battles that take place there. The loose dornick on that street gathers no moss.

Now, gentlemen, I hope you will not get an idea that any Columbus citizen would boast. What I have aimed to do was to give you a few facts to reflect upon. Some of you may decide to come to Columbus some time and go into the Hardware business. If you do, you will find genial, honorable and wide-awake competitors. I trust you will decide that it is the most suitable and convenient place to hold your annual convention in 1899. I can assure you a cordial welcome.

THE SESSION OF THURSDAY

began at 9:20 A.M. and opened with the question box. This was truly the interesting part of the entire meeting of the Association, and the general verdict was that it was instructive in the extreme.

The Committee on Resolutions presented the following:

Resolved, That any manufacturer or jobber furnishing goods or employing special salesmen to solicit orders from consumers or others not regularly engaged in the retail business, shall be reported by the member offended, to the secretary of this Association.

Resolved, second, That the secretary shall then correspond with the offending manufacturer or jobber, and in the event of a failure to satisfactorily adjust, report the same in his first quarterly report to each member.

Resolved, third, That the members of this Association pledge themselves to patronize such manufacturers and jobbers only as do not offend in the above particulars.

Resolved, fourth, That the above shall not be construed as prohibiting manufacturers and jobbers from soliciting and supplying large plants with material actually used in large quantities in the construction of their manufactured product.

Resolved, fifth, That the secretary is hereby directed to mail to each member of the Association and such other Hardware dealers and jobbers and manufacturers, as in his judgment is deemed advisable, a copy of these resolutions requesting their co-operation.

The foregoing resolutions were adopted unanimously.

The committee on the death of Mr. Gillum, of Chillicothe, reported the following resolutions, which were adopted:

"It becomes the sad duty of the members of the Ohio Hardware Association to solemnly recognize the overruling of a Divine Providence in the death of our Mr. H.V. Gillum, of Chillicothe, Ohio, a former member of this Association, who died at his home in Chillicothe, November 15, 1897.

"Mr. Gillum became a member of this Association February 24, 1897, and was an earnest and active member with us until his death. His life was in all respects an exemplary one; he was diligent in business, always active and earnest in his work for the advancement and the interest of his firm; he was gifted by nature with a rare business ability and social qualities.

"He moved among the people as one of them and became widely known in the community in which he lived. He was always ready to respond to the call of the needy and felt a keen interest in the welfare of his native town.

"His heart was open to the world; his friends were legion; enemies—he knew them not. It was our pleasure one year ago to listen to his wit and humor at our annual banquet given at this place. His heart was full of the fulness of his works and his tongue gave expression of the nobility of his life in his home and in public life.

"While his hands no longer labor, yet his works remain to honor his name and testify of him.

"This Association unites in extending their loving sympathy to the family in their distant home, and as further mark and token of their love and sympathy, it is ordered that a copy of these resolutions and condolence be sent to the family of the deceased, to the firm of which he was a member, be furnished to the press of his native city, and be inscribed on the record of this Assoeiation."

THE NEW OFFICERS.

The Committee on Nominations reported as follows:

For President: H. C. Wiseman, of Springfield.

Vice-President: E. L. Harris, Columbus.

Secretary and Treasurer: John F. Baker, Dayton.

Executive Committee: W. A. Remy, Mansfield; Frank Harrison, Toledo; O. M. Scott, Marysville; Geo. M. Gray, Coshocton; L. F. Stahler, Waverly; W. P. Scott, McConnellsville; C. C. Fouts, Middletown.

On motion, the report of the committee was adopted.

The time and place for next meeting resulted in the choice of Toledo, and the day, February 22, 1899.

After complimentary resolutions to the officers of the Association, to the Columbus Hardware Co., the hotel management, the Association adjourned.

The secretary suggests a special mention of the Bohemian Smoker given to the members by the Columbus Association. The affair was a most enjoyable one, about one hundred and sixty Hardware dealers being present. The evening was enlivened by a number of impromptu speeches from members of both of the Associations. A programme of music was also carried out, all the members assisting in the singing of the songs, and the zeal with which the older dealers entered into the spirit of the singing was a surprise to the younger element who were present. An orchestra assisted to entertain, being accompanied by a quartet of colored waiters. It was an evening not soon to be forgotten, and thus ended the most satisfactory annual meeting of the Hardware dealers ever held in the State. To say that they are now anxious to proceed against Toledo (next year) is but to express the situation very feebly.

The Ohio Hardware Association is now a fixed institution, and soon the dealers in the State will crowd their way to the front to enlist under its banner.

It is not the amount of money spent, but how it is spent, that makes the success in advertising.—*Exchange.*

Coburn Trolley Track Mfg. Co.

The Coburn Trolley Track Mfg. Co., Holyoke, Mass., have published for the season of 1898 three very handsome catalogues. One of these describes in full their various hangers, tracks, fire shutters and escapes, barn door stops, etc., etc. In another is found a full description of their Patented Carrying Track systems, and in another detailed information as to their Patented Rolling Ladder systems, covering the Victor, Sumner, Coburn, Comet and Standard.

These publications are all prepared in an artistic manner in colored covers, and an examination of the same will

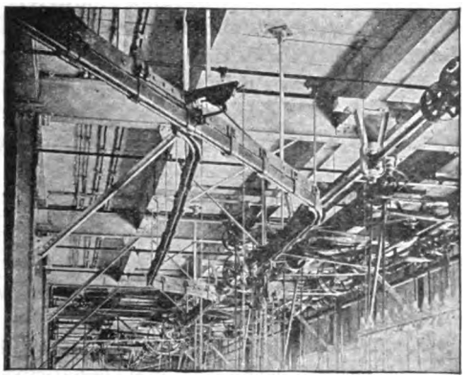

FIG. 1.

provide any dealer with a liberal education as to the various important lines of manufacture which they represent. As to their door hangers so fully described in the publication first named, they say that their stock is always full and complete, that dealers can obtain them at any time, and that since 1892 they have sold in the United States over 30,000 sets of the Coburn Door Hangers.

We are permitted in this connection to reproduce three illustrations of their patented carrying track system, and two of their patented rolling ladder system. In Fig. 1 is shown the Coburn Carrying Track System in operation in the machine shop of the Granger Foundry & Machine Co., Providence; used to place work on or off the machines. In Fig 2 is seen another part of the system, in the machine shop of the same factory. In Fig. 3 we show a system of the Coburn

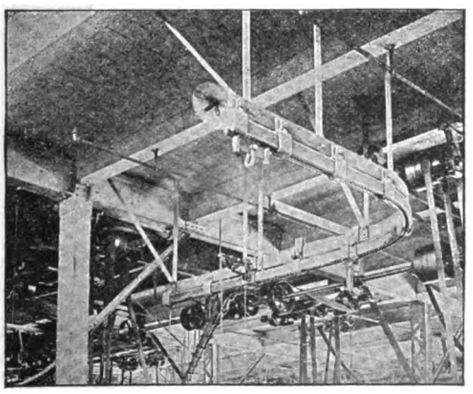

FIG. 2.

Carrying Track in operation in the die room of the Silver Spring Bleach & Die Works, Providence. These are but a few of the many effective illustrations of this system found in the catalogue, among which is seen one in operation in Holyoke, another in Springfield, others in New Bedford, Fall River, etc. A number of pages are given to diagrams showing various plans of this system, in various works, and any one who has in contemplation the addition of mechanical appliances of this character, should certainly examine this catalogue in full. The manufacturers state that parties who write for prices shold enclose a detailed sketch of their requirements, and state the maximum weight of loads which they wish to carry.

In Fig. 4 we show the Victor Ladders in the shoe store of Morse & Haynes, Springfield, Mass. These are made in various sizes and styles, prices of which will be furnished

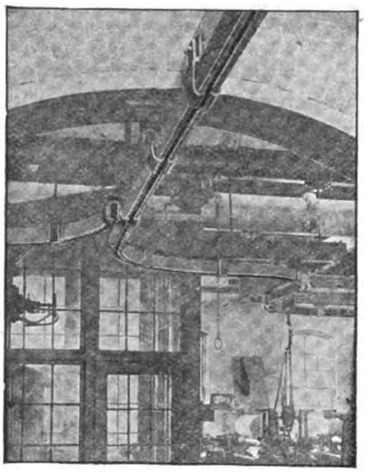

FIG. 3.

on request. A glance at the illustration shows the system in detail, and in Fig. 5 we see samples of the Sumner Ladders, with curves, in the shoe store of J. H. Fitzsimmons, at Holyoke, Mass. The work referred to above con-

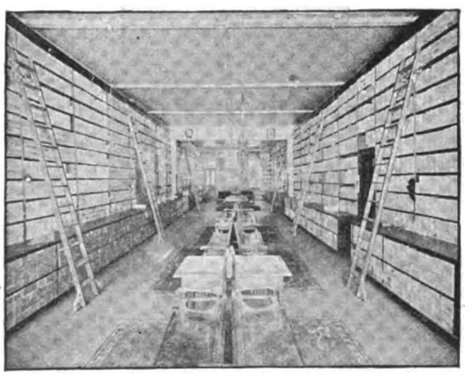

FIG. 4.

tains many other illustrations of systems of ladders, parts of the same by themselves, directions for use, testimonials, etc. The Coburn people have shown a great deal of enterprise in the preparation of these extensive illustra-

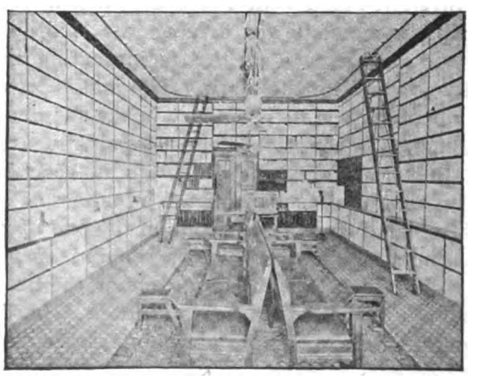

FIG. 5.

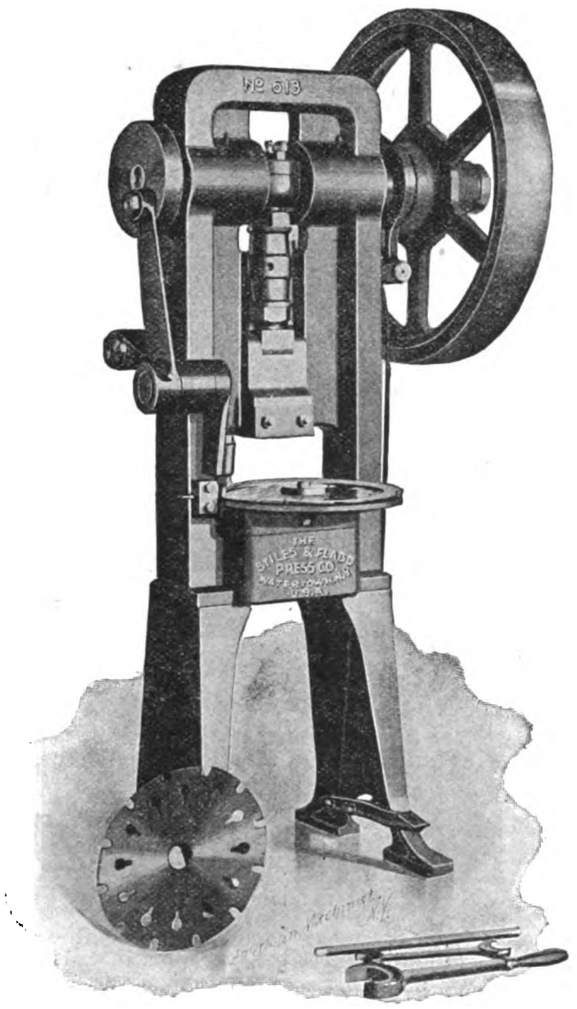
tions and descriptions of their product, but the investment certainly seems to have been one of wisdom. These catalogues will be sent on application to anyone interested.



The Berlin Iron Bridge Co., East Berlin, Conn., are building a new boiler house roof for the Coe Brass Mfg. Co., at Ansonia, Conn.

NEW GOODS AND SPECIALTIES.

A New Dial Feed Press.

We illustrate herewith a new Dial Feed Press, designed and built particularly for lettering and planishing keys. A

brief description will readily show the novelty and simplicity of its construction.

This Straight Sided Dial Press contains a very simple and novel movement for driving the dial, eliminating ratchet and pawl as well as the reciprocating movements generally adopted for the work. The dial is provided with as many openings on its periphery in the shape of teeth as there are stops in the dial. These openings are situated around the rim similar to the teeth in the regular gear wheel. The motion is transmitted by means of a walking beam suspended from a crank pin on the end of man shaft and fulcrumed on an arm which is secured to the frame; thus it will be seen that the lower end of the beam will inscribe an ellipse. To this arm is secured a hardened pin which enters the slots on the periphery of the dial and carries the dial with it until it reaches that point in its direction which would indicate the greatest horizontal travel. It is then removed from the slot by its upward travel when it returns and engages the next slot in the dial, this operation being repeated. The dial is locked in place by means of a spring pin pressing against the rim of the dial until the opening is drawn across its path, when it engages same at the instant the driving pin is withdrawn. The tapering point on the driving pin descends and removes the locking pin, and at the same time engages the disk; thus it will be noted that the disk is at all other times either engaged by the driving pin or the locking pin in every position. This prevents the possibility of throwing the dial ahead by momentum, when run at high speed.

These presses are built with solid bearings and provided with a patent stop motion of a peculiar character, which insures positive action in the direction that the press is designed to run, but cannot be thrown into action or engaged when the wheel or power may be reversed, thus avoiding an accident which often occurs on Dial Feed Presses.

These presses are built in all sizes for all classes of work by the E. S. Stiles Press Co., Watertown, N. Y., who will be pleased to furnish further data, photographs, etc.

Johnson's Portable Harness Shop.

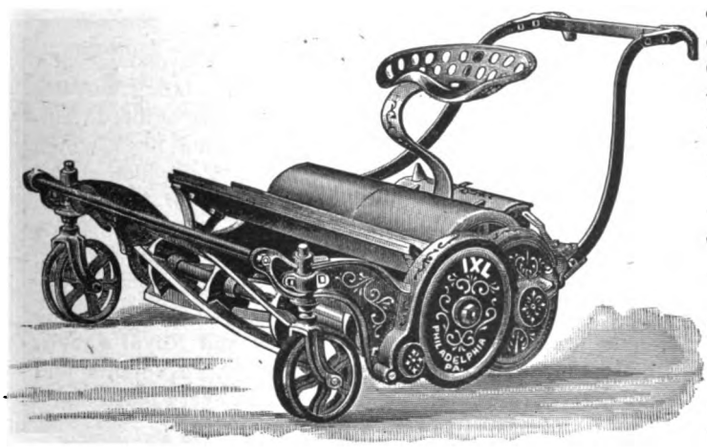
"I expect to be sat down upon." With this pertinent suggestion opens a very interesting description of the article shown in the accompanying illustration. This is Johnson's Portable Harness Shop, manufactured by Eugene L. Johnson, No. 314 East Third Street, Cincinnati, Ohio. It is intended to fill all the requirements of that trying period when the harness breaks, and it is necessary to save the time as well as expense that would be consumed in dropping everything and making way to the harness shop. The manufacturer explains that this is a handsomely finished chest, measuring 18x8x5 in size. The lid or seat is of solid oak, securely attached with wrought steel hinges. In one end of the lid a heavy iron socket is set in flush with the top, and by a clever arrangement the sewing clamp or vise may be put in a position in a moment, solid as a rock, and in proper position, too, for either a right or left-handed man, and for sewing harness or filing a saw, key, etc. The

clamp is made of iron, strong and serviceable, and neatly japanned. When you sit down on the "horse," as it might be called, the weight of your body gives it as much solidity as if you were astride of a great, awkward, four-legged affair such as a journeyman saddler uses, and you are ready for business. The outfit consists of a good knife, an adjustable sewing awl haft, a saddler's straight awl, a sad-

Digitized by Google

dler's bent awl, a wrench, a paper of harness needles, a ball of linen harness thread, a ball of shoemaker's wax; a box of bifurcated rivets, with a "set" for holding rivet while you drive it in, and a file. Mr Johnson adds in the circular before us the very pertinent suggestion that "even the man who is going to Klondike wants one." These articles are packed one-half dozen in a crate, and full description, with particulars, will be sent upon application.

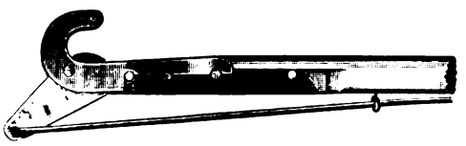
Doughty Bicycle Bell



J. Doughty & Co., No. 1025 Arch Street, Philadelphia, Pa., are placing upon the market the Doughty Perfection

Automatic Bicycle Bell. It is described as made of the best bell metal, is highly polished and nickel-plated, and is warranted rust-proof. It is further described as "always ready for instant use; no loose parts to rattle or get out of order; does not roll on the tire; only press the thumb lever on the handle-bar, which throws the little rubber tip in contact with the spokes, and the bell does the rest; is easily attached, and will positively ring when riding." These are put up in neat boxes ready for mailing. Full information as to prices, etc., can be obtained by writing to the manufacturers at the address above given.

A New Horse Mower.



In addition to their already large and complete line of genuine Philadelphia Lawn Mowers, the Philadelphia Lawn Mower Co., Nos. 3107-09 Chestnut Street, Philadelphia, Pa., have added a new horse mower, to be known as the I. X. L., illustrated in the accompanying cut. This machine combines all their latest improvements in every detail, and is superior in quality and workmanship, and is guaranteed to

give good satisfaction and be free from any defects in manufacture. The machine is made in four sizes, 25 inch, 30 inch, 35 inch and 40 inch wide, and is furnished complete with seat and shafts. A postal card sent to the above address will bring a detailed circular of the I. X. L. Horse Mower, as well as a complete catalogue of their full line of Genuine Philadelphia Hand and Horse Mowers, Grass Collectors, Fenders and Sprinklers.

New Standard Tree Pruner.

The Standard Tree Pruner shown in this connection is offered to the trade in an improved form by Seymour Smith & Son, Oakville, Conn. In the illustration the pole and iron are cut away so as to show the metallic brace plate, which consists of a strip of steel six inches in length, in-

serted in a slot in the centre of the pole, a recess being cut in the steel to fit the washer in the head. The steel and head are securely fastened by rivets passing through all to strengthen the pole at the point of the greatest strain, reinforcing the wood in such a manner as to prevent its breaking or splitting.

Drop Handles and Escutcheons.

There is so much old furniture being furbished up nowadays, that Hardware dealers find quite a demand for drop handles and escutcheons suited for these pieces of old mahogany. Most of the work of putting them into shape is done by small furniture shops, who depend upon the local Hardware dealers for supplying them with the necessary trimmings, and they will naturally go to the store which offers them the greatest variety of suitable goods, The American Ring Co., Waterbury, Conn., make a specialty of brass trimmings for furniture and interior cabinet work, and manufacture a large line specially adapted for use on furniture of this class. Their large and finely illustrated catalogue will be sent to any dealer mentioning *Hardware*. It contains designs of all sorts of brass goods, drop handles, escutcheons, hat and coat hooks, rings, pulls, hingeplate, shade pulls and towel racks. This company also manufacture a line of sleigh bells, brass trimmings for bedsteads, curtain pole rings and fixtures, including the well-known Leslie Traverse rings, which are so designed that small rollers reduce the friction between the ring and curtain pole. The furniture trimmings made by this company are all up-to-date in design, and are well adapted to the needs of the Hardware trade. Dealers will make no mistake in writing to the firm mentioned for prices and discounts to the trade.

George P. Williams, who for many years has been associated with the St. Louis Stamping Co., Beekman Street, New York City, in the capacity of manager of their sales department, has just been appointed manager of their Eastern business in place of Mr. Brown, who recently retired. G. P. Williams is brother of T. W. Williams, second vice-president and Eastern manager of the Bissell Carpet Sweeper Co., and has been favorably known among buyers of all house-furnishing departments for many years past. We prophesy for the St. Lonis Stamping Co. a liberal increase in their Eastern business in consequence of the change just effected.

Machines for making nails are of comparatively recent invention. Ezekiel Reed, of Bridgewater, Mass., invented a machine for cutting tacks and nails in 1786, which, being improved afterwards, made 150,000,000 tacks in 1815. His son invented a machine in 1807 for making and heading tacks at one operation that turned out 60,000 a day. Samuel Briggs, of Philadelphia, patented a machine for making nails, screws and gimlets, in 1791, the first patent issued in the United States for a nail-making machine. The first patent for a cutting and heading machine combined was granted to Isaac Garrettson, of Pennsylvania, in 1796.—*Exchange.*

Recent Trade Publications.

The Monarch Stove & Mfg. Co., Mansfield, Ohio, makers of the well-known Monarch Stoves and Furnaces, for gasoline, gas and oil, have issued a handsomely illustrated catalogue for 1898, containing nearly 100 pages, and gotten up in a most artistic manner in several colors, with illustrations upon every page. A very attractive design is found upon the front cover, while several illustrations of cooking in the various centuries fill the back cover, running from the sixteenth century, when the primitive dinner of the savage was prepared over the open fire in the forest, to the nineteenth century, when it is much more expeditiously prepared upon a Monarch Range. Full descriptions of each of their various articles are given, with prices attached, and it is a work that can be examined to the advantage of any Hardwareman, whether he is yet a dealer in stoves or not, as there is a special incentive to such dealer to handle their lighter lines of gas stoves, etc., whether he be interested in the selling of ranges or not. In a personal note to the dealer the company say: "Our Monarch line, as our trade-mark symbolizes, is emphatically the embodiment of progress. It enters its eighteenth year of public service, with the positive assurance that it has reached the high water mark of progressive development. We have made it our constant aim to incorporate into every pattern we make some original feature that will afford the pushing and live merchant an opportunity to build up a reputation for high class goods, and to reap a profitable trade from their sale. A most critical examination of every article we show will convince you, Mr. Stove Dealer, that 'the Monarch line is all right.' We will be glad to submit a line of samples for your inspection."

The Enterprise Mfg. Co., of Pa., Philadelphia, with New York office with J. C. McCarty & Co., No. 10 Warren street, have published a new descriptive catalogue of their patented Hardware specialties. Among these are found their fruit and sugar augurs, barrel jack, truck and stand; bolts, barn door; borers, bung hole; choppers, meat and food; cobblers' kitts; cutters, tobacco; cutter, slaw; extractor, meat juice; faucets, measuring and paint; gates, molasses; grater, horse radish; handles, sad iron; heaters, sad iron; holders, flag; hooks, meat; knife, cheese; mills, bone, shell and corn; mills, coffee, spice and drug; mowers, lawn; presses, fruit, drug, meat juice, lard, tincture; pressers, cork; pullers, cork; pump, self-priming and measuring; sad irons, Mrs. Potts' and Star; sad irons, family outfit of; seeders, raisin; shavers, smoked beef; shredders, ice; slicer, vegetable; sprinklers, lawn; stoners, cherry; stuffers, sausage; trap, mole. This catalogue is printed upon elegant book paper, in heavy red covers, and has been prepared with great care. It is hardly necessary to speak in detail of the well-known lines carried by this long-established house. Specific information is furnished upon each page as to size, prices, etc., of each article shown, with special directions as to use, etc. This is a publication that should be in the hands of every Hardware dealer, and will be sent upon application.

The Wells & Nellegar Co., jobbers of Hardware, cutlery, sporting goods, etc., Chicago, have issued a catalogue covering their general lines, with special reference to seasonable goods such as farm implements, refrigerators, bicycles, etc. According to this catalogue they handle everything known to the Hardware trade. This circular is sent to their friends as a reminder that they are in the market with full and complete lines of spring goods, concerning which they say: "Our goods are purchased at the very lowest figures for cash, so that we feel confident we are able to meet any competition that exists in the way of prices, supplying at the same time a much better quality of goods than is generally sent out. To our large and increasing list of customers we extend our hearty thanks for their liberal patronage during the past year, respectfully soliciting their valued orders for our entire line of goods for the coming season. Your correspondence is especially requested for quotations, Our mail order department is in such perfect working order that we feel safe in guaranteeing quicker shipments and lower prices on mail orders than our competitors are making at the present time."

The C. W. Hackett Hardware Co., St. Paul, Minn., are sending their friends their 1898 catalogue of bicycles and sundries, which is well printed and thoroughly illustrated, showing everything in the line of bicycle sundries that can be enumerated. They call particular attention to their Hackett line of wheels, and add the following in a prefatory note: "Our 'Supreme' is a new line with us this year, but one which we feel will please you in appearance and give the best of satisfaction in service. Our 'Special' and 'Roadster' are the same wheels which we have heretofore handled as 'Our Diamond,' being manufactured especially for us, and we guarantee they will give equally as good service as in the past. Our 'Great Western' is a line which the trade has for some time demanded, being up to date in style and finish, and low in price."

The White Mountain Freezer Co., Nashua, N. H., are presenting to the trade perhaps the most complete and attractive catalogue of ice cream freezers ever sent out. It is handsomely illustrated, and minutely describes the entire line of Freezers manufactured by this concern. A convenient cost and selling price arrangement is printed under the description of each machine, which enables the dealer to so prepare his catalogue as to have at all times full information regarding every detail of the style, workmanship and cost of White Mountain Freezers, for quick reference. A neat and easily comprehended telegraph code is included in contents. It is certainly a fine book, nicely and plainly printed on good paper, and should be on the desk of every dealer in ice cream freezers.

Walter W. Woodruff & Sons, Mt. Carmel, Conn., have complimented us with a handsome catalogue of Carriage Goods for 1898. This is bound in heavy boards and printed on book paper, which makes each illustration stand out with distinctness. Several pages of index are occupied in a mention of their many details of manufacture, comprising everything that can be used in connection with a vehicle, and each article is illustrated, with full information as to sizes and prices, Great care seems to have been taken in the preparation of a book which would show a dealer, whether in the carriage or Hardware line, just exactly what was needed to enable him to form his conclusions in an intelligent manner. This handsome work will be sent upon application.

The Lockwood-Taylor Hardware Co., Cleveland, Ohio, have issued a handsome catalogue for 1898 of their bicycles and sundries. It taxes fifty pages of closely printed matter, well illustrated, to show their extensive lines, which cover everything known to a wheelman, or of which he can dream in the most extensive enumeration of his wants. They announce that they have been appointed wholesale distributing agents for the Acme Mfg. Co., Reading, Pa., and as such have charge of the interests of the Stormer and Pennant bicycles for a large territory. Of the old line they will retain the Ripple, Lakeside and Royal wheels, which, they say, "in the matter of improvements and equipments are brought down to date in every particular." This catalogue will be sent upon application.

The Cleveland Stone Co., Cleveland, Ohio, are sending from their grindstone department as handsome and taking a line of advertising as it has been our pleasure to examine for some time. The circulars are printed in colors, and are "fetching," in every sense of the word, and every dealer into whose hands they fall will read every line, poetry and

Digitized by Google

all. Timely topics of the day are discussed with incisive wit, and the illustrations are modern and unique.

The Glacier Refrigerators.

The Northern Refrigerator Co., of Grand Rapids, Mich., are sending their friends a handsome illustrated catalogue and price list for the season of 1898, of their famous Seven Wall Glacier Cold, Dry Air Refrigerators. This is printed in colors, handsomely bound and finely illustrated, and bound in the body of the work are samples of charcoal sheathing used in these refrigerators, and also of their wool felt, both of which are for insualting purposes. Illustrations of their entire line are found through this work, showing not only the refrigerators themselves, but their metallic ice racks, shelves, air- tight locks, refrigerator hinges and traps. The manufacturers have made many improvements in these goods, among which may be mentioned a complete remodeling of the design. They are now much more ornamental than heretofore, the carvings being raised instead of sunken, and the proportions and mouldings entirely remodeled. The backs and bottoms are finished as nicely as the fronts and sides, as will be seen at a glance of Fig. 1, shown herewith. Great improvement has also been made in the metal work, especially in the all metal ice racks and the removable flues. The locks of these refrigerators are made entirely in their own factory, and, the manufacturers inform us, cannot be obtained

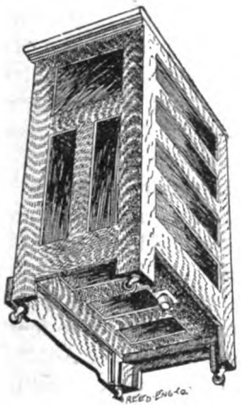

FIG. 1.

FIG. 2.

elsewhere. They are made of solid bronze, with a wedge-shaped latch, which draws the door into an air-tight joint. The door can be opened and closed with the foot if necessary. The manufacturers guarantee this "Glacier" to be as good a refrigerator as can be found in the market to-day.

In Fig. 2, herewith shown, we see their new style, No. 2551, made of solid ash, with antique finish. It has a porcelain-lined water-cooler and nickel-plated faucet, and solid bronze tumbler holder. The large ice chamber affords room for bottles, pitchers, etc.

In addition to the regular lines described, the catalogue also shows some special articles, among which may be mentioned their apartment house refrigerator, cold dry-air sideboard refrigerator, grocers' refrigerator, meat refrigerator, hardwood ice-chests, etc. In a note of introduction the manufacturers say: "We are pleased to call your attention to the elegant and greatly improved Refrigerators which we manufacture. We have had long experience in this business, and are owners of some of the most valuable patents in this line ever issued. As we have ample stock of dry hardwood lumber, the latest improved machinery, the best of dry kilns, and the most skilled workmen, we guarantee our goods to give perfect satisfaction, both as to price and quality. The capacity of our works is over two-hundred complete refrigerators per day. We have five large warehouses in which we carry a stock of over twenty thousand refrigerators at the beginning of each season. The largest dealers can place their orders with us with greater certainty of having them promptly filled than with any other manufacturer. We find there is a demand for refrigerators of artistic design, provided they are superlative in merit and of medium price. This demand we meet in our Glacier Refrigerators. Each size has a special design of great beauty. There is extraordinary merit in the seven walls for insulation, also in the Glacier air-tight locks, and the Barrett movable flues for cleaning, patented January 26th, 1892."

Missouri's Wonderful Deposit of Kaolin.

That enterprising publication at Chicago, that calls itself *Brick*, says: "Clay, which is one of the most useful portions of the earth's crust, is found nearly everywhere, but the pure form of it, having the highest refractory properties and burning a dead white color, is rare. When found, we call it kaolin, or china clay. Kaolin is found at Woodbridge, N. J., in South Carolina and other places, but still we import quantities of china clay from abroad, which does not seem quite right. The theoretical composition of clay has been stated, by authorities, to be 39.45 per cent. of alumina; 46.64 of silica, and 13.91 of water, or in round numbers, alumina, 40; silica, 46; water, 14; but this absolutely pure clay is so rarely found in nature, and in such small quantities, as to be reckoned a mineralogical curiosity. The nearest approach to it that we have ever met with on a large scale is at Warrenton, Mo. On the ranch owned by Frank Reifsnider, of Akron, O., there is an immense bed, about 80 acres in extent, of practically pure kaolin. Analysis shows that it contains alumina, 41.48; silica, 43.56, and water, 14 05 per cent., while the total impurities, consisting of sesquioxide of iron, 0.35; lime, 0.45; magnesia, 0.08, and alkalies, 0.02 per cent. amount only to one per cent., which is found to have no appreciable effect, as goods made from this kaolin burn a pure white, and fire bricks made from it exhibit the highest degree of refractoriness. There will probably be a large demand for this exceptional clay."

Goshen Sweeper Co.

The Goshen Sweeper Co., Grand Rapids, Mich., have announced a new price list under the date of March 1st, in which they call attention to a special reduction in prices. In this statement to their customers and the trade, they say: "With better facilities than we have ever had before for manufacturing, and yielding to a growing demand of the trade to secure high grade sweepers at more popular prices, we have decided upon this course, and trust our disposition to place at your command first quality sweepers, containing distinctive mechanism, at extremely moderate prices, will meet the generous response it deserves, and that we may hope for a share of your patronage." They speak further of styles and prices, which they say "will convince you that we are now offering unequalled inducements, and in these times, when customers are seeking to obtain the best possible value for the least money, it behooves the merchant to carefully discriminate in making his purchases, only stocking such merchandise as offers excellent value at a moderate price to the customer. This is precisely the position the Goshen sweeper holds on the market to-day. We shall offer this season a full line of Broom-Action sweepers, as well as our well-known and popular line of Cam-Action goods, we being the originators and sole manufacturers of Cam-Action, a patented feature embodying the simplest method yet devised for adjusting the brush to the various grades of carpets to be swept."

Smith & Bishel are about to open a Hardware store in Middletown, Conn. They are men of enterprise, and will certainly succeed in the live city which they have decided to make their permanent business home.

The Expense of Collecting Local Checks.

It is the custom of many merchants to remit to wholesalers and manufacturers their checks on local banks in payment for their purchases. Where the bills have been sold payable in par funds in the wholesaler's city, there is a wrong in this plan of remittance to the extent of the cost of collection and loss of time on the money. Just what the expense amounts to is explained in some detail in the following extract from an article in a recent number of the "Dry Goods Economist," written by F. R. Boocock, Secretary of the National Association of Credit Men:

The magnitude of this abuse has never been so forcibly brought to my attention as it has been recently through the special study which I have given to this subject in behalf of the Association. In reference to this custom I have received figures from eighty-five mercantile houses in every section of the country, from very small cities as well as large commercial centres, and from concerns having both small and large volumes of trade. The cost to each house for collecting out-of-town checks varies with the size of the business, so that the figures submitted range from $60 to $2,500 per annum. The average cost, however, yearly, to these eighty-five houses amounts to $558.

This loss is keenly felt, and some concerted action will certainly be taken in the near future to correct this abuse. Shall it be the addition of wholesale houses of a sufficient percentage to cover this loss? This is impracticable, by reason of the fact that the "righteous would suffer with the guilty," and the very injustice be shown to those who are deserving of better treatment that the measure would endeavor to abolish.

Shall wholesale houses refuse to accept remittances in payment of maturing obligations other than those which are at par value? This is nearer to the method being pursued to-day by many houses in connection with this custom. Of course these are the concerns that are independent and that pay close attention to strict business equity rather than the allowance of every petty irregularity in order to please and hold their trade. The retail merchants of this country are not sycophants and they appreciate and honor any house that maintains regularity as to business rules and exacts conformity with their established principles. There is confidence inspired by a firm that compels compliance with its terms, that causes the customer to know that he will receive in every instance the same treatment as any one else. This confidence in the integrity and reliability of a firm attracts and holds trade to a degree that subservient acquiescence in unjust allowances can never attain.

A Novel Mountain Railway.

The mountain railway constructed on a novel plan is shortly to be opened on the Hochstauffen, near Bad Reichenhall, Bavaria. The chief feature of the new system is that the force of traction is directed vertically upward, being derived from a balloon. The latter has a diameter of 66 feet and a lifting power of 10,560 pounds. The balloon, car, net, ropes, etc., weigh 4620 pounds, and an allowance of 3300 pounds is made for passengers and aeronauts, leaving a margin of 2640 pounds. A single rail is used for the sole purpose of directing the course of the train and keeping the balloon with its load captive. To this end the rail is made T-shaped, and the car runs on it, gripping it from the sides and from below. The rail is anchored to the ground at distances of about 15 feet. In descending the mountain the propelling force is gravity, and the balloon acts as a check to prevent accelerated motion.

A ballast of water, taken in at the top of the mountain, provides the additional downward force required. The truck carries the water receptacle, which can be opened by the aeronauts during the journey. The truck and receptacle together weigh about 600 pounds, and when there is no wind the receptacle carries about 1100 pounds of water, making a total weight of 1760 pounds. When it is windy the strain between the balloon and the truck is reduced by letting the water out of the receptacle, thus compensating for the difference in power. The difference in weight caused by passengers entering or leaving the car is regulated by the use of separate weights, a sufficient number of which will be kept at the several stations.—*The Manufacturer.*

Deepest Shafts in the World.

The question of the deep shafts of the world came up in a group of mining engineers recently, and some of those present maintained that the Geyser shaft in this State was, next to the Comstock, the deepest in the United States. Prof. B. Sadtler asserted that this was an error; that the Geyser shaft is the fourth in depth in this country, and that even the Comstock was exceeded by many shafts in other parts of the world. "I have secured some information on this subject," said he, "and keep it with me for handy reference.

"The deepest shaft in the world is that of the Red Jacket, Calumet and Hecla in the Lake Superior district, which has attained a depth of 4900 feet. The next is the Tamarack, in the same district, with 4500 feet. The Comstock comes next, with 3123 feet, and then the Geyser, in the Silver Cliff district, with 2400 feet. The fifth is the Grass Valley shaft in Idaho, with 2182 feet; the sixth the Kennedy, in Jackson, Cal., with 2150 feet; the seventh, the California of this State, with 2100 feet, and the eighth is a disused shaft of the Philadelphia & Reading Coal Company at Pottsville, Pa., with a depth of 2000 feet.

"There are many deep shafts in other countries. In Belgium there are five which have attained a depth of more than 3000 feet—the Produits' colliery at Mons, 3937 feet; the Viviers shaft at Gilly, 3750 feet; the Viernoy shaft at Anderlues, 3200 feet; the Marchienne colliery, 3117 feet; and the St. Andre shaft of the Poirer colliery, 3100 feet.

"Austria-Hungary has three deep shafts—the Adalbert, 3672 feet: the Maria, 3281 feet, and the Anna, 3100 feet, all in the Przibram mining district of Bohemia.

"Great Britain also has three: The Pendleton, at Manchester, with workings 3474 feet below the surface; the Ashton Moss, at Manchester, workings 3360 feet, and the Astley Pit, Dukinfield, workings 3150 feet.

"In Victoria, Australia, there are the Lansell's Bendigo, 3302 feet, and the Lazarus Bendigo, 3024 feet.

"These deep workings show that in Colorado we have not commenced to explore the rich territory awaiting development."—*Denver Republican.*

Gas Stoves in Germany.

According to Consul Monaghan of Chemnitz, Germany, makers of gas stoves who desire to extend sales may advantageously cultivate the German market. He writes to the Department of State:

"In 1895 Germany used 733,000,000 cubic metres of gas, to produce which she burned 55,000,000 centners of coal. The number of lights was 5,734,762 (she has besides, 95,000 sixteen-candle-power electric lights furnished by 180 electric plants). She has 15,644 gas motors, giving 52,000 horse power. She uses gas for light and fuel—that is, for heating and cooking purposes. It seems to me that much might be done to put American gas stoves on the German market, as all I have seen are much dearer than equally good, if not better, ones in the United States. The Berlin city gas plant produced 103,913,000 cubic metres in 1895, against 74,337,000 cubic metres in 1885, and an English company in Berlin, 32,282,000 cubic metres in 1895, against 30,960,000 cubic metres in 1885."

Review of the Markets.

Hardware: The month of March begins by encouraging enquiries regarding the future of prices, with orders among the wholesale trade increasing in number, and also in volume of goods. The magnificent weather, so perfectly springlike, which has been vouchsafed us, has doubtless done its share toward getting the roads in the interior in passable condition, and bringing the farmer buyers to their markets in the country towns. While no great changes in quotations are especially noticeable, the evident belief that prices are very favorable as compared with the lowest quotations previously given, will do a great deal to make trade open early, and retailers, jobbers, and manufacturers all experience a corresponding benefit.

Wire Nails: As the season advances, a sustained enquiry is noticeable, having reference to this staple line. The stocks purchased under the more favorable conditions of the past four weeks are gradually being disposed of, and while the sales for March so far, at the advanced quotation previously agreed upon, have not been as large as desired, it would indicate there were local stocks in the jobbers' hands fairly large enough to draw upon, while the current quotations are sustained. We quote: carload lots, f. o. b. mill, $1.55 at either Cleveland or Pittsburg, with a reduction of 5 cents a keg for above quantity to jobbers. New York quotations for carload lots are $1.65@$1.70 on dock, smaller lots from store being held at 5@10 cents a keg advance.

There is some doubt expressed by the leading houses in the trade as to the probability of the wire and nail interests becoming consolidated as was originally contemplated. The scheme is so vast in its proportions and so far reaching in its effects that some fresh obstacle to its successful accomplishment is constantly arising. As the possibility of some such arrangement has not had any radical effect in materially advancing prices, the trade can await results as to its certain consummation with perfect equanimity.

Cut Nails: There is but little of interest to report in the cut nail market. The apathetic conditions prevailing for several weeks still continues, business being very moderate and quotations ruling low. New York quotations are $1.20 for carload lots on dock, and $1.30 for smaller lots from store.

Builders' Hardware: There are some signs of an early improvement in this important line. Prices continue very low, and with the prospect of an unusually brisk demand as soon as the spring trade opens, it is anticipated that jobbers will order early stocks and urge prompt delivery, in order to be prepared to fill the requisitions from the smaller trade, as local stocks were never in a lighter condition.

Files: A large and constantly increasing business is being reported by the leading manufacturers of these important goods. Stocks throughout the country in the hands of retailers are reported in excellent condition for replenishing, and the jobbers, availing themselves of the favorable condition of the trade since the change in the list prices on July 1, 1897, are stocking up with confidence, as to the requirements of the spring trade, the general demand being excellent wherever heard from.

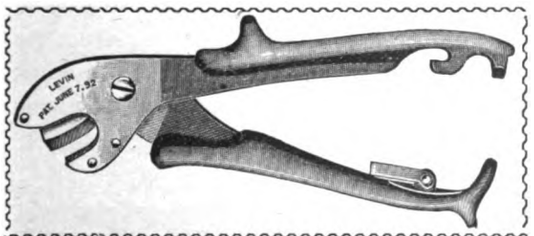
Linseed Oil: The Dean Linseed Oil Co., No. 181 Front Street, New York, quote as follows: In lots of less than 5 barrels, 44 cents per gallon; in lots of 5 barrels or more, 43 cents per gallon. The 5-barrel price only applies to deliveries of that quantity at one time. Boiled linseed oil, 2 cents per gallon higher than raw. Calcutta oil, 54 cents per gallon. Above prices are subject to change without notice.

THE OMAHA TRADE.

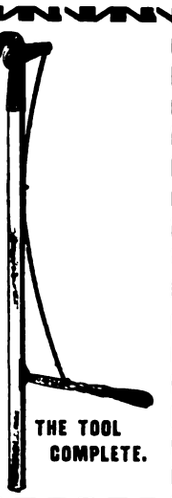
February business closed up with a handsome increase over the corresponding period of a year ago, and March promises even more satisfactory results. Orders are coming in, both through salesmen and by mail, better assorted and covering more lines than has been the case for several years past. The country generally is in position to buy goods and pay for them, and the merchants, therefore, are anticipating their wants to a better extent and carrying goods in stock to supply the demands of their trade, and, consequently, the situation is all that can be desired.

On account of the excessive competition, season goods are being held at an extremely small margin of profit, but most of us have grown accustomed to being satisfied with a small profit and do not expect the returns that we would have looked for several years ago.

RECTOR & WILHELMY CO.



THE DAVENPORT TRADE.



Winter still lingers in the lap of spring. There is ice in the river and snow in the fields. It is too late for winter goods and too early for articles that are used in spring. February sales are about an average for this short and unusually dull month. Traveling salesmen too frequently get promises for next trip instead of orders now. Mail orders are numerous, but call for small quantities, indicating light stocks in the hands of dealers. The hand-to-mouth policy prevails, which promises to continue until something happens to change conditions that have so long tended towards reduction in values. Over-production prevails. The whole country seems to have too much of everything except profits.

business of this great country. As has been well said, England will carry on two or three wars in various parts of the world at the same time, and yet affairs move on smoothly at home, while we are unduly excited at the mere mention of war with such a third-rate power as Spain. Our national honor and the suffering Cubans should be protected, and we have no doubt will be safe in the hands of President McKinley should it become necessary to declare war, but if war does come, the business of this great land will not stop, nor even be retarded very long. The great interior will buy and sell and prosper. The coast cities will be more or less inconvenienced for a time, but it cannot last long; in fact we hardly believe Spain would dare to actually begin a war that could have but one ending, that is humiliation and loss to herself.

March is opening up with good promise of increased business. Bad roads in the country districts are the drawback just now. It is amazing how much discomfort and loss the farmers will suffer every year rather than pay out the money to properly improve the roads.

Pittsburg's supremacy as a steel producer is again announced in Mr. Carnegie's claim to lay down ship building material in New York twenty-five per cent. below the price at which English mills can deliver it on the Clyde. We are certainly attaining a very strong position in the manufacturing world.

LOGAN-GREGG HARDWARE CO.

THE CLEVELAND TRADE.

The murmur of discontent among the laboring class begins to appear among the middle class of traders also. Combinations of wealth it is said intend to crush traders of modest means. The spirit of altruism that Mr. Drummond insists is an integral part of the strife for existence, seems to have little influence.

The large jobber who once made his prices based on legitimate profit, now makes and changes them with a view to destroying his smaller competitor.

Under these conditions respect for the wealthy is beginning to turn to hate, and socialism feeds on the faults and cruelty of competition, which has been supposed to be the life of trade. Added to this the publications in the daily press, describing the extravagant expenditure of the rich, help to increase this dislike, and suggests a union of the middle and poorer classes to protect themselves. Less parade of the wealthy of their luxury would be patriotic, for arrogant selfishness breeds an epidemic, but the optimist may hope that these disagreeable manifestations will decrease with time; that the second generation will wear their honors with more becoming grace, and find more satisfaction in use, and less in spectacular extravagance. Sudden wealth is a severe test for individuals or nations.

The improvement in business so far in 1898 has been mostly in manufacturing interests. This is well, as it affects the laborer, who mostly needed help. When they recover from the debts that had accumulated, they will become an important factor in helping other lines of business, and an era of debt paying will be a benefit to the country.

Notwithstanding the talk of good times, average prices have declined since January 1st, and the prudent merchant will look carefully to his expense account if he contemplates comfort from his '99 balance sheet. Consolation may be found in the fact that good times are sure to get here, and that increase in business may soften the grasping tendency and give the middle class an opportunity to make a living again. Unless something definite is settled this month regarding prices, the year is likely to be unsatisfactory to jobbers and retailers, as each month will reduce the value of their stock. The optimism shown by your correspondents for the past six months has been mostly inspired by hope, and unless its fruition appears soon it will not be maintained.

It is not amiss to give some heed to complaints even if they are made by the pessimistic spirit. The middle class is the hope of all countries, and if it is true that combinations of wealth, having exhausted the poor, are now preparing to wipe out the middle class, legislatures must recognize that the right to life is superior even to the right of property, and as an ounce of preventive is worth a pound of cure, it may be wise to listen in time.

Trade for February is somewhat better than it was last year, but last year is a very poor measure of prosperity.

THE LOCKWOOD-TAYLOR HARDWARE CO.

THE CHICAGO TRADE.

If our present trade is any indication of what we may reasonably expect when we have spring weather and the retailers become reasonably busy, all we can say is that we will probably have to put on an extra force of employees to work nights as well as day time. We are quite well equipped to take care of all the business that is offering and likely to come to us; at the same time would state our increase of business this month in comparison with February of the last half dozen years is very large indeed, and one very good thing about it all is the fact that our orders are not very large in one particular locality, but are made up mostly in small quantities from customers in all sections of the Great Northwest.

It is quite plain to our eyes that the reason why retailers are ordering in small quantities and placing the phrase "Rush this order through" on their communications, is because their stocks of goods are quite low, and they are only ordering from hand-to-mouth during the winter months and are awaiting the opening up of the ground and the spring demand from consumers before branching out and making their orders larger. When this time arrives we feel that orders will double and triple in size. Prospects were never better throughout the Northwest. During the

past two weeks on this market we have experienced quite a rise in the value of wheat, oats and corn, and we are informed that the export business in oats has not been so large in a long while as it is at the present time. With present prices for oats and corn, farmers are rapidly bettering their condition and will be able during the coming spring and summer to make their many needed improvements. Prices are being well maintained in this locality, and we are pleased to state that we have no word of complaint to make with our own situation. We have now three stocks of goods on our floors going out this week.

WELLS & NELLEGAR CO.

THE BOSTON TRADE.

Those who looked forward to a grand boom in the Hardware business during the early months of the year, have not had their hopes fully realized, yet it can be thoroughly said of New England trade that the volume is satisfactory as compared with previous years of general depression.

We are pleased to learn that our Western friends are placing such large orders in anticipation of renewed activity, and certainly hope that between "dollar wheat" and "Klondike gold" they may receive their full share of the profits.

Prices are fairly firm, and there seems to be an absence of the periodical desire to cut in seasonable goods.

The advance in wire nails and barbed wire was a surprise in some quarters, as a recent report indicated that a consummation of the trust might be a failure. There are a large number of orders being placed for these goods, and business in that line during the present month will be very large.

The deep snows in northern New England have been a detriment to lumber and other interests, and in some localities it is almost impossible to stir on account of the condition of the roads.

Seasonable goods are being called for and with a good outlook for the bicycle trade. The retail dealers seem to be looking to their jobbers who carry a stock of these goods and draw upon them as wanted.

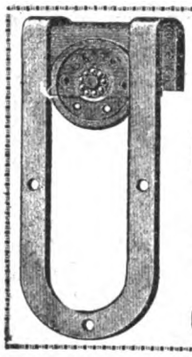
FRYE, PHIPPS & CO.

THE COLUMBUS TRADE.

The weather has been of the uncertain kind during the past ten days, and the country roads are in a bad condition. Some of them have a good bottom when you get down to it, but it is several feet below the surface, while in other places the bottom has dropped out. I remember seeing a suggestive warning in a mudhole during my wanderings in quest of trade. Some one stuck a stake in a bad place in the road, and by the stake was an old horse collar and the bleached skull of a horse. I took it for granted that everything had disappeared in the mud but the horse's head, and the collar naturally would slip off his head as he went down. I steered clear of that hole. That reminds me of the story of two men meeting in a muddy road. One was on a horse and the horse was stuck; the other man apparently was on foot. So the man on the horse said, "My friend, you will never get out of that mud without help," and was greatly surprised when the man informed that he was all right, as there was a mule under him.

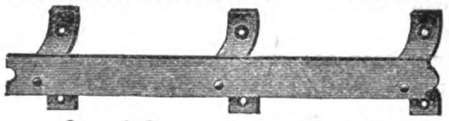
Spring will soon be here, and it will not be long before the roads are good, and then we expect to receive duplicate orders thick and fast. Merchants generally stock up pretty liberally soon after the first of the year, and then there is a little lull until the weather settles and they move some of their early purchases.

Trade is very much better so far this year than a year ago, and we believe it will be so through the year. Prices are none too firm on many goods, and manufacturers are watching their trade with jealous eyes and seem ready to meet any legitimate price. It can be truthfully said that misrepresentations are numerous. You hear of prices that look unreasonable, and if you chase them down they are about as reliable as the war news you read in the daily papers. There are lots of men in business who would not dare use a George Washington hatchet for an emblem.



The State Hardware Convention was a success from every standpoint. The attendance was good, and we are told that the business sessions were profitable to the members. Many good and instructive papers were read on different topics pertaining to Hardware, and how to make the business pleasant and profitable. We know of only one mistake they made, and that is that they are not going to meet in Columbus next year. Our friend Harrison, of Toledo, enthused the members by his brilliant oratory to such an extent that they forgot about Toledo being a way-station, until it was too late. If the vote had been taken about midnight last Thursday during the Bohemian Smoker, Toledo would not have received a vote. Did we have a Bohemian Smoker? Well, yes; I think we did, and if our neighbor city of Toledo beats it, it will be because Columbus gave the Toledo gentlemen pointers how to do it. That Smoker was a happy winding up of the State Hardware Convention of 1898. Everybody was delighted with it, and that special brew developed musical talent that was not known to exist before. Any one can sing under favorable conditions, and we think the conditions were never more favorable than they were that night. We did not have frogs, but there are more hops in a bottle of special brew than in a Toledo frog. SMITH BROS. HARDWARE CO.

THE PHILADELPHIA TRADE.



March has opened with unpropitious weather, but trade is moving along in even volume, although the sale of seasonable goods is probably somewhat delayed by reason of the low temperature.

Pat. Jan. 11, '98. 1025 Arch St., Philadelphia, Pa.

One of the Best Mediums Known.

C. T. Williamson Wire Nove'ty Co., Newark, N. J. [*Corkscrews*]: To present new goods to the trade we consider HARDWARE one of the best mediums known.

The feeling of buoyancy, however, continues strong, and all indications point to a fair and, perhaps, increasing trade for the balance of the year.

The war scare so far has very little perceptible effect on the Hardware business, although it naturally means increased call for tools and many articles of Hardware, but an increased activity in this line is likely to be offset by the general damage done to business by war. How great this damage might be is reflected to some extent in the movements of the stock markets, where, according to the daily papers, one hundred million dollars of values were wiped out in New York on the 7th.

It is earnestly to be hoped that war can be avoided, and the calm, persistent and firm attitude of President McKinley can hardly be too highly commended. The American people trust him and believe he will do the right thing at the right time, and that we can safely leave the honor of the country in his hands. It is very noticeable that those who talk the loudest about war are not as a rule the veterans of '61, as those who have seen the war and its effects are now among those who are most strongly inclined towards peace.

The wire nail combine appears to have taken shape, and the expected advance on wire and nails went into effect on the 1st.

Other prices are without important changes, although any decided improvement in the demand would probably send them upward.

Credits and collections are, apparently, in better shape than for some time. This is a most healthy sign, and one on which the country is to be congratulated.

BIDDLE HARDWARE CO.

She Changed the Conversation.

During the summer of 1886 a handsome New England lady paid a visit to one of the North Side society queens of Wichita. In due time a swell lawn party was given by the hostess at her home to make her visitor acquainted with her Western friends. Among those invited was the genial and witty Will Beatty. He was in from his trip off the road and, donning his best attire, was soon at the party. He was presented to the visiting lady and it happened to be his good fortune a little later in the evening to have her on his arm promenading over the velvety lawn. In the course of conversation Miss Blank asked Mr. Beatty what business he followed.

"I'm a commercial traveler."

The lady, possibly in a moment of mental aberration, made this remark: "In the East commercial travelers do not go in the best society."

Before the last word had hardly left her lips Mr. Beatty replied: "They don't here either."

Conversation was carried on after that in entirely different channels.—*Wichita Eagle.*

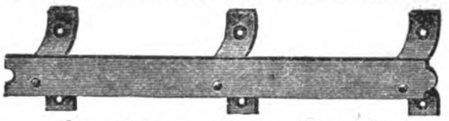
We know of only one mistake they made, and that is that they are not going to meet in Columbus next year. Our friend Harrison, of Toledo, enthused the members by his brilliant oratory to such an extent that they forgot about Toledo being a way-station, until it was too late. If the vote had been taken about midnight last Thursday during the Bohemian Smoker, Toledo would not have received a vote. Did we have a Bohemian Smoker? Well, yes; I think we did, and if our neighbor city of Toledo beats it, it will be because Columbus gave the Toledo gentlemen pointers how to do it. That Smoker was a happy winding up of the State Hardware Convention of 1898. Everybody was delighted with it, and that special brew developed musical talent that was not known to exist before. Any one can sing under favorable conditions, and we think the conditions were never more favorable than they were that night. We did not have frogs, but there are more hops in a bottle of special brew than in a Toledo frog. SMITH BROS. HARDWARE CO.

THE PHILADELPHIA TRADE.



March has opened with unpropitious weather, but trade is moving along in even volume, although the sale of seasonable goods is probably somewhat delayed by reason of the low temperature.

Reasons Why it is the Best.

The DOUGHTY Perfection Automatic Bicycle BELL.

Made of best Bell Metal, highly polished and nickel-plated, Anti-rusting The only Automatic Bell always ready for instant use (fast or slow speed.) No loose parts to rattle and get out of order. Does not roll on tire—only press thumb lever on handle bar—throws little rubber tip in contact with spokes—Bell does the rest. The only Bell with a clear electric ring without a battery. You will pronounce it the Perfection in Bell ringing. **Price $1.00 each.**

MANUFACTURED BY J. DOUGHTY & CO.,

Pat. Jan. 11, '98. 1025 Arch St., Philadelphia, Pa.

One of the Best Mediums Known.

C. T. Williamson Wire Novelty Co., Newark, N. J. [*Corkscrews*]: To present new goods to the trade we consider Hardware one of the best mediums known.

The feeling of buoyancy, however, continues strong, and all indications point to a fair and, perhaps, increasing trade for the balance of the year.

The war scare so far has very little perceptible effect on the Hardware business, although it naturally means increased call for tools and many articles of Hardware, but an increased activity in this line is likely to be offset by the general damage done to business by war. How great this damage might be is reflected to some extent in the movements of the stock markets, where, according to the daily papers, one hundred million dollars of values were wiped out in New York on the 7th.

It is earnestly to be hoped that war can be avoided, and the calm, persistent and firm attitude of President McKinley can hardly be too highly commended. The American people trust him and believe he will do the right thing at the right time, and that we can safely leave the honor of the country in his hands. It is very noticeable that those who talk the loudest about war are not as a rule the veterans of '61, as those who have seen the war and its effects are now among those who are most strongly inclined towards peace.

The wire nail combine appears to have taken shape, and the expected advance on wire and nails went into effect on the 1st.

Other prices are without important changes, although any decided improvement in the demand would probably send them upward.

Credits and collections are, apparently, in better shape than for some time. This is a most healthy sign, and one on which the country is to be congratulated.

Biddle Hardware Co.

She Changed the Conversation.

During the summer of 1886 a handsome New England lady paid a visit to one of the North Side society queens of Wichita. In due time a swell lawn party was given by the hostess at her home to make her visitor acquainted with her Western friends. Among those invited was the genial and witty Will Beatty. He was in from his trip off the road and, donning his best attire, was soon at the party. He was presented to the visiting lady and it happened to be his good fortune a little later in the evening to have her on his arm promenading over the velvety lawn. In the course of conversation Miss Blank asked Mr. Beatty what business he followed.

"I'm a commercial traveler."

The lady, possibly in a moment of mental aberration, made this remark: "In the East commercial travelers do not go in the best society."

Before the last word had hardly left her lips Mr. Beatty replied: "They don't here either."

Conversation was carried on after that in entirely different channels.—*Wichita Eagle.*

STANLEY'S PATENT Roofing Bracket.

STANLEY
Rule & Level Co.
New Britain, Conn.

SOLD BY ALL HARDWARE DEALERS.

The parts are of Spring Steel, firmly riveted together. Push the beveled ends up under two layers of shingles, already nailed down; the Bracket has two separate bearings on the roof, and is so formed that any increase of pressure from above, increases its stability.

One dozen per minute can be placed in position, or removed; and great economy in lumber and nails will be found. There are no loose parts to get lost; and no nail-holes are made in the roof. In constant use these Brackets will last a life-time.

No. 1. Roofing Brackets, 8 inch, ½ dozen in box. Per Doz., $3.00

Blacking Bright Steel Work.

The following direction for oxidizing and blacking the bright work of steel in lieu of paint, to stand heat and wear well, is taken from a recent issue of the *English Mechanic:* "Take three ounces of glacial acetic acid, mix it with its weight of water; to this add half an ounce of powdered nut gall, and let stand for a day or two, shaking it up occasionally; then let it settle; then pour off the clear, then put a pint of water to the residue. When cold and settled pour off the clear and mix with the first. Now to this add a grain of nitrate of silver or sulphate of copper, or nitrate of copper. Dissolve whichever you use in a little hot water before mixing with the other liquid. Silver is the best process. Clean all oil off, and rust or scabs, paint, etc."—*Industrial World.*

Prepared.

"I have ordered everything," he said, sinking wearily on the sofa.

"Did you see about the stoves?" his wife asked.

"Yes, I bought fourteen of them—a coal stove and a gas stove for each room."

"And the coal?"

"Yes; forty tons and eight cords of wood. They will all be delivered at our new place tomorrow."

And next day they moved into their Harlem steam-heated flat.—*Evening Journal.*

The Bristol & Plainville Tramway Co. are erecting near Plainville, Conn., a new substantial steel bridge, having a span of about ninety feet. The bridge has been designed with a view of being a permanent structure, well able to take care of the increasing and heavy traffic of the road. It has been furnished, and is now being erected by the Berlin Iron Bridge Co., East Berlin, Conn.

You do not add anything to the goodness of your own name by trying to give disrepute to the "other fellow."

Sterling, Ill.—Dillon-Griswold Wire Co., certified to an increase in capital stock from $150,000 to $300,000.

Waltham, Mass.— The Waltham Screw Co., plant will be enlarged.

Miscellaneous.

Cincinnati, Ohio.—The annual meeting of the Davis & Egan Machine Tool Co. has been held. The old board of directors was re-elected as follows: Charles Davis, Robert Laidlaw, Thomas P. Egan, W. H. Burtner and B. B. Quillan. The board organized by putting in the same officers, including Charles Davis, president; W. H. Burtner, vice-president and treasurer, and B. B. Quillan, secretary and general manager. The report of the business was a most encouraging one. It showed that there were 800 men employed, and that the concern was sold ahead to June. An inspection trip was made around the factory, and the entire board, with some of the leading stockholders, went over to look at the site of the new and additional plant in Covington. This will be put in shape as rapidly as possible, when 1100 men will be employed in all by the company. A regular quarterly dividend of twelve per cent. was declared.

Detroit, Mich.—Last year's business was the largest in the history of the Detroit Stove Co. William Tefft Barbour has been elected president; W. G. Henry, vice-president; G. Bert Gunderson, secretary-treasurer; Lafayette Crowley, superintendent, and the above with E. T. Barbour and M. B. Mills the board of directors.

Everett, Wash.—The Everett Wire Nail & Steel Co. has resumed operations. It has a quantity of wire on hand and large shipments are on the way from the East. The company employs about seventy-five men. It has a keg factory in connection.

Harrisburg, Pa.—The McCormick Harvesting Machine Co. is making arrangements for the erection of a large building on Market Street, near the Philadelphia & Reading freight depot. The building will be 125 feet long by sixty-two feet wide and four stories high. It will be used for the storing of agricultural implements.

Marion, Ohio.—The Marion Tool Co. has sold out to the Delaware Fence Co., and the two concerns will be merged into one, with the plant at Marion.

Portland, Ore.—A recently patented plow has been received by the Pierce Farming Co. at the company's Umatilla reservation farm. The machine is what is known as a disc plow, and tears into the soil with a sharp revolving disc. It will penetrate to any desired depth up to twelve inches, and is said to draw easier and do much better and quicker work than the ordinary plow. It is a recent Californian invention. The plows are manufactured in different sizes, the Pierce plow being of the largest class manufactured, requiring eight horses. It cost $175.

Quincy, Mich.—The Livingston Mfg. Co. have commenced the manufacture of their patent stovepipe holders.

Raynham, Mass.—The business prospect here is bright. The Diamond Tack Co. and the Raynham Tack Co. are busy with orders.

Reading, Pa.—At the annual meeting of the stockholders of the Reading Stove Works, Orr, Painter & Co., held at the offices of the company, on Canal Street below Chestnut, the following board of directors was elected for the ensuing year: Elijah Bull, Enoch T. Painter, William H. Schick, Charles S. Prizer, Robert P. Schick, Jesse Posey and Grant Nagle. The board organized by the election of the following officers: President, Charles S. Prizer; treasurer, Elijah Bull; secretary, Robert P. Schick.

Recent Fires.

Bristol, Conn.—The hardening shop of the Bristol Saw Co. was destroyed by fire a short time ago, entailing a loss of about $1500; insured for $1000. The fire was caused by a pan of oil which was being heated over a furnace.

BICYCLE TRADE RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Companies, Agencies, Etc.

Bridgeport, Conn.—The Bridgeport Novelty Co. has been organized with a capital stock of $1000. The concern will deal in novelties and bicycle supplies.

Chicago, Ill. — Co-operative Bicycle & Watch Co. has been incorporated by W. R. Burch, Robert McQuaid and A. J. Harvey; to manufacture bicycles and watches. Capital stock, $2600.

Chicago, Ill.—Gasoline Motor Cycle Co. has been incorporated by Thomas F. Sheridan, Thomas B. McGregor and Thomas A. Banning; to manufacture engines, etc. Capital stock, $2500.

New York, N. Y.—The Equitable Cycle Co. Capital stock, $5000. Directors: Eugene H. Levy, Jr., P. H. Earle and Deronda Levy, New York City.

New York, N. Y.—The Nonpareil Cycle Co. Capital stock, $5000. Directors: William Frahm, E. L. Marks and Joseph J. Moen, New York City.

Rock Hill, S. C.—Poag & White have opened their bicycle emporium. They will rent and sell and repair wheels of all kinds, but they make a specialty of the Rambler.

Changes and Removals.

Beaumont, Tex.—Joseph Simmons has withdrawn from the firm of E L. Wilson Hardware Co., and has opened up store for himself, under the style of Simmons Hardware & Mill Supply Co., handling Hardware, sporting goods, bicycle sundries, etc.

Chicago, Ill.—The America Cycle Mfg. Co., entire assets have been purchased by the David Bradley Mfg. Co. They will continue to manufacture American and Hussar bicycles.

Chicago, Ill.—The Firestone Victor Rubber Co., certified to change of name to the Firestone Rubber Tire Co.

Chicago, Ill.—The Standard Cycle Works, entire plant has been purchased by the Fanning Cycle Co., Nos. 194 to 200 South Clinton Street. The additional machinery thus secured increases the company's capacity to 125 wheels per day.

Cortland, N. Y.—Cortland Wrench Co., manufacturers, reported to have dissolved partnership.

Delanco, N. J.—F. H. Smith & Son have sold their bicycle business to H. J. Wells.

Griffin, Ga.—H. C. Burr's Sons will erect a bicycle repair shop.

Knoxville, Tenn.—Biddle Mfg. Co., bicycles, succeeded by the Biddle Cycle Co.

Kokomo, Ind.—J. A. Hutchings, bicycles, sporting goods, etc., is enlarging his storeroom.

Meriden, Conn.—A. D. Meeks has taken the store on Church Street adjoining the one now occupied by him to make additional room for his bicycle business. His old store will be devoted to the repair department and the new store to show goods.

Montreal, Can.—A. H. Campbell & Co., bicycles, etc., about dissolving

Morristown, N. J.—A. S. Pierson & Co. have closed out their bicycle business formerly carried on on Washington Street.

Muncie, Ind.—The Muncie Wheel Co. will erect a three-story addition to their factory.

Murfreesboro, Tenn.—J. J. Edwards, bicycles, succeeded by Brooks & Edwards.

Newport News, Va.—The Newport News Cycle Co., Mr. Kipper, manager, have enlarged their store.

New York, N. Y.—The New York Bicycle Tire Repair Shop of Morgan & Wright, Chicago, has been transferred from No. 107 Chambers Street to No. 125 White Street.

Poughkeepsie, N. Y.—Bauer & Winans, bicycles, succeeded by Henry Bauer.

Seymour, Ind.—Times Mfg. Co., bicycles, rented plant to Nelson M. Carlson.

Shelbyville, Ind.—The Arrow Cycle Mfg. Co. has been succeeded by Christian Schrader.

Washington, D. C.—Washington Cycle Supply Co., wholesale bicycle sundries, opened store at No. 1015 Fourteenth Street, N.W.

Recent Embarrassments.

Boston, Mass.—The Very Cycle Mfg. Co. has made an assignment to George R. Nutter, and Frederick A. Very, of Springfield, one of the partners, has filed a voluntary petition in insolvency. The liabilities of the firm are $42,866, and Mr. Very's personal liabilities are $8500.

Rochester, N. Y.—Elastic Wheel Co., reported to have made an assignment.

Springfield, Mass.—The stockholders of the Warwick Cycle Co., at a special meeting, voted unanimously to go into voluntary insolvency. Liabilities, $225,000; assets, $425,000

Recent Fires.

Brantford, Ont.—Elz. Cooper's bicycle repair shop completely destroyed by fire. Loss, $500.

New York, N. Y.—The Herald Bicycle Co., No. 28 Park Row, damaged by fire at a loss of $5000.

Pittsfield, Mass.—W. J. Davoll, bicycle repairer, damaged by fire at a loss of $200; insured for $200.

Saginaw, Mich.—Fischer Bros., manufacturers of bicycles, damaged by fire at a loss of $2500; insured for $2000.

Miscellaneous.

Torrington, Conn.—C. S. Dikeman, manager of the Eagle Bicycle Co., has been elected president of the Cycle Manufacturers' board of trade.

Wallingford, Conn.—Business is picking up at the Wheel & Cycle Bar Co.'s works. The factory is now on a ten-hour schedule. From fifteen to twenty additional hands have been engaged. This company has recently gotten out a new wheel, and orders for it are coming in fast.

Great Change.

"There has been a great change in the prices of Hardware in my time," said a man who, when just entering into business life, served an apprenticeship in a little Hardware store in this city. "Here I am buying wire mosquito netting for a fraction of a cent a square foot, and when I was behind the counter the price was twelve cents a square foot. Of course, the wire was stronger and better then, because unlike this stuff, it did not merely shut out the gallinippers, but was close enough to exclude the smallest skeeter, and at the worst it lasted three years. The price is the thing I started to speak about, however, and not the quality. Oh, that was such a convenient price for figuring on. My bosses were so stuck on it that they lost the whole wire cloth business rather than change it. In fact, I knew them to sell wire which cost them thirteen and a half cents for twelve cents a square foot rather than take the trouble of figuring fractions. They were not strong on mathematics, and I never liked figures myself. You see it is so easy to figure on twelve cents a square foot. It was always just so many cents a running foot as the cloth was wide and it made it so easy calculating that the bosses hated to fall, while their competitors dropped to eleven, ten, nine and eight cents. By that time all their trade for wire cloth was gone. They tried again when it got down to six cents, because figuring was again easy, but they never got their trade back."

The following railroad statistics for the United States are taken from official figures: At the close of 1896 there were 1687 miles of track laid, which raised the total mileage to 182,600 miles, less than 5000 miles of which were out of operation. The year's earnings amounted to $1,125,500,000, and of this sum $770,000,000 represents freight traffic.

The great hammer of the Woolwich Gun Works of England weighs forty tons and has a drop of forty-four feet.

"EVERYTHING IS COMING UP."

BUSINESS IS BETTER AND THERE WILL BE A LARGER DEMAND THAN EVER FOR OUR

Sheep Skin Mitten.

Acknowledged to be the best article for polishing stoves, as it does away with the old time dirtiness of the work, making this work a pleasure. Also invaluable for polishing brass or glass, or silverware, which it does not scratch. For tan shoes and cleaning bicycles it has demonstrated itself a conspicuous success.

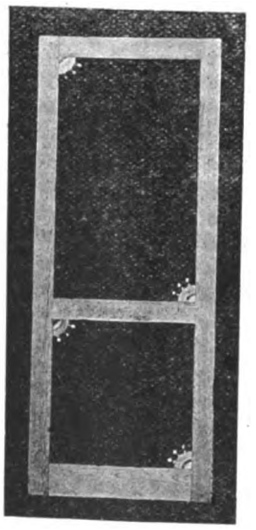
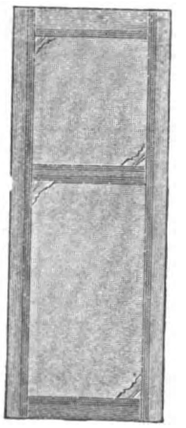
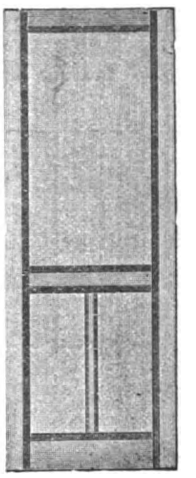
One of the First and Last Advertisers.



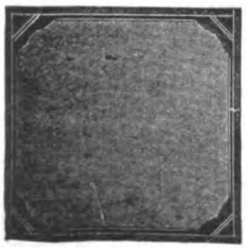
New Jersey Car Spring & Rubber Co., Jersey City, N. J. [*Rubber Goods*]: This company was one of the first to enter your list of advertisers, and we expect to be among the last to retire. We feel that HARDWARE is one of the publications we can't afford to stay out of.



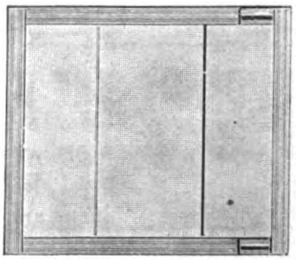
PROGRESSIVE AND ENTERPRISING.



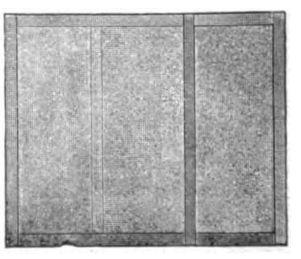
Holmes & Edwards Silver Co., Bridgeport, Conn. [*Silverware*]: We recognize in HARDWARE a magazine progressive and enterprising.



PHILLIPS' SCREEN GOODS

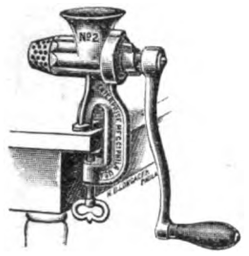


Have won for themselves the confidence and respect of the best posted buyers.



Where quality is considered as well as price, these goods are apt to have the preference. They are not rough. They are not "hustled," nor are they "degenerated" from other people's patterns.

What is a cent on a Window Screen or two cents on a Screen Door, when you consider that you wish to sell them again at a profit? Poor goods always have to be sold cheap! Of course, all manufacturers claim their goods are A1. But—what is your experience?



If your jobber will not sell you genuine Phillips goods, you can get them of the manufacturer.

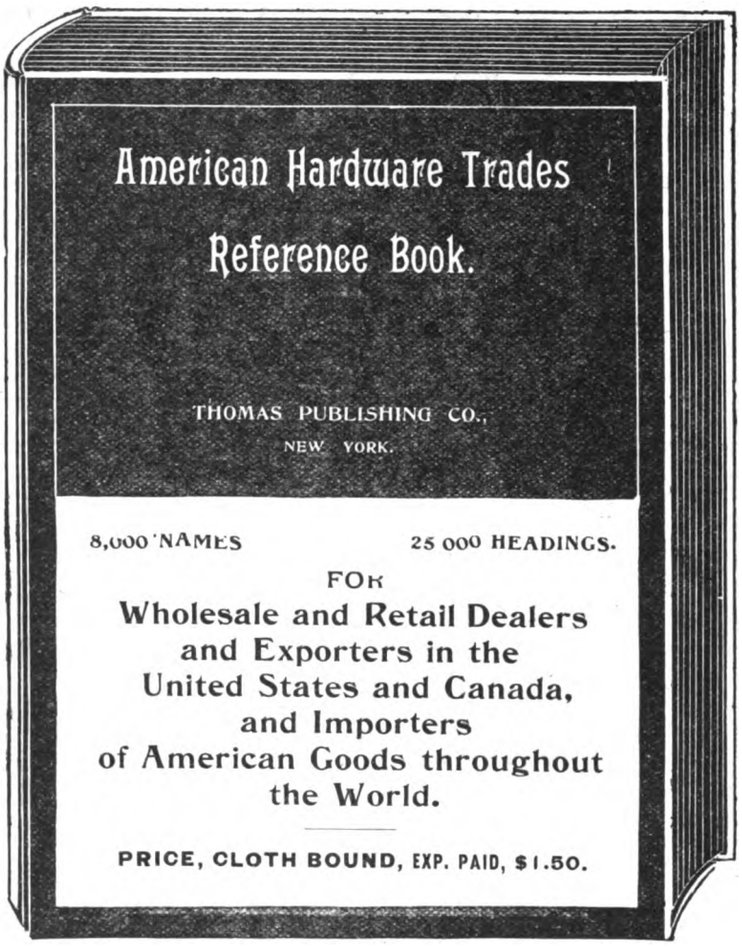
EVERY PROSPEROUS HARDWAREMAN

MUST BE WELL POSTED.

Secure the benefit of all possible Competition in Buying. A Dealer's Reference Book is essential. Here it is. A complete one, independent of any other publication, giving the names of ALL manufacturers, those who do not advertise, as well as those who do. The only work of the kind maintaining this feature. 1898 edition ready in few days. . . . .

IT COVERS THE FOLLOWING TRADES:



Hardware of All Kinds,

Hardware Specialties,

Agricultural Implements and Machinery of Every Description,

Carriages, Wagons, Harness,

Stoves, Ranges,

Tinware, House-furnishing Goods, Bicycles, Plumbing, Steam and Gas Fitting Goods of all Kinds and all Other Articles, Machines, etc., Handled by these Trades.

The object of the work is to enable the above trades to instantly find all the manufacturers of any article desired; the main and branch offices of every manufacturer in the trade, and the financial rating of every manufacturer.

Completeness.—The names of all manufacturers, regardless of whether they advertise or not. We give the names over 8,000.

Classification.—By our method of classification, we index every manufacturer under every article manufactured. We name some manufacturers under as many as 300 headings. We make no charge whatever for any number of headings required to completely represent every manufacturer. The book gives nearly 25,000, fifty times as many as any other publication gives to these trades. We do not use general headings, such as are used in ordinary directories, as for instance: "Hardware," "Agricultural Implements," "Vehicles," "Plumbing Goods," etc., but state the specific article and the special kind of article, and for what purpose used, as for instance: "Door Locks," "Bicycle Locks," "Refrigerator Locks," "Gang Plows," "Sulky Plows," "Swivel Plows," "Ditching Plows," "Brass Faucets," "Wooden Faucets," "Beer Faucets," "Steam Heating Boilers," "Combination Steam and Hot Air Boilers," "Air Valves for Radiators," etc., etc., throughout the 25 000 headings, naming every article, every special kind of article needed by these trades. It enables the user to instantly find exactly what is wanted. Nothing like this minute classification has ever been attempted before.

Ratings.—The financial rating of every manufacturer is given.

SAVES SUBSCRIBERS 100 TIMES ITS COST.

THOMAS PUBLISHING CO., SOLE PROPRIETORS, 40 Broadway, New York.

To Bicycle Riders.

WE MAKE OUR TUBE OF FIFTY CARBON STEEL

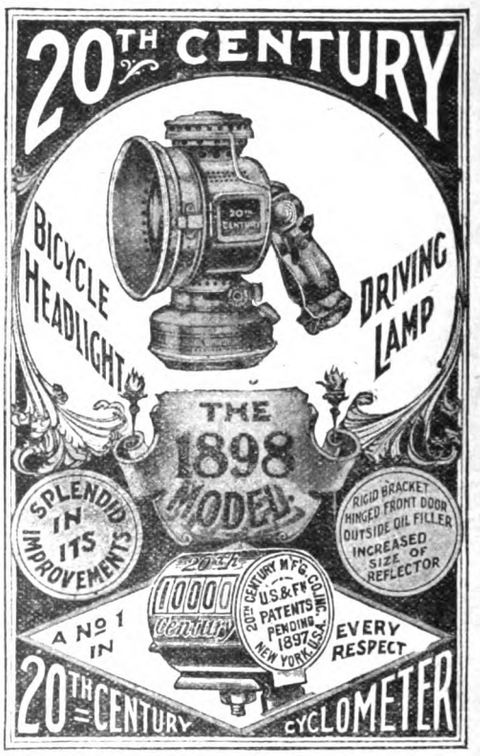
Because a Tube like this of our

.50% CARBON STEEL

Is just as strong as a Tube like this of

.25% CARBON STEEL

While weight for weight in a Bicycle our FIFTY CARBON Steel will last so long [redacted] and TWENTY-FIVE CARBON Steel will last only so long [redacted]



NOTE THE FULL IMPORT OF THE PARALLEL LINES.

The comparison which they graphically make indicates the result of the prolonged investigations of the most practical experts of the world.

That the tests in our own laboratory corroborate these results is merely so much to its credit; that the same is true of actual trial on the road equally proves the trial to have been made in bicycles of correct design and construction. THE FACT REMAINS.

The margin of safety is greatly increased by the use of this tube. Every bicycle manufacturer should use it; every dealer should insist on having it; every rider should demand it. Send for catalogue.

MORRILL'S

Saw Sets, Bench Stops, Punches, Cutting Pliers, and Seal Presses.

REGISTERED U. S. PATENT No. 30572.

TRADE CM MARK

REGISTERED U. S. PATENT No. 30572.

This Trade Mark is stamped on all Saw Sets and other Hardware Specialties of my make.

MORRILL'S No. 1 IMPROVED.

Known as the New No. 1 Saw Set.

For Hand, Band and Jig Saws, from the widest made down to ½ inch. The Sets are too well known for me to enlarge on them.

MORRILL'S UNIVERSAL PUNCH

Seven and a quarter inches in length. An indispensable office tool. Powerful, simple, convenient, durable. Thousands now in use, with the highest satisfaction, in every branch of business.

MORRILL'S No. 5 SAW SET.

15 Inches in Length.

For Timber and Board Saws, from 6 to 14 gauge. The size of the saw in circumference makes no difference.

These sets are made strong, accurate and durable.

Saw teeth should never be twisted, but set at right angles to their points.

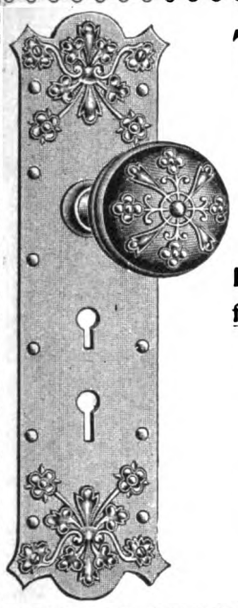
MORRILL'S MASTER-PIECE, No. 95.

The revolving anvil with indicator sub-divided and marked with figures, the figures showing the number of teeth to the inch in the saw to be set; for example, if the saw has four teeth to the inch, turn the anvil until the figure 4 comes up directly in front of the plunger, and so on.

MORRILL'S No. 11 SAW SET.

A Superior Hand Saw Set perfect in its construction and unerring in its operation; will set any hand-saw from 1-16 inch thick down to the thinnest made, and from the coarsest to the finest in general use.

MORRILL'S PERFECTED BENCH STOP.



No wood worker can afford to do without a reliable Bench Stop or hook, as it is sometimes called. The end that the screw is in should always be towards the operator. The spindle and working plate is of WROUGHT STEEL. The body is of malleable iron, rendering it the most durable and useful Bench Stop ever put on the market.

Write for Catalogue and obtain a complete list of specialties from which the few cuts above have been chosen.

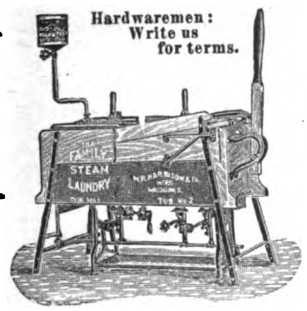
Did You Ever . . .

hear it said that any other Seed Sower was better in any one respect than

Pearce's Improved Cahoon's Broad-Cast Seed Sower? . . . .

We think not. The superiority of the **"Cahoon" Sower** has been everywhere acknowledged for more than thirty years, and the time has never been when any other was "just as good" by one half. Sows all kinds of grain and cleaned grass seed better than can be done by hand, at least five times as fast and with two-thirds the quantity of seed. . . Hardware dealers can handle nothing that will bring them more money or friends.



Wholesale agencies in all parts of the country, where the trade can be supplied promptly at factory prices.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

. . . ALWAYS COLD.

Sold by all Jobbers in Hardware or Plumbing.

Made only by . . . .

TROY NICKEL WORKS,
ALBANY, N. Y.

FITS ANY IRON.
Want to see one? Send us 25c. We will mail you one.

"WE GET RESULTS."

New York Cycle Supply Co., New York. [*Bicycle Supplies*]: HARDWARE is all right as an advertising medium. We get results from it.

"HAVE FOUND IT SATISFACTORY."

The Ideal Mfg. Co., New Haven, Conn. [*Reloading Tools*]: We recognize your medium from time to time, and have found it satisfactory.

"READS ADS. AND ALL."

Fred. A. Welles, Milwaukee, Wis.: I like your paper first rate, and I read the advertisements as well as the rest.

"SATISFIED WITH 'HARDWARE.'"

Schoverling, Daly & Gales, New York. [*Bicycles, Guns, etc.*]: We have every reason to be satisfied with our advertising in HARDWARE.

Digitized by Google

THE POPULARITY

Of our premium list, evidenced by the eagerness with which new subscribers are availing themselves of the opportunities offered, has compelled us to extend the time limit. We will therefore continue this offer until further notice to **NEW 1898 SUBSCRIBERS.**

ALL THE NEWS. **HARDWARE** HARDWARE EXCLUSIVELY.

Needs no introduction to the Hardwareman. He already knows what a valuable adjunct to his business this semi-monthly visitor is, with its reliable "Prices Current," its "Market Reviews" and its general news of interest to the Hardware trade.

FOR $1.00 We will send "**HARDWARE**" for one year, and ANY **ONE** of the following articles:

A dating stamp that will last till 1902, with 12 special entries for marking letters and bills.

Huebsch's Year Book.

A 365-page Cloth Bound Diary—one page for each day in the year—4½x9 inches, bound in flexible cloth covers. Invaluable to merchants, manufacturers, bookkeepers, clerks, etc.

Indexed Coupon Books

representing one hundred dollars—to enable you to put your business on a cash basis—do away with pass books——to prevent bookkeeping errors. No disputes over accounts—no delinquent debtors or bad accounts. Used throughout the country now instead of credit system.

A numbering stamp, which will number from 1 to 999,999. You can number every article in your store with this stamp. It is indispensable to the careful retailer.

FOR $1.25 We will send "**HARDWARE**" for one year and your choice of the following six premiums:

1. A Perfect Fountain Pen . . . . with 14 kt. gold pen and a filler, warranted to give the most satisfactory results. Made by one of the oldest fountain pen houses in America, and fully guaranteed. . . .

2. A Silver Mounted Stationery Set. Seal, letter opener, and paper knife with pearl blade—that gives an air of elegance to your desk. . . .

3. Huebsch's Year Book . . . . (large size), 6x9 inches, bound in flexible cloth, made to last. IT IS YOUR BUSINESS MEMORY, and will not fail you.

4. If You Have a Good Name . . . you may like to see it in your window. We send you ten of the best white enamel 4-inch letters, with a half pound of best cement and full instructions for putting up. If 4-inch letters are too large, send for twenty 2-inch letters. If you require more than the quantities specified, we will send you extra letters; 4-inch at 6 cents each, and 2-inch at 3 cents each. . . . . .

5. Half Dozen Photographs. . . . . Send us any photograph, with your name and address written plainly on the back, and we will return it to you together with six medallion copies of the original, mounted on celluloid, with a wire stand. We guarantee the medallions to be as good as the original. . . . .

6. Bushnell's Price Book . . . bound in seal morocco, 4¾x6⅞ inches, 200 pages, adapted to the use of the traveling man, the home salesman and the office. Neatly indexed, red edged, ruled faint, printed headings. This practical Price Book is in almost universal use. . . . . .

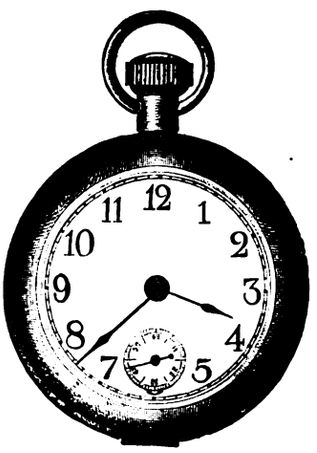
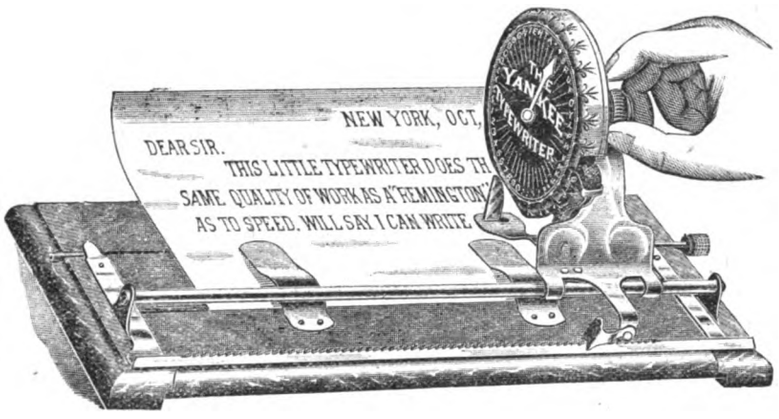
You Live

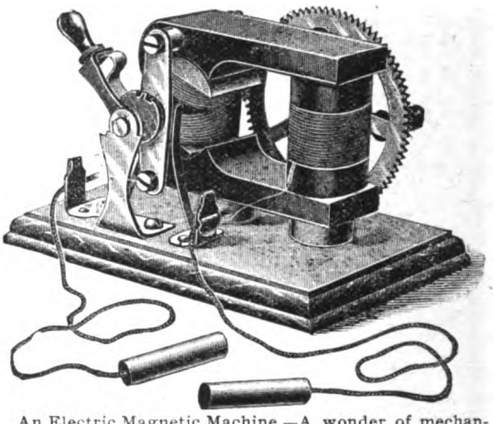
In hopes of always securing the greatest "helps" to your business. *"HARDWARE"* is a "help." It helps the dealer to buy economically, and helps the manufacturer to sell extensively. *"HARDWARE"* for one year, and any one of the following attractive premiums sent post paid for ***$1.50.*** This offer applies to



NEW 1898 SUBSCRIBERS ONLY.



A perfect Sewing Machine. "The Baby." It uses regular Wilcox & Gibbs needles and ordinary machine thread. It is strong and simple; won't get out of order; can be clamped on any table, and is so constructed as to make it almost impossible for the smallest child to injure itself with the needle.



Just think—a complete Camera and an outfit to print, develop and mount. Makes a picture 2½x2½ inches, and its work compares favorably with higher-priced ones of which it possesses the best features, including an instantaneous shutter, adjustable to time exposures if desired, and operated by a lever and button just as your $50 outfit is.

An Open-Faced Nickel-Plated Watch; fully guaranteed for a year. Winds and sets in back of case, and will stand rough usage, and keeps as good time as an expensive watch.

The Yankee Typewriter.—Will write 15 to 30 words a minute; will take any size paper, from postal card to foolscap size. Has automatic carriage and paper feed. Mounted on highly finished hardwood base, and packed in a strong wooden case.

An Electric Magnetic Machine.—A wonder of mechanical perfection. Supersedes the old-style medical batteries, and gives a stronger current without the expense of renewals. It has a current regulator which can be adjusted to a nervous child or to overpower the strongest man.

OF COURSE, YOU TAKE A MAGAZINE,

Probably one in the subjoined list, if it is not, let us know, and we'll put it there. The first column shows the price you would have to pay for the magazine alone. The second column indicates the price at which we will send you "HARDWARE" and the magazine for a year. In many cases you will find the combined price is no more than the single one, and you know you can't afford to do without "HARDWARE." This offer applies to **New 1898 Subscribers only.**

OLD SUBSCRIBERS AND NEW

May take advantage of the following liberal offers:

1. "American Hardware Trades Reference Book," published by Thomas Publishing Co., with "HARDWARE" for one year, will be sent on receipt of **$1:50.** Those who are already paid subscribers to "HARDWARE" will receive the book, on sending **50c.** This book is a complete directory of the manufacturers of Hardware in the United States. Each manufacturer is classified under the name of every article he makes. The financial rating is given in each case; 8000 Names; 25,000 Headings.

---

2. "Ladd's Discount Book," with "HARDWARE" for one year, for **$3.00** Single Index, and **$4.00** Double Index. Present subscribers will be credited for one year in advance. If you have to calculate discount this comprehensive work will save many times its price in time, trouble and mental strain. Its comprehensive character may be realized from the fact that it contains nearly 200 pages of positively accurate tables or more than 120,000 computations giving at a glance the net of any sum at all discounts from 1 per cent. to 95 per cent. together with a great range of combinations.

---

3. "American Hardware Store," with "HARDWARE" for one year, for **$3.00.** The "AMERICAN HARDWARE STORE," containing 450 pages and 500 illustrations, is an exhaustive treatise on the most approved methods used by the successful merchants of this country to arrange, display and sell Hardware. It is edited by R. R. Williams, editor of the *Iron Age*, and published by the David Williams Co., of this city, at $3.00. By a special arrangement, we are enabled to combine "HARDWARE" with the book at the same price. Present subscribers will be credited for a year, in advance of their present subscription.

Fill out Order, and address as below:

"A GOOD REPRESENTATIVE OF THE TRADE."

Warwick Cycle Mfg. Co., Springfield, Mass. [*Bicycles*]: We have always considered HARDWARE a good representative of the Hardware trade.

"BETTER THAN ANY OTHER TRADE PAPER."

S. L. Allen & Co., Philadelphia, Pa. [*Agricultural Implements, etc.*]: We have found results of our advertising with you better than in any other trade paper.

"WELL PLEASED WITH 'HARDWARE.'"

W. W. Johnston, Bartlett, Ohio: Enclosed find $1 to pay my subscription to your journal. I am well pleased with the paper, and think it would pay all dealers in Hardware to take it.

"BEYOND CRITICISM."

Wm. Jessop & Sons, New York. [*Steel manufacturers*]: Another five years as proportionately successful as HARDWARE's last will place it almost beyond the criticism of friends or competitors.

"READ IT FROM THE FIRST ISSUE."

C. E. Neale, Worcester, Mass.: Please find enclosed the cash for the coming year's subscription to HARDWARE. I have read it from the first issue, and intend to keep right along reading it, and wish you success.

"TOO VALUABLE TO BE WITHOUT."

Charles T. Mitchell, Baltimore, Md.: HARDWARE is too valuable to be without.

"LIKED 'HARDWARE' FROM THE START."

Gibbs Mfg. Co., Canton, Ohio. [*Hardware Specialties*]: We liked HARDWARE from the start, and have no reason to think otherwise now.

"USEFUL AS AN ADVERTISING MEDIUM."

Smith & Egge Mfg. Co., Bridgeport, Conn. [*Traps, Locks, Chains, Pulleys, etc.*]: We have found your paper very useful as an advertising medium.

"'HARDWARE' IS READ BY THE DEALERS."

Forehand Arms Co., Worcester, Mass. [*Arms*]: In the numerous inquiries received daily, reference is made to HARDWARE as often as to any other publication, which shows that HARDWARE is read by the dealers.

"BEST CLASS TRADE FROM HARDWARE LINE."

Sager Mfg. Co., Rochester, N. Y. [*Bicycle Saddles and Specialties*]: We have received a large proportion of the best class of trade from the Hardware line. We always regard it advisable to dispose of our goods wherever we can do so to advantage. We see no reason why the Hardware trade should be excepted.

Manufactured by The Burr & Houston Co.,
33 to 39 Franklin Street, - - - BROOKLYN, N. Y.

The Hartzell Self-Draining Hose Reel

IT SELLS RAPIDLY.

It is scientifically and mechanically constructed.
It is a nice ornament and a great convenience in spraying and watering a lawn.
The hose is not kinked, twisted, crushed or drawn to a tension, thus avoiding the breaking of either the inner or outer walls of the hose which protects the fabric and prevents it from becoming water soaked, which usually causes the rapid destruction of the hose.
It drains all the water out of the hose, after it has been reeled, and keeps it always in good order, ready for service.
Each section of hose is independent of the others and may be easily detached at the top or bottom.
It sells at sight, because any person who owns a garden hose can readily see its advantages and superiority.

Jobbers are especially solicited to handle our goods to whom lists and prices will be furnished upon application.

DEALERS ask your Jobbers for the HARTZELL SELF-DRAINING HOSE REEL and insist on getting it.

If they will not supply you address us for prices, circulars and lists.

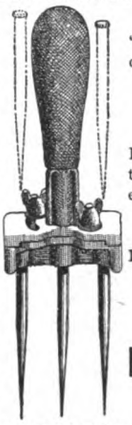
STAMPING AND FORMING

It Doesn't Burn off.



Gillespie's Elastic Iron Enamel is practically indestructible, and is unequalled for use on Stove Pipes, Registers, Grates, Locomotive Smoke Stacks, etc. This is the season of the year when its sale in pint and half-pint cans to the household trade is enormous.

Your stock is not complete without it. Write for jobbers' special discount, and send us a sample order.

IS A GOOD ONE.

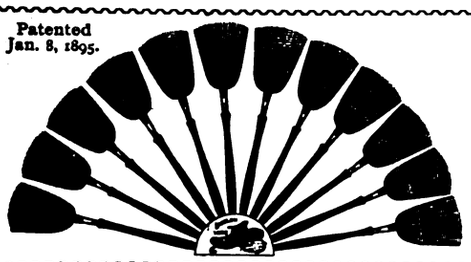
Morgan & Wright, Chicago Ill. [*Bicycle Tires*]: There can be no question about the advisability of using the Hardware trade as a means of disposing of bicycles and bicycle parts, and as to the efficiency of HARDWARE, we can only say what we would say in reply to an inquiry from any other publisher, i. e., we have no direct means of knowing whether our "ads" do us good or not. If we insert an "ad," it is on our judgment that the publication is a good one.

Digitized by Google

A GOOD THING.

IT'S IN THE TEETH.

The Patent "REFORM" Curry Comb is composed of three shallow, oval trays, with corrugated edges. The parts are struck up from a fine grade of cold rolled steel, heavily tinned and bronze lacquered, firmly riveted together and warranted not to rust. The outer dimensions are 6½x4¼ inches and by reason of the large cleaning surface and peculiar arrangement of teeth, the comb will do its work with a large saving of time and labor, cleaning with equal thoroughness both long and short coats. There are no places to accumulate hair and it will not tear or injure the brush, the comb being quickly freed from accumulation by giving its face a gentle tap.



NEW YORK STAMPING CO.,

HENRY HOPKINS, - - Associate Editor.
FRED. A, CATON, - - Asst. Manager.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

Editorial Trade Review.

The reported business throughout the country, with the exception of a few points in our Eastern markets, continues to be of that favorable character which admits of comparisons being made that indicate present improvement. Even in the East the ultra-conservatism, having reference to anticipating trade requirements for the season now rapidly approaching, is gradually giving place to a more satisfactory state of affairs, showing increasing confidence in a trade revival.

The Northwest and the Central West especially exhibit the existence of a demand which is of undoubted strength, and hase very appearance of long continuance. This healthy impetus is given to many lines of business other than Hardware proper; agricultural implements, the sale of which is largely in excess, from obvious reasons, of any previous season, is largely benefited; the prosperous farmers have at last confidence in their future prospects, and intend to deserve the success they but recently doubted their ability to command.

The increasing production of iron and steel favored greatly by government requirements has not had a depressing effect upon current prices, owing to the continuance of the excellent regular demand which keeps up surprisingly, and finds in some lines orders booked far ahead.

The satisfactory weather conditions in the South have had a good effect on business, and both wholesale and retail dealers report a steady improvement. The Northwest, with the opening of lake navigation now near at hand, will, with the natural movement of all sailing and other craft, bring about accelerated conditions of traffic that will still further increase the general confidence.

Quotations on copper have been strengthened by the demands of the government. The large purchases made by the contractors in order to fulfil their promises, have made the market a strong one, the strength of which will be felt throughout the season.

The naturally disquieting effect of the reports affecting the relations of this country and Spain has affected but little the trend of general business, the belief being prominent that any conditions that might jeopardize the peaceful relations of the respective countries, would be settled through diplomacy by indemnity for loss sustained, or other concessions of a character to leave the national honor of both countries unsullied and the public peace undisturbed.

It is gratifying to know that conditions still continue favorable for the steady growth of our prosperous export trade. It would seem as though we were but just realizing the important advantages, worthy of national support and legislative encouragement, which surround our industrial development and commercial expansion.

It is universally admitted that our far-reaching efforts to impress upon other nations an ability to compete with any of them in the manufacture and sale of all the products requiring mechanical skill in their conception and construction, will eventually find the whole world a successful market and under conditions that will affect but little the admittedly superior pay received by our intelligent laborer.

The Tariff Date Decision.

It was a very just decision, that of Judge Townsend in the United States Court at New Haven, Conn., recently, having reference to the hour when the Dingley tariff law went into effect. The judge took the view which was undoubtedly founded on justice to all, that the bill did not become a law until the signature of the President made it one. There was no necessity for any guesswork. Was it right or was it wrong? Should the law become operative before it became a law at all, or only after it was enacted? The judge decided upon the latter construction, believing that in a matter as important as this, there should be no lack of the quality of definiteness, especially when it pertained to a business connected with the operations of an international code of morals and equity. The decision of the judge is hailed with satisfaction by merchants generally and proves the treasury department in error when they argued that the law went into effect on the very beginning of the day upon which it was finally signed. Perhaps it desired a position of the kind suggested should be legally adjudicated and acted upon in order to establish a precedent.

The Consular Service.

In the interest of an improved consular service, it is a pleasure to record the fact that a bill has been favorably reported by the House Committee on foreign affairs, which provides a comprehensive system of classification, confining appointments to persons between the ages of twenty-one and fifty years, and who must be citizens of the United States. A commission consisting of two members of the Senate, three members of the House, and an officer of the State Department, will assist the President in the work of reorganization.

It is intended to provide examinations to test the

Digitized by Google

fitness of applicants for appointment and promotion, in which no grade is to be over-stepped. Larger salaries in proportion will take the place of the fees now in vogue, and the prospects are good for a great improvement to result from this proposed measure, and that the efforts of our proposed merchants and manufacturers who are expending many thousands of dollars in the work of opening up new markets and more extended foreign trade, will be assisted and supported by our National representative one more familiar with the wants and requirements of his delegated territory.

The Annual Meeting of the Hardware Club.

The annual meeting of the Hardware Club of New York was held in the club rooms on the afternoon of Saturday, March 19th. It was called to order by President Peter McCartee, who, in a few well-chosen words, outlined the work of the past year, and felicitated the members of the Club upon the successful history of the organization. The minutes of the last meeting were read by Secretary J. L. Varick, and approved, after which the secretary presented his annual report. The annual report of Thomas F. Keating, treasurer, was also received, and that of Webster R. Walkley, chairman of the finance committee.

The annual election of five governors was declared in order, and the following gentlemen appointed as tellers: Christian T. Stork and Charles L. R. Clark.

A report of the nominating committee, consisting of Charles L. Mead, George A. Graham, Benjamin A. Hawley, George Munson and Thaddeus Smith, was then presented. Alfred D. Clinch, Mortimer C. Ogden and W. R. Walkley were renominated as members of the board of governors for the term expiring 1901, while James D. Foot and George J. Laighton were nominated as the successors of Brace Hayden, removed to California, and Charles Daly, who declined a re-election. These five gentlemen were all unanimously elected to membership.

The board of governors and the trade generally are to be congratulated upon the accession of these two new members to these positions of responsibility and influence. Mr. Foot is president and treasurer of the Kearney & Foot Co., and Mr. Laighton is president of the Russell & Erwin Mfg. Co. Each of these gentlemen has taken a deep interest in the welfare of the Club, and will work earnestly for its success in the future.

The following gentlemen have been elected to membership in the Club since our last report:

R. H. Beach, No. 44 Broad Street.
Ernest F. Eidlitz, No. 31 Nassau Street.
Louis Ferguson, No. 433 West Thirty-first Street.
William B. Wheeler, No. 80 Broadway.
William R. Wilder, No. 45 Cedar Street.

New England Hardware Dealers' Association.

The regular meeting of the New England Hardware Dealers' Association was held at the United States Hotel, Boston, on March 9th, with President D. Fletcher Barber in the chair. The chief business of the evening, after a very excellent dinner had been disposed of, was the election of a president. Edward A. Loomis, of the Belcher & Loomis Hardware Co., Providence, R. I., was unanimously elected to that position, and conducted by ex-President Barber to the chair. Mr. Loomis made a few happy remarks, which were greeted with applause. Speeches were made by George M. Fiske, of Boston, and William H. Sayward, secretary of the Master Builders' Association of Boston, on the subject of the building material lien law.

The following committees were elected for the ensuing year:

Pricing Committee: M. A. Chandler, Boston; J. B. Hunter, Boston; J. O. Nichols, Boston; W. A. Billings, Dorchester; W. E. Plumer, Somerville.

Investigating Committee: E. O. W. Bliss, Boston; H. M. Sanders, Boston; M. H. Tarbox, Boston.

Membership Committee: H. G. Janvrin, Boston; J. H. Sagwood, Haverhill; M. H. Tarbox, Boston.

Auditor: Hiram G. Janvrin, Boston.

The next meeting will be held at the same place, on the evening of April 13th.

The Bates & Son Arms & Engine Co., Philadelphia, has been incorporated with $160,000 capital to manufacture revolvers. The company has purchased the machinery and tools formery operated by Wm. G. Smith & Co., for making the Columbia revolver and will start up the business at the same place, Nos. 1429-31 North Twenty-first Street. It is reported that a New York house has contracted for all the revolvers they can make.

The down-town retail store in Chicago of the Monarch Cycle Co. formerly located at No. 152 Dearborn Street, has been removed to No. 122 Dearborn Street.

A Hardware Association Number of "Hardware."

On April 10th, 1898, *Hardware* will celebrate the eighth anniversary of its birth.

Hardware has certainly used its best effort for the promotion of neighborly friendship and good fellowship among the members of the trade. It has given freely of its space for the dissemination of news in regard to the great Hardware organizations which, since 1890, have become so grand a force for good in the Hardware world. It has by its voice, encouraged in every possible way the creation of organizations having for their purpose the bettering of trade conditions, and has been an enthusiastic supporter of every movement having for its purpose the good of the trade.

It occurred to us that the celebration of our anniversary of April 10th, 1898, could be made of signal usefulness to the trade everywhere, by the publication of a SPECIAL HARDWARE ASSOCIATION number.

It is our purpose, therefore, with that issue, to present a mass of valuable information in regard to the beginning and growth of the great forces or organizations which have accomplished so much in the way of acquaintance, better business methods, and the cultivation of fraternal regard. These sketches of the rise and growth of the organizations will be accompanied by portraits of various officers of the same, special articles from the pen of men who have been instrumental in the founding of these societies, and much else of interest in connection therewith. We feel that the time has come when the various steps which led to the creation of these forces within the Hardware trade should be gathered and properly placed upon record, and more especially as the information can now be secured at first hands, from those who assisted in this work.

We ask the hearty co-operation of Hardwaremen everywhere in this laudable effort, and our experience of the past leads us to firmly believe that the same will be given with a generous willingness which shall be very effective in its results.

As to Credit.

Credit is almost a necessity in the world of commerce. There are many businesses run upon a cash basis and where no credit is given, but these are isolated cases in large centres, but the basis of most mercantile transactions of to-day is man's faith in man. It would be a sorry state of affairs if this idea, or sentiment if you may choose to call it, were eliminated from our dealings with our fellow men. Not only in regard to the buying and selling of goods, but in every act of life, we must act upon this principle. We must trust the physician who attends us when we are sick; we have to trust our lawyer, when he is engaged by us to attend to some legal matter about which we know nothing; we have to trust to our milkman, that our milk is not contaminated by disease and death; and so on through every detail of life we are dependent upon others, and must give them credit for doing things correctly about which it is impossible for us to know. So with the merchant and banker. They must give their goods and money out for people to use for them, and must take risks in getting an equivalent in return.

The merchant has faith enough to believe that the people he credits will pay him for the goods. He must take a certain amount of risk, yet he calculates upon the chances of getting his pay; and his calculations in the main are generally correct.

The advantages of credit are numerous.

By its aid a man with ability and energy is enabled to do that which, without it, would be beyond his reach. He buys goods and turns them into money, and pays back his creditor, and also has a margin of profit left him for his skill in the transaction. Having thus carried out his promises, and with the aid of the profit thus made, he repeats the operation upon a more extended scale with proportionate results. He thus not only is deriving a benefit himself, but the man supplying him with the goods and the consumer who is accommodated by him are each receiving benefit. Credit enables a man to obtain capital with which to improve lands, erect buildings, and carry on enterprises which give employment to people and thus add wealth to the country.

To the merchant it is especially valuable and it is in this connection that we have particularly to deal in this article.

The merchant must, of necessity, extend credit to his customers, and he must weigh the chances of bestowing it worthily or otherwise in each particular case. He should not be actuated or influenced by any but strict business considerations. The fact that he would be conferring a benefit upon the man asking it even if the bill were never paid, should not induce him to run risks. If he chooses to assist one in need, that is a matter of charity and not business. These acts should be kept separate from business transactions, as no matter of mere sentiment should be considered in granting credit. The first important question is "Is he honest?" If you have information which would lead to this conclusion, it will materially assist in solving the question. But this is not enough. All honest men do not pay their bills. They may wish to but their poverty, misfortune, sickness, extravagance and a hundred other things may intercept their plans. In fact we are inclined to believe people as a rule prefer to pay their bills.

Of course we have all seen an occasional instance where a man deliberately plans to avoid doing so if it is at all possible. But such cases are rare. The great majority wish to meet their obligations and endeavor to do so.

When a stranger applies for credit, let him give his own story and then refer to another party. If we are satisfied with what he says, and his general appearance seems favorable, we may grant his request without consulting his references. Every merchant ought to be a good judge of human nature and be able to "size up" a man rapidly. He may make mistakes, but this faculty is often of great assistance in arriving at a correct conclusion.

But there are some persons who abuse the credit given them by the tradesmen. Instead of keeping their promises as made at the sale, they seemingly forget them as soon as made. Instead of coming to the man who has accommodated them and explaining their position, if unable to pay as agreed upon, they allow their creditor to wait upon them indefinitely, and are apparently ungrateful for his leniency.

When a man has thus proved himself unworthy of credit and ungrateful of it, it is best to refuse him when next he asks it. Of course he will make nice promises and excuses, but it is better to be done with him forever as far as credit transactions are concerned.

It is not always that people of ability to pay can safely be given credit. A trader recently told me that a man who was in receipt of a large salary and had much property, owed him for a bill of tinware for about three dollars and a half, but he said he would be compelled to sue him as it had been standing over a year and he was tired of running after him so many times. When a man like this is known he should not be given credit under any circumstances.

It is not the size of a man's bank account which determines his eligibility to credit. Many with slim purses can safely be trusted because they promptly fulfil whatever promises they make. LYLE MERTON.

Sending American Files Abroad.

It seems surprising to a veteran in the Hardware business, that, at the present time, among our growing exports should be a constantly increasing output of American files. The fact that our file product is so perfectly made by the aid of American machinery, as to successfully compete with the hand-cut product of Great Britain and the factories on the Continent, is of itself a matter for national and industrial pride. The Arcade File Works, Anderson, Ind., Allerton, Clarke Co. selling agents, No. 97 Chambers Street, New York, among other foreign shipments, have recently filled in a single order from an English cycle manufacturing company an assortment of their files amounting to 648 dozen. The order was the outcome of a set of samples sent to this cycle company some time ago which, being tested against the English product under every possibility, resulted in this handsome order.

As stated by Mr. C. C. Clarke, the Treasurer of the company, their foreign shipments now embrace not only Great Britain and France, but also Russia, Norway, Denmark, Austria, etc., and are increasing in a manner so steady and satisfactory as to indicate a certainty of a prosperous future.

The Yale & Towne Mfg. Co., now at Nos. 84-86 Chambers Street, New York, intend removing about May 1st to the new Franklin Building in Murray Street near Broadway. This handsome twelve-story building, 100 feet front, by 95 feet deep, is now nearly completed, and will then be ready for occupancy. There will be four stores on the street level, one of which in connection with the sub-basement and nearly the entire floor above the store, will be occupied by the Yale & Towne Co. The arrangement of space used by the company is considered to be greatly to their advantage, making the removal a very desirable one.

Charles Churchill, managing director of Chas. Churchill & Co., Ltd., of London, Birmingham and Glasgow, will arrive in New York by the *Lucania* on April 2nd, and proposes spending some two months on this side, visiting the various manufacturers here they are representing. His headquarters will be in New York, at the offices of the American Gas Furnace Co, No. 23 John Street.

Digitized by Google

Champlain Horse Nails.

The National Horse Nail Co., Vergennes, Vt., J. C. McCarty & Co., sole agents, No. 10 Warren Street, New York, have for thirty years been prominently before the Hardware trade as manufacturers of the Champlain Horse Nail, the advertisement of which will be found on page 52.

This company was established in 1868. They claim the invention of the first machine ever used in the pointing of horse nails, and in 1869 placed upon the market the first horse nail finished and pointed ready for driving. They have always deemed the production of a perfect nail that should be equal to the very best possible, both in material and workmanship, was the essential requirement of every horseshoer and horse owner; and with this object in view, they confine their attention in their methods of manufacturing, to the production of one grade only, never putting on the market any horse nail made from inferior stock and marketed under conditions which require a cheaper nail. They make only the "Champlain," which is guaranteed by the company as "first-class in every possible respect, manufactured entirely from one known brand of Swedish material," which from long-continued use they claim to be "of the highest grade obtainable."

Champlain nails are strictly "hot forged" and "cold hammer pointed." The Aerated Fuel process of burning oil is used in the furnaces of this company's extensive plant. This process insures a perfectly uniform heat while forging, and prevents the accidental introduction of any impurity into the metal during the process. A careful and thorough individual selection previous to boxing enables the company to give their warrantee of perfect production in every respect. Samples and prices may always be obtained at the New York office of the company, or application at their office in Vergennes, Vt.

A New Departure.

The *Commonwealth* is glad to chronicle the fact that a new and important industry has just been established in this city under the name of the Fond du Lac Toy & Specialty Co. The promoters and organizers are C. J. Medberry, David Jack and M. J. Peck. The fact that the new enterprise is in the hands of these gentlemen, bespeaks for the new departure a success from the start, and will add to Fond du Lac's already large list of manufacturing industries, one that the people may expect will soon stand at the head of the toy trade, if the success that these gentlemen have attained in the refrigerator business is to be taken as a criterion.

C. J. Medberry, David Jack and M. J. Peck are the organizers and principal stockholders of the Gurney Refrigerator Co. of this city, who organized in Oshkosh in 1890, for the manufacture of refrigerators on an entirely new principle of construction and refrigeration. That their judgment on points of manufacture is correct, is attested by the fact that they now stand at the head of this line of manufacture in the United States, and that nearly all manufacturers have departed from the old style and are now closely following the lines of construction and the business policy inaugurated by this company.

We are informed that the manufacture of refrigerators is one that is dependent, like farming, upon the seasons, all deliveries being made during one short period of the year, from January to July, with a manufacturing period extending from October to May or June. During this time the refrigerator works are pushed to the highest capacity, turning out from 125 to 150 refrigerators per day, the works for the balance of the season standing practically idle.

It is the intention of the organizers of the Fond du Lac Toy & Specialty Co. to utilize for the present, the Gurney works during this period of inactivity, in the manufacture of a line of rocking horses and toy furniture. Philip Marqua, of St. Louis, who is the patentee of many of the articles to be manufactured and who has had twenty-two years of experience in this line of work, has been engaged, and is now in the city.

The Gurney Refrigerator Co. are now getting out samples for the new company, and as soon as the refrigerator season is over, work will be pushed on the new line during the entire summer months.—*Fond du Lac (Wis.) Commonwealth.*

All About Mail Boxes.

W. C. Heller & Co., Montclair, N. J., whose names have become synonymous with Steel Hardware Shelf Boxes, have issued a brief statement describing the construction of these articles, quality, etc. They state that they will be pleased to quote prices upon receipt of a list of the boxes desired, and will also mail a sample box on receipt of 25 cents in stamps. They further say:

We make the boxes with white wood, pine, North Carolina pine, oak, ash, or cherry fronts and backs, painted, stained, or varnished if desired. We make them any size to fit your shelving at no extra cost. The fronts and backs are ¼ inch thick, the sides and bottom are pressed of one piece of the best patented rolled galvanized steel. The steel is embedded in the wooden ends by our own process, and secured by steel wire brads driven from the inside, thus making a box that has no nails on the outside or rough edged to tear the shelving. A depression on the right hand side near the front, which is enameled, upon which the cost and selling price of the contents of the box can be marked, (marks can be rubbed off and changed at any time without injuring enamel). Twenty per cent. shelf room is saved by using these boxes, they also give better satisfaction and service for money invested in them than any other box made. As evidence of their worth and advantage, we refer to the many Hardware dealers who are using them in the United States, Canada, England, Germany, South America, and South Africa. We fill all orders promptly, make no charge for crating, and guarantee boxes to reach you in same condition as they leave our factory.

A Belt Dressing.

"It is the slipping heel that wears the hole in the stocking, and it is the slipping belt that wears the leather. Belts that slip not only do not drive properly, but they wear out rapidly. A belt that is too tight is over-strained, and will also wear out rapidly. A thoroughly reliable belt dressing is therefore a necessity in every well regulated factory, and probably no dressing has such a world-wide reputation as Dixon's Belt Dressing and Leather Preservative. As long ago as 1878 it was used on the big driving belt at the Paris Exposition, when other means had failed to make the belt take hold of the pulley that was to start the thousands of feet of shafting and hundreds of machines." Those who use Dixon's Belt Dressing claim that it prevents slipping and thoroughly preserves the life and elasticity of the belt. It is made only by the Joseph Dixon Crucible Co., Jersey City, N. J., who are known the world over for their graphite products.

Charles Morrill, No. 35 Warren St., N. Y., the manufacturer of Morrill's Saw Sets and other specialties, has made his export quotations conform entirely to those given the home trade. He does this in justice to his patrons and the trade in general, feeling that, as the pioneer manufacturer in this class of specialties, which has obtained the confidence of the dealers, he wishes the trade to know that no concessions are obtainable by orders given solely for an export demand that are not also within the reach of every domestic patron of his, now selling his production, his motto being: "Justice to all and partiality to none."

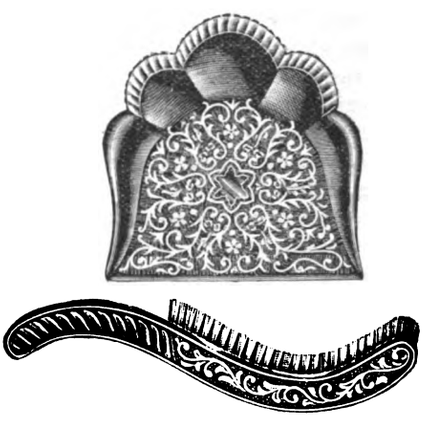
THE W. H. SWEENEY MFG. CO.

One of the most interesting manufacturing growths of this country has been the development in a comparatively short time, from a state of crudity to that of artistic and economical perfection, of the manufacture of tin and copper ware. It is well within the memory of most of us

when the finer lines of this industry all bore the stamp of foreign manufacture.

Some twenty-two years ago (in 1876) there was established in Thirty-sixth Street, New York, by Mr. W. H. Sweeney a small factory wherein he undertook the production of tin, brass, copper and nickle-plated goods. By introducing the most improved machinery success, attended his efforts, and five years later, in 1881, the business was incorporated under the name of The W. H. Sweeney Mfg. Co. Increasing business demanding additional facilities and space, the new firm established itself at No. 240 Water Street, and later, requiring still more space, a branch factory at Nos. 26 and 28 Cherry Street. In 1894, finding even these factories inadequate to their demands, the firm decided to combine their entire manufacturing plant under one head and secured the large factory at Nos. 66, 68, 70 and 72 Water Street, and 51 Front Street, Brooklyn, where it has grown to such dimensions that its four story house is now taxed to its utmost to hold their large plant. Twice within the past year has it been necessary to increase the working force until it stands three times greater numerically than it then did. This increase involved a corre-

sponding one in plant, and accordingly the most improved machinery was added, while the inadequate shipping facilities were remedied by the installation of chutes, under which the wagons drive and receive their loads "while they wait."



But if the factory growth has been worthy of extended mention, the growth in popularity of the goods has been no less so. In the trade the name of the W. H. Sweeney Mfg. Co. means a guarantee of quality, and the reputation of their products as quick sellers is a trade proverb. The latter qualification is due to more than one cause. Probably the greatest factor is the unswerving policy of the

firm never to place a line of goods that does not thoroughly merit the representation made of it. The fact that the hardwareman who handles the W. H. Sweeney Mfg. Co.'s goods may rest assured that none of his customers will return to complain of defects is one of the most potent reasons for always finding these handsome lines in his

stock. Another and most important cause of the well deserved esteem in which these goods are held is the artistic merit of their design. No field of mnnufacture gives a wider scope to the eyepleasing effects, and this is taken advantage of to the greatest possible extent. From the least pretentious tray to the most elaborately engraved

coffee pot the design is studied and made pleasing at any cost save that of utility and it is with justifiable pride that they point to their Carpathian trays, of which they are the sole manufacturers. Some idea of the excellence of these goods may be obtained from the cuts herewith presented

Digitized by Google

but to be thoroughly appreciated the goods must be seen. Even then the closest inspection is required to distinguish the fine nickel finish from silver-plate.

Not by any means the least important part of the organization of this model business is the staff of twenty outside representatives who cover the United States and Canada; and the magnitude of the output may be judged by the quantity such a large force of travellers must dispose of to make their services remunerative.

By the advantage gained from a plant of the latest and most approved design, much of which is the Company's own invention, and from the enormous annual production, foreign competition is more than met. A perusal of their catalogue, in which are illustrated their different lines of coffee pots, tea pots, tea kettles, wash boilers, cuspidors, funnels, measures, trays, dust-pans, mugs, flue stoppers, pipe rings, stove-boards, etc., will demonstrate the fact that their prices leave nothing to be desired. A request to the firm at their Brooklyn address for catalogues will be met with a prompt response.

The Storm Mfg. Co.'s New Purchase.

The Storm Mfg. Co., manufacturers of elevators and dumb-waiters, Newark, N. J., make the following important announcement under date of March 16, 1898:

We beg to announce herewith to our friends, customers and the trade in general, that we have purchased the dumb-waiter and elevator business of the F. S. Hutchinson Co., of New York City, manufacturers of the Paragon Self-Retaining Dumb-Waiters and Elevators, and in the future they will be made only by us.

These dumb-waiters and elevators added to our present large line of goods, gives us without question the most complete and largest line of dumb-waiters and elevators made by any concern in the world.

We take this opportunity to return our thanks for the liberal patronage we have enjoyed in the past, and to say we shall endeavor to merit its continuance.

Newark, N. J., March 16, 1898. THE STORM MFG. CO.

New York City, March, 16, 1898.

Referring to the above, we desire to thank our customers for their many favors, and would say that in disposing of our business to The Storm Mfg. Co., we believe it has passed into the hands of a concern that, with their large and unexcelled facilities, will maintain the high standard of these machines in all respects, and trust that our former friends will bestow their business on our successors.

THE F. S. HUTCHINSON CO.

The Value of Good Credit.

BY T. H. GREEN.*

A good credit is something worth striving for, and when attained the possessor may rightfully feel a just pride in the fact that he possesses the confidence of those with whom he deals. A good credit standing properly used is an acquisition of unlimited value, but when abused it becomes one of the worst curses that can be entailed upon an individual.

It should not be inferred because one is in good credit standing that he is entitled to unlimited credit or that his honesty is called in question should the jobber or manufacturer place a limit on the amount he is willing the merchant should owe him. It must be borne in mind that honesty alone will not pay debts. One may be absolutely honest and not able to pay. The fact that he does not pay is not an evidence that he is dishonest. It will readily be seen that one's ability to pay must be taken into account as well as his honesty.

To obtain and maintain a good credit, it is essential that the merchant, in addition to having capital, be it large or small, should be honest, capable and industrious, and should have a just appreciation of the rights of those of whom he seeks credit. If he possesses these qualities he will have no trouble in obtaining all the credit his business demands. There is danger, however, that he may be led thereby to overstep the bounds of prudence and load himself with debt for goods on his shelves in excess of the legitimate requirements of his business, which state of affairs is likely to lead to effort by sales on credit, often injudiciously extended to relieve the pressure, or to establish branch stores for the same purpose, both of which means only add to the burden and usually lead to failure.

If credit is extended at all by the retail merchant, it should be upon distinct terms as to time of payment, and only to those who are known to be worthy of credit, and prompt payment at maturity should be insisted upon.

The retail merchant should pay his bills promptly at maturity, if he does not discount them. Otherwise the jobber of whom he buys on credit is in reality the one who bears the burden of the unpaid accounts of those who have no claims upon him and in whom he has no interest. The jobber's rights are thus invaded and the credit of the merchant suffers.

It is very important to every retail merchant that he keep his business well in hand, the details properly looked after, the stock well insured, expenses carefully guarded, his debts within easy control and his collections promptly looked after. Failure is not likely to come to those who appreciate the value of a good credit and who take the proper means of meriting and retaining it.

* Mr. Green, of Tolerton & Stetson Co., Sioux City, Iowa, is treasurer of the National Hardware Association of Credit Men, and also chairman of the Business Literature Committee.

"Friction and Lubrication."

The Jos. Dixon Crucible Co., Jersey City, N. J., have published an attractive pamphlet of a half-dozen pages, bearing the above caption, and filled with information of value to anyone interested in the using or the selling of lubricants of any character, or the handling or use of machinery on which the same are used. This is not merely a description of the line of lubricants made by this company, but is a practical, scientific discussion and explanation of all the points connected with practical lubrication. Among some of the headings are: "The Theory of Friction," "How Oil Lubricates," "Friction in Lubricants," "Friction Tests Made for Comparison," "Bearing Surfaces," "High Speed and Great Power," "Tests of Graphite," and "How Graphite Prevents Friction." They will not only send this pamphlet to anyone wishing the same, but say they will be glad to send without charge, samples of graphite, and interesting information as to where Dixon Pure Black Graphite has been most successfully used.

Gridley Bryant, a civil engineer, in 1826, projected the first railroad in the United States. It was built for the purpose of carrying granite from the quarries of Quincy, Mass., to the nearest tidewater. Its length was four miles, including branches, and its first cost $50,000. The sleepers were of stone and were laid across the track eight feet apart. Upon rolls of wood, six inches thick, wrought iron plates, three inches wide and a quarter of an inch thick, were spiked. At the crossings stone rails were used, and as the wooden rails became unserviceable they were replaced by others of stone.—*Ladies' Home Journal.*

G. H. Jantz, who has been identified with the American Wringer Co., with headquarters on Chambers Street, New York, has been promoted to the position of assistant manager of that company, and now occupies the position formerly filled by J. F. Hemenway, who is connected at present with the Smith & Hemenway Co., No. 10 Warren Street, New York. Mr. Jantz will hereafter be found at the headquarters of the company, No. 99 Chambers Street, New York.

Recent Trade Publications.

The Iver Johnson's Arms & Cycle Works, Fitchburg, Mass., and No. 99 Chambers Street, New York, have recently issued their cycle catalogue, which is a handsome specimen of the printer's art. For over a quarter of a century they have been engaged in the manufacture of fine metal products, and the experience gained in the intricate work of their fire-arm construction has been of incalculable value to them in cycle building, in which latter industry they have been engaged for the past thirteen years. With ample capital, unexcelled facilities, and a determination to lead, they are in position to command the large patronage with which they are favored. In the construction of their cycles they claim to use only materials which are subjected to the most crucial tests before same are approved. They realize that good material alone is not sufficient for the production of a perfect cycle; it must be coupled with great mechanical skill, and an accurate knowledge of the cyclist's needs. They have made several additions to their line this season, and now have an assortment of cycles that is at once complete and practical. They list a racer and a special light roadster at $85 each; special roadster, in gentlemen's and ladies' models, at $75; also a diamond frame and a convertible tandem at $100 each. They have a gentlemen's and ladies' roadster, in their regular Iver Johnson type, listing at $50. To these is added the Fitchburg line which consists of roadsters, in both ladies' and gentlemen's models, listing at $40 each. Among the many improvements on their cycles this season, none possess greater advantages than the rear hub brake which they fit to their chain cycles, either as part of the regular specifications or as an option. They present, in this device, a simple yet powerful brake—one which gives the rider instant and complete control of his machine—and this, too, without changing the position of hands or feet, or any conscious effort on his part. It is absolutely automatic in its operation, requires no motion to apply or release, the steepest hills may be ridden with safety, or the wheel may be brought quickly to a dead stop without jar or strain, pressure on the bearings, or danger of unseating the rider. All strain is transferred from chain and sprockets to the frictional surfaces, thus relieving the bearings from wear and tear. The brake will be appreciated by all riders, for it makes control of the wheel easier, is neither cumbersome nor unsightly, and adds much to the safety and pleasure of cycling. Knowing that there are riders who prefer an enclosed chain model to a chainless machine, they have arranged for the use of a gear case on their $75 bicycles, and fit the same at a slightly additional cost. It is light, simple and practical, and affords complete protection to the chain against dirt, dust and water, and saves the wheelman much trouble and annoyance.

The Russell & Erwin Mfg. Co., New Britain and New York, have recently issued a small "handy size" catalogue of thirty-eight pages, within the contents of which is embraced the line manufactured by them, of Wrought Steel Locks and Lock Sets, which they can now furnish in Oroide and eight different finishes. In this convenient pamphlet these goods are ilustrated fully by the use of half-size illustrations, with full descriptions, and is well printed on excellent paper. In their introductory remarks the company refer in this publication to new improvements, as follows: "In presenting this pamphlet, illustrating the development of our new and important departure in the manufacture of Door Locks from Wrought Steel, we call the attention of all dealers, architects and builders to their many advantages. The goods excel in lightness and strength, in beauty of design, and novelty of finish; and, being made from wrought metal, are uniform in size and exact in measurement. Attention is also called to the strikes for rim locks, as shown in illustrations, the improvement in which is the added security of a flange extending over the door-casing, through which a screw is fastened at right angles with the usual screws, preventing the possibility of its being forced or taken off when the door is locked. By the use of perfected methods, for which we own letters patent, we are enabled to supply these goods from wrought steel in competition with those made from cast iron. That the mechanical construction of our wrought steel locks is satisfactory is attested by the quantities sold during the last nine years. The purpose of the changes which we have made in them is chiefly to improve their external appearance. Our Oroide Finish is a gold-colored plate, applied to both rim and mortise lock cases. It prevents rust, betters the appearance of the locks, and should increase their salableness."

The New Departure Bell Co., Bristol, Conn., John H. Graham & Co., selling agents, No. 113 Chambers Street, New York, have just issued their 1898 catalogue of their products, in four distinct editions, which will prove the greatest novelty in the way of catalogues so far connected with the business of bicycle sundries. They have one edition, intended for distribution throughout the United States; another edition for their large and growing trade in Great Britain, and its provinces and dependencies; another for France, and the countries governed by the French people, and all these are supplemented by still another for Germany and such other points where trade is established under German influences. The novelty of this group of catalogues, calculated to grasp and hold the trade of the world, emanated from the skilled resources of the advertising manager of the company, F. A. Southwick, who was the translator, and under whose personal supervision they were inaugurated. As the prices are quoted respectively in each catalogue in the currency of the country in which it is intended they shall be distributed, there can be but little doubt of the successful issue of this pioneer method of exploiting American bicycle products. The company will be pleased to mail a copy of either catalogue upon request.

J. F. Bigelow, Worcester, Mass., patentee and sole manufacturer of the Bigelow Wire Fly Killer, is sending his patrons and the trade generally a line of very handsome and taking cards illustrating and describing the article named. In description of the article and its useful purposes, Mr. Bigelow says: "Nowadays people in civilized regions endeavor to keep the flies out of their houses by having them well screened. This keeps out the greater number of the little pests, but a few always manage to find an entrance through some crevice or crack, and half a dozen of these enterprising insects can cause about as much annoyance to the neat and orderly housekeeper, or a bald-headed man during his after-dinner nap, as the whole brood of them could do if turned loose in the room. In order to rid the house of the few flies that crawl past the screens the Bigelow Patent Wire Fly Killer has proven itself to be a boon to suffering humanity, for it dispatches the fly, or any insect in a cheap and speedy manner and leaves unspotted the most delicate wall-paper or ceiling. The air passes perfectly between the strands of the wire broom, and the fly feels no pressure and cannot escape, consequently you never fail to bring down your small game."

Sargent & Co., New York, and New Haven, Conn., are distributing to the Hardware trade a thirty-four page catalogue of "Screen Hardware for 1898." The catalogue is 9x12 inches in size, and filled with illustrations and descriptions of everything possible to be found in this line in their larger general catalogue, to which is added the newer specialties placed on the market since the large catalogue was issued. It is a very suggestive compilation of good things for the spring and summer seasons, and should be in the

Digitized by Google

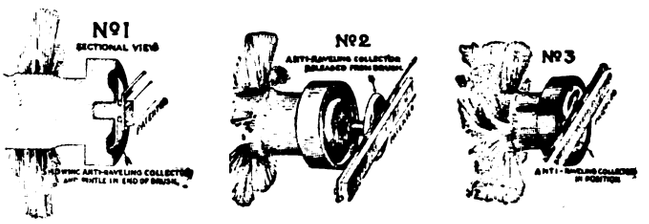
hands of every dealer handling such goods, to be made useful when "fly-time" arrives in dead earnest. A discount sheet accompanies the pamphlet.

The Remington Arms Co., Ilion, N. Y., and No. 315 Broadway, New York City, have issued a leaflet in which they say: "The many inquiries we have had for a small bore sporting arm, embodying the Remington system, and adapted to smokeless powder cartridges, have determined us to introduce to the public the No. 5 Remington Rifle. The barrels, frame, and lock mechanism are constructed of selected material especially designed to resist the enormous strain developed by the use of modern high explosives. We believe this rifle will meet the growing demand for a light well-balanced weapon of simple mechanism and great penetration, adapted to any climate. The No. 5 Remington Rifle will be adapted to the 30|30, the 30 Government, and the 7m|m Cartridges, and will be listed at $18 in our Spring Catalogue." On the reverse of the same they say: "Together with the marked tendency toward the small calibre rifle has occurred a less noticeable trend toward the small bore gun. To meet the demand among sportsmen, we have included a 16 gauge in both our hammer and hammerless styles. The enduring reputation of our hammer gun, and the wide and rapid popularity which the Remington Hammerless has scored, justifies the extension of our line in the direction of popular demand."

The Bryan Mfg. Co., Bryan, Ohio, manufacturers of wheelbarrows, have issued a very attractive leaflet illustrating and describing their Champion No. 10. The chief point in connection therewith lies in the quotations which are reproduced in a large number from dealers all over the country, from Atlanta, Ga., to Kokomo, Ind., who have handled the goods made by the Bryan Co. An illustration of one of their lines will be found elsewhere in this issue, and full particulars will be sent by them on application.

Biddle Hardware Co., Philadelphia, Pa., have recently issued a very complete catalogue covering their line of "Wiuchester" and "Vindex" Bicycles, and a full and complete assortment of bicycle sundries, including every possible requirement to make their customers' stocks equal to every demand that might be made upon it. This catalogue is printed on good paper, filled with excellent illustrations, and consists of fifty-four pages, with an attractive cover.

The Russell & Erwin Mfg. Co., New Britain and New York, have just issued under date of March 15th the revised list prices and discounts, No. 7, to be used in conjunction with Catalogue Volume VIII, 1897, supplement No. 2 and Columbia supplement, forming a pamphlet of fifty-seven pages and covering in its contents a number of important changes and additions.



Compressed Cork Grips.

The Codling Mfg. Co., of Bristol, Conn., make a specialty of bicycle grips and their Compressed Cork Grips, an illustration of which may be seen upon page 49 of this issue, are articles which are finding their way into the market, especially among Hardware dealers who handle bicycles and bicycle material, with great success. These are made lined or unlined, as desired, in all sizes, and with every style of grip. The manufacturers inform us that they use nothing but high-grade goods, make prompt shipments without delay, and are now turning out 5000 pairs per day. This is an indication that the bicycle business for 1898 is to be of a very lively character.

Like seed, the better an advertisement is the more fruitful will it be. A poor advertisement cannot be expected to produce good results.—*Hardware & Metal.*

Bissell's "Anti-Raveling Collector."

The latest patented improvement announced by the Bissell Carpet Sweeper Co., the "Anti-Raveling Collector," is a small circular concave disc, fitted at the ends of the sweeper, operating in a groove in the brush pulley, to prevent all hair, thread and ravelings from winding on the ends of the brush support or from filling the holes in the ends of the brush, thus preserving the free action of the sweeper, and sparing the user a great amount of labor and annoyance. They say: "Many attempts have been made in the past to produce something that would protect the brush journal, but not until the introduction of our device

was there ever devised a satisfactory preventive to dust and ravelings getting into the holes in the ends of the brush and making the sweeper run hard, and this great nuisance to housekeepers in the use of a sweeper has been completely overcome by our recent invention. The Anti-Raveling Collector is one of the most valuable improvements ever made in a carpet sweeper, except cyco-bearings." The Bissell Carpet Sweeper Co. purpose utilizing this great improvement in connection with all their high grade sweepers.

The American Steel & Wire Company.

It having been found impossible to reconcile estimates of value on a number of the plants desiring consolidation, the protected gigantic combination of manufacturers controlling the output of the manufacturers of wire, with $87,000,000 capital, has fallen through. Several of the companies however, believing it would have a beneficial effect as to profits arising from economy of manufacture and a combination of executive details, have formed a smaller organization with a more limited amount of capital than was originally contemplated.

This new company, under the name of the American Steel & Wire Company, will commence operations in a corporate way about April 1st.

The companies of which the new corporation will be composed are as follows: The Consolidated Steel & Wire Co., with seven plants, one at St. Louis, two at Joliet, one at Cleveland, one at Beaver Falls, Pa., one at Pittsburg, and one at Allentown, Pa.; the I. L. Ellwood Co., having two plants at Dekalb, Ill.; the American Wire & Nail Co., one plant at Anderson, Ind.; the Salem Wire & Nail Co., with two plants, one each at Findlay and Salem, Ohio; the H. P. Nail Co., one plant at Cleveland Ohio,, and the American Wire Co., one plant at Cleveland, Ohio.

The companies in the original plan of operations and now left to go alone, are the Washburn-Moen Co., with plants at Worcester, Mass., and Waukegan, Ill; the Newcastle Wire & Nail Co., Newcastle, Pa., and the Oliver Co., Pittsburg, Pa.

It is hoped and believed that stability to prices will prove more certain under the management and sustaining of a strong company with a combination of interests deeply interested in maintaining a regular market. A diminished competition will result therefrom, and under prosperous conditions especially greater security will be felt in quotations governing current sales.

Higher prices than those obtainable at present, will undoubtedly follow the announcement that this new company is prepared to do business under these more encouraging auspices.

BRITISH VS. AMERICAN BICYCLE TRADE.

In his annual report, to be printed in *Commercial Relations*, Consul Parker, of Birmingham, England, under a recent date, says:

The one marked development in this district during the past year has been in the cycle trade. From July 1, 1896, to January 1, 1897, this was very rapid. Productive power was immensely increased. Small establishments developed almost without notice into large ones, with an unsuspected capacity for turning out bicycles. The result was that the speculative interest became so dominant as to confuse the result, and produced an overdevelopment not only of manufacturing facilities, but of company promoting. This induced some neglect of selling effort and a disposition to underrate the possibility of competition, especially from the United States. In spite of the increased use of bicycles all over the world, the result of this was soon apparent in the comparative decline of exports. This did not affect the trade with the United States, because hardly any complete bicycles have been sent since the beginning of 1894. There was a determined maintenance of prices, but very little effort to make a good bicycle at such a cheap price as would bring it within the reach of workingmen. The British foreign trade in bicycles for the calendar year 1895 was $6,747,012.93: for 1896, it was $9,056,420.23; for 1897, the returns are not yet complete, but from January to September, inclusive, the most important portion for the bicycle trade, there was a falling off of more than 13 per cent. If this rate should continue over the whole year, the exports wonld amount to about $7,877,275.22.

So rapid was the growth of the bicycle industry during the period mentioned that large numbers of workmen were drawn from other lines, and the rate of wages advanced very rapidly in this and allied trades. This drew into the bicycle industry a large number of men who had had no training in this particular branch, to the temporary injury of others. Some of the latter found themselves, almost without notice, losing trained and experienced workmen, or were compelled greatly to increase the rate of wages paid them. It would probably be safe to say that the predominance of the bicycle manufacture in this district during the past two years resulted in an increase of probably 20 per cent. in the wages of skilled laborers in many of the established metal branches. Some of this advance will now probably be lost, because, as the making of bicycles becomes a settled business, it will not require the services of such a large number of men, so that many of the new ones will be compelled to seek employment at their old trades. Besides, the use of the best American machinery has increased very rapidly, thus displacing hand labor more and more.

This apparent neglect of opportunity, with its failure to recognize existing conditions, was coincident with a remarkable export movement from the United States. During the past two years, ending in each on June 30, the total exports of cycles and parts from the United States and those to the United Kingdom are shown in the following brief table:

EXPORTS OF CYCLES AND PARTS FROM THE UNITED STATES.

Description.	1896.	1897
Total	$1,898,012	$7,005,323
To the United Kingdom	613,392	2,375,675

Not only has the total export of American cycles increased by nearly 300 per cent. in one year, and that to the United Kingdom in about the same ratio, but the demand from British colonies or markets, heretofore held almost exclusively by British manufacturers of cycles, was greater by more than 175 per cent. during the period named.

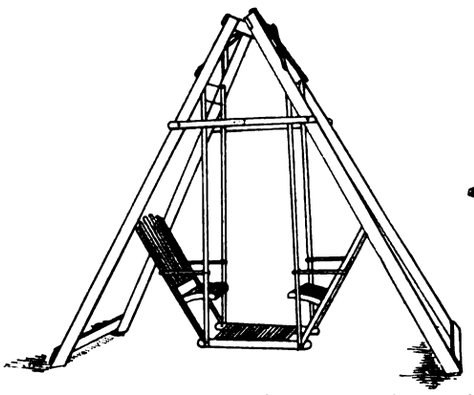
Thus the export of bicycles from the United States, insignificant two years ago, has grown to proportions almost as great as those of the United Kingdom, in spite of its earlier development and immense capital and facilities. There are indications that the conditions are now fairly appreciated by the British manufacturer, and that he will not so easily be caught again; but, as the manufacturers of the United States are not likely to surrender without a struggle the advantages incident to two years of successful trading, the former must now fight to retain what he has, to say nothing of getting back what he has lost.

The exports from the United States of other manufactures which without exception show an increase, but are not classified by countries of destination, are brass goods, clocks and watches, glass and glassware, lead and its manufactures, steel rails, iron and steel plates and sheets, wire, printing presses, typewriters, nickel, tin and zinc. An analysis of the exports from the United States also show that our manufacturers are rapidly increasing the sale of the above-enumerated products in the British colonies, especially in Canada and Australasia. In addition to the increase in these articles, they are also extending their trade in cotton goods, leather, boots and shoes, and furniture in these markets, which the British manufacturer has hitherto held. In some articles, notably in typewriters, the people of the United Kingdom are no less dependent upon the United States than are the people of the latter, there being no acceptable machine of any other make.

If one might make a suggestion to manufacturers, it would be not to seek to enter a market, especially one where competition is so sharp as it is here and in the larger colonies, without the most careful investigation made in the most improved manner by the best equipped men in each line of trade. It is only in this way that goods can be sold in an old country. The tastes of the people must be consulted at every turn. It would be useless, for instance, to offer in England bedroom suites which were merely the surplus of those made for the home market, because the demands are entirely different; and yet there is perhaps nothing for which the demand would be more steady than for products in wood.

Houses Without Chimneys.

It is curious, though true, that of all the houses, dwellings, stores, hotels, and other buildings that dot the island of Key West from one shore to the other, not one of them has a chimney or anything that will answer the purpose of a chimney. Handsome residences and lowly hovels are alike in this respect, and from an eminence gazing out over acres of roofs on all sides one is struck with the want of something to complete the symmetry of the picture. Wood and coal or fuel of any kind are unknown quantities, as the tropical atmosphere furnishes all the heat required, and for cooking purposes sticks of carbon are used, which are sold by peddlers, who hawk their wares about the streets. —*Atlanta Constitution.*



The trade marks of Messrs. Rodgers—the star and Maltese cross—were granted in 1682. So highly is it prized in distant markets that for many years before legislation made commercial piracy increasingly difficult, the firm spent £1000 a year in defending their mark against foreign rivals who struck it on their own goods.—*Exchange.*

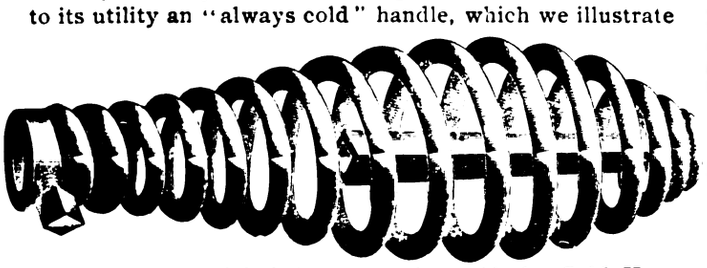
NEW GOODS AND SPECIALTIES.

The Alaska Lawn Swing.



The Dain Mfg. Co., Carrollton, Mo., are offering the trade at the present time the Alaska Lawn Swing, which is one of the most desirable specialties for spring trade that the Hardware dealer could desire; not only an ornament to the premises, but useful as well, and a great favor-

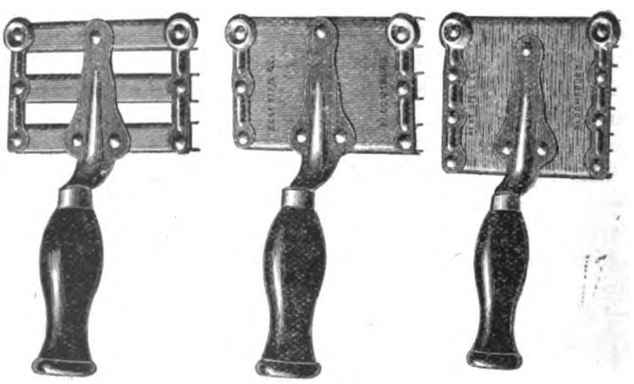
ite with the children, as previous sales have abundantly proved. It is sold upon its merits, being a popular and taking swing, made of good material and well finished. It is most portable in its make-up, its construction being such that it can be easily folded, set up or taken down with the use of the least possible amount of time, making its convenience of adjustment one of its most commendable features. The seats are so arranged they can be readily placed in any required position. All of these advantages are obtained under a simplicity of construction which enables them to be offered to the trade at $3.75 net each, which should ensure a wide distribution.

The Alaska Soldering Iron Handle.

The Troy Nickel Works, Albany, N. Y., have for years been making a revolution among all the ordinary trimmings about a stove or range, from the knobs that ornament the many doors thereof down even to the poker. These essential embellishments and articles of utility, that were in old times the hottest things to grasp by a housewife, are now found "always cold" enough for comfort, through the many useful inventions and applications of this progressive company. But the latest addition to this well-known line of "always cold" articles is one that would be least expected, even as the tinsmith himself is found essentially the same as the man we remember in our boyhood days. The soldering iron has now had added to its utility an "always cold" handle, which we illustrate

herewith, and which is known as the "Alaska Cold Handle," and was the only thing needed to make the tinners' life a very happy one. It is made as all their other specialties in the handle line are, by a steel wire spiral curved and coiled in a proper shape to fit the hand perfectly, having a socket within the coil in which to place the end of the soldering iron, and possessing a collar with a set screw to enable it to be adjusted and held firmly in its place. The manner of its construction permits any form or weight of copper to be held securely, and it needs only a trial by the up-to-date tinner and plumber to make it warmly welcome, and the old pattern of handle, which has always been unnecessarily clumsy in its form, to become entirely obsolete. Write to the Troy Nickel Works for a sample, which will be forwarded on receipt of 25 cents. The handle looks as though it would last indefinitely, and as it fits any copper, bids fair to do so.

New Electricians' Bit and Fish Wire Combined.

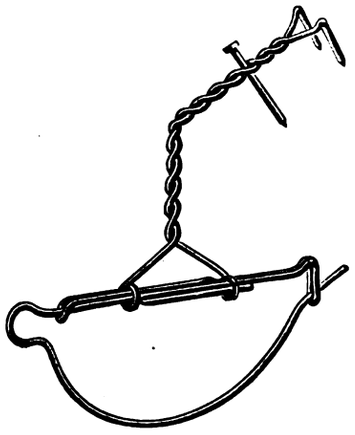


The Cleveland Twist Drill Co., Cleveland, Ohio, and No. 99 Reade Street, New York, are placing before the

electrical and Hardware trade a new and desirable article which we illustrate herewith, it being known as an "Electricians' Bit and Fish Wire Combined." It will be noticed that in its construction these bits have holes drilled through the center web of each bit. This improvement enables the electrician to fish his wire without the use of a secondary or auxiliary tool for that purpose. All bits up to and including 10-32 inch diameter, have fish holes for No. 14 wire, after the insulation has been removed. Larger bits can be furnished if required, provided with larger holes. These bits are made under Smith's patent, granted as recently as January 25, 1898. They are claimed to be made from the best quality of steel, finely tempered for the purpose designed, and very handsomely finished. They are made in even thirty-seconds, from 6-32 to 24-32 in diameter, the number of thirty-seconds constituting the List Number by which they should be ordered, and 12, 18, 24, 30 to 36 inches in length. At the New York office, which is under the management of C. I. Markham, a full and complete stock of the products of this company, including the bits described above, will at all times be found in stock.

Harman's American Curry Combs.

S. S. Harman, Bloomsburg, Pa., Surpless, Dunn & Co., sole agents, No. 55 Warren Street, New York, are placing before the Hardware trade a line of curry combs which have met with popular approval and will establish a place for themselves founded on careful construction, commendable patterns and salable styles. They are manufactured



from sheet steel, in open back and closed back styles, carefully handled with ferrule to strengthen it, well riveted and giving every evidence of durability and strength. We present herewith illustrations conveying a general idea of their appearance. Quotations for these goods will be promptly furnished the trade upon application to the home office or that of their sole agents in New York.

Bell's Eave-Trough Hanger.

Jno. W. Bell & Co., manufacturers of wire goods specialties, Mercer, Pa., have recently added to their line the article herewith shown. This is an Eave-Trough Hanger, which is made of two pieces of galvanized wire. The bar across the top is composed of three wires so arranged and bound together as to get the greatest strength possible. The roof wires leave the bar separately and reach a short

distance from the centre, and are twisted together to form the roof-piece, each terminating in a pointed driving hook. It is claimed that by this peculiar construction a hanger is produced which is exceedingly stiff and strong, that it can be quickly and easily put on the trough, and that it is very convenient to adjust and fasten to the roof. The manufacturers offer to mail a sample of it to persons who are interested. A patent has been applied for.

Young's Rim Sprocket.

Barkelew & Kent, No. 26 West Broadway, New York, who are the proprietors of the Bicycle Saddle Exchange, are placing upon the market Young's Rim Sprocket, of which we give an illustration herewith. This invaluable appliance is being used extensively throughout the United States as well as abroad, as a changeable gear. They are made to fit over the sprocket wheel, without removing sprocket or pedals. They are correctly milled and finely nickeled, and the makers guarantee them not to break, bend or work loose when properly adjusted. There is no drilling necessary to be done. To put on this rim sprocket it is only necessary to put one tooth of your sprocket in the notch in the rim; the other points all go between the teeth of the sprocket. Should the points prove too long

to fit on the sprocket, file them off a little. It is desirable that it should fit snugly; the four bolts are then placed in position, requiring but a few minutes, and the job will be found complete. They are made in all the various sizes needed for 3-16, ¼, 5-16 and ⅜ chain, and to fit any especial sprocket from 14 tooth to 25 tooth. Prices will be given upon application to the manufacturers as above.

Baker's Patent Steel Picket Fence.

The Baker Mfg. Co., Allegheny, Pa., who are manufacturers of elevator enclosures, bank and office railings, window guards, etc., are placing upon the market the Baker Patent Steel Picket Fence, an illustration of which is given herewith. It is constructed entirely of steel. The top and bottom rails are made from angle steel, and the pickets from twisted steel, forming a combination which makes the fence durable and strong while economical in point of

price. It is a style of fence quite easy to handle, and simple in construction, all the parts fitting so perfectly, any ordinary workman can erect it with ease and efficiency.

The Merchant's Rating.

There are many merchants both large and small whose credit ratings are not what they ought to be; at least, they are not what the merchants think they should be. Investigation, however, shows that in most cases, if not in all, the fault lies with the merchants themselves. One prime cause for the merchant's failure to secure the rating to which he believes he is entitled is the lack of information furnished with reference to his financial condition. Some merchants refuse all information whatever, upon the assumption, apparently, that their resources are so large as to make them independent of credit ratings. Such a position is extremely foolish. The world is prone to accept a man at his own valuation until such time as it has had the opportunity to demonstrate an error. Silence leaves the world to form its own opinion, and at this date it is very apt to conclude that because no statement is made there must be something to conceal. On the other hand, a statement frankly made and demonstrated to be correct carries opinions to the other extreme, and gives the merchant the full measure of credit to which he is justly entitled.

Several points are considered when ratings are established, in addition to capital or present worth. These include the broad questions of business integrity, of general business methods, and of habits with respect to payments. Of two men, equal in all other respects, one discounting his bills and the other habitually paying slowly, the first will have the better rating as to credit, even though the capital ratings of the two are essentially the same.

Merchants formerly bought their goods in person. They journeyed to the warehouse and factory to make selections, and thus came into direct contact with those of whom they asked credit. Now purchases are made through intermediaries. The merchant's orders are given to traveling salesmen or are forwarded by mail or telegraph. The merchant, then, should not overlook the fact that in the changes which have been made in the methods of conducting business, changes also have necessarily been made in the methods of establishing credit or determining a rating. A signed statement to-day takes the place of the personal interview of a few years ago.

The great commercial agencies that make a business of ratings are only an instrumentality that modern business has found it necessary to employ in order to meet changing conditions. The merchant who does not have the rating to which he thinks he is entitled should commence to remedy the wrong by a careful study of the situation. In the end he will be quite willing to comply with the reasonable requirements of modern jobbers and manufacturers, some of which are here pointed out. A. O. KITTREDGE.

The C. A. Baynon Co. have succeeded to the jobbing and commission business in Hardware and analogous goods, formerly done under the name of the Woolley & Baynon Co., at Nos. 97-99 Reade Street, New York. C. Arthur Baynon is president, and E. F. Drake, secretary-treasurer.

Digitized by Google

Review of the Markets.

Hardware: An increasing business growing daily more satisfactory in volume, is reported for the month, Spring goods being in demand resulting from the pleasant weather we have enjoyed through March with but rare exceptions.

The Wire Nail interests have suffered temporarily from the abandonment of the larger consolidation anticipated; but the formation of the small organization will improve the market price, stimulate freer purchasing of this important staple, and act in a beneficial way to give stability to necessary conditions of business.

Wire Nails: Ever since it became evident the combination among the many manufacturers controlling the wire interests could not be consummated, a weakness has existed in the quotations on wire nails, which has made a lower price obtainable than has been previously possible for a long time. It is extremely difficult at this time to state definitely whether the present low quotation will last very long, but purchases for the past two weeks have not been very heavy, and as the demand will necessarily soon become more brisk, a few early sales of moment may effectually brace the market against any further decline of importance. The minor consolidation of mill interests soon to commence operations, will no doubt assist in this consummation and serve to steady the market. The competition existing between the mills has made many reports of low prices mentioned, which upon investigation fail to be substantiated. We quote for carload lots, f. o. b., mill, $1.40; New York prices for carload lots on dock, $1.55, and for smaller lots from store, $1.65.

Cut Nails: The market for cut nails exhibits no movement calling for extended comment. Business has been of a limited character and quotations the same as have obtained for some time. New York quotations are $1.20 for carload lots on dock and $1.30 for smaller lots from store.

Copper Rivets and Burrs: The improved conditions surrounding the copper market have materially strengthened the quotations on Rivets and Burrs. Prices are firmly held, and the discounts named according to quantity, are 60 & 10 @60, 10 & 10.

Sheet and Bolt Copper: These goods have been held lately at advancing quotations which have settled at an advance over prices previously noted, of fully 1 cent a pound.

Brass Wire, Sheet Brass, etc.: The manufacturers have recently advanced prices on these goods covering the entire line, the higher prevailing price at which copper has been sold recently, under extremely large transactions, making the change unavoidable. The quotations here given apply only to quantities of 100 pounds or over in one order:

Roll and Sheet Brass	Per cent.	40
Patent Leveled Sign Brass	"	30
Platers' Metal, thinner than No. 38	"	40
Slitting Charges (Brass)	"	40
Sawing Charges (Brass)	"	40
Jewelers' or Gold Metal	"	40
Printers' 2x4 Sheets and Galley Sheets	"	40
High Brass Rods	"	40
Wire in Coils (No. 20 or coarser), excepting Copper Wire.	"	40
Spooling Wire (Brass)	"	40
Brazed Brass Tubing	"	45
Brass Moldings	"	45
Door Rail	"	45
Iron Lined Brazed Tubing	"	47½

Terms of payment net cash 30 days, or ½ per cent. off for cash in ten days from date of invoice.

Strap and T-Hinges: Revised list prices on this important line have been in contemplation for some time. Under date of March 15th they are announced as follows:

LIGHT STRAP HINGES.

Inches	3	4	5	6	7	8	10	12	14
Per dozen pairs	$1.35	1.80	2.20	2.85	3.45	4.00	5.50	8.00	10.50

HEAVY STRAP HINGES.

Inches	4	5
Per dozen pairs	$2.45	3.30

Inches	6	8	10	12	14	16
Cents per pound	23	21	20	20	20	20

LIGHT T HINGES.

Inches	3	4	5	6	8	10	12	14
Per dozen pairs	$1.15	1.25	1 55	1.85	2.35	3.45	4.70	6.10

HEAVY T HINGES.

Inches	4	5	6	8	10	12	14
Per dozen pairs	$1.95	2.25	2.70	3.40	5.00	7.00	9.60

EXTRA HEAVY T HINGES.

Inches	4	5
Per dozen pairs	$2 80	3.85

Inches	6	8	10	12	14	16
Cents per pound	24	23	21	21	21	21

LONG CHEST HINGES.

Inches	6	8	10	12
Per dozen pairs	$1.00	2.10	2.80	4.10

HINGE HASPS.

Inches	3	4½	6	8	10	12
Per single dozen	$0.85	1.05	1.35	1.80	2.60	3.55

CRATE HINGES AND HASPS.

Crate Hinges, 3 inch ..... $1.00 per dozen pairs
Crate Hasps (single swivel), 3 inch ..... .85 per single dozen

These list prices are subject to trade discounts as follows:

Light Strap Hinges	75, 10 and 5%
Heavy " "	80% and 10%
Light T Hinges	70%
Heavy T "	75 and 5%
Extra Heavy T Hinges	80%
Long Chest Hinges	60 and 10%
Hinge Hasps	60 and 10%
Crate "	60 and 15%
" Hinges	75, 10 and 5%

The changes advance net prices materially, but the list prices are now arranged so that one uniform discount is no longer possible, each style having its own quotation.

Corrugated Strap and T Hinges, etc.: The Stanley Works, New Britain, Conn., and New York, in harmony with the quotations above named, make the following revised list prices on their Patent Corrugated Steel and other special Strap and T Hinges:

CORRUGATED HEAVY STRAP, NO. 935.

Inches	4	5	6	8	10	12
Per dozen pairs	$2 45	3.30	4.70	7.20	10.80	16.00

Discount, 80&10%.

CORRUGATED EXTRA HEAVY T, NO. 937.

Inches	4	5	6	8	10
Per dozen pairs	$2.80	3.85	5.05	8.40	11.25

Discount, 80%.

HART'S PATENT LIGHT STRAP, NO. 928.

Inches	8	10	12
Per dozen pairs	$1.70	2.30	3.90

HART'S PATENT HEAVY STRAP, NO. 929.

Inches	4	5	6	8	10	12	14	16
Per dozen pairs	$1.00	1.25	1.75	2.85	4.25	6.00	7.50	8.75

HART'S PATENT EXTRA HEAVY T, NO. 931.

Inches	5	6	8	10	12	14	16
Per dozen pairs	$1.70	2.10	3.35	4.85	7.00	8 30	9.50

Discount, 20&10%.

WELLS' PATENT HEAVY STRAP, NO. 925.

Inches	6	8	10
Per dozen pairs	$1.75	2.85	4 25

WELLS' PATENT EXTRA HEAVY T, NO. 927.

Inches	5	6	8	10	12	14
Per dozen pairs	$1.70	2.10	3.35	4.85	7.00	8.30

Discount, 20&10%.

THE CHICAGO TRADE.

We have hardly time to answer your inquiry about trade, for the very good reason that we seem to be having a regular boom in the way of orders, and even with our largely increased force of help, and an extra amount of space, which we have lately secured, the immense amount of business that has lately come to us gives us all that we can possibly do, even though we are working day and night.

Our only regret is that the margin at which goods are sold in the Hardware line seems to be smaller at the present time than there is any occasion for.

With few exceptions, everything in the Hardware line seems to be cheaper than ever before in the history of our business. But, in so far as the bulk of the business is concerned, we have no fault whatever to find, for we have never experienced anything like it.

The war scare has had no effect whatever in checking business; as a matter of fact, we feel that the condition of both the retailer and consumer of Hardware is so much more substantial and well intrenched, with the best of reasons for their keeping up stock, that even though a war might take place between this country and some foreign nation, we feel that with the good start business has attained this spring, the Hardware trade of the West would enjoy plenty of activity right through the balance of the year.

Some of our manufacturing friends have withdrawn prices, which is an indication that the market prices may become firmer in the near future, and certainly the large

Digitized by Google

amount of steel, iron and other material that the government is using at the present time, ought to have some effect on the price of raw material in the way of betterment of prices. WELLS & NELLEGAR CO.

THE DAVENPORT TRADE.

Yours of the 16th, asking us to write you "with special reference to the effect which war scare is having upon business here," is received. The only noticeable effect on business so far is a demand for additional skilled labor at the arsenal, who have been working overtime. Should we get our proportion of the work necessary in manufacturing supplies, it will bring a large additional force of workmen to this point and hence have a stimulating effect on local trade. SICKELS, PRESTON & NUTTING CO.

THE PITTSBURG TRADE.

March has thus far been remarkably mild-mannered, and the beautiful weather has brought an active demand for spring Hardware. Jobbers are busy putting up mail orders, quick shipment being called for in every instance. The great drawback is the low value of goods. Work, work, work as hard as the whole force can go, from week to week, turning out goods, but the amount in dollars is no larger than when we did half the business with half the expense, ten or fifteen years ago.

There is certainly a gradual increase in the purchasing power of the people, a greater variety of goods called for, and more of them. When this will reach the point of stiffening prices by taxing the producing capacity of manufacturers, is a question.

The encouraging export trade we are doing is one of the best signs of the times.

The fifty million "peace appropriation" of Congress is coming to Pittsburg in part, in the purchase of projectiles. It may not be generally known that we have the most successful maker of shells here, and they have large contracts to fill. We sincerely hope the national honor may be upheld without resort to actual war, and no doubt the preparations making are the best preventive.

LOGAN-GREGG HARDWARE CO.

THE ST. PAUL TRADE.

We are glad to report a fair business and very good prospects for spring trade. Prices generally are firm, with a good feeling among both jobbers and retailers.

The "rod pool" is looked upon as broken, and, consequently, those wanting wire and nails are uncertain as to the price.

We hear rumors of war and preparation for it, but it affects us here in the West only to the extent of having a tightening in the money market. We trust to President McKinley and his advisers to uphold the honor and dignity of our country, and firmly believe that he will do so. It does us good to see the splendid position of the South to protect "Old Glory" from injury or insult, and believe this war scare will result in cementing this country together as nothing else would, and if war does result, the effect will be to make this country more solidly one than ever before.

C. W. HACKETT HARDWARE CO.

THE PHILADELPHIA TRADE.

March is not living up to its reputation for blustery weather; on the contrary, we have had a succession of smiling skies and balmy breezes, which seem to promise an early spring.

Vegetation is already considerably advanced, perhaps too much so in case we should meet with a cold spell. All this, however, has had a beneficial effect on trade, and the last few days have seen quite a brightening up in this respect, with spring goods in fair demand, while buyers seem much more disposed to order liberally.

Already in some lines, the increased business, especially from the West, is having an effect in advancing prices, and during the past few days higher quotations have been announced on brass and copper goods, carriage, stove and tire bolts, and a few other lines.

Owing to the failure to organize the wire nail pool on the lines as originally proposed, barbed wire and wire nails have been somewhat weaker in consequence, but we understand that a partial combination has been formed, representing, perhaps, the largest mills in the country, and prices will, doubtless, steady themselves in a few days.

Collections, locally, are a little slow owing to the old-time custom in some parts of Pennsylvania of making April 1st a general settling day, but the orders given by the government, on account of the war scare, are giving employment to many men heretofore idle, while, at the same time, it withdraws from the open market certain large factories which are now obliged to put in all their time on special orders, and the immediate effect is beneficial, as the money paid for wages finds its way later into the channels of trade.

On the whole, prospects are encouraging for almost all classes, and we think that merchants are in a more hopeful frame of mind than for some years past. While there has been very little positive improvement as yet, everything seems to point to a steady advance toward renewed prosperity. BIDDLE HARDWARE CO.

THE COLUMBUS TRADE.

The mild weather has hurried trade wonderfully, and it is hard for manufacturers, as well as jobbers, to keep up with the demand for season goods. Orders that were placed soon after the first of the year for shipment April 1st are wanted immediately, and every mail brings requests to forward goods ordered, without delay. Prices have not changed much since our last letter. Bolts are 5 per cent.

Digitized by Google

higher. Rope seems to be on the up-grade at a rapid rate, and if manila don't look out, sisal will be the highest. If we are not mistaken, the demand for manila will increase and sisal decrease, as there is more than ½ cent per pound difference in the value of the two, while now there is only that difference in the cost. Strap hinge manufacturers have adopted a new list on hinges, which is very much higher. If any one can show us the wisdom of doubling a list up, and making the discount correspondingly high, we would be willing subjects. If it is done with the hope of getting better prices, we think it is a failure. The old list is familiar to every dealer now, and we cannot see the sense of changing it.

We hear considerable gossip about war and what we do not know about it would fill a large book, and what we do know could be put in a pamphlet. The daily papers publish things to-day, and to-morrow say they did not know anything about it. If fact, you do not have to wait until to-morrow for a denial, for it often happens that it comes as a postscript in the same issue. The truth is that newspapers as a rule are getting to be so unreliable, you never know whether the reports are based on facts or the imagination of some reporter.

We cannot see how war would affect mercantile interests materially except indirectly. It has already given a great impetus to the ammunition, coal and lumber business. If war should be continued long, it would require an increase in the army and relieve the glut in the field of labor, which would give employment to men who are now out of employment. We do not expect war, as we believe the difficulty will be arbitrated, and sincerely trust it will be settled without resorting to war. But Uncle Sam cannot be insulted by Spain or any other nation unless they expect to pay the penalty. SMITH BROS. HARDWARE CO.

THE CLEVELAND TRADE.

Competition is chargeable with most of the friction between capital and labor, and some modification of its relentless cruelty seems to be advisable. It has forced a combination among laborers, and strongly suggests the advisability of the same thing among manufacturers. To prevent this, already in many of the States laws have been passed prohibiting agreements that tend to maintain prices.

Competition, useful in an earlier age, seems to need modification in a higher civilization—cheapness is not a synonym of happiness. Manufacturers, as a rule, prefer to pay fair wages, but are often compelled, as a last resort, to reduce the wages or close their shops.

The German system of co-operation among manufacturers has resulted in benefit both to labor and to capital, and the great prosperity in Germany is ascribed to it. It is a new field for legislation and should be handled with the greatest wisdom, and it would be wise to investigate the German method. There is great danger of crippling industry and injuring both labor and capital by hasty legislation. Organization of laborers is recognized of value, and why may not that of manufacturers also? It seems to be so in Germany. If the public are protected in one case, why may they not be in the other?

Our present system tends to force wages to the lowest limit, and results in the failure of many manufacturers, and if legislation can aid in correcting this evil, it would be a public benefit, for competition that forces prices below cost, results in injury to the consumer, dealer, laborer and manufacturer alike. Co-operation seems to be the remedy.

Notwithstanding the war talk, trade in March shows a steady improvement. The foundation for a good time is laid in the West and not in Wall Street. Purchases are not made on speculation, but on demand for the goods from consumers, and this furnishes evidence of an inherent prosperity in the country districts. Our ills are slowly being cured, and it will give us wealth if not contentment. Discontent is not necessarily an evil, as love of the best may be the father of it. Indifference may be and often is more dangerous.

The safest indication for anticipating continued improvement is that actual demand from consumers is compelling purchases.

Rumors of success and failures of combinations will continue to strengthen or weaken prices, but do not materially affect the amount of business.

The bulls and bears of Wall Street may continue to bellow and growl, but all unconscious of it, the great West is moving on to victory, and will make the nation great.

THE LOCKWOOD-TAYLOR HARDWARE CO.

Lyon & Grumman, Bridgeport, Conn., write as follows in commendation of the "Baker fence," manufactured by the Baker Mfg. Co., Allegheny, Pa., and advertised on page 37: "As the year 1897 is about to close, we take pleasure in communicating to you the satisfaction we have enjoyed in selling your fence for the past several years. Wherever we erected it, it met with approbation and gave universal satisfaction. The fence makes a very neat and pretty appearance, and adds materially to the pleasing surroundings of a cottage home. We expect the year of 1898 will bring us a large increase in our orders for your popular fencing."

The Remington Arms Co., Ilion, New York, and No. 315 Broadway, New York, are sending their friends a Remington Desk Tray, which is a fac-simile of their 1898 Remington Special Chain and Sprocket, printed in four colors. This is a handsome ornament to use for a pin tray or other purposes on the desk, and the company will be pleased to send one to any address for three two-cent stamps.

STANLEY'S
PATENT
Roofing Bracket.
STANLEY
Rule & Level Co.
New Britain, Conn.
SOLD BY ALL HARDWARE DEALERS.

The parts are of Spring Steel, firmly riveted together. Push the beveled ends up under two layers of shingles, already nailed down; the Bracket has two separate bearings on the roof, and is so formed that any increase of pressure from above, increases its stability.
One dozen per minute can be placed in position, or removed; and great economy in lumber and nails will be found. There are no loose parts to get lost; and no nail-holes are made in the roof. In constant use these Brackets will last a life-time.
No. 1. Roofing Brackets, 8 inch, ½ dozen in box. Per Doz., $3.00

Value of Advertising.

In a discussion upon the subject of "Advertising as a Business Force" before the Merchants' Association, New York, Robert C. Ogden, a resident partner of John Wanamaker, made the following remarks, which were loudly applauded by the large audience present. He said, in part:

"We all know that advertising is a business force, a very great power that has to be recognized most thoroughly. Concerning the principle of advertising I am not quite clear myself, but if I should undertake to make an analysis of a retail business I should divide the subject into three parts—the merchandise, service, and advertising. All three of them are equal in their importance to each other, but I should characterize the advertising as the dynamic power of the business. With the public's mind fixed upon business as it now is, with the competition that exists between traders, it is undoubtedly the fact that without advertising of the proper kind a business cannot be successfully prosecuted to any large degree. Therefore I consider the advertising as the force which is to vitalize all the other work that is put into the business.

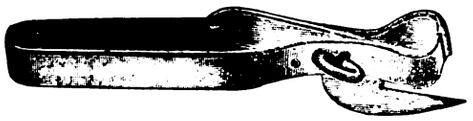
"After the merchant has purchased his goods, after the service is hired, the steam that is generated in order to make the machine move is the advertising.

"One mistake of the advertising merchant is that he does not take advertising sufficiently seriously. It is regarded as an element that is somewhat important and yet a little strange. It is not thought of generally as holding the very serious and important relation to the public at large and to the business itself that it really should occupy.

"Say a man sends his agent to advertise his goods; that agent at once becomes an Ishmaelite. Every man's hand is against him. If he succeeds in getting past the servant and then the butler of the house, it is still doubtful if he can secure the attention of the owner. Let him send his advertising matter by mail, and every obstacle is put in the way of its reaching the person for whose eyes it is intended. For this reason a merchant must place his advertising in position, and in a manner which will insure its being read by those whom it is intended to reach.

"The newspaper is the business man's rostrum; through its columns he speaks to the public, and for that reason he must regard it as a virtual key to his character. By his sayings the people shall know him and judge him. He must therefore first of all be true—true to himself and true to his readers. He must use good English and make his advertisement as attractive as possible in form, type, illustration, and words. A splendid tribute to American advertising was recently paid by Mr. Gladstone. A friend of mine called on him and noticed that he kept all the American issues of magazines which are also published in England. Upon asking him the reason for this, the grand old man replied: 'Oh, I keep the English editions, too, but they are for Mrs. Gladstone. I like to read the advertisements in the American editions. They are in themselves literature, and I can gauge the prosperity of the country by their very appearance.'"

In closing, Mr. Ogden, speaking of the results of advertising, said: "As for the facts which come from advertising, that is a matter that cannot be demonstrated by any set theory. It resolves itself to this: A business man who advertises continuously—and he must advertise continuously to achieve any results—soon notices the increase in his business and becomes prosperous. This is the test. There is no other, and I cannot conclude my few remarks any better than by ending with the old proverb:



"'Early to bed and early to rise,
Don't get tired—advertise.'"

Frayed Fagin—"So de woman cried out 'Welcome!' an' yer waltzed right in?"

Chewed Chauncey (groaning)—"I did—an', oh, oh, Lord! Welcome wuzn't a 'ting but de name uv her English bulldog."—*Exchange.*

Past Due Accounts.

In a very able address delivered by W. H. Preston, ex-president of the National Association of Credit Men, at the convention of the Iowa and Nebraska Retail Implement Dealers' Association, at Council Bluffs, Iowa, the speaker referred to past due accounts as follows:

"When a statement of past due account is received, the amount should be promptly remitted or an acknowledgment of statement sent and reasons for non-payment given and the prospects for payment in the future. There is nothing that will influence a Credit Man more than the treatment of statement of past due account, for in this is shown one of the important characteristics of the conduct of the business. A statement of past due account is always a request for immediate attention and should be granted this courtesy without delay, and if remittance is not made, reason should be given. It is customary with many houses to give a ten days' notice of intention to make a draft. When such notice is given preparation should be immediately made to meet the draft, but if you prefer not to have draft made it is your duty either to promptly remit the amount or request the draft to be withheld, giving reasons for such request and prospect of payment."

Increase Lines.

Without encroaching upon department store methods, which many Hardware dealers concede to be very obnoxious, there are opportunities of which every wide-awake merchant should take advantage to increase his lines. The expense attached to an extension in different lines of goods should not deter a dealer from investing in them when they come within the extent of the stock which he already has. A merchant is shortsighted who allows himself to be appalled by the immediate outlay, and does not realize that an extension of stock means an increase in business and profits. There is no shortcoming more detrimental to prosperity or success than this one of shortsightedness, which cannot venture on any new project because effort and expense seem dreadful at first. If inventors felt like this, we would still be riding in a stage coach, cooking over fire-places and working with the crudest and most unweildy appliances. To be brave and dare to do a great deal does not imply that a man is venturesome or imprudent. Every man who desires to attain a modicum of success should carefully study the methods of others who are known to have reached the promised land for which he himself is bound. Endeavor to ascertain what lines of goods they sell. Careful observation in city retail stores is a good assistance to a mercantile education. By the addition of goods which really appertain to the Hardware business, customers who have been in the habit of going to another store for them will be very glad to find these at the same place where they do their buying. Take, for example, lamps; many Hardwaremen do not keep these in stock, yet they are appropriately used in conjunction with Hardware, and as they can be both useful and ornamental, no time should be lost in obtaining a line of them.—*Stoves and Hardware Reporter.*

A. N. Jacobs, No. 491 Broadway, New York, a leading uptown dealer in "job lot" specialties, has in preparation a catalogue of desirable job lots in Hardware and sporting goods, which will be ready on April 1st. This catalogue will be mailed free to any Hardware dealer upon request, and will be found especially attractive.

A young man may lose minutes and hours by being obliging, but it is not in dollars or in other people's esteem that he will be any the poorer.—*Hardware & Metal.*

Prefer some town between New York and Chicago, where more capital can be secured to enlarge our business; can employ seventy-five men with present business. Want town cheap coal and good railroad facilities. We have the best business and trade of any concern that makes Hardware Specialties in this northern country and many which we control. Could move the business as soon as we fill orders we have on hand, which will take about three months. Plant and business will be all clear. Will give all details to any person or persons that are looking to make money and increase the population of their town and a business that has come to stay. For particulars address

"EVERYTHING IS COMING UP."
BUSINESS IS BETTER AND THERE WILL BE A LARGER DEMAND THAN EVER FOR OUR

Sheep Skin Mitten.

Acknowledged to be the best article for polishing stoves, as it does away with the old time dirtiness of the work, making this work a pleasure. Also invaluable for polishing brass or glass, or silverware, which it does not scratch. For tan shoes and cleaning bicycles it has demonstrated itself a conspicuous success.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over are requested to contribute to this page News of new factories or companies, changes, improvements, etc, will be gladly received, and promptly published.

New Companies, Etc.

Adrian, Mich.—Among the latest in corporations is the Gibford Mfg. Co., of this city, with a capital of $5000. The firm will manufacture all kinds of specialties, among which will be bicycle chain cleaners.

Albany, N.Y.—Reuben Wood's Sons' Co., sporting goods and fireworks. Capital, $30,000. Office, Syracuse. Directors: William Allen Butler, Alice L. Wood and Carolyn J. Wood.

Baltimore, Md.—The Beery Heating Co. has been incorporated by Otto Bruggeman, William A. Beery, Ira Plumley, Jos. C. Hobbs and Jas. E. Tippett. Capital stock, $5000.

Bellville, Ill. — Another nail factory is about to be established in this city, Solomon Mueller having ordered four new machines for making wire nails. His factory will be located at No. 407 East Main Street. His son, George Mueller, and Harry Wangelin are also interested in the proposed new industry.

Chicago, Ill.—Model Window Hinge Co. has been incorporated by George W. Reed, Reuben H. Peters and George H. Parker; to manufacture window hinges. Capital stock, $50,000.

Cincinnati, Ohio.—The Davis-Egan Machine Tool Co., capitalized at $500,000, has been licensed to transact business in Illinois, with a capital stock of $8000.

Cleveland, Ohio.—The Kirk-Latty Mfg. Co. has been incorporated for the purpose of manufacturing and dealing in bolts, tacks, nails, Hardware, tools and other steel specialties, with $5000 capital stock. The incorporators are: F. M. Kirk, S. D. Latty, H. T. Latty, William Bates and J. H. Woods.

Dallas, Tex.—The Rose Mfg. Co. has been incorporated by J. D. Crawford, P. A. Norris and I. E. Rose; to manufacture and sell goods, agricultural and farm products, etc. Capital stock, $50,000.

Goodwater, Ala.—The Gurley Handle Co. has been organized to manufacture all kinds of hickory handles.

Howell, Mich.—The Best Wire Fence Co. has been organized by A. Prindle, G. Hornung and C. F. Farrar.

Jackson, Mich.—D. M. Osborne & Co., manufacturers of agricultural implements, of Chicago, Ill., will establish headquarters in Jackson.

Jackson, Mich.—Reid Implement & Seed Co. has been incorporated, with a capital stock of $5000.

Lees, Mo.—The Powell Hardware Co. has been incorporated by E.M. Powell, Jonathan Keirsey and R. J. Powell. Capital stock, $4500.

Nashville, Tenn.—The Harding Mfg. Co. has applied for charter, with J. A. Norris, John Harding, Jr., Innis Brown, C. E. Brown and E. Brown, as incorporators; to manufacture farm implements and machinery.

New York, N. Y.—Benjamin C. Smith & Sons has been incorporated by B. E. Smith, B. C. Smith and F. A. Smith; to carry on a plumbers' supply business. Capital stock, $10,000.

New York, N. Y.—Woods Specialty Co.; to manufacture Hardware. Capital, $100,000. Directors: F. T. Pember, E. D. Woods and C. E. McFadden, Granville; H. T. Seymour, New York City; N. T. Boyd, Poughkeepsie.

New York, N. Y.—The Groton Mfg. Co. has been incorporated by E. W. Ketcham and others; to manufacture machine tools. Capital stock, $5000.

Ottawa, Ont.—The Canadian Nickel Steel Co. has been incorporated by Alexander Fraser and others, with a capital stock of $20,000,000.

Portland, Ore.—Eclipse Hardware Co., Astoria; Max Skibbe, J. N. Laws and W. C. Laws; $4000.

Rich Hill, Mo.—The manufacture of harrows will be established by a $25,000 stock company.

St. Paul. Minn.—The Grinals Farm Machinery Mfg. concern have filed articles of incorporation. The capital stock is placed at $25,000. The incorporators are: Elizabeth A. Grinals, C. D. Grinals, Ripley B. Brawer, of St. Cloud, and Walter Gregory, of Minneapolis.

Syracuse, N.Y.—Articles of incorporation of the Sweet Steel Co. have been filed with the county clerk. The incorporators will be A. C. Chase, J. William Smith, Ethel Sweet, John S. Finke and Peter Eckel. The capital stock of the new company is $100,000, of which $75,000 has already been paid in.

Toronto, Ont.—The Toronto Wire, Iron & Brass Works Co. has been incorporated by G. B. Meadows and others. Capital stock, $20,000.

West Saginaw, Mich.—A plow factory will be located here by D. C. McKay and Samuel Fair.

Changes and Improvements.

Chicago, Ill.—Robert Iron Works, certified to an increase in capital from $6000 to $10,000.

Chicago, Ill.—The plant of the Bonnet-Nance Stove Co., of Quincy, Ill., will be removed to Chicago Heights. The foundry will be 86x450 feet, twenty-five feet high, with a truss roof the entire length of the building. The main building will be 50x800 feet, two stories high, with boiler and engine house attached, which will be equipped with two freight and passenger elevators, electric light plant, a 200-horse power Corliss engine, two boilers, and all of the modern improvements to be found in an up-to-date stove works.

Indianapolis, Ind.—The Home Stove Co. have decided to remove their plant from Greenfield to Indianapolis. A suitable building has been selected, and the move will be made in a short time. The company now employ 125 men, but the force will be increased to 150. The plant has been running steadily for the last four years.

Kansas City, Mo.—The Gille Hardware & Iron Co., St. Louis Avenue and Santa Fe Street, one of the large general Hardware houses here, have found it necessary to enlarge their tinware factory in order to supply the growing demand of the trade. The old Huggins cracker factory building, 50 by 100 feet, four stories and basement, on St. Avenue near Santa Fe Street, has been leased, and hereafter it will be used for the manufacture of a general line of tinware.

Raynham, Mass.—The Diamond Tack Co. contemplates a large addition to the buildings and a new water wheel this season.

West Union, Ohio.—The Manchester Stove & Range Co. has been reorganized, and will start with a full force in a short time.

Recent Fires.

Kansas City, Mo.—The pattern shop and offices of the Kansas City Wire & Iron Works, at Rosedale, have been totally destroyed by fire.

Miscellaneous.

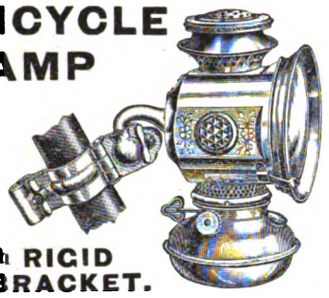
Albany, N. Y.—At a meeting of the directors of the Albany Hardware & Iron Co., the following officers were re-elected: President, Charles H. Turner; treasurer, James K. Dunscomb; secretary, W. B. Wackerhagen.

New London, Conn.—Twelve carloads of powder have been shipped from Hazardville, Conn., on a government order to Springfield, and the Hazardville powder mills are running night and day.

Reading, Pa.—All the departments of the Penn Hardware Co. are running with 500 hands and more than a hundred work until 10 P.M. four days in the week. The Reading Hardware Co. are running full-handed and on full time—nine hours a day and six days in the week.

Southington, Conn. — The cutlers employed by the Southington Cutlery Co. have received an increase of wages of ten per cent. The increase in pay is voluntary on the part of the company, the men having made no request for same. Knife employees of other departments have recently had their wages increased in like manner.

Springfield, Ill.—The Sattley Mfg. Co. are having a large demand for their plows, and have been compelled to put on an additional force of forty men, and are working night and day to fill their orders.



Westfield, Me.—The mill of the Bangor Edge Tool Co. has so far manufactured about 12,000 cant-dog stocks from lumber furnished by Cyrus Chase.

Windsor, Conn.—The plant of the Spencer Automatic Machine Screw Co. has been kept busy for some time past filling foreign orders for its machines, and there are large orders ahead for shipment to England. The men have had to work overtime to keep up with orders.

Genesee, Wis.—George Fox, bicycle factory, destroyed by fire.

Lorain, Ohio.—The bicycle repair shop of Frank Warnock, on West Avenue, has been destroyed by fire.

Rome, Ga.—The E. E. Forbes Music & Bicycle House, damaged by water; insured for $2000.

Miscellaneous.

Bay City, Mich.—The new retail house of the National Cycle Co., next to the factory, will be completed in a short time, when the local trade can be taken care of more comfortably.

Grand Rapids, Mich.—The local bicycle factories will turn out about 17,500 wheels this year, the Grand Rapids Cycle Co. leading with 10,000.

Marietta, Ohio. — The Lobdell Works, manufacturers of bicycle rims and handlebars, which were recently destroyed by fire, will be rebuilt with large increased capacity. These works give employment to 200 men.

Middletown, Conn.—The Keating Wheel Co. have received an order from foreign sources for 800 wheels. The company now have enough orders to insure continuous work for at least a year.

Pottstown, Pa.—The Light Cycle Co. is rushed with orders at present, and recently started working several hours overtime. The plant employs about 150 hands.

Winsted, Conn.—The Winsted Metalliform Co. have recently begun the manufacture of bicycle lamps, on an extensive scale, and have taken large orders. The lamps are designed to burn acetylene gas.

Reasons Why it is the Best.

The DOUGHTY Perfection Automatic Bicycle BELL.

Made of best Bell Metal, highly polished and nickel-plated, Anti-rusting The only Automatic Bell always ready for instant use (fast or slow speed.) No loose parts to rattle and get out of order. Does not roll on tire—only press thumb lever on handle bar—throws little rubber tip in contact with spokes—Bell does the rest. The only Bell with a clear electric ring without a battery. You will pronounce it the Perfection in Bell ringing. **Price $1.00 each.**

The Very Latest.

Patented Aug. 24, '97.

The "Eclipse Cleanable" Refrigerator is original.

It is the only removable ice chamber refrigerator having a removable flue through which pure cold dry air is introduced in the bottom of the provision room, getting under and between the provisions, and forcing the warm moist air and odors upwards, and creating a positive current or circulation. All other makes are imitations of the first crude removable tank refrigerator introduced years ago, and have an ice box set in top, from which cold, heavy air falls by gravity and forces downward the objectionable matters. THE ECLIPSE HAS THE LARGEST ICE CAPACITY.

HAS ALL THE CLEANABLE FEATURES OF OTHER MAKES.

HAS MORE TALKING POINTS THAN ANY OTHERS.

THE ECLIPSE REFRIGERATOR WORKS, BURLINGTON, VERMONT.

ESTABLISHED 1882.

To Bicycle Riders.

WE MAKE OUR TUBE
OF FIFTY CARBON STEEL

Because a Tube like this of our .50% CARBON STEEL

Is just as strong as a Tube like this of .25% CARBON STEEL

While weight for weight in a Bicycle our FIFTY CARBON Steel will last so long [redacted]

and TWENTY-FIVE CARBON Steel will last only so long [redacted]

NOTE THE FULL IMPORT OF THE PARALLEL LINES.

The comparison which they graphically make indicates the result of the prolonged investigations of the most practical experts of the world.

That the tests in our own laboratory corroborate these results is merely so much to its credit; that the same is true of actual trial on the road equally proves the trial to have been made in bicycles of correct design and construction. THE FACT REMAINS.

The margin of safety is greatly increased by the use of this tube. Every bicycle manufacturer should use it; every dealer should insist on having it; every rider should demand it. Send for catalogue.

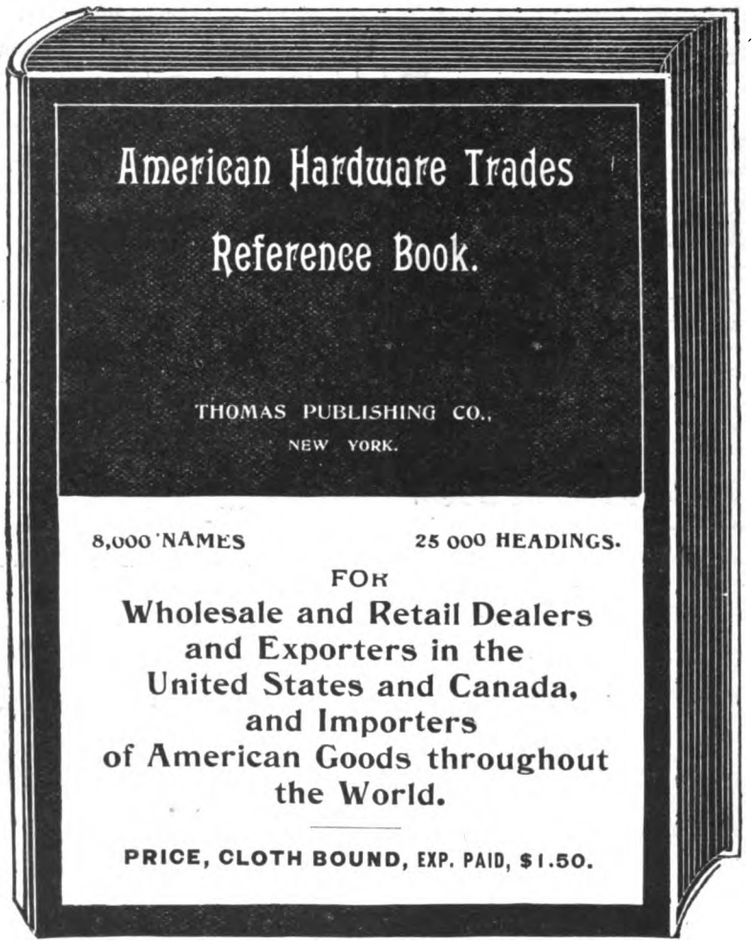
EVERY PROSPEROUS HARDWAREMAN

MUST BE WELL POSTED.

Secure the benefit ot all possible Competition in Buying. A Dealer's Reference Book is essential. Here it is. A complete one, independent of any other publication, giving the names of ALL manufacturers, those who do not advertise, as well as those who do. The only work of the kind maintaining this feature. 1898 edition ready in few days. . . . .

IT COVERS THE FOLLOWING TRADES:



Hardware of All Kinds,

Hardware Specialties,

Agricultural Implements and Machinery of Every Description,

Carriages, Wagons, Harness,

Stoves, Ranges,

Tinware, House-furnishing Goods, Bicycles, Plumbing, Steam and Gas Fitting Goods of all Kinds and all Other Articles, Machines, etc., Handled by these Trades.

The object of the work is to enable the above trades to instantly find all the manufacturers of any article desired; the main and branch offices of every manufacturer in the trade, and the financial rating of every manufacturer.

Completeness.—The names of all manufacturers, regardless of whether they advertise or not. We give the names ver 8,000.

Classification.—By our method of classification, we index every manufacturer under every article manufactured. We name some manufacturers under as many as 300 headings. We make no charge whatever for any number of headings required to completely represent every manufacturer. The book gives nearly 25,000, fifty times as many as any other publication gives to these trades. We do not use general headings, such as are used in ordinary directories, as for instance: "Hardware," "Agricultural Implements," "Vehicles," "Plumbing Goods," etc., but state the specific article and the special kind of article, and for what purpose used, as for instance: "Door Locks," "Bicycle Locks," "Refrigerator Locks," "Gang Plows," "Sulky Plows," "Swivel Plows," "Ditching Plows," "Brass Faucets," "Wooden Faucets," "Beer Faucets," "Steam Heating Boilers," "Combination Steam and Hot Air Boilers," "Air Valves for Radiators," etc., etc., throughout the 25 000 headings, naming every article, every special kind of article needed by these trades. It enables the user to instantly find exactly what is wanted. Nothing like this minute classification has ever been attempted before.

Ratings.—The financial rating of every manufacturer is given.

SAVES SUBSCRIBERS 100 TIMES ITS COST.

THOMAS PUBLISHING CO., SOLE PROPRIETORS, 40 Broadway, New York.

Special to our Subscribers.

WE have contracted with the Thomas Publishing Co. for 10,000 copies of the 1898 American Hardware Trades Reference Book, which we are offering to the trade of the United States, with a year's subscription to "Hardware" for $1.50; the price of the book alone. . . . . .

« « « ◆ » » »

Those who are already paid subscribers to "Hardware" may take advantage of this offer by sending 50 cents. . .

« « « ◆ » » »

We do not agree to hold this offer open for any specified length of time, as it will be impossible to furnish the Book alone at less than $1.50 after these 10,000 are taken.

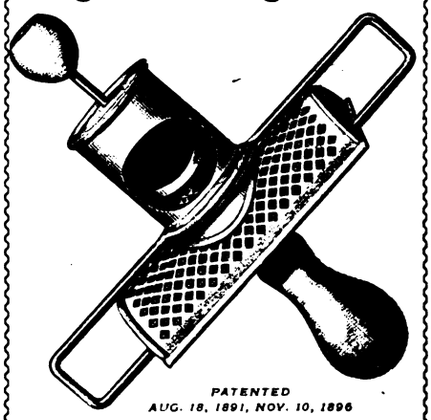
The ALASKA LAWN SWING.



THE demand for the **Alaska** is such that its merits and selling qualities cannot be questioned. Made of good material and well finished. Its peculiar construction is such that it can be easily folded, set up or taken down in an instant. The seats are thoroughly adjustable; can be placed in any position desired. While the **Alaska** possesses many desirable features not found in others, yet its simplicity in construction enables us to quote——

A price to the trade only, of $3.75 each; terms net cash.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

ALASKA SOLDERING IRON HANDLE

FITS ANY IRON.

Want to see one? Send us 25c. We will mail you one.

. . . ALWAYS COLD.

Sold by all Jobbers in Hardware or Plumbing.

Made only by . . . .

TROY NICKEL WORKS,

ALBANY, N. Y.

"BROUGHT US MANY PAYING CUSTOMERS."

Defiance Bicycle Co., Defiance, Ohio. [*Bicycles*]: We are much pleased with the results obtained from our advertisement in HARDWARE during the past season. It has brought us many paying customers, and we feel that the money paid you was well invested.

"HAVE FOUND IT SATISFACTORY."

The Ideal Mfg. Co., New Haven, Conn. [*Reloading Tools*]: We recognize your medium from time to time, and have found it satisfactory.

"OF INTEREST TO LIVE DEALERS."

Van Voorhis & McNair, Crawford, Neb.: We like the journal very much. It always comes to our desk full of bright, sound matter, that cannot but be of interest to all good live dealers.

"JUST THE PAPER RETAILERS WANT."

Henry E. P. Pritchard, Philadelphia, Pa.: Enclosed find $1 for which please send me HARDWARE for one year. It's just the paper retailers want.

Digitized by Google

THE POPULARITY

Of our premium list, evidenced by the eagerness with which new subscribers are availing themselves of the opportunities offered, has compelled us to extend the time limit We will therefore continue this offer until further notice to **NEW 1898 SUBSCRIBERS.**

ALL THE NEWS. **HARDWARE** HARDWARE EXCLUSIVELY.

Needs no introduction to the Hardwareman. He already knows what a valuable adjunct to his business this semi-monthly visitor is, with its reliable "Prices Current," its "Market Reviews" and its general news of interest to the Hardware trade.

FOR $1.00 We will send "**HARDWARE**" for one year, and ANY **ONE** of the following articles:

A dating stamp that will last till 1902, with 12 special entries for marking letters and bills.

Huebsch's Year Book.

A 365-page Cloth Bound Diary—one page for each day in the year—4½x9 inches, bound in flexible cloth covers. Invaluable to merchants, manufacturers, bookkeepers, clerks, etc.

Indexed Coupon Books

representing one hundred dollars—to enable you to put your business on a cash basis—do away with pass books——to prevent bookkeeping errors. No disputes over accounts—no delinquent debtors or bad accounts. Used throughout the country now instead of credit system.

A numbering stamp, which will number from 1 to 999.999. You can number every article in your store with this stamp. It is indispensable to the careful retailer.

FOR $1.25 We will send "**HARDWARE**" for one year and your choice of the following six premiums:

1. A Perfect Fountain Pen . . . . with 14 kt. gold pen and a filler, warranted to give the most satisfactory results. Made by one of the oldest fountain pen houses in America, and fully guaranteed. . .

2. A Silver Mounted Stationery Set. Seal, letter opener, and paper knife with pearl blade—that gives an air of elegance to your desk. . . .

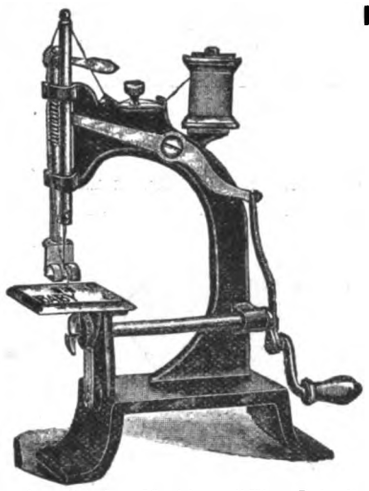
3. Huebsch's Year Book . . . . (large size), 6x9 inches, bound in flexible cloth, made to last. IT IS YOUR BUSINESS MEMORY, and will not fail you.

4. If You Have a Good Name . . . you may like to see it in your window. We send you ten of the best white enamel 4-inch letters, with a half pound of best cement and full instructions for putting up. If 4-inch letters are too large, send for twenty 2-inch letters. If you require more than the quantities specified, we will send you extra letters; 4-inch at 6 cents each, and 2-inch at 3 cents each. . . . . .

5. Half Dozen Photographs. . . . . Send us any photograph, with your name and address written plainly on the back, and we will return it to you together with six medallion copies of the original, mounted on celluloid, with a wire stand. We guarantee the medallions to be as good as the original. . . . .

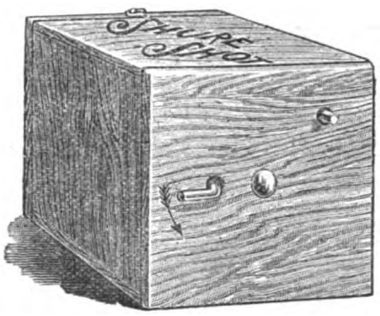
6. Bushnell's Price Book . . . bound in seal morocco, 4¾x6⅞ inches, 200 pages, adapted to the use of the traveling man, the home salesman and the office. Neatly indexed, red edged, ruled faint, printed headings. This practical Price Book is in almost universal use. . . . . .

Address all communications to



HARDWARE PUBLISHING CO., No. 143 CHAMBERS STREET, NEW YORK CITY.

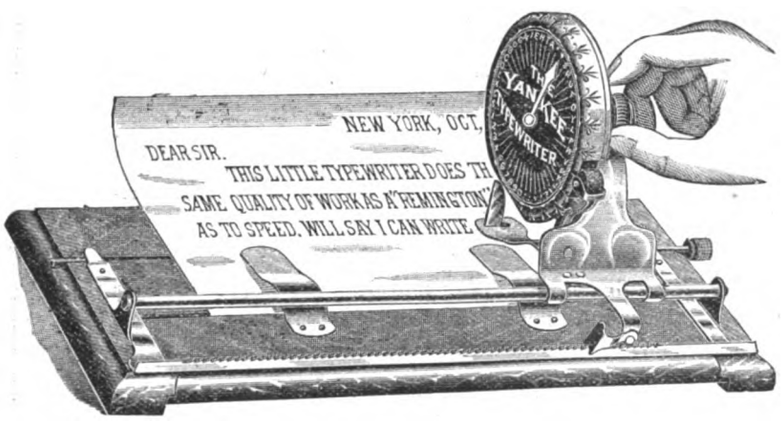
Digitized by Google



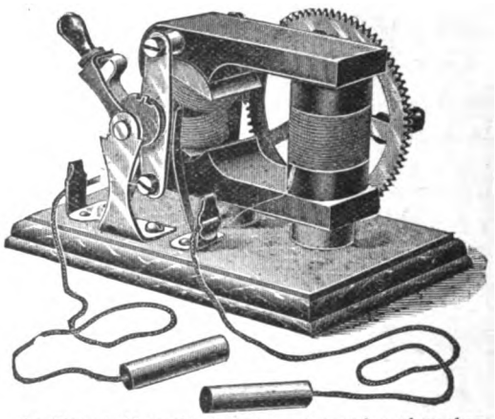
You Live

In hopes of always securing the greatest "helps" to your business. *"HARDWARE"* is a "help." It helps the dealer to buy economically, and helps the manufacturer to sell extensively. *"HARDWARE"* for one year, and any one of the following attractive premiums sent post paid for ***$1.50.*** This offer applies to

NEW 1898 SUBSCRIBERS ONLY.



A perfect Sewing Machine. "The Baby" It uses regular Wilcox & Gibbs needles and ordinary machine thread. It is strong and simple; won't get out of order; can be clamped on any table, and is so constructed as to make it almost impossible for the smallest child to injure itself with the needle.



Just think- a complete Camera and an outfit to print, develop and mount. Makes a picture 2½x2½ inches, and its work compares favorably with higher-priced ones of which it possesses the best features, including an instantaneous shutter, adjustable to time exposures if desired, and operated by a lever and button just as your $50 outfit is.

An Open-Faced Nickel-Plated Watch; fully guaranteed for a year. Winds and sets in back of case, and will stand rough usage, and keeps as good time as an expensive watch.

The Yankee Typewriter.—Will write 15 to 20 words a minute; will take any size paper, from postal card to foolscap size. Has automatic carriage and paper feed. Mounted on highly finished hardwood base, and packed in a strong wooden case.

An Electric Magnetic Machine.—A wonder of mechanical perfection. Supersedes the old style medical batteries, and gives a stronger current without the expense of renewals It has a current regulator which can be adjusted to a nervous child or to overpower the strongest man.

OF COURSE, YOU TAKE A MAGAZINE,

Probably one in the subjoined list, if it is not, let us know, and we'll put it there, The first column shows the price you would have to pay for the magazine alone. The second column indicates the price at which we will send you "HARDWARE" and the magazine for a year. In many cases you will find the combined price is no more than the single one, and you know you can't afford to do without "HARDWARE." This offer applies to **New 1898 Subscribers only.**

OLD SUBSCRIBERS AND NEW

May take advantage of the following liberal offers:

1. "American Hardware Trades Reference Book," published by Thomas Publishing Co., with "HARDWARE" for one year, will be sent on receipt of **$1.50.** Those who are already paid subscribers to "HARDWARE" will receive the book, on sending **50c.** This book is a complete directory of the manufacturers of Hardware in the United States. Each manufacturer is classified under the name of every article he makes. The financial rating is given in each case; 8000 Names; 25,000 Headings.

---

2. "Ladd's Discount Book," with "HARDWARE" for one year, for **$3.00** Single Index, and **$4.00** Double Index. Present subscribers will be credited for one year in advance. If you have to calculate discount this comprehensive work will save many times its price in time, trouble and mental strain. Its comprehensive character may be realized from the fact that it contains nearly 200 pages of positively accurate tables or more than 120,000 computations giving at a glance the net of any sum at all discounts from 1 per cent. to 95 per cent. together with a great range of combinations.

---

3. "American Hardware Store," with "HARDWARE" for one year, for **$3.00.** The "AMERICAN HARDWARE STORE," containing 450 pages and 500 illustrations, is an exhaustive treatise on the most approved methods used by the successful merchants of this country to arrange, display and sell Hardware. It is edited by R. R. Williams, editor of the *Iron Age*, and published by the David Williams Co., of this city, at $3.00. By a special arrangement, we are enabled to combine "HARDWARE" with the book at the same price. Present subscribers will be credited for a year, in advance of their present subscription.

Fill out Order, and address as below:

"LIKED 'HARDWARE' FROM THE START."

Gibbs Mfg. Co., Canton, Ohio. [*Hardware Specialties*]: We liked HARDWARE from the start, and have no reason to think otherwise now.

"A VALUABLE MEDIUM."

Humber & Co., Westboro, Mass. [*Bicycles*]: From our limited observation we should consider HARDWARE a very valuable medium for advertising intended to reach the Hardware trade. It is interestingly made up, and we think could not fail to attract the readers in that line of business. We can readily understand that it would be a valuable medium for advertising certain lines of cycles and cycle sundries, adapted for sale to Hardware stores.

"CANNOT FAIL TO HELP OUR BUSINESS."

J. C. Tanger & Co., Hanover, Pa.: Please find $1 enlosed for one year's subscription. After examining a specimen copy, we think it one of the best, and that it cannot fail to help us in our business.

"A PROFITABLE MEDIUM TO ADVERTISERS."

Gilbert & Bennett Mfg. Co., Chicago and New York. [*Wire Goods*]: You have reason to be proud of HARDWARE's success both as a journal of interest and of usefulness to your readers, and as a profitable medium to the numerous advertisers. From the fact that our card has been steadily published in its columns from the first number, it must be concluded that we have found you a satisfactory medium.
